# IN THE CIRCUIT COURT OF THE SIXTH JUDICIAL CIRCUIT IN AND FOR PASCO COUNTY, STATE OF FLORIDA CRIMINAL FELONY DIVISION

STATE OF FLORIDA, Plaintiff,

Case No.: CRC-1400216FAES

V.

Division: 1

CURTIS J. REEVES, Defendant.

DEFENDANT'S RESPONSE TO STATE'S DAUBERT MOTION TO EXCLUDE THE TESTIMONY OF DEFENSE EXPERT DR. PHILIP HAYDEN, PH.D.

COMES NOW, the Defendant, CURTIS J. REEVES, by and through his undersigned counsel, submits the following response to State's *Daubert* Motion to Exclude the Testimony of Defense Expert Dr. Philip Hayden, Ph.D., ("State's Motion") and as good cause would show:

Dr. Hayden's testimony is relevant, reliable, sufficiently tied to the facts of the case, and helpful to the jury and is therefore admissible. *See Daubert v. Merrell Dow Pharmaceuticals, Inc.*, 509 U.S. 579 (1993). Dr. Hayden's testimony is critical for the jury, in its duty to weigh the evidence, in order to understand the circumstances that led the Defendant to invoke his statutory right to self-defense and apply the justifiable use of deadly force to avoid the imminent threat of great bodily harm or death that was perpetrated upon him. Dr. Hayden's testimony is crucial to

the Defendant's case and his Constitutional right to a receive a fair trial. U.S. Const. Amend. VI., Fla. Const. Art. 1 Sect. 22.

#### JUSTIFIABLE USE OF DEADLY FORCE—EXPERT TESTIMONY

In the United States, it is universally understood that all persons have the right to protect themselves against an imminent threat of great bodily harm or death. In Florida, this right is codified in Florida Statutes §776.012(2) and §782.02.

#### Fla. Stat. 776.012(2)

Use or threatened use of force in defense of person—A person is justified in using or threatening to use deadly force if he or she reasonably believes that using or threatening to use such force is necessary to prevent imminent death or great bodily harm to himself or herself or another or to prevent the imminent commission of a forcible felony. A person who uses or threatens to use deadly force in accordance with this subsection does not have a duty to retreat and has the right to stand his or her ground if the person using or threatening to use the deadly force is not engaged in a criminal activity and is in a place where he or she has a right to be. (emphasis added)

#### Fla. Stat. 782.02

Justifiable use of deadly force—The use of deadly force is justifiable when a person is resisting any attempt to murder such person or to commit any felony upon him or her or upon or in any dwelling house in which such person shall be. (emphasis added)

The use of force statutes clearly authorizes a person to use deadly force to prevent imminent death or great bodily harm from ever happening. The Florida Legislature did not intend that a person wait to be harmed before acting in his or her own defense. Specifically, the clear language of Fla. Stat. 782.02 legally authorizes

a person to use deadly force in order to prevent any felony from being perpetrated against him or her.

Several factors are taken into consideration when analyzing whether a person has acted reasonably in his or her belief that deadly force was necessary. Courts will look at who was the initial aggressor, *See Craven v. State*, 285 So.3d 365 (Fla. 1st DCA 2019), *see also D.M.L. v. State*, 773 So.2d 1216 (Fla. 3d DCA 2000) (distinguished on other grounds by *K.S.H. v. State*, 56 So.3d 122 (Fla. 3d DCA 2011), whether there were overt acts which reasonably indicated a need for a defendant to take action, see *Wilson v. State*, 971 So.2d 963 (Fla. 4th DCA 2008) and state of mind of the defendant. *Robbins v. State*, 891 So.2d 1102,1108 (Fla. 5th DCA 2004) (reversible error for due process denial of expert witness to opine on defendant's state of mind; "perception and state of mind at the time he shot the victim are the foundation of his theory of self-defense") (distinguished on other grounds by *Diaz v. State*, 958 So.2d 377 (Fla. 3d DCA 2007)).

For the jury to determine the reasonableness element of the Defendant's use of force to prevent the commission of a felony upon his person, the jury must understand what was reasonable to a person "situated as [the Defendant] was and knowing what he knew." See Toledo v. State, 452 So.2d 661, 662-63 (Fla. 3d DCA 1984) quoting People v. Moody, 62 Cal.App.2d 18 (1943). Dr. Hayden will explain that as a trained law enforcement officer, the Defendant was extensively trained in

the cues of predictability and indicators of threat of harm or death. It is unjust and contrary to law for the jury to disregard or not have information that the Defendant was trained in the use of force. To not allow expert testimony regarding Defendant's training as it goes to his state of mind when assessing a threat would be patently unfair and a denial of Due Process. *See Robbins* 891 So.2d at 1104.

Expert testimony is routinely employed in the legal system where a determination turns on understanding an issue or fact outside the realm of understanding of the average juror. As the State pointed out, the Federal Rules of Evidence and interpretations provide persuasive authority for interpreting the counterpart provisions of the Florida Evidence Code. See State's Motion at 26. *Citing Sikes v. Seaboard Coast Line R. Co.*, 429 So.2d 1216, 1221 (Fla. 1st DCA 1983).

Federal courts have upheld expert testimony on the use of force. The Eleventh Circuit Court of Appeals held no error of expert testimony that included the witness's opinion that a person in a hypothetical question reacted reasonably and in line with the prevailing standards of law enforcement. *See Samples v. U.S*, 916 F.2d 1548, 1551 (11th Cir. 1990) The Fourth Circuit Court of Appeals ruled it was abuse of discretion not to allow expert testimony in a use of force case and stated that the proper determination is whether the testimony will assist the jury:

"The facts of every case will determine whether expert testimony would assist the jury. Where force is reduced to its most primitive form—the

bare hands—expert testimony might not be helpful. Add handcuffs, a gun, a slapjack, mace, or some other tool, and the jury may start to ask itself: what is mace? **what is an officer's training on using a gun?** how much damage can a slapjack do? Answering these questions may often be assisted by expert testimony." (emphasis added)

Kopf v. Skyrm, 993 F.2d 374, 378-79 (4th Cir. 1993).

In an excessive use of force case, the United States District Court for the Northern District of Illinois answered the "more difficult question [of] whether the defense experts in this case ought to be allowed to testify that a defendant acted 'reasonably' and 'appropriately'". Richman v. Sheahan, 415 F.Supp. 2d 929, 946 (N.D. Ill. 2006). In determining that the expert's opinions that "the defendant's 'used only that force that was reasonably necessary'" the court held that "his opinion on this ultimate issue is precisely the kind that Rule 704 allows. The opinion that the defendants used reasonable force is not, under the circumstances of this case, an impermissible legal conclusion." Id. at 949. The United States District Court for the Western District of Missouri, similarly held that expert testimony on "unreasonableness" and the conclusion that the action in question was "excessive force" was acceptable and "[did] not constitute an impermissible legal conclusion" and the court denied a motion to strike the testimony. Cothran v. Russell, No. 2:17cv-04012, 2019 WL 913119 (W.D. MO. Feb. 25, 2019).

The United States Court of Appeals for the Seventh Circuit held that the district court did not abuse its discretion in admitting what the appellant called "an

opinion on the ultimate issue of reasonable force." *Cacciola v. McFall*, 561 Fed. Appx. 535 (7th Cir. 2014). "[Appellant] is incorrect. First, '[a]n opinion is not objectionable just because it embraces an ultimate issue' to be decided by the jury. Fed. R. Evid. 704(a)" *Id.* at 538.

Testimony as to the use of force has been upheld on appeal in Florida courts as well. In a second-degree murder case, the Fourth District Court held that testimony from a law enforcement officer was admissible where the witness's testimony specifically regarded his use of force investigation and reasonableness of the amount of force used. Fuentes v. State, 613 So.2d 481 (Fla. 4th DCA 1992) ("The investigating officer's testimony, however, was limited to his investigation and to the reasonableness of the amount of force used during the arrest."). In another case of second-degree murder, the Fifth District Court of Appeal reversed and remanded for a new trial where a defendant was denied an expert to determine his state of mind at the time of the offense, stating that "perception and state of mind at the time [the defendant] shot the victim are the foundation of his theory of self-defense." Robbins, 891 So.2d at 1108. ("[Defendant] never denied that he shot the victim; his entire defense was that he did so out of necessity in order to preserve his own life or to prevent great bodily harm to himself").

The average juror is unfamiliar with the cues and predictability indicators employed in law enforcement use-of-force training nationwide. It is imperative that

the jury hear Dr. Hayden's testimony to understand the Defendant's state of mind and thereby properly assess the reasonableness of his actions in order for the Defendant to receive a fair trial.

#### **EVENTS OF JANUARY 13, 2014**

The Defendant, Curtis Reeves aged seventy-one (71), and his wife, Vivian Reeves aged sixty-seven (67), decided to see a mid-day matinee movie on January 13, 2014. They went to the Cobb Grove 16 cineplex in Wesley Chapel, Pasco County, Florida with the intention of meeting their son, Matthew Reeves. The family had planned to see the film *Lone Survivor*. Mr. Reeves purchased tickets for his wife and himself and the couple then proceeded to the snack counter where Mr. Reeves purchased a bag of popcorn and a beverage.

Mr. and Mrs. Reeves arrived before Matthew. After purchasing snacks and a stop at the restroom, the couple then proceeded to Theater 10. Looking for an unoccupied area that could accommodate the family of three, the couple decided on the last row of the bottom section of the theater. Behind this last row is a wall that serves as the base for the next tier of seats. The couple sat in the middle of this last row, Mr. Reeves seated on the left and Mrs. Reeves at his right. Mr. Reeves quickly sent out a text message to the couple's son to let him know where they were located inside Theater 10.

In the row directly in front of Mr. and Mrs. Reeves sat Chad Oulson and his wife Nicole Oulson. Mr. Oulson was forty-three years old (43), six foot four inches (6'4") tall and weighed over two hundred pounds. Mr. Oulson was much younger than the then seventy-one-year-old (71) Mr. Reeves and was also much taller than Mr. Reeves.

The Oulsons were strangers to Mr. and Mrs. Reeves. They had never met nor spoken before January 13, 2014. Mr. Oulson was in the seat directly in front of Mrs. Reeves and Mrs. Oulson was directly in front of Mr. Reeves.

After Mr. and Mrs. Reeves sat down and Mr. Reeves had texted his son and put his phone away, the lights were dimmed, causing the interior of the theater to become dark. The announcement asking patrons to refrain from using their electronic devices was clearly displayed on the theater screen. Signs asking patrons not to use their phones during the movie were also prominently displayed throughout the theater lobby.

While Mr. Reeves watched the previews, he noticed a light shining in his face. That light was emanating from Mr. Oulson's cell phone. Mr. Reeves then politely asked Mr. Oulson to put his phone away. Mr. Oulson's response to this reasonable request was to begin hurling obscenities at the elderly Mr. Reeves.

Mr. Reeves decided he would inform a theater employee about the aggressive theater patron's furious and erratic response to the request to put away his phone.

Mr. Reeves stood, handed his popcorn to his wife, and proceeded down the row, through the aisle, and exited the theater. Once he reached the service desk, Mr. Reeves patiently waited while another theater patron finished speaking to the attending theater employee. When they were finished speaking, Mr. Reeves calmly and respectfully relayed to the employee the events that had just transpired: the man seated in front of him had loudly berated him with obscenities for his simple request to put his phone away. Mr. Reeves displayed no signs of irritability or anger while speaking to the employee. After informing the employee about the irrationally irate and belligerent patron, Mr. Reeves walked back toward Theater 10. As he walked down the row of the theater, he had to place his hands on the theater chair backs to steady himself and maintain his balance. Mr. Reeves was respectful and polite to the other seated patrons as he passed in front of them.

When he reached the last row, Mr. Reeves could no longer see a light coming from Mr. Oulson's phone. Mr. Reeves took his seat, retrieved his popcorn from his wife, and settling in to watch the film. Immediately after Mr. Reeves returned, Mr. Oulson stood and turned around to face Mr. Reeves. Mr. Oulson loomed over Mr. Reeves and again screamed a barrage of obscenities, including threats to harm the elderly Mr. Reeves. Mr. Oulson had assumed an aggressive posture as the six-foot four-inch-tall (6'4") man leaned over the back of his seat as he aggressively came toward Mr. Reeves. Mr. Reeves remained in his seat and as such had to look up at

Mr. Oulson. Mr. Reeves leaned back in his seat in an effort to distance himself from Mr. Oulson who was screaming in his face.

Mr. Oulson then escalated his already irrational behavior into a violent attack. Mr. Reeves saw the blur of light and immediately felt a blunt object forcefully hit his face. Mr. Reeves was unsure if he was hit in the face with Mr. Oulson's phone or with his fist. Mr. Reeves's glasses were knocked to one side of his face. The elderly Mr. Reeves was instantly stunned by the impact and experienced sharp pain from the blow. Mr. Reeves was instantaneously filled with intense fear at Mr. Oulson's savage and irrational assault. In an attempt to protect himself and distance himself from the threat of further injury, Mr. Reeves pushed himself back in his seat with his arms and his feet as Mr. Oulson continued his barrage of obscenities and threats.

During this time, movie trailers were playing loudly in surround sound. The Defendant's investigation determined that movie trailers for the films Sabotage and Robocop were aired during this time. Sabotage is rated "R" by the Motion Picture Association for, other things, "strong bloody violence". among www.imdb.com/title/tt1742334. A New York Times movie review of Sabotage was titled, "Carnage and Chaos, Heavy on the Gore." Manohla Dargis, The New York Times. Carnage and Chaos, Heavy on the Gore, March 27, 2014, https://www.nytimes.com/2014/03/28/movies/arnold-schwarzenegger-is-back-insabotage.html. *Robocop* earned a "PG-13" rating for, among other things, "intense sequences of action including frenetic gun violence throughout." Filmratings.com, https://www.filmratings.com/Search?filmTitle=robocop&x=0&y=0 (last visited August 25, 2020). Mr. Oulson's tirade of obscenities and threats could be heard by theater patrons over these movie trailers.

The theater was dark with the only light coming from the movie screen. Mr. Reeves had no way to retreat as there was a retainer style wall directly behind his seat and to get up would necessarily mean coming closer to his attacker.

Mr. Reeves could not and did not understand why the taller, younger Mr. Oulson was verbally and physically attacking him in an explosive manner. Mr. Reeves, who was seventy-one at the time, had attended movie theater shows since his youth in the 1940's and had never encountered someone who acted so erratically and violently towards anyone in what is typically a peaceful setting. Mr. Oulson was out of control. This experience was terrifying and nonsensical that a complete stranger would attack an elderly man both verbally and physically over the request to put away a phone.

Over the next few seconds, Mr. Oulson continued his attack on Mr. Reeves, and continued to lean over his seat. Mr. Reeves could see that Mrs. Oulson was struggling to restrain her husband, to no avail, as Mr. Oulson continued to advance on the elderly Mr. Reeves. Mr. Reeves perceived Mr. Oulson's arm extend into Mr.

Reeves's space. Certain that he was about to be physically attacked again and fearing the irrationally escalating situation would result in serious bodily injury or even death, Mr. Reeves's training kicked in and he swiftly retrieved his legal firearm from his right front pants pocket. He fired a single shot.

That single shot penetrated Mr. Oulson's chest and he died instantly. Before entering Mr. Oulson's chest, however, the bullet first grazed Mr. Oulson's wrist then hit Mrs. Oulson's finger as she likely still had her hand on Mr. Oulson's chest in her attempt to hold her uncontrollable husband back. The medical examiner later concluded that Mr. Oulson's hand was in front of his thorax (chest) at the time it was grazed. The back of Mr. Oulson's hand had stippling on it, which indicated it was close to the barrel of the gun when it was fired. This is consistent with Mr. Reeves account that Mr. Oulson was reaching out towards him in what Mr. Reeves reasonably perceived as an imminent threat of great bodily harm or death in the form of Mr. Oulson's fist coming toward him.

## **APPLICABLE LAW**

In Florida, the "[e]xclusion of witness testimony...is a **drastic remedy that should be invoked only under the most compelling circumstances**." *Rojas v. Rodriguez*, 185 So.3d 710, 711 (Fla. 3d DCA 2016) (emphasis added) citing *Clair v. Perry*, 66 So.3d 1078, 1080 (Fla. 4th DCA 2011), *see also In re Amends. to Fla. Evidence Code*, 210 So. 3d 1231, 1242-43 (Fla. 2017) ("[a] review of the caselaw

after *Daubert* shows that the **rejection of expert testimony is the exception rather the rule**.") (Polston, J. concurring in part and dissenting in part) (citing Fed. Rule 702 Advisory Committee Notes, 2000 Amendments) (superseded by Rule in *In re Amendments to Florida Evidence Code*, 278 So.3d 551 (Fla. 2019)). As such, the gatekeeping function of the court "is not intended to serve as a replacement for the adversary system: 'vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *United States v. 14.38 Acres of Land, More or Less Sit. In Leflore County, Miss.*, 80 F.3d 1074, 1078 (5th Cir. 1996) (quoting *Daubert v. Merrell Dow Pharm.*, Inc., 509 U.S. 579, 596 (1993)). Therefore, even in situations with questionably admissible evidence, the court is not to extend its role as gatekeeper and usurp the trial process.

In 2019, the Florida Supreme Court adopted the *Daubert* standard to govern the admissibility of expert testimony, thereby amending Florida Rules of Evidence §90.402 (testimony by experts) and §90.704 (basis of opinion testimony by experts). *In re: Amendments to the Florida Evidence Code*, 278 So.3d 551 (Fla. 2019), *see also Daubert*, 509 U.S. 579. The Court in *Daubert* overruled the use of the "generally accepted" (*Frye*) standard for admitting expert scientific testimony in a federal trial. *Daubert* at 579. The Court reasoned that the former antiquated standard was too strict and "a rigid 'general acceptance' requirement would be at odds with

the 'liberal thrust' of the Federal Rules and their 'general approach of relaxing the traditional barriers to 'opinion' testimony." *Id* at 588. The amended Florida Rules of Evidence read as follows:

## Florida Rule of Evidence 90.702

Testimony by experts—If scientific, technical, or other specialized knowledge will assist the trier of fact in understanding the evidence or in determining a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education may testify about it in the form of an opinion or otherwise, if:

- 1. The testimony is based upon sufficient facts or data;
- 2. The testimony is the product of reliable principles and methods; and
- 3. The witness has applied the principles and methods reliably to the facts of the case.

#### Florida Rule of Evidence 90.704

Basis of opinion testimony by experts—The facts or data upon which an expert bases an opinion or inference may be those perceived by, or made known to, the expert at or before trial. If the facts or data are of a type reasonably relied upon by experts in the subject to support the opinion expressed, the facts or data need not be admissible in evidence. Facts or data that are otherwise inadmissible may not be disclosed to the jury by the proponent of the opinion or inference unless the court determines that their probative value in assisting the jury to evaluate the expert's opinion substantially outweighs their prejudicial effect.

The preliminary inquiries into expert testimony begin with the witness and the subject matter. Rule "[90.702] requires the court to make two preliminary determinations: (1) whether the subject matter will assist the trier of fact in understanding the evidence or in determining a disputed fact[] and (2) whether the

witness is adequately qualified to express an opinion on the matter." *State Farm Mut. Auto. Ins. v. Bowling*, 81 So.3d 538 (Fla. 2d DCA 2012) *quoting Chavez v. State*, 12 So.3d 199, 205 (Fla. 2009). An expert witness must be "qualified as an expert by knowledge, skill, experience, training, or education" in order to testify and if not met, the inquiry would necessarily stop there. *See* Fla. R. Evid. 90.702. A witness need not be certified in their respective field of expertise. *Anderson v. State*, 220 So. 3d 1133, 1143 (Fla. 2017). Nor is an expert required to be licensed, if applicable, in their respective field. *Vega v. State Farm Mut. Auto.*, 45 So.3d 43, 44 (Fla. 5th DCA 2010).

The Court in *Daubert* made clear that the primary objective of the court in its gatekeeping function regarding expert testimony is to ensure that admitted evidence is "not only relevant but reliable." *Daubert*, at 589. Assisting the trier of fact in understanding the evidence or in determining a fact in issue "goes primarily to relevance." *Id.* at 590. This concept of "helpfulness" in the relevancy inquiry includes determining that evidence is "sufficiently tied to the facts of the case." *Id.* at 591, quoting *United States v. Downing*, 753 F.2d 1224, 1242 (3d Cir. 1985). In other words, the consideration is one of "fit" and "connection." *Id.* at 591-92.

The inquiry into reliability necessarily "entails a preliminary assessment" of whether the reasoning or methodology behind the testimony is valid and of whether it can be properly applied to the facts in issue. *Daubert*. at 592-93. The Court gave

some general guidelines but stopped short of establishing any bright-line rules regarding this determination. *Id* at 593. The factors, as delineated by the Fourth District Court of Appeal are as follows: 1) Whether the theory can be or has been tested; 2) Whether the theory or technique has been subjected to peer review and publication; 3) The known or potential rate of error of a particular scientific technique, as well as the existence of standards controlling the technique's operation; 4) General acceptance in the scientific community *Kemp v. State*, 280 So.3d 81, 89 (Fla. 4th DCA 2019). The Court specifically stated that these factors are not requirements but rather "general observations." *Daubert*. at 593, *See also Kemp*, at 89. The Court also noted that the inquiry is a "flexible one" and is to be focused "solely on principles and methodology, not on the conclusions that they generate." *Id*, at 594-95.

Four years after *Daubert*, the issue of expert testimony reliability was before the Court in *Gen. Elec. Co. v. Joiner*. 522 U.S. 136 (1997). The Court, in applying an abuse of discretion standard, held that the District Court did not err in excluding the testimony of experts whose opinions regarding causation of cancer relied on animal studies that "were so dissimilar to the facts presented" to the court. *Id.* at 144. The Court further explained: "...[W]hether animal studies can ever be the foundation for an expert's opinion was not the issue. The issue was whether *these* experts' opinions were sufficiently supported by the animal studies on which they purported

to rely." *Id.* This determination was made on the grounds that "no study demonstrated that adult mice developed cancer after being exposed to PCB's. One of the experts admitted that no study had demonstrated that PCB's led to cancer in any other species." *Id.* at 144.

A little over a year later, *Daubert* and its application were again before the Court. The Court held that *Daubert* applied not just to the reliability of scientific evidence, but to *all* expert testimony. *Kumho Tire Co., Ltd. V. Carmichael*, 526 U.S. 137, 147 (1999). "The language [of Rule 702] makes no relevant distinction between "scientific" knowledge and "technical" or "other specialized" knowledge. It makes clear that any such knowledge might become the subject of expert testimony." *Id*.

#### MR. REEVE'S LAW ENFORCEMENT TRAINING AND KNOWLEDGE

During Mr. Reeve's twenty-seven years of service with the Tampa Police Department, he learned of and became fluent with the principles of officer safety and survival and the use of force. He was first introduced to these principles and protocols in the 1960's, when he attended the police academy. While there, he received hundreds of hours of instruction and hands-on training in a wide range of topics including threat assessment, officer safety and survival, and the use of force. Later, Mr. Reeve's began pursuing and attending specialized law enforcement training exercises and seminars across the country. Many of these seminars and training programs were operated by governmental agencies such as the United States

Army, Federal Bureau of Investigation ("FBI"), and the Florida Department of Law Enforcement. He also conducted research and independently studied law enforcement-related issues. These training programs and his independent studies enabled Mr. Reeves to both improve his ability to serve as a law enforcement officer and to bring home the information and training he learned to his fellow officers at the Tampa Police Department.

Mr. Reeves was a founding member of the Tampa Police Department's tactical response team ("TRT/SWAT team"). The TRT/SWAT team focused on recognizing imminent danger and responding appropriately while implementing the use of force protocols. The Defendant attended countless hours of specialized training courses in his development of the TRT/SWAT team, many of which specifically dealt with the skills necessary to recognize imminent danger of death or serious bodily injury in the line of duty and on the use of necessary force and officer survival. The Defendant learned to recognize factors that could impact a tactical response, such as lighting and noise conditions, physical abilities, facial expressions and body language, proximity, and reaction time. He served as co-commander of the TRT/SWAT team from 1976 to the early 1980's, and then served as sole Commander until 1991. In implementing and supervising the TRT/SWAT team, the Defendant devoted himself to learning about issues relevant to tactical responses by attending specialized law

enforcement training opportunities across the country as well as pursuing self-study in related fields.

Over his career, Mr. Reeves taught a broad range of subjects, but among the most important were those pertaining to officer safety and survival. These classes and training exercises related to identifying signs of danger, proper tactical responses, and close quarters physical confrontations. The officer safety and survival courses that Mr. Reeves taught highlighted the fact that violent suspects frequently use "personal weapons" against the officers: hands, feet, their head, or other body parts. By 1976, when Mr. Reeves assumed command of the TRT/SWAT team and was teaching at the police academy, he had personally investigated hundreds of violent crimes that were committed with "personal weapons." The injuries that he personally observed included a wide range of what one human being can do to another with their hands, fists, feet and other body parts, including, broken noses, black eyes, retinal detachments, contusions, orbital fractures, groin injuries appendage fractures, internal bleeding, concussions, and even death.

From 1983 to 1993, Mr. Reeves was extremely familiar with and personally trained in the procedures of use of force that were employed by law enforcement agencies across the country. After his retirement from the Tampa Police Department, Mr. Reeves went to work at Busch Gardens Tampa Bay theme park where he was hired as the Director of Security. He employed the same principles from his law

enforcement background and continued his studies concerning safety, implementing them in the area of public relations and theme park management.

## Dr. Hayden is Qualified to Testify as an Expert Witness

Dr. Hayden is qualified to testify as an expert witness in the use of force. It is the proponent's burden to elicit the background that qualifies the expert. *See GIW Southern Valve Co. v. Smith*, 471 So.2d 81, 83 (Fla. 2d DCA 1985), *see also Crump v. State*, 622 So.2d 963, 968 (Fla. 1993) (distinguished on other grounds by *Smithers v. State*, 826 So.2d 916 (Fla. 2002)).

Dr. Hayden holds the following opinions and is prepared to testify to:

- 1) The "Officer Safety/Survival" and "Use of Force" principles and protocols taught to federal, state, county, and municipal law enforcement officer attendees of the FBI Academy and the Law Enforcement Training for Safety and Survival Program ("Safety and Survival Program") from 1983 to 1993; and
- 2) The "Officer Safety/Survival" and "Use of Force" principles and protocols were utilized and employed by law enforcement agencies throughout the United States from 1983 to 1993; and
- 3) Given the totality of the circumstances at the time of the January 13,2014 shooting, a law enforcement officer situated in Mr. Reeves' shoes,

knowing what he knew, would have been justified in using deadly force against Chad Oulsen.

According to Dr. Hayden's curriculum vitae, attached to this Motion as Exhibit A, he has been testifying and consulting in the field of Force Science as an expert witness since 1999. Exhibit A at pg. 1. In the past twenty years, Dr. Hayden has been qualified to testify as an expert witness in the following jurisdictions:

"I have served as a consultant and expert witness on cases with the following: United States Attorney's Office in New York City and the Western District of New York, New York; District of New Jersey; Washington D.C.; El Paso, Texas; Portland, Oregon; Alexandria, Virginia; and Eastern District of Pennsylvania; State, County and City Attorneys' Offices for the cities of Lafayette, Louisiana; Miami - Dade, & Sarasota, Florida; Wilmington, Delaware; and County Attorney's Office for Prince Georges County, Maryland; City Attorney's Office for Trumbull, Connecticut and Defense and Plaintiff Attorneys in Richmond, Virginia; Washington D.C.; Baltimore, Maryland; Las Vegas, Nevada; Denver, Colorado; Kansas City, Kansas; Pasadena, Texas; Birmingham, Alabama; and the Swedish Defense Ministry in Stockholm, Sweden."

#### See Exhibit A at 1.

Dr. Hayden began his law enforcement career in 1973 as a Special Agent with the FBI. For the next ten years, then-Special Agent Hayden investigated and conducted arrests in violent crime, organized crime, and foreign counterintelligence cases. He personally participated in several hundred arrests of both violent and non-violent criminals.

Both before and after becoming a Special Agent with the FBI, Dr. Hayden underwent extensive training on issues pertaining to officer safety and survival, tactical concepts for law enforcement officers, defensive tactics, and other related issues. He personally employed the principles of officer safety and survival and use of force that he testifies about.

In 1983, Dr. Hayden was both promoted to Supervisory Special Agent with the FBI and transferred to the FBI academy where he dedicated the next sixteen years to both researching and teaching the principles of officer safety and survival and use of force to other FBI agents and officers. During this time, Dr. Hayden was involved in the training of approximately 6,000 federal, state, and local law enforcement officers. As a testament of his stature, experience, and knowledge in the field of law enforcement training, Dr. Hayden was appointed to co-found and co-create the Safety and Survival program for the FBI. Although Dr. Hayden eventually retired in 1999, law enforcement officers around the country continue to enroll and participate in the FBI's Safety and Survival Program to train to protect themselves and others from violent individuals.

During his time with the FBI, Dr. Hayden was also a member of the Shooting Review Board for approximately seven years. The Board investigates every firearm discharge that an FBI agent is involved in, whether it involves shooting a person or an accidental discharge. The Review Board analyzes the situation and generates a report giving an opinion of whether or not the shooting was justified.

At both the FBI Academy and in the FBI Safety and Survival Program, Dr. Hayden instructed law enforcement officers on the circumstances surrounding situations where force must be used in order to protect oneself and others from great bodily harm or death. He taught trainees the factors an officer must consider and take into account in assessing the danger that a suspect poses. These factors included, but were not limited to: the distance between the officer and the suspect; the perceived behavior of the suspect such as the observed commission of prior acts of violence, tone of voice, words uttered, inflection and pitch, physical gestures and body posture, indications of intoxication and/or impairment, and other non-verbal factors; physical features of the suspect, such as age, height, weight; relative physical features of the officer in comparison to the suspect; environmental conditions, such as lighting, noise level, location, and terrain, as well as other factors.

Officers in the program were warned and instructed to always be alert when a suspect is engaging in aggressive and menacing behavior and to respond accordingly. Paying attention and responding properly and promptly meant the difference between life and death for a law enforcement officer.

The FBI Academy and Safety and Survival Program attendees were also instructed that the actual commitment either to use or not use deadly force should be

but not limited to, the limitation and extent of the officer's powers, the risks involved, and the existence of possible alternatives to use of force. Only if an officer can maintain his/her safety and protection should the officer pursue a non-physical response. The training curriculum made at both the FBI Academy and Safety and Survival Program made clear to all attendees, however, that officer safety was paramount. If a suspect becomes violent, the officer's response must be rapid, swift, and sufficient to disable the aggressive individual. Otherwise, the violent suspect may inflict great bodily harm or death upon the officer or another person.

In addition to Dr. Hayden's creation of the Safety and Survival Program, he served as an instructor on SWAT team programs at the FBI Academy and commanded an FBI SWAT team. He developed the curricula for the New Agent Program and later became the Program Manager, which entailed training of over 1,500 new agents on matters that involved officer survival/safety, arrest, investigations, and other topics.

Dr. Hayden: knows the procedures used by the FBI and other non-federal law enforcement agencies respecting use of force from 1983 to 1993, knows that those procedures were acceptable in the field and actually used by agencies throughout the United States, and had extensive personal experience using those procedures both as a Special Agent in the field and as a Supervisory Special Agent at the FBI Academy.

His vast knowledge and experience regarding these matters makes him qualified to opine as to when, and under what circumstances a law enforcement officer's use of deadly force is appropriate. See Fla. R. Evid. 90.702 (... "a witness qualified as an expert by knowledge, skill, experience, training, or education") *See also Chavez*, 12 So.3d at 205-06. ("The witness must possess specialized knowledge concerning the discrete subject related to the expert opinion to be presented.")

# Dr. Hayden's Testimony Is Relevant and Helpful to the Jury

Expert testimony is admissible under 90.702 only where the testimony will "assist the trier of fact in understanding the evidence or in determining a fact in issue." *Bowling*, 81 So.3d at 540. *See also Boyer v. State*, 825 So.2d 418, 419 (Fla. 1st DCA 2002) (Abuse of discretion to exclude expert testimony regarding the false confession phenomenon on basis that it would not assist the jury in understanding any facts at issue). The Defendant has asserted an affirmative defense of self-defense under Florida Statute §776.012 and §782.02. Florida standard jury instruction 3.6(f) provides in part:

## 3.6(f) JUSTIFIABLE USE OF DEADLY FORCE

The use of deadly force is justifiable if the defendant reasonably believed that the force was necessary to prevent imminent death or great bodily harm to [himself] [herself] while resisting:

1. another's attempt to murder [him] [her], or

- 2. any attempt to commit (applicable felony) upon [him] [her], or
- 3. any attempt to commit (applicable felony) upon or in any dwelling occupied by [him] [her].

The jury, therefore, must determine whether the Defendant's actions were reasonable considering all the circumstances. The Defendant is a veteran of Tampa Police Department with extensive training in use of force procedures and direct application of force through hands-on training. To understand whether the Defendant acted reasonably, the jury must necessarily understand what a trained law enforcement officer in the Defendant's situation would reasonably do under the circumstances. *See Graham v. Connor*, 490 U.S. 386, 396-97 (1989) ("The 'reasonableness' of a particular use of force must be judged from the perspective of a reasonable officer on the scene... The calculus of reasonableness must embody allowance for the fact that police officers are often forced to make split-second judgments—in circumstances that are tense, uncertain, and rapidly evolving—about the amount of force that is necessary in a particular situation").

In *Mobley v. State*, 132 So.3d 1160, 1164-65 (Fla. 3d DCA 2014) (distinguished on other grounds by *Viera v. State*, 163 So.3d 602 (Fla. 3d DCA 2015)), the Third District Court of Appeal stated:

"An objective standard is applied to determine whether the immunity provided by these provisions attaches. *See Montanez v. State*, 24 So.3d 799, 803 (Fla. 2d DCA 2010) (confirming that in determining whether

the immunity accorded by section 776.032 attaches, "the objective, reasonable person standard by which claims of justifiable use of deadly force are measured" should be applied). That standard requires the court to determine whether, based on circumstances as they appeared to the defendant when he or she acted, a reasonable and prudent person situated in the same circumstances and knowing what the defendant knew would have used the same force as did the defendant. See Toledo v. State, 452 So.2d 661, 663 (Fla. 3d DCA 1984) ("[A] person in the exercise of his right of self-defense may use 'only such force as a reasonable person, situated as he was and knowing what he knew, would have used under like circumstances." (quoting People v. Moody,62 Cal.App.2d 18, 143 P.2d 978, 980 (1943))); see also Chaffin v. State, 121 So.3d 608 (Fla. 4th DCA 2013)(confirming that the standard to be applied for determining whether a person is justified in using deadly force in self-defense is not a subjective standard as to the defendant's state of mind, but an objective standard as to a reasonably prudent person's state of mind); Price v. Gray's Guard Service, Inc., 298 So.2d 461, 464 (Fla. 1st DCA 1974) ("The conduct of a person acting in self-defense is measured by an objective standard, but the standard must be applied to the facts and circumstances as they appeared at the time of the altercation to the one acting in self-defense.") (emphasis added).

In order for the jury to know what the defendant knew and to understand what a "person situated in the same circumstances" would have done, they absolutely must be educated on the Defendant's background and training in threat perceptions and reaction. Without such education, the jury has no way to properly apply the reasonableness standard to the facts and circumstances as they appeared to *this Defendant* acting in self-defense. That necessarily makes Dr. Hayden's testimony

both relevant and helpful to the jury. There is nothing in Dr. Hayden's testimony that is misleading or confusing.

The State cites several cases purportedly in support of its assertion that Dr. Hayden's testimony and opinions are based on facts that are of such a nature as not to require any special knowledge or experiences in order for the jury to form its conclusions. However, the State fails to apply the facts from those cases to this case. In Salomon v. State, 267 So.3d 25 (Fla. 4th DCA 2019). the court points out that "[t]he witnesses to the shooting and the events leading up to it were all civilians." Law enforcement did not become involved until after the shooting occurred." Id. at 28. This is important to the analysis of whether the Dr. Hayden's testimony will assist the jury as the very reason his testimony is necessary is because the Defendant was a trained law enforcement officer. In Salomon, the facts of the case are that it involved only civilians in a familial domestic violence situation that was not outside the common understanding of the average juror. This case, on the other hand, involves the Defendant who is a trained and experienced former law enforcement officer, and it is this very issue that separates him from the average juror and which necessitates Dr. Hayden's expert testimony.

The State also cites *Frances v. State*, 970 So.2d 806 (Fla. 2007) (distinguished on other grounds by *Scott v. State*, 66 So.3d 923 (Fla. 2011)). In *Frances*, the trial court was held not to have erred in excluding mental health expert testimony

regarding the fact that Frances had "street smarts." *Id.* This is exactly the type of testimony that courts have indicated does not require an expert and is within the common understanding of the jury. This reasoning does not apply to facts before this court where the average juror is not aware of the extensive reactionary training received by law enforcement as directly applied to threatening situations such as that experienced by the Defendant on January 13, 2014.

In *County of Volusia v. Kemp*, 764 So.2d 770, 773-74 (Fla. 5th DCA 2000), the Fifth District Court of Appeal held, in pertinent part, in a §1983 malicious prosecution case that, "the expert was allowed to inject his own interpretation of the reports, depositions, and trial testimony of the defendants in the criminal trial and based his ultimate opinion on those findings. This testimony did not assist the jury in deciding the issues in the case because the jury was fully capable of determining for itself what the reports meant and whether there were discrepancies between the reports and between the reports and the testimony presented during the criminal trial." The jurors here will not be tasked with side by side comparison of reports and testimony from one case to the present case and thus *Kemp* does not stand for the proposition that Dr. Hayden's testimony will not assist the jury.

The State also cites to *Mills v. Redwing Carriers, Inc.*, 127 So.2d 453 (Fla. 2d DCA 1961). In *Mills*, the trial court erred in allowing an "expert" witness to testify to the point of impact where that witness was deemed not to have been qualified and

point of impact was a determination that the jury could readily determine on its own, being an occurrence that is within the common understanding of the average person. What the average juror does not know or understand without being educated is the Defendant's background as a trained law enforcement officer.

Not cited in the State's Motion but helpful to this Court to consider whether Dr. Hayden's testimony is helpful to the jury and not something that the average juror would understand is a recent ruling from the Fifth District Court of Appeal wherein the court held that expert testimony regarding human trafficking and sex work subculture was admissible in a criminal case to "assist the trier of fact". *Poole v. State*, 284 So.3d 604 (Fla. 5th DCA 2019). The court stated:

"[We] hold that expert opinion on human trafficking and the sex worker subculture can assist the trier of fact on subjects not within an ordinary juror's understanding or experience. See United States v. Evans, 272 F.3d 1069, 1094 (8th Cir. 2001) (finding no abuse of discretion in allowing an officer to present expert testimony "regarding the operation of a prostitution ring, including [the] recruitment of prostitutes and the relationship between pimps and prostitutes, and regarding jargon used in such rings"); see also United States v. Lewis, 762 F. App'x 786, 797 (11th Cir. 2019); United States v. Brinson, 772 F.3d 1314, 1319 (10th Cir. 2014); United States v. Anderson, 560 F.3d 275, 281–82 (5th Cir. 2009); United States v. Taylor, 239 F.3d 994, 998 (9th Cir. 2001). Not only are jurors generally unfamiliar with the realities of human trafficking, see Taylor, 239 F.3d at 998, but a juror's only exposure to this subject may be confined to brief references gleaned from popular media outlets or fictionalized accounts. See Danica Baird, Changing the Narrative: Sex Trafficking and Its Victims, 33 BYU J. Pub. L. 321, 343, 353 (2019). This only

underscores the importance of expert testimony to aid the juror in understanding the complexities surrounding human trafficking and the sex worker subculture in today's society." (emphasis added)

*Id.* at 607. Jurors here will similarly not be familiar with the realities of the knowledge and survival training associated with being a former law enforcement officer. So too are juror's limited experiences confined to what they see on fictional television shows and movies, thereby "underscor[ing] the importance of expert testimony to aid the juror in understanding" the Defendant's situation. *Id.* 

The State has failed to show this court how and why Dr. Hayden's testimony is not relevant, not helpful, or otherwise of a subject that is within the common experience of the average juror.

## Dr. Hayden's Testimony Does Not Invade the Province of the Jury

Florida Statute 90.703 deals with opinions on the ultimate issue. It states as follows:

### Florida Rule of Evidence 90.703

Opinion on Ultimate Issue —Testimony in the form of an opinion or inference otherwise admissible is not objectionable because it includes an ultimate issue to be decided by the trier of fact.

In other words, an opinion is not inadmissible just because it includes an ultimate issue that is to be decided by the trier of fact. Florida Statute 90.703 applies to expert as well as lay witness opinion. *Fino v. Nodine*, 646 So.2d 746, 749 (Fla. 4th DCA 1994).

Inadmissible ultimate opinions are those opinions that tell the jury how to decide a case. *Id*. The jury here will be tasked with deciding the Defendant's guilt or innocence. In making that decision, the jury must make a determination as to the element of reasonableness. Dr. Hayden's testimony will assist the jury in determining the reasonableness element for this specific Defendant in these circumstances to be applied to the ultimate determination of guilt or innocence. What Dr. Hayen's testimony does not do is tell the jury how to decide the case.

"Whether the testimony of the expert is a *permissible factual conclusion* or the impermissible application of a legal standard or definition to a set of facts is sometimes a fine distinction involving a large measure of discretion in the trial judge." Ehrhardt, *Florida Evidence* (2019) at 902. It is crucial to understand this distinction. Reasonableness of the Defendant's actions is not a legal conclusion but rather an issue of fact as to be determined by the jury through the application of the specific facts of this case.

The State cites to *Mootry v. Bethune—Cookman University, Inc.*, 186 So.3d 15, 21 (Fla. 5th DCA 2016). In *Mootry*, the court determined that the expert witness was erroneously allowed to tell the jury how to decide the case by stating that the two issues to be determined should be decided adversely to the Plaintiff. *Id. Mootry* can be distinguished from this case in that Dr. Hayden's testimony does not tell the jury how to decide the case, i.e., guilt or innocence as that is the ultimate

determination the jury will be called upon to decide. Dr. Hayden's testimony merely assists the jury in determining one element; reasonableness. He does this by bringing necessary background information regarding indicators of imminent threat of harm or death that relates to the state of mind of this particular Defendant.

In Fuentes v. Sandel, Inc., 189 So.3d 928 (Fla. 3d DCA 2016), the court held that an architect's affidavit was properly excluded wherein he stated that a party was "liable under the South Florida Building Code." Id. at 943-35. See also Kayfetz v. A.M. Best Roofing, Inc., 832 So.2d 784 (Fla. 3d DCA 2002). As liability was the only issued to be determined, the witness's affidavit would have directly told the jury how to decide the caw. Fuentes, at 935. That would be akin to Dr. Hayden telling the jury that Defendant was not guilty. Counsel has never elicited and Dr. Hayden has never testified as to the Defendant's guilt or innocence as it would be a legal conclusion that is exclusively for the jury to decide. Dr. Hayden's testimony is limited to educating the jury as to the type of training Defendant received in order to apply that information to the Defendant's situation. The jury is tasked with determining the reasonableness of the Defendant's actions according to a reasonable person situated in the same circumstances and knowing what the defendant knew and whether that person would have used the same force as the defendant did. Toledo, 452 So.2d at 662-63. Compare Estate of Murray ex rel. Murray v. Delta Health Group, Inc., 30 So.3d 576, 578-79 (Fla. 2d DCA 2010) (In wrongful death action against nursing home, error to permit decedent's treating physician to express opinion that defendant was negligent. "Delta could have offered Dr. Desai's opinion that the nursing home did not breach the standard of care but not his opinion that the nursing home was not negligent.") with Government Employees Ins. Co. v. Grounds, 311 So.2d 164 (Fla. 1st DCA 1975) (No error to admit testimony of expert attorneys regarding standard of care in bad faith suit against carrier). A reasonableness determination in light of the situation of the Defendant's unique experiences is no different than opining on breach of the standard of care in a civil suit.

This is the very distinction, contemplated inversely in *Town of Palm Beach v*.

Palm Beach County, 460 So.2d 879, 882 (Fla. 1984) that is cited to in State's Motion but not analyzed. State's Motion at 39. The Florida Supreme Court in *Town of Palm Beach* stated:

"Although the expert may testify to whether certain benefits were received by the municipality, and may, within his expertise, testify to the importance of potential or unquantified benefits, he is precluded from opining whether a particular benefit is or is not "real and substantial" within the meaning of Briley, Wild. An illustration of this principle is found in Gifford v. Galaxie Homes, Inc., 223 So.2d 108, 111 (Fla. 2d DCA 1969). In Gifford, an action for negligent construction, it was held proper for the duly qualified expert to respond when asked whether the premises were "constructed and maintained according reasonably safe construction and engineering to standards." Id. See also, Millar v. Tropical Gables Corp., 99 So.2d 589 (Fla. 3d DCA 1958). However, it would have been improper for the expert to assert to the trier of fact that the premises were "negligently constructed." While this is to some degree a matter of semantics, we

find the distinction necessary. See Ehrhardt on Evidence, § 90.703 at 451 (West 1977). Otherwise, the trier of fact is being directed to arrive at a conclusion which it should be free to determine independently from the facts presented. We do not think that section 90.703 was intended to be so broad. See e.g., Ehrhardt, § 90.703; Feldman v. Department of Transportation, 389 So.2d 692, 694 (Fla. 4th DCA 1980)."

Town of Palm Beach, 460 So.2d at 879, 882.

"[A]n expert may lead a jury to the precipice of a verdict, but she may not instruct them to leap." *In re Methyl Tertiary Butyl Ether (MBE)Products Liability Litigation*, 643 F. Supp 2d 482, 505 (S.D. N.Y. 2009). Dr. Hayden's testimony does just that; assists the jury in deciding the facts and elements in order to reach its ultimate conclusion.

The State also alleges that Dr. Hayden's interpretation of what he sees and does not see on the video is impermissible and cites two cases. State's Motion at 54. In *Seymour v. State*, 187 So.3d 356 (Fla. 4th DCA 2016), the court held it was error to allow lay witness testimony regarding a video recording wherein the witness speculated that the Defendant in the video was concealing a firearm under his shirt and where the jury could watch the video and make this determination. Not only does *Seymour* interpret the testimony's admissibility under Rule 90.701—Opinion testimony of *lay* witnesses, the witness's testimony told the jury something that could not be depicted in the video, a concealed object hidden under clothing and as such was held to be mere speculation on behalf of the witness.

Similarly, in Lee v. Anderson, 616 F.3d 803, 809 (8th Cir. 2010), the expert manipulated a video in order to clarify the images and opined that there was no gun in the hand of an individual. The court held that the expert testimony was not helpful to the jury as they could determine what they could see and not see in the video. Here, Dr. Hayden did not alter the video nor does his testimony interpret the video for the jury but rather narrated what could readily be seen by jurors. See U.S. v. Torralba-Mendia, 784 F.3d 652 (9th Cir. 2015) (Immigration and Customs Enforcement officer did not invade the province of the jury when he narrated the video) (distinguished on other grounds by U.S. v. Sun, 673 Fed. Appx. 729 (9th Cir. 2016)); see also Cuzick v. Commonwealth of Kentucky, 276 S.W.3d 260 (KY 2009) ("No error to allow officer's lay testimony narrative testimony of video") (distinguished on other grounds by Rogers v. Commonwealth of Kentucky, 315 S.W.3d 303 (KY 2010). This is an important distinction. Dr. Hayden will relay what can readily be seen in the video as the basis for his opinion. See Fla. R. Evid. 90.704, see also USA v. Garcia-Zarate, 419 F.Supp.3d 1176 (N.D. Cal. 2020) ("witnesses may narrate and describe events in a video based on their perceptions").

Dr. Hayden's testimony is helpful to the jury and does not impermissibly invade the province of the jury.

# Dr. Hayden's Opinions Are Reliable

The State asserts that "Dr. Hayden's testimony and opinions are based on unreliable methodology." State's Motion at 4. It is Defendant's position that the State has not sufficiently pled this claim as the State has merely made assertions that Dr. Hayden's opinions are based upon improper methodology, cited the holdings and quoted rules from several cases, then reiterated its assertion that the opinions are not reliable. See Booker v. Sumpter Co. Sheriff's Office/North America Risk Services, 166 So.3d 189 (Fla. 1st DCA 2015) ("Depending on the specific basis for the challenge, the objection should include, for instance, citation to 'conflicting medical literature and expert testimony.") quoting Tanner v. Westbrook, 174 F.3d 542, 546 (5th Cir. 1999) (superseded in part by rule on other grounds in *Mathis v*. Exxon Corp. 302 F.3d 448, 459 n. 16 (5th Cir. 2002)). "A Daubert objection must set forth the specific defects in the expert's opinion. When the motion is vague and conclusory and not accompanied by expert depositions or reports, professional articles or other materials raising a significant issue concerning the relevancy or reliability of the testimony, a hearing will not be necessary." Ehrhardt, Florida Evidence (2019) at 849 (emphasis added).

The State's Motion is insufficiently pled and fails to put the Defendant on notice in order to address alleged defects in Dr. Hayden's testimony. *See Booker*, 166 So.3d 189. The State has failed to sufficiently plead to this Court reasons to

exclude expert testimony and has further failed to show why this most extreme measure should be applied to Dr. Hayden's expert testimony.

Not only has the State failed to properly plead the assertion that Dr. Hayden's testimony and opinions are unreliable, the State has misrepresented the caselaw to this court. Page 4 of the State's Motion involves the interpretation of Salomon v. State, 267 So.3d 25 (Fla. 4th DCA 2019) wherein the State says "Method not reliable" within its parenthetical breakdown of the case, implying this is the holding of the case. The Salomon court never discussed the methodology or reliability of the witnesses' testimony, merely restated the witness's testimony as it related to the discussion of improper bolstering. Salomon 267 So. 3d at 31-33. The only discussion or holding regarding the witness's testimony was that the expert testimony was improper as it "demeaned appellant's credibility concerning whether the victim may have been armed by pointing out 'no one says that except for [Appellant]." Id. at 32. The State repeats the misrepresentation on pg. 34 of State's Motion where it says, "The method described by Hayden is the same method used by the experts in Salomon and the Kemp cases, which was rejected by the courts as unreliable."

The State also cites *Kemp v. State*, 280 So.3d 81 (Fla. 4th DCA 2019), as it deals with the reliability and/or methodology of an expert witness. However, the State has failed to show how this case would relate to the present case. In *Kemp*, the court determined that the expert used a method of "eyeballing the shape of the crash

damage on a vehicle to determine if the vehicle that made the impact was braking" and his "repeated invocation of the magic words 'training and experience' was insufficient, without more, to establish the reliability of his opinion under *Daubert*." *Id.* at 89.

Dr. Hayden has extensive training and experience in the use of force, See Exhibit A, and relied upon extensive evidence as pointed out by the State. State's Motion at 33. Not only did Dr. Hayden design and implement the FBI's Safety and Survival program, he served on the FBI's Safety Review Board, determining whether officer shootings were justified. Dr. Hayden commanded an FBI SWAT team and was also an instructor of SWAT team programs for other agents. He developed the curriculum for the New Agent Program. Dr. Hayden was actively involved as an agent employing use of force as well as an instructor of these principles to others.

The State has alleged that Dr. Hayden's testimony is unreliable and therefore inadmissible under 90.704 which reads as follows:

#### Florida Rule of Evidence 90.704

Basis of Opinion Testimony by Experts—The facts or data upon which and expert bases an opinion or inference may be those perceived by, or made known to, the expert at or before that rial. If the facts or data are of a type reasonably relied upon by experts in the subject the opinion expressed, the facts or data need not be admissible in evidence. Facts or data that are otherwise inadmissible may not be disclosed to the jury by the proponent of the opinion or inference unless the court determines

that their probative value in assisting the jury to evaluate the expert's opinion substantially outweighs their prejudicial effect.

The State has failed to sufficiently plead the claim that Dr. Hayden's testimony and opinions are inadmissible as unreliable and based on improper methods. As such the State has failed to put the Defendant on notice and therefore this claim should be struck in its entirety.

### Dr. Hayden's Opinions and Testimony Are Not Merely a Conduit for Inadmissible Evidence

The remainder of the State's claims assert that varying statements and opinions of Dr. Hayden's are inadmissible in one regard or another. The Defendant will address these claims below.

#### • Comments on Credibility of Witnesses

The State asserts that Dr. Hayden improperly comments on the credibility of witnesses. In relaying the information that he did and did not rely upon in forming his opinion, Dr. Hayden stated that he did not consider the testimony of theater patrons who had not been separated from each other before giving their statements to law enforcement. For support of its contention that this is somehow improper, the State cites to *Linn v. Fossum*, 946 So.2d 1032 (Fla. 2006). In *Linn*, the expert witness improperly stated that she relied on the hearsay opinions of other experts who had no first-hand knowledge of the case in forming her opinion and thereby impermissibly bolstered her own credibility to the jury. *Id.* The expert testimony

"indicate[d] a group consensus based on hearsay that would not be conveyed by testimony that the experts relied on records, tests, or reports from the patient or other medical providers directly involved in the diagnosis or treatment of the patient." *Id.* at 1039. The court "conclude[d] that referring to consultations with other experts creates a danger of bolstering the credibility of the testifying expert's opinion without providing the opposing party the ability to effectively cross-examine the expert as to the basis for the opinion." *Id.* 

Here, the theater patrons, assuming they are called by the State in its case in chief, will be cross examined on the fact that their statements were contaminated by conversing with each and not being separated from each other before speaking to law enforcement. Several of the theater patrons readily admitted speaking to each other and indicated that there were large groups that had formed where people were talking about the events. This was before they gave their statements to law enforcement. It is imperative in any investigation to separate witnesses so that you get their actual perception of events without filling in any gaps in their recollection. According to Dr. Hayden, "people have a tendency to want to fill blanks, and when they hear what other people have to say, they have a tendency to put that in their statement, thinking that that's what they did see or hear." (Immunity Hr'g Vol. XIV 1675:8-11.) (Tr. attached hereto as Exhibit C.) This information will already have been elicited and before the jury for its consideration as to the weight of the evidence. As this information will be in evidence, the jury will then have to decide whether they agree with Dr. Hayden's decision not to rely on their testimony in forming his opinion, which goes to the weight and not the admissibility of the testimony.

The State also cites to Geissler v. State, 90 So.3d 941 (Fla. 2d DCA 2012) wherein a State witness in a child sexual abuse case erroneously testified that a child was testifying truthfully in the absence of physical proof based upon the child victim's statements alone. Geisler was distinguished by Scott v. State, 218 So.3d 476 (Fla. 3d DCA 2017), a factually similar case to Geissler involving a child protection service counselor recommendation that the child receive therapy. Scott 218 So.3d at 479. The court said, "this statement did not leave the jury with the clear impression that [the witness] believed that [the victim] was telling the truth. The facts in this case substantially differ from the facts in *Ramayo* and *Geissler*, where the expert witnesses expressly stated that they believed that the victim had been abused based on nothing more than the victim's own statements. Just as in *Scott*, Dr. Hayden's testimony does not tell the jury his opinion of the witness's truthfulness or lack thereof. Dr. Hayden's testimony involves the improper investigation by law enforcement in not separating witnesses, merely tells the jury why he chose not to consider that evidence in rendering his opinion, facts that will already have been elicited and in evidence.

#### • <u>Self-Serving Statements</u>

The State claims that Dr. Hayden's testimony and opinions are based only on the Defendant's self-serving statements. For support of this claim, the State cites to *Mitchell v. State*, 965 So.2d 246 (Fla. 4th DCA 2007) where a defendant wanted to enter the report of a mental health expert who had examined him for competency and merely restated the defendant's version of the events for no other purpose than to bolster the defendant's self-defense claim. In context, Dr. Hayden's statements regarding the Defendant's statements were made to establish part of the information he used to make his ultimate opinions. Experts are allowed to base their opinions on the "general acceptance of the defendant's version of the [events]...It is precisely because experts are prohibited from resolving these conflicts-the very rule contended for the plaintiff-that the expert's opinions necessarily must be based on someone's version of the incident." *Richman*, 415 F.Supp.2d at 942.

#### • Prior Consistent Statements

The rule pertaining to prior consistent statements, 90.614, involves the statements made by the witness. The State's claim appears to revolve around the defendant's statements and not those of Dr. Hayden. The cases cited by the State involve the same, prior consistent statements of the declaring witness. Dr. Hayden's statements relating to the Defendant's statements are merely an explanation of the evidence he relied upon to form his opinion that will undoubtedly already be in evidence.

#### Conclusion

The State has asked this court to exclude the testimony of defense expert Dr. Hayden in its entirety. The State also seeks an order from this court instructing counsel for the Defendant not to refer to any of the facts mentioned in State's Motion without first obtaining this court's permission. The State has failed to show why the court should take these drastic measures. As shown by this response, Dr. Hayden's expert testimony is relevant, reliable, assists the trier of fact and is not otherwise inadmissible and as such the State's Motion should be denied.

WHEREFORE, the defense respectfully requests this court to deny the State's Daubert Motion to Exclude the Testimony of Defense Expert Dr. Philip Hayden, Ph.D. in its entirety.

#### **CERTIFICATE OF SERVICE**

I HEREBY CERTIFY that a true and accurate copy of this has been furnished by Electronic Submission and United States Postal Service to: the Office of the State Attorney for the Sixth Judicial Circuit, P.O. Box 5028, Clearwater, Florida 33758, this 17th day of September, 2020.

#### Service

- Entered the U.S. Army as a Private in 1964 and retired on a disability as a Captain in 1968 due to wounds received while serving with the 173rd Airborne Brigade in Vietnam Training Received
- Advanced Infantry and Demolitions Training, Non-Commissioned and Officers Candidate, Airborne, Ranger, Pathfinder, Jungle and Sniper Schools

#### Awards Received

Purple Heart, Vietnamese Cross of Gallantry, Conspicuous Service Cross, Army Commendation for Valor, Bronze Star for Valor, and the Distinguished Service Cross

# In The Matter Of: State of Florida v. Curtis J. Reeves Dr. Philip Hayden January 27, 2017 Commonwealth Court Reporters, Inc Min-U-Script® with Word Index

1	Deposition upon oral examination of
2	DR. PHILIP HAYDEN, taken on behalf of the State,
3	before Deanna A. Arend, Registered Professional
4	Reporter, a Notary Public for the Commonwealth of
5	Virginia at large, taken pursuant to notice,
6	commencing at 8:33 a.m., on January 27, 2017, at the
7	Fredericksburg Hospitality House & Business Center,
8	2801 Plank Road, Virginia.
9	
10	DR. PHILIP HAYDEN was sworn and deposed on
11	behalf of the State as follows:
12	EXAMINATION
13	BY MR. MARTIN:
14	Q Dr. Hayden, would you state your name for
15	the record, please, sir?
16	A Philip P. Hayden. One L in Philip.
17	P-h-i-l-i-p. H-a-y-d-e-n.
18	Q Dr. Hayden, my name is Glenn Martin, and
19	I'm an Assistant State Attorney out of Pinellas
20	County, for the Sixth Judicial Circuit. It's my
21	understanding that this is a continuation of your

deposition that we began in March of 2016, in the

22

1 case of State versus Curtis Reeves.

Is that your understanding?

A Yes, it is.

1.3

2.1

Q All right, sir. What I would like to do is go ahead and begin the deposition. We've had about four hours to talk with each other back in March. I'm not going to go over that material again. We've already covered that. We may be referring back to add to what we're going to talk about, but we're not going to go and rehash any of that material. Basically today we're going to be talking about the facts of the case and your opinion. Fair enough?

A That's fine.

Q All right. What I'd like to do to begin the deposition before we start delving into the facts -- as you did not do a report in this particular case, so I don't know exactly what your opinions are. I did my best guess. So I'm going to ask a series of questions regarding your opinions in this case. And once we develop at least a baseline of what your opinions may be in this particular case, then that would assist me in the rest of the depo,

1 how we're going to go through the facts. 2 Α That's fine. Yes. 3 All right. So regarding your potential opinions and, of course, this is my quessing as to 4 5 what they may be, if you were asked and allowed by 6 the Court to render an opinion, have you derived any 7 conclusions or opinions regarding whether or not 8 Mr. Reeves was justified in the shooting of 9 Mr. Oulson under the totality of the circumstances as 10 you know them to be? 11 Α Yes, I have. 12 Q. And what is that opinion, sir? Α 13 I believe he was justified in his actions. 14 If you are asked and allowed by the Court Q 15 to render an opinion, have you derived any 16 conclusions or opinions regarding whether or not it 17 was necessary the Defendant to use deadly force 18 against Mr. Oulson? 19 Yes, I have. Α 20 All right. And what is that opinion? Q 2.1 I believe he was justified. Α 22 Q Well, my question to you, sir -- and not to nitpick, but I understand you indicated he was justified. My question was, do you have an opinion as to whether or not it was necessary for Mr. Reeves to use deadly force against Mr. Oulson?

(Interruption)

#### BY MR. MARTIN:

2.1

Q We're back on the record after a brief moment off the record as maintenance tended to our comfort. Let me ask you the question that we were talking again. All right, sir?

A Sure.

Q If asked and allowed by the Court to render an opinion, have you derived any conclusions or opinions regarding whether or not it was necessary for Mr. Reeves to use deadly force against Mr. Oulson?

- A Yes, I have.
- Q And what is that opinion?
- A I believe it was necessary.
- Q If asked and allowed by the Court to render an opinion, have you derived any conclusions or opinions regarding whether or not it was reasonable

1 for Mr. Reeves to believe that Mr. Oulson was going 2 to attack him after he tossed the popcorn on him? 3 Α Yes, I am. And what is that opinion? 4 0 5 Α I believe he was reasonable. 6 And if asked and allowed by the Court to Q. 7 render an opinion, based on the facts and 8 circumstances as you know them to be as to whether or 9 not there was conduct by Mr. Oulson immediately prior 10 to Mr. Reeves firing the pistol that rose to a level 11 constituting an imminent event justifying the use of deadly force? 12 1.3 Yes, I am. Α 14 And what is that opinion? Q 15 That I believe the threat was imminent. 16 And if asked and allowed by the Court to 17 render an opinion, have you derived any conclusions 18 or opinions based on the facts and circumstances as 19 you know them to be under Florida Law what forcible 20 felony was prevented by Mr. Reeves shooting 2.1 Mr. Oulson? 22 Α I believe all of those forcible felonies,

as you say, were laid out by Mr. Escobar in his report and memorandum.

1.3

2.1

Q I understand that, sir, and I've read that pleading. So my question to you -- and this is what this opinion is going to. Based on the facts and circumstances as you know them under Florida Law, what forcible felony was prevented by Mr. Reeves shooting Mr. Oulson?

A Well, I've read -- I've read the document, and there are several things in there, so if there is something that you want to show me in that document, I would be glad opine on any one of the comments.

But there's nothing in that document that I saw that I did not believe was correct.

Q We're going to go through that document, and I'm just making a note here that we're going to come back to that at the appropriate time.

A That's fine.

Q If asked and allowed by the Court to render an opinion, have you derived any conclusions or opinions under the facts and circumstances as you know them to be whether or not Mr. Oulson used an

1	object as a deadly weapon against Mr. Reeves?
2	A Yes, I do have an opinion on that.
3	Q All right. And what is that opinion?
4	A That he did use a deadly object.
5	Q And what was that object?
6	A His fist, number one; his hands, and
7	possibly his cell phone.
8	Q If asked and allowed by the Court to render
9	an opinion, have you derived any conclusions or
10	opinions based on the facts and circumstances as you
11	know them to be whether or not at any time did
12	Mr. Oulson verbally make any threats to do violence
13	or physical harm to Mr. Reeves?
14	A Yes, I do.
15	Q And what is that opinion?
16	A I do believe he made threats towards
17	Mr. Reeves.
18	Q If asked and allowed by the Court to render
19	an opinion, have you derived any conclusions or
20	opinions regarding whether or not at any time
21	Mr. Oulson hit Mr. Reeves with his fist?
22	A Yes, I do have an opinion on that.

1	Q And what is that?
2	A I believe there was a good possibility that
3	he did.
4	Q If asked and allowed by the Court to render
5	an opinion, have you derived any conclusions or
6	opinions regarding whether or not at any time did
7	Mr. Oulson hit Mr. Reeves in the face with an object
8	other than a popcorn bag filled with popcorn?
9	A I do have an opinion on that.
10	Q All right. And what is that opinion, sir?
11	A I believe there was a possibility that he
12	did.
13	Q And what would that object be?
14	A Possibly a cell phone.
15	Q If asked and allowed by the Court to render
16	an opinion, have you derived any conclusions or
17	opinions based on the facts and circumstances as you
18	know them whether or not at any time did Mr. Oulson
19	use any object as a deadly weapon against Mr. Reeves?
20	A Yes, I do have an opinion on that.
21	Q All right. And what is that opinion, sir?
22	A I believe he used a cell phone. Possibly

used a cell phone.

1

3

4

5

6

7

8

9

10

11

12

13

14

15

18

- Q If asked and allowed by the Court to render an opinion, have you derived any conclusions or opinions regarding whether or not Mrs. Oulson, Nicole Oulson, was struggling to restrain her husband at any time they both were shot?
  - A I do have an opinion on that.
  - Q And what is that, sir?
  - A I believe she was trying to restrain him.
- Q I was provided a list of documents that was provided to you by the defense team prior to the March 2016 deposition. Have you been provided any other documents in any form since our March 2016 deposition?
  - A Yes, I have.
- And what items have you been provided since
  March?
  - A The deposition of the Turners.
- 19 | O Okay.
- A And the police report. I don't know what
  that date would be. It's 131 pages of all of the
  documents, I believe.

1	MR. ESCOBAR: It's the updated one.
2	THE WITNESS: The updated one.
3	MR. MARTIN: The 12th?
4	MR. ESCOBAR: The one that you gave me, the
5	recent updated one. You know how we repaginate
6	these?
7	MR. MARTIN: Yeah. So that would be
8	MR. ESCOBAR: Because we gave him the
9	police report from the very beginning, but when you
10	repaginated, we
11	MR. MARTIN: Yeah, we need to talk about
12	which one we're actually going to be referring to.
13	All of my notes are on the January 25th one.
14	MR. ESCOBAR: I'm not sure that any of us
15	know.
16	MR. MARTIN: I know. All right. So I am
17	familiar with that.
18	BY MR. MARTIN:
19	Q Anything else?
20	A And also lab reports dealing with the DNA
21	on the phone.
22	Q All right. And anything else?

1	A I cannot think of anything right now.
2	Q Let's talk briefly about the lab reports
3	from the DNA. What did you learn from those reports?
4	I think there's just one report. Right?
5	A There is two different reports. I think
6	they were done a year apart from each other.
7	Q All right, sir. What did you learn from
8	the DNA reports?
9	A That Mr. Reeves' DNA could not be excluded
10	from the DNA on the phone.
11	Q Is that the salient feature that is
12	important to you?
12 13	<pre>important to you?  A I'm not a technician, and I'm not a lab</pre>
13	A I'm not a technician, and I'm not a lab
13 14	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in
13 14 15	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in that lab report. I just tried to gather as much
13 14 15 16	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in that lab report. I just tried to gather as much information.
13 14 15 16 17	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in that lab report. I just tried to gather as much information.  Q The bottom line?
13 14 15 16 17	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in that lab report. I just tried to gather as much information.  Q The bottom line?  A The bottom line, yes.
13 14 15 16 17 18	A I'm not a technician, and I'm not a lab person, so I don't understand everything that's in that lab report. I just tried to gather as much information.  Q The bottom line?  A The bottom line, yes.  Q The bottom line, that is the fact that is

1 Α Yeah. 2 Okay. And the depo of the Turners, what Q 3 did you learn from those depos? I read their depos, as I read every depo 4 5 that was given to me, and the problem with that depo, 6 as well as every one of them, they're all extremely 7 contaminated. So I had a hard time using much of the 8 information in any one of them. 9 Would you explain to me what you mean by contaminated? 10 11 After the shooting, there was a half an 12 hour, an hour, an hour-and-a-half before people were 1.3 even -- put down their statement. They were talking 14 They were all gathered in the to people down there. 15 same location, sitting at the same table and discussing what had actually happened. 16 17 You mean the patrons? The witnesses? 0 18 The witnesses. 19 And what is your source of information that 0 20 the patrons were all sitting around talking to one 2.1 another? 22 Reading the depositions. They admitted to Α

that.

2.1

Q Okay. And in what way did that -- we're going to talk about this generally, and then we'll talk about the Turners.

A Sure.

Q Generally, in what way did that contaminate the information they provided during their depositions?

A Well, as an FBI agent many years ago, I learned the first thing you do is separate witnesses, because witnesses begin to talk, and then they start taking on each other's story. So as -- you, as an attorney, that's probably a basic thing that you learn also. You have to separate witnesses, because if you don't, they will take on each other's story. They'll start adding to things, because people have a tendency to want to fill in the blanks. And so when you have people that are talking to each other -- and I don't know who was talking to, but I know a lot of people said that people were just talking down there. And once that contamination occurs, none of it's worth much at all.

Q Having said that, regarding any of the information in the depositions or the police reports or the recorded statements or the handwritten statements of any of the witnesses, did you totally disregard all of that and set that aside and not use that in any fashion to derive your conclusions and opinions in this case?

A No, I think as a professional, as I look at this, I have to look at everything that's out there.

You know, the things are contaminated and the things that aren't contaminated.

Q Okay.

2.1

A It's my obligation to look at everything.

And were you able to discern from your analysis of the witnesses' depositions or statements or police reports that you believe were contaminated and compare that with items that you believe were not contaminated, were you able to ferret out anything from any of the witnesses' depositions that you're going to rely on as being uncontaminated?

A No. If you put it like that, I'd have to say every -- every deposition or every statement that

was made down in -- at that point was contaminated, because people talked to each other. Now, when you have that contamination, I still look at trying to figure out is there anything that's going on? You know, from that it's obvious that there was an argument of some type or some yelling. And that's, you know -- so those are facts from Mr. Reeves, from Ms. Oulson, from other witnesses that -- that were there. But, you know, when you put it together, I don't know what was said, exactly what was said by any of them, because that's contaminated. I just know something did happen.

2.1

Q Okay. So I want to ask you specifically then if you are asked, what facts support a particular opinion? And we'll go over that later. Are you going to include any of the facts contained in the depositions or written statements of any of the witnesses as support of your opinions?

A No, I think everything -- as I said, they're so contaminated I cannot think of anything right now that I would be using that's not based on some other fact.

Q Okay. Just so I understand and I'm clear --

A Sure.

2.1

Q Because with that statement we're going to save about an hour's worth of time.

A Good.

Q But I want to make sure that I understand exactly what you're explaining to me. As an example, I asked you your opinion as to whether or not at any time did Mr. Oulson verbally -- and that's the keyword -- verbally make any threats to do violence or physical harm to Mr. Reeves? You answered yes. So if I ask you what supports that, are you going to refer back to any witness that was in that theater and attribute any statement that they believe they heard in that theater in support of that particular opinion?

A As you ask me that question, if you were to ask me did a certain person say something, I'm prepared -- and I understand, I read all of the depositions, and I know things that were said. But with the threats that were made is what Mr. Reeves

stated in his statement and corroborated by a lot of other facts of the case.

- Q I want to go into those facts a little bit later.
  - A Sure.

- understand where you're going with the witnesses' depositions, all of the patrons that were in there.

  Because I don't want to be caught in the courtroom if you're asked what supports -- specifically when -- if it's an opinion regarding verbal threats. So you're going to rely on Mr. Reeves. Well, that's fine. But are you going to say that witness A, B or C heard this? Or attribute a particular statement to Mr. Reeves or Mr. Oulson in support of an opinion based on whether or not verbal threats were made? See how specific that is?
  - A Yes.
- 20 So that's why I'm pinning you down, because --
- 21 A Sure.
- 22 Q -- I want to know are you going to say any

of the patrons -- attribute anything to them regarding a verbal threat, as an example?

A I cannot think of any deposition that I would look at and say I'm going to use that particular deposition, so I cannot think of anything right now that would be. If the question is asked of me, I'm going to have to answer you the best I possibly can. So that's all I'm saying.

Q Well, the question would be, what are you using? I'm not going to give you any facts --

A Sure.

2.1

Q -- because it doesn't matter to me what my opinion is. We're trying to figure out the basis of your opinions. So my question is, are you going to say Mark Turner or the Cummings or the Hamiltons said this? Are you going to specifically refer to anyone -- of any of the depositions that you have? Because right now you've discounted basically everything that they said, and you've set it aside. Is that what you've done?

A Well, no, I have not set it aside. It's there. I'm not relying on it, because it's too

contaminated. However, there are the Hamiltons -Corporal Hamilton that was there and that he
assisted. You know, I believe his testimony is also
contaminated, because I don't know who he talked to.
I know he and his wife were talking. And his wife
had said a few things. So I'd probably rely on them
a little bit more than I would rely on any other
statement that was made. But, here again, every
statement -- every witness statement, I believe, has
a certain part of contamination. And once it's
contaminated, you know, I don't know how much you can
rely on.

1.3

2.1

Q I don't have that comfortable feeling. I want it black or white. Are you going to use it or not? And I get the impression that you are using it. You are using the facts that are related by the patrons in the depositions.

A No, I don't have to use it. I think there's enough facts in this case that lead me to my opinions, and that Mr. Reeves was justified, it was necessary for him to do what he did to protect himself.

1 Q Okay. 2 Α So... 3 I'll just continue on, and we'll just see Q how things go. We might have to come back to that. 4 5 Α Sure. 6 There's a report by a Dr. Cotton from Rose Q. 7 Radiology and X-rays and the MRIs that were done on Mr. Reeves. Did you look at that at all? 8 9 Α I don't remember looking at that, no. 10 0 All right. Did you talk to a Dr. Foley? 11 He's their forensic radiologist. 12 Α No, I did not. 13 Either prior to the March 2016 depo or up Q 14 until today, have you sat down and interviewed 15 Mr. Reeves? Yes, I have. 16 17 Okay. Why don't we go ahead and just get 0 18 that out of the way. And if you would start with 19 when it took place, where it took place, and then if 20 you would just go through everything that you asked 2.1 him and his response. I'm just going to let you run

with it. I'm not going to try to interrupt with you,

22

1 so you'll just have your stream of thoughts, put it 2 down on the record, and then I'll come back with 3 follow-up questions. Fair enough? That's fine. 4 All right. When did that interview take 5 0 6 place? 7 Α God, I'd have to look at my calendar. I'm 8 not positive exactly when it took place. I mean, I 9 can look right now on my phone, but it was about a month ago in Tampa, at Mr. Escobar's office. 10 11 Was it after Christmas or before Christmas? Q 12 After Christmas. 13 Q Okay. 14 You know, it was -- I don't --Α 15 That's fine. 0 16 God, I don't know. My mind must be 17 slipping on that. I don't remember exactly. I think 18 it was about a month ago I was down there. 19 And other than Mr. Reeves, who else Q Okay. 20 was present? 2.1 Mr. Escobar was present. There was another Α 22 attorney that was in and out, but I don't remember

1	what his name was.
2	Q All right. Did you tape record it?
3	A I did not.
4	Q Did you take notes?
5	A I did not.
6	Q If notes were taken by anyone else, did you
7	review those notes before coming to the depo today?
8	A I don't believe any notes were taken by
9	anybody else, but I'm not sure.
10	Q So you haven't reviewed any notes
11	A I have not reviewed any of the notes.
12	Q All right. And if you would, start from
13	the very beginning, how you set it up, what you said
14	to him, and then go through question and answer,
15	question and answer, and then I'll follow up with my
16	questions.
17	A When I was down there, I met Mr. Reeves in
18	the office, and it was a cordial meeting, and we
19	talked about how he was doing at that time, and if he
20	was okay, and if he felt comfortable talking to me.
21	And he was very willing to talk to me.

What I did was asked him to explain to me

22

in his words what had happened, but where I differ is in Detective Proctor's 30-minute -- I wouldn't call it an interview. I would call it a listening to Mr. Reeves talk. I had listened to that. I had read his statement. And what I did was ask a lot of questions why. Why did you do the things? Why did you think the way you thought? In the English language, one of the best words there is is why.

2.1

During the time that Mr. Reeves was talking to Detective Proctor, Detective Proctor hardly ever asked him why he did certain things and why he reacted in certain ways, which surprised me very, very much.

So what I did is I asked him what exactly had happened, and he said he went into the theater --well, bought his tickets, he and his wife. They end up going into the theater. And I'm just giving you a quick overshot of this. Went into the theater and they sat down, and they were sitting there, and Mr. Oulson was in front of them, and he was talking on his phone. He had his phone on, and Mr. Reeves bent over to him and asked him if he'd turn off his

phone. I asked him if he did it in a way that was aggressive or could be construed as nasty, and he said not as far as he was concerned he didn't. He said he just bent over and asked would you please turn off your phone? At which time Mr. Oulson made some comments to him, and Mr. Reeves sat back and just kind of let it go.

2.1

When Mr. Oulson did not turn off his phone and was still doing whatever he was doing on his phone, Mr. Reeves got up, walked out, walked down the stairs, walked to the lobby and went to the manager or somebody he thought was in charge. And he waited there while the manager was talking to somebody. He waited there patiently. After about a minute or so he had an opportunity to talk to the manager, and he told the manager there's this individual that's sitting in front of me that won't turn off his phone. So he made a complaint to the manager, and as far as he was concerned, it was done. He came back up, walked back in to his seat, sat down, grabbed his popcorn, sat back in the chair, ready to enjoy the movie. And he says he believes he said something to

Mr. Oulson like, you know, if I -- if you would have turned -- if I would have known you were turning your phone off, I wouldn't have said anything to the manager. At which time Mr. Oulson started saying, It's none of your fucking business what I'm doing. Things of that effect. You know, I was texting my daughter. Those kind of comments. Got very aggressive about that. Which at this time Mr. Reeves said he was really taken back by that, because the only dealing, in his opinion, with this guy turning off his cell phone, and he said this guy was totally out of character for anybody in a theater or anybody in that kind of environment that would be standing up saying, Fuck this, fuck that, and being very aggressive towards him. And he said he was shocked. He was -- he didn't know what to think about it. What kind of person am I dealing with here? And that's when he told me -- he says, you know, I've been dealing -- I've been working as a police officer or in law enforcement for most of my life, and he said, I never had anybody in all of that time get into my face like Mr. Oulson did.

So I asked him what he did. Did he say anything back to him or anything else? And he said he was just sitting there and not doing anything and just trying to figure out what is going on? this guy doing? Is he crazy? Or what is he doing? So that's when he started coming over the chair, and that's when Mr. Reeves said, I felt like something hit me in the head. He says, I didn't know. thought he hit me with his fist. And I says, Well, why do you think he hit you with something? He said, Because it knocked my glasses sideways, and he says, I felt like I was hit in the head with something, something hard. And he said, It stunned me. says, I was stunned. I didn't know what would He says, I just know I had been attacked by somebody that I could not figure out why this guy is doing what he's doing. And he said, It scared the shit out of me. He says, I was scared. He says, In all my time in law enforcement, he says, I don't ever remember being scared like that.

And then he's trying to recompose himself,

and he's trying to figure out what is going on. I'm saying, Well, why were you thinking what's going He says, Well, as I said, this guy seemed like he was crazy. And he said, And I was sitting there and then all of the sudden this hand comes in, and I said, I don't know, I says, I don't know. He says, I put my left up. And he says, I don't know if I grabbed his chest, his arm or what, but something hit my left arm, and I was trying to protect myself. then the next thing, his hand's coming in, and he says, I felt like my life was over if I didn't do something. And he says, I knew I couldn't take a beating. He says, I know how bad physically I am. He says arthritis and all kinds of problems with his back, with his arms, with his hands, with his shoulder. And he says, I knew I couldn't take any kind of a beating. And he says, I thought this guy was going to come in and kill me. He said, I didn't know what he was going to do, but he says, I was scared to death. And he said, He had made threats towards me. And he says, I responded. He says, That's when I pulled my weapon, and I shot for center

of mass. And after I shot and the threat was no longer there -- because Mr. Oulson backed up at that time -- he says, I took my -- my weapon and I put it on my knee, and I sat there. And he says, A gentleman came over. And he says, I found out later he was a police officer or a deputy, and he took charge of my weapon. And he says, I sat there. And he says, And I complied at that point. But he said he was -- he was scared and just felt like he had to do something to defend himself.

2.1

That's a conversation that took place over about an hour, and we just talked about it in about ten minutes, so I'm not repeating every exact word he said. I'm giving you the concept of what he talked about.

I had read many of the reports or all of the reports at that time. I had a good idea what had happened and what he had said, what other people had said, so I just wanted to make sure I understood in my own mind why he did the things he did. And then I did ask him about the interview that he had with -- here again, I can't call it an interview. The

1 conversation that he had with Detective Proctor. he said he explained all of this to Detective 3 Proctor. And that was pretty much it. Are you familiar with a concept of a 5 cognitive interview? 6 In what terms are you talking about? Α 7 Like explained at the Force Science Q 8 Institute, the classes that you've been to. 9 Α The cognitive interview, I mean, is an 10 interview that should be very comprehensive. 11 What is your understanding of how to Okay. 12 conduct. one? 13 Α Well, in order to explain that, let me give 14 you a little bit of background why I'm giving you the 15 answer I'm giving you. 16 Fair enough. 17 Α Back when I began in the FBI in 1973, we 18 went through training and in that was -- one of the 19 major blocks of instruction was doing an interview, 20 because that's where you get all of your information

Q Okay.

when you're talking to a subject.

2.1

22

Α Through my years in the street working violent crimes, working other type of matters, I had to interview many, many people, and I developed my skill as an interviewer; however, where my skills really got to a point where I understood what an interview should be is when I got to the FBI Academy and was dealing with a lot of different units throughout the FBI Academy, because we were dealing -- I was dealing pretty much in the beginning with And the question is: How do you get the information you need through an interview? One of the ways to do it is as Detective Proctor did, was ask what happened, and just listen to them, and that's fine. But the problem is you have to go back and dissect every one of those answers. Why did you feel the way you did? Why do you think this happened? Getting the person's opinion and understanding, because then you totally understand what's going on. And if you don't do that, then you're not getting a comprehensive interview. When I was at the FBI Academy, and

22

in, I spent hundreds, maybe thousands of hours interviewing officers and agents who had been in life-threatening situations that have been in gun fights, had been shot, had shot other people, and my intention at that was to find out everything that was going through their mind, not just what they did and how they did it, but why they did. And, as I said, that word why is a very important word.

2.1

Why did they do the things they did? And how could you be better prepared in asking their opinions? So in my understanding, an interview has to be fully -- fully worked from the beginning to the end. And I've had a lot of experience in doing that.

And when I looked at what Detective Proctor did with Mr. Reeves, I was appalled that a decision was made at that point based on that one conversation. So interviewing to me is comprehensive.

Q My question to you was, are you familiar with the term cognitive interview as it is explained and taught at the Force Science Institute?

A Well, I have gone through the Force Science

Institute. I'm a member of the Board of the Force Science Institute, and I don't remember that being brought up as a subject in the Force Science Institute.

2.1

They're not -- there are people on the Board -- Alex Artwhol, I believe her name is, that was a psychologist who has written on different interviewing techniques and memory. And, you know, a lot of those things have come out. But I don't remember that actually being taught at the class that I went to or any of the understandings that I've had with any of the classes that are being taught to anybody, because his whole concept is not on how you interview people, it's how a law enforcement officer maintains his own safety.

Q When you discussed with Mr. Reeves -- once he entered the theater and took his seat, you indicated that he indicated that Mr. Oulson was talking on the phone. Did you ask Mr. Reeves what he was thinking?

MR. ESCOBAR: I'm going to object. I don't think he said talking.

1 MR. MARTIN: He did. MR. ESCOBAR: He said using the phone. 2 3 MR. MARTIN: No. Read it back, right at the very beginning. 4 5 (Off-the-record discussion) 6 (Whereupon, the Court Reporter read back "Went into the 7 the requested answer as follows: 8 theater and they sat down, and they were sitting 9 there, and Mr. Oulson was in front of them, and he 10 was talking on his phone. He had his phone on, and 11 Mr. Reeves bent over to him and asked him if he'd 12 turn off his phone." 1.3 MR. MARTIN: All right. Thank you. BY MR. MARTIN: 14 15 When you indicated that Mr. Reeves said he 16 came in and sat down for the very first time, that he 17 saw Mr. Oulson talking on the phone, my question to 18 you is, did you ask him what he was thinking at that 19 What was Mr. Reeves thinking? point? 20 So just to clarify this -- and I Okay. 2.1 I'm sure I did, but I don't might have said talking. 22

think Mr. Reeves at that time knew exactly what he

was doing, because Mr. Oulson was talking about I'm texting my fucking daughter, those kind of things. So whatever he was doing on his phone, you know, I wasn't that concerned when I talked to Mr. Reeves about that. So it wasn't that important to me if he was talking on his phone or texting on his phone, so that I just kind of passed over. So what was the rest of your question?

2.1

Q My question is when you indicated to me that Mr. Oulson was talking on his phone -- that's what you said Mr. Reeves said. My question to you, did you follow up on that at some point and ask him what he was thinking at the time that he made that observation?

A I did ask him what was going on at that time, and he said he was doing whatever he was doing with his phone, and I'm not sure exactly what the wording was, talking, texting, doing something on his phone. My concern at that point was, you know, what was bothering you? He said, The light. The light and he was just, you know, being annoying.

Q So when you asked him what was his thought

process of what was going on in his head when he made this observation, you've told me that he was being -- he was being annoyed, and the light was bothering him?

2.1

A Yeah, he says it was -- he was -- he had the light -- the light was bothering him. He was talking on the phone, and he came there to watch the movie. And that's when he said to him, Do you mind turning off your cell phone?

Q When he told you that he made that decision to ask Mr. Oulson to turn off his cell phone, did you ask him what was his thought process as to why he did that? Other than it was annoying and bothering him, did you ask him what in his mind made it appropriate or gave him the right to confront Mr. Oulson and ask him to turn off the phone? Did you ask him that?

A No, I didn't ask him that.

Q Is that important what his thought process was as far as under what moral code, conduct, whether it was appropriate to confront someone and ask him to turn off the phone? Basically a nonconsensual meeting of two people? Did you ask him about that?

A I didn't really feel like I needed to ask him why he felt like he needed to tell him to turn the cell phone off. I've been to hundreds of movies myself. And, you know, if the heading comes up on the screen please turn off your cell phones, I've done it many, many times, so I understand. I understand what the protocol is in a theater. So I didn't have any problem with him saying to somebody in front of him would you mind turning off your cell phone.

Q I appreciate what you feel. My question to you, Dr. Philips -- I'm sorry, Dr. Hayden, is
Mr. Reeves' thought process. Did you ask him in his
mind -- and I'll use the term right. But what gave
him a right to have a nonconsensual contact with
someone in the theater and ask them to turn off the
phone? Did you ask him that thought process?

A I did not ask him, and I don't feel like I have the knowledge to answer for him what gave him the right. I think that --

Q No, what --

2.1

A -- anybody would have the right. So you

asked me -- you asked me a question, and I tried to answer that question. I did not ask him why he felt like he had the right to ask him. It's an assumption that I have, because I've been in many theaters myself, that people should not be on their cell phones. So I could understand somebody not wanting somebody to talk in front of him, so that's pretty simple.

1.3

2.1

I want to make sure that you understand why I'm asking the questions, because you spent about five minutes of explaining to me how important it is to keep asking why, why and what was going through someone's mind. You indicated to me that you've developed this interview technique over many, many years of interviewing police officers who have been involved in a shooting and other individuals. So as I go through your interview, which took, you said, about an hour, you gave me about ten minutes' worth. I'm going to go through and ask at every point did you follow up on why? So that's why I'm asking the question. I don't care what you think was appropriate or not. I want to know did you ask the

1 follow-up questions like you told me that you're trained and it's your habit to do. Okay? That's the 3 reason for the question. I understand. I understand that. 5 All right. So my question to you is -- and 6 you already told me -- we're done with the last 7 question. 8 Α Okay. 9 You already explained that you did not ask 10 him about that. Factually, did Mr. Reeves tell you 11 how many times he had this nonconsensual contact with 12 Mr. Oulson before he got up and left for the manager? 13 MR. ESCOBAR: I'm going to object to 14 presuming on the question that anything was 15 nonconsensual, but go ahead, you can answer that 16 Mr. Hayden. 17 THE WITNESS: I believe he asked him one 18 I don't know if he asked him twice or not. 19 I'm not sure. I don't remember that. 20 BY MR. MARTIN:

Did you ask him how many times?

Did I ask him how many times? I don't know

2.1

22

Q

Α

if I asked that question or not.

2.1

Q Is it important to you in your analysis of this particular case the number of times that Mr. Reeves had nonconsensual contact with Mr. Oulson before going and complaining to the manager?

A I didn't really concern myself that much with how many times he did it, because I thought in my process that he had a right to do what he did, and he didn't do anything that was abnormal, that was out of line, so there wasn't any reason for me to ask him and stay on that.

Q All right. So based on your perception of what should or should not be allowed in the theater, you didn't follow up on questions, because you just relied on your own personal opinion and life experience --

A No, it's not --

Q -- of what Mr. Reeves did was appropriate?

A It is not my own personal opinion. You know, I -- I don't really know how to answer your question, because it's an appropriate action in a theater that people don't do things like that. So is

it just my opinion? No, I've heard it from many other people. I've read it on the screen. I've dealt with that. So, you know, I didn't feel like I had to pursue that with him.

1.3

2.1

Q All right. And I asked you did you ask him how many times he made contact with Mr. Oulson, and you indicated that you didn't follow up on that question, right?

A No. How many times he made contact with Mr. Oulson, he gave me the opinion that he asked Mr. Oulson the one time, and that was it. And Mr. Oulson didn't do it, he said something -- Mr. Oulson said something to him, and he just went back to doing whatever he was doing on the phone. And that's when Mr. Reeves got up and left and went out to see the manager.

Q Would it make any difference to you in your analysis as to whether or not Mr. Reeves had one, two or three contacts with Mr. Oulson before he left for the manager?

- A No, it doesn't matter to me.
- Q Based on your conversation with Mr. Reeves,

is it your understanding that by Mr. Reeves' own words, that he initiated the contact with Mr. Oulson? He was the first one to reach out, if you will, and make contact with Mr. Oulson, as opposed to Mr. Oulson first time contacting him? Do you see what I'm trying to get at?

- A Yes.
- Q Okay.

2.1

- A Mr. Oulson told me that he --
- O Mr. Reeves or Mr. Oulson?
  - A Mr. Reeves, Mr. Reeves. Mr. Reeves bent over and told Mr. Oulson, you know, would you please turn off your cell phone?
    - O All right.
  - A At that point when Mr. Oulson started saying things to him, Mr. Reeves told me, he said, you know, I just saw this was going to be an argument, and I didn't want to get into an argument with him, and that's why I decided just to go to the manager. So that's why I didn't feel like any other questions were necessary on that.
    - Q Based on that statement, there was no

reason for you to follow up if he just felt it was an argument as to whether or not he may contact him once, twice or three times?

2.1

A As I said, you know, maybe I come from a different background where I tell my child to do something once, I don't think I should tell him, two, three, four, five times. I'm sure Mr. Reeves, as a police officer, is used to telling people things and expecting some kind of response. When he got a negative response, he knew enough. I wasn't going to have anymore conversation with him, because this was going to go nowhere. Just let management take it.

Q You mentioned that Mr. Reeves indicated that after Mr. Oulson made the comments that you've just described that he sat back and let it go. When you use the words "let it go," are you describing what Mr. Reeves' thought process, or was that what he said?

A No, it's what his thought process was. He said, you know, that I made the comment to him will you please turn off your phone, he says, I sat back, and he says, I just -- I made my comment to him, and

he said, I didn't want to take it any further than that. And then he starts making all of these comments to me. I'm texting my fucking daughter. You know, I'm texting my -- if not my fucking daughter, whatever fuck I'm doing. He used fuck several times, he said. And he said, you know, at that point in time I just knew this was not good. From his experience and his background, he knew that this was not going to go good if he kept on talking to him, and no sense in making it worse.

2.1

Q Did he say that? Or is that what he told you his thought process was?

A He was explaining to me he did not want it to go any further. He just wanted him to put his phone down so he could enjoy the movie, and that's where he was at that point in his thinking. He didn't want it to go any further, and he did tell me that. He says, you know, as far as I was concerned, I told him, I thought he'd do it, and then he started making these comments, and that's when I started wondering what is going on in this guy's mind?

Q All right. So when he explained his

thought processes -- thought process at that point in the scenario that this wasn't going good, he didn't want it to go any further, I'm guessing here -- and correct me if I'm wrong. Is that where you made the assumption that he'd just let it go and had no further contact with Mr. Oulson?

A No, no, I did not say that. And if I led you to believe that --

Q Okay.

2.1

A Not that he let it go and just completely forgot about the whole thing. He just backed off and he said, you know, I didn't want a conflict with him, and so I just wanted to back off and, you know, just let it -- let it end right there.

Q Okay.

A And then when he did not put his cell phone down and he made those comments, that's when he decided to go see the manager.

Q So according to Mr. Reeves, Mr. Oulson made the comments after -- according to Mr. Reeves -- he said, Would you please turn off your cell phone? Is that the sequence of events as related by Mr. Reeves?

1	A After he asked him to turn off his cell
2	phone, that's when made the comments, yes.
3	Q And, therefore, the sequence of events is
4	after Mr. Oulson made those comments that in
5	Mr. Reeves' mind this isn't going anyplace good, I'm
6	just going to let it go?
7	A No, I'm not going to it's not going
8	anyplace good.
9	Q No, letting it as far as contact?
10	A I'm just not going to confront him anymore.
11	I'm going to go see the manager.
12	Q When Mr. Reeves explained to you that at
13	this point in the sequence of events that he went to
14	the manager, did you ask him why he went to the
15	manager? Did you ask him what was the purpose of
16	going? What was he trying to accomplish?
17	A Yes, I did.
18	Q All right. What did he say?
19	A He said, I didn't want to get in a
20	confrontation with this man. And he said, I just
21	thought, hey, let management take care of it.
22	Q You continued your interview with

Mr. Reeves, and you indicated that Mr. Reeves indicated to you that he came back into the theater and went and sat down in his seat. Do you remember that part of the interview?

A That's correct.

2.1

Q Did you ask Mr. Reeves as he related to you that he was walking down his aisle to get back to his seat what his thought process was as far as the events that had transpired thus far? What was going through his head as he was walking down the aisle to take his seat back? Did you ask him that?

- A I did ask him that.
- Q And what did he say?

A And he said, I felt like it was taken care of. I went down, told the manager. I was coming back to enjoy the movie. I walked in, went to my seat. Took my popcorn in my hand, and he says, As far as I was concerned, it was all over at that time.

Q All right. Did you ask Mr. Reeves whether or not Mr. Reeves had noticed that Mr. Oulson had either put his phone away or the phone was turned off as he was walking back?

1 A Yes, I did.

2.1

Q And what did Mr. Reeves say about that?

A He said he noticed that the phone -- he was not on the phone. And when he sat down, he said to him, you know, in a way that -- as Mr. Reeves explained to me -- was almost like an apology. If I would have known you were putting your phone away, I would not have gone to the manager. And he felt like it was in a way that -- it was almost an apologetic way of saying, Hey, you know, I'm glad you put your phone away. And this is what he's explaining to me. But that's when Mr. Oulson, he said, kind of started going crazy.

Q As soon as he made the statement to you I wouldn't have reported you to the manager if I knew you were going to put the phone away, at that particular point, immediately that's when Mr. Oulson began to do what, according to Mr. Reeves?

A According to Mr. Reeves, he sat back and was getting ready to enjoy the movie.

Q All right. And this is after he, again, had contact with Mr. Oulson, saying to him if I had

known you were going to put the phone away, I wouldn't have reported you to the manager?

2.1

A He came in, and I don't know if he actually made that comment as he was walking back -- and he couldn't remember exactly -- or if it was right when he sat down. But he made that comment in a way that he thought was kind of an apologetic thing, and that was the end of it for him, he thought.

Q My question to you is, immediately after that, what happened?

A And immediately, you know, within seconds, that's when Mr. Oulson started saying a lot of things to him and threatening him, and he felt very threatened at that time.

Q And did you ask him specifically what threats were made?

A I did. And he could not tell me exactly what threats were made, but he says, I felt as though he was making threats towards me that he was going to kick my ass, and he was going to do something to me physically. And he said, I really felt very threatened at that time. And I asked him, Well, did

he say he was going to kill you? Did he say he was going to kick your ass? And he says, Well, I don't exactly remember those words, but he says, I remember -- he says, In all my times as a police officer that I never felt that way, somebody was in my face that much, and I felt very threatened, and I felt -- and I had that feeling he was going to do something physically to me.

Q Did you follow up at all in order to try to ferret out, if you will, exactly what the basis of his feelings were?

A Yes, I did.

2.1

Q And what did you ask him, and what did he say?

A This might take a little bit of time, but I will give you the best answer I can. He said, as his experience as a police officer, he said, I started my police work, and he says, I worked, you know, violent crimes. He says, I worked a lot of dangerous people. He ended up going all through his program, and he went through a lot of training. He did a lot of training, and he went through a lot of training.

He began to develop himself as a really very highly trained police officer. And he says, What was going through my mind is that me, as a police officer, with all of this experience, I'm sitting here thinking this guy is coming after me. Why am I thinking this? What is it that's making me He says, It's all of the experiences I feel this? had over all of the time that I was on the department. All my training that I did, all of the training that I received was giving me indicators that this individual was a threat, that he was physically a threat to me. And he was totally out of character for everything that he was doing, and he said, I could not imagine somebody in this environment doing what he was doing. And he said. That's what really scared me. He said, But my background and experience and everything that I was doing and everything that I was prepared for, he said, I just put it all together, and he says, I just -- I had this feeling this guy was coming after me. Did you follow up and ask him specifically

what were the indicators that was going through my

mind that he was considering in making his -informing his belief that he was -- that Mr. Oulson
was a threat? Did you ask him specifically --

A Yes, I did.

2.1

- Q -- what those indicators were?
- A Yes, I did.
- Q And what was that?

He says he was coming over the seat. And he says there's a crack between the seats, and I felt like he's coming right over the seats after me. And he says it was his body language, his demeanor, the way he was talking, using the word -- he said when people start cursing like fuck, fuck, fuck and saying it, he said that's kind of an indicator -- and from my background and training, I understand that that's an indicator that something -- the person is totally out of control, out of character, and he's coming after him.

And he said those were the things. His body language, his wording, the way his voice was deflecting, his look on his face. He said from what

I could see -- and he says the theater was darkened, it was loud in there. So he says, I'm trying to put all of this together. And he said, I put what I could together, and that's what I believed at that time.

2.1

Q One of the indicators you just explained to me that Mr. Reeves told you was that he was coming over the seat. Putting that in sequence, when did coming over the seat take place? Because we were talking about him saying please turn off your phone, sitting back in the seat, and then you indicated that Mr. Oulson started cussing at him. So, I mean, I'm at that point in the sequence as to what was his thought process. What made him think at that point in time as to why Mr. Oulson was a threat? Is coming over the seat in that sequence?

A Mr. Reeves, after he made that comment, sat back with his popcorn in hand, ready to enjoy the theater, and he said at that time that's when Oulson turned around, was facing him, making these comments, and he felt like he was coming over the seat. He says he was coming in between the cracks of the seat,

and I felt like he was coming over, and that's when he said, I felt a blow to my head, and there was kind of a blur, something, you know, coming in after me. I didn't know what was happening, but I thought he was coming over after me.

2.1

Q All right. So just so I get the sequence right according to Mr. Reeves, according to Mr. Reeves' statement to you during your interview, as soon as he says I see that you turned off the phone or I wouldn't have reported you to the manager if I'd known you were going to turn off the phone, according to Mr. Reeves at that point is when he felt that Mr. Oulson was coming after him, and that's when he felt the blow to his face? Is that the sequence of events?

A Not quite in the way you're putting it.

What he felt in the sequence of events is after he said that and he sat back, Mr. Oulson at that point is standing up, and he's turning around, and when he's looking at all of this like what's going on, and it started getting more and more aggressive towards him, that's when he turned around, and he was saying

the words he was saying, and he felt like he's coming over the seat, and that's when he felt the blow to his head and thought he had hit him with his fist, because he felt like he was that far over the seat.

2.1

Q Did you ask Mr. Reeves what his thought process was when he explained to you that he believed he was hit possibly with Mr. Oulson's fist?

A When I was asking him what was going on in his mind at that time -- and I did ask him that -- he said it was moving very fast. It was out of con -- you know, concept that he understood, you know, people would react to something that he said, he couldn't believe somebody was reacting like that.

He said, I'm in a darkened theater, and you know a lot of loud music and everything is playing, and he said, I'm sitting in a seat that I'm right behind him. He says, There's nowhere I can really go. He says, It's very close. He says, I'm realizing at that time, he says, you know, physically I'm not the person I was when I was 40. He says, I realize that I don't have any fight in me. I can't fight this guy. You know, this guy is a 6-foot 200

and -- 200-plus pounds guy. And from his autopsy photos it shows that he's in pretty good shape. And with all of the problems that Mr. Reeves had, and he sees Mr. Oulson coming after him, he said, That's why I was scared. He said, I knew I couldn't fight him. I couldn't do anything physically to ward him off. And this guy is coming over the seat after me. And he said, When I felt like I got hit by this fist, and he said, I didn't know what it was. He said, I saw this blur, and then I felt like I got hit with something. And he says, The only thing I could think of I got hit with his fist. And later he said, you know, it's probably his phone. I saw his phone down between my feet.

2.1

And he says, And while all of this is going on, he says, his wife is there trying to restrain him, and she is trying to hold him back. And he says, And that scared me, because now here you have your wife trying to restrain him. He's coming over the seat after me. And he says, you know, then I get hit. He says, It was frightening, very, very frightening.

Q Did you ask Mr. Reeves what his response was to his belief that he was either hit with a fist or possibly with a cell phone? Did you ask him specifically what his response was to that contact?

A Yes, I did.

1

18

19

20

2.1

22

Q And what did he say?

He said when I got hit with whatever it is Α I got hit with, he says, I was stunned. He says, It hurt, and he says, I felt dazed. And he said, I went back into my seat trying to get away from this guy. And he says, I was scooted way back in my seat, and I didn't know what was happening at that time. He said it was a confusing time for him, because he felt like he had been hit. This quy's coming over after him. His wife is trying to restrain him. And he just thinks at that point in time that he has an out-of-control person that's going to do some great physical harm to him, if not kill him.

Q You just made the statement that he went back into his seat. Is that what Mr. Reeves said?

A Yeah, he said he scooted back in. And I forget exactly how he said it, but he was, you know,

demonstrating it. Slid back on his left side, and he says he was just trying to get back. And so his wife was to his right. He was scooting back over to the left.

Q Okay.

22

A And almost kind of -- not laying down but scooting way back in his seat.

Q All right. Did he tell you why he was scooting way back in his seat? Here, let me just make sure that you and I are on the same page.

A Sure.

Decause when you made the statement went back into his seat, my visual impression of those words that right after he got hit, that he either stood up or did something, and then he sat back down. So that was my visual when you said those words. And I assume from your explanation that is incorrect.

A That's correct.

Q Okay.

A That's correct, it's incorrect.

Q Right, I got it.

A Okay.

Q So I just want to make sure that that is --

22

No, he said he was sitting in his seat. Α And he said, I realized -- he said, I couldn't get He said, I couldn't get out of there, because in his training, as he told me, and as I know from a trainer myself, that if he would have stood up, he would have been getting into a much closer proximity with the threat. So he said his thought at that point, he says, I was stunned. He said, I felt like I had been hit, this guy's coming after me, and I was trying to get as far away from him as I could. wanted distance between me and him. And so he said that's when he just kind of scooted back, took his rear end and kind of slid it back towards the front of the seat and leaned back a bit to get away from Mr. Oulson.

Q Did you ask Mr. Reeves while he was -- you used the term scooted back, but I took that to mean that he took his buttocks from the rear of the seat and kind of slid forward to the front of the seat back. Is that what you're talking about?

A That sounds like a pretty good explanation

of what I'm trying to say, yes.

2.1

Q All right. Did you ask him what he was doing at that time while he was scooting back?

A He said, I'm scooting back. And he said, I was just kind of leaning back, trying to get away from him. He said, That's what my thought process was. I need distance between me and Mr. Oulson. So that's what his thought process was at that time. I just want to get further away from this individual.

Q All right. Did you take that to the next sequence as Mr. Reeves has scooted in his chair so that he's leaning back with his buttocks from the rear of the seat bottom to the front of the seat bottom, in the sequence of events did you ask him what he did next?

A Yes, I did.

Q And what did he say?

A He says, I'm sitting there. He says, I'm scooted back. And he said, you know, I -- he said, I had -- still had the popcorn in my hand, and he says, and all of the sudden something is coming in. And he said, I don't know what it was. And he says, I put

my arm up. And he said, I don't know what I made contact with at that time. With his arm, his chest or something, but I made contact with him. And he said -- and that was pretty much what was going on at that exact second. Just making contact with him, trying to defend himself the best he could. And he says, At that time I knew at that time this guy is crazy. He's coming over, and he's going to kill me.

2.1

Q Did you follow up on that with Mr. Reeves and ask him to sequence the events? After Mr. Reeves explained that he put his arm up to defend himself and make distance, did you sequence the events after that? What did Mr. Reeves tell you that he did after he did that?

A Yes, he said he -- he said, I put my hand up to defend myself. And he says, It was just kind of reaction, because I had already been hit in the head. He said, I have problems with right eye, and all of the sudden my left eye -- I feel like something's in it.

Q He had problems with the right eye?

A He says he has problems -- he has problems

of some type, and I don't know what those problems were -- I didn't pursue that -- with his right eye. And he said, All of the sudden I'm hit in my left eye. And he said, I'm just -- don't know what's going on at that time. And he says, And that's when I see something else coming in on top of me. And he says, That's when I had my pistol, and I shot him at that point in time.

Q Did you follow up with that in sequencing events as to -- in relation to Mr. Reeves having his left hand up and scooting to the front of the bottom of his seat and defending himself specifically when he began the process of drawing the pistol from his pants pocket? Did you ask him that?

A I don't understand your question.

Q Did you ask him when he started to draw his qun? That's as simple as I can make it.

A Okay, yeah, I understand it. Because your voice got up there, so I understand you now.

Q All right.

A Okay.

2.1

Q Go ahead.

A Did I ask him? Yes, I did ask him. Wher did you start going for your gun?

Q All right.

2.1

- A And he says, I don't know.
- Q All right. Did you ask him how he started to go for his gun? It's in his right pants pocket. Did you ask him to explain how he got it out of his right pants pocket?

A I did. I asked him all of those questions about how he got the gun out? Why, you know, he had it in his pants pocket? Why didn't he carry it in something else? And he said, I just -- he said, We had just come back from hunting. And he said, I had it, you know, on my chair I guess in his house.

Didn't want to leave it there, and he just put it in his pants pocket. And he said, I don't remember when I took it out or how I took it out. But he says, I knew I was scooted back in. He said, My right leg was extended. And he said, I was extended back. And he said, I don't know. He said, I -- he said, I can't tell you. I don't know.

Q Did he tell you that -- as sequencing the

event, that it was while he was scooted forward and leaning back, and as you indicated he said he was defending himself with his left hand by putting it out, did you specifically ask him at that point is that when you began to draw your gun?

MR. ESCOBAR: I think -- I'm going to object. Asked and answered. He already said that Mr. Reeves told him he does not know when or how he took it out.

## BY MR. MARTIN:

2.1

O You can answer it.

A And that's what I said before. Mr. Reeves does not know when he took it out or how he actually took it out. He said, I was scooted back, and he said, And my right leg was stretched out. And he said, After I got hit with a fist, what I thought was a fist, he said, I knew this was going bad when he's coming over. And he says, I was scared for my life at that point in time. And I asked him a couple of times, in your own thinking, can you think back at all when you took it out of your pocket? When your thought process was to take it out? And he says, I

1 don't remember.

2.1

Q In sequencing the events with Mr. Reeves -just so I get the sequence of events clear in my
head -- the best Mr. Reeves could tell you is that he
began drawing his weapon -- his pistol from his pants
after he was hit with either the fist or the cell
phone?

MR. ESCOBAR: I'm going --

A No --

MR. ESCOBAR: I'm going to object. He's already answered the question about drawing the pistol, and you're trying to put words in his mouth that -- you know, that are inappropriate. He's given you the -- asked and answered how many times now? Three times.

## BY MR. MARTIN:

Q Answer the question.

A He does not remember when he started going for that pistol. He does not remember. He doesn't remember in the sequence of when he started going for that pistol.

Q When is it in the sequence? That's what

1 I'm asking.

2.1

A When is it in the sequence? He doesn't know when it was, and that's what I'm trying to explain.

Q Okay. Well, let me follow up on --

A From the very beginning to the end, he does not know when he drew it.

Q Is that something that's important to your analysis to know at what point a person decides that deadly force is necessary? In that little snippet of time, is it important to know at what point the person decides I have to use deadly force?

A Yes, I did want to know that, and that's why I asked him.

Q But is it important? That was the question.

A Is it important?

MR. ESCOBAR: I'm going to object to that, because you're assuming that taking out the pistol is using deadly force, and that's not the case. It's when you pull the trigger that it's deadly force.

MR. MARTIN: Thank you for your comments.

## BY MR. MARTIN:

2.1

Q My question to you, Dr. Hayden -- and I'm sure you're an intelligent man, and you can understand my questions. My question to you: Is it important in your analysis to know when a person decides that deadly force is necessary in the sequence of events? Is that important?

A Every aspect of this investigation is important to me. That's just one more. But when my experience in asking those kind of questions to officers who have been in gunfights who have shot somebody, I try to understand when their thought process was, when did you believe a threat was there? When did you believe you needed to draw your weapon? And when you draw your weapon, why did you believe you needed to pull the trigger? I have asked that question to well over 200 -- probably 400 police officers and agents that have been in gunfights.

My question to Mr. Reeves was asking the same thing. I wanted to know what his thought process was. Why he thought he had to do that, and when he thought he had to do it. I wanted to know

all of those things. But, you know, if it's not there, it's not there.

2.1

Now, as you read many articles on memory under stress, people do not always remember every little detail. Many officers never remember drawing their weapon, can't tell you exactly what happened right before or even right after. It's a part of understanding how people's minds work. They do not remember every little detail. I understand that, and all of the people who have written articles on it seem to understand that. And that's what I'm trying to explain to you here. I believe Mr. Reeves was in that, that he just doesn't remember.

Q Would you not agree that in determining whether or not it was necessary to use deadly force to prevent a threat in order to determine the necessity part, you have to identify the threat and when it's taking place?

A Yes, you need to understand the threat.

You need to understand that. You know, and I looked at it as a -- as the Supreme Court has basically laid out in Graham versus Connor, from the perspective of

1 an officer on the scene. And I'm trying to understand it. Without any hindsight, trying to 3 understand what's going in his mind, and that's what I want to understand. What is going on in his mind 4 5 at that exact moment? I do want to understand that, because I want to understand when did he feel 6 When did he feel like he needed to use 7 threatened? 8 some force? And when did it get to the point where 9 he felt like he needed to use force that could cause 10 And I was trying to get to that. 11 understand how the memory works, and I understood he 12 could not answer every one of those questions. 13 he told me very, very clearly that when he had -- was 14 dealing with Mr. Oulson in the beginning he realized 15 this was not a rational man. And after he made that comment to him, you know, I see you turned off your 16 17 cell phone, and he started coming around using the 18 words he was using, he turned around, that he was coming through the seats, that his wife was trying to 19 20 restrain him, he said at that point, he said, I knew 2.1 if I didn't do something -- if this guy didn't stop 22 and if I didn't do something, you know, my life was

going to be altered forever, if not death.

2.1

Q In trying to determine the sequence of events and putting what you just told me in a sequence of events, is what you just told me that Mr. Reeves explained to you, was that before or after Mr. Oulson grabbed the popcorn and tossed it at him?

A He never told me that Mr. Oulson grabbed the popcorn and tossed it at him. He told me that he had the popcorn in his hand, and he doesn't really know how that popcorn -- he just knows that the popcorn was on the floor afterwards. So he doesn't remember him grabbing the popcorn and throwing it at him. He sees him coming in, and he sees a fast movement coming in on top of him, knowing at that point this guy is coming back after him, and then another one immediately, immediately within a half a second about he's coming back in with that second blow.

Q And did you ask him his thought process when he says he saw him coming in with his second blow, what did he feel like he needed to do? Did you ask him that?

1 A Yes, I did.

2

3

4

5

6

7

8

12

13

14

15

16

17

18

19

20

2.1

22

Q And what did he say?

Α He said, At that time, he said, I knew this was a deadly attack on me. And he said, I knew I couldn't fend him off in any other way. And he said, If he hit me in the head -- and as law enforcement officers have been taught right from the very beginning of their training -- and I think most people understand this. And there are many situations where we understand that hands, fists can kill. You hit somebody in the head, the head is a part of your body, that if you destroy the brainstem, you can kill somebody very easily. You can do all kinds of damage by -- to their face, their eyes. doesn't take much. I have talked to many officers who have been in bad fights. A good friend of mine was confronting somebody, thinking he had things under control, and the guy almost beat him to death, and he spent over a month in intensive care just because the guy hit him with his hands. No other tool. Hit him with his hands.

1	taught that. We understood that. He said, I know
2	hands can kill. And he said, And here comes this guy
3	after me. And he said, I know he's going to punch
4	me. He says, He's a big guy, he looks like he can do
5	this damage to me. And he said, I was scared for my
6	life at that point in time.
7	Q In your review of the material that was
8	provided to you by the defense, did you review the
9	Tampa PD personnel file on Mr. Reeves?
10	A Yes, I did.
11	Q All right.
12	MR. MARTIN: Would you mark this as State's
13	Exhibit Number 1, please?
14	(Whereupon, the Employee Performance
15	Evaluation was marked as State's Exhibit
16	Number 1 for identification.)
17	MR. MARTIN: Richard, let me just cut to
18	the chase
19	MR. ESCOBAR: Okay.
20	MR. MARTIN: so we don't spend a lot of
21	time (indicating document.)
22	MR. ESCOBAR: Okay.

1	MR. MARTIN: This paragraph (indicating.)
2	MR. ESCOBAR: I want him to read the entire
3	exhibit, though, before he comments on any part of
4	it.
5	BY MR. MARTIN:
6	Q Let me show you what's been marked as
7	State's Exhibit Number 1, which is one of the
8	documents provided by the defense as one document
9	from the Tampa Police Department personnel file of
10	Mr. Reeves (tenders document.)
11	(Whereupon, the witness reads the
12	document.)
13	MR. ESCOBAR: Glenn, can we have that
14	what's the date of that? Is that on the record?
15	MR. MARTIN: It's in the thing. It's
16	MR. ESCOBAR: I think it's 1979 or
17	something.
18	MR. MARTIN: No, it's August 5th, 1980.
19	MR. ESCOBAR: 1980.
20	THE WITNESS: Yes, this appears to be one
21	of the documents, yes.
22	BY MR. MARTIN:
	DI MI. MARIIN.

1 Q All right.

2.1

A August '79 to August '80.

Q Right. It's an Employee Performance
Evaluation for Curtis J. Reeves, Tampa Police
Department, Uniform District II. At the time he is a
Police Lieutenant, and the evaluation period is from
5 August '79 to 5 August 1980. Correct?

A Yes.

Q Okay. What I'd like to do is direct your attention to the second page, the second paragraph. Paragraph number 9, note the employee's strong points. And it's written: Lieutenant Reeves' strongest quality lies in his keeping abreast of current information that pertains to his position as Field Commander and TRT member, and his forceful personality. These qualities have shown to be assets to his performance. And driver's license and all department equipment checked. Personnel check has been purged.

A Uh-huh, okay.

Q All right. The observation, at least back in 1980 when Mr. Reeves is a police officer, a fellow

1 police officer indicated his strongest point or his 2 strongest strength -- that doesn't make any sense. 3 What does it say? MR. MICHAELS: It doesn't say spectral. 4 5 Strongest quality lies in keeping --6 Yeah, strongest quality is his forceful Q 7 personality. Do you see that written there? 8 Α I see that part of that. Keeping abreast 9 of current information that pertains to his position 10 as Field Commander and his forceful personality. 11 Yes, I do see that. 12 0 13 to have a forceful personality. There's nothing

And that's not unusual for a police officer wrong with that as a police officer, is there?

14

15

16

17

18

19

2.1

22

There's nothing wrong with that as a police officer. I wouldn't say all officers have a forceful personality, but it's not -- it's good, it's not bad.

But a colleague of his, a fellow police officer who was doing the evaluation at least opined in that person's opinion that that was a quality that was one of Mr. Reeves' strongest qualities, his forceful personality, right? In 1980?

1	A That's the terminology that he used, yes.
2	Q Let me have that back.
3	A (Tenders document)
4	Q Thank you.
5	(Whereupon, Mr. Martin tenders document to
6	Mr. Escobar.)
7	MR. ESCOBAR: What Exhibit Number?
8	MR. MARTIN: Exhibit Number 2.
9	(Whereupon, 2005 Florida Session Law Chapter
10	2005-27 was marked as Deposition Exhibit
11	Number 2 for identification.)
12	BY MR. MARTIN:
13	Q Let me show you what's been marked for this
14	deposition as State's Exhibit Number 2. It is titled
15	2005 Florida Session Law Chapter 2005-27, Florida
16	2005 Session Law Service. Specifically it relates to
17	Florida State Statute 776.012, which became effective
18	October 1 of 2005. That's the document that I'm
19	handing to you (tenders document.) I'll give you a
20	moment just to read it, and then I have some
21	questions for you.
22	(Whereupon, the witness reads the

1 document.)

1.3

2.1

A Okay.

Q Prior to coming in the courtroom today, had you ever read Florida State Statute 776.012?

A Yes, I have read this before.

Q Okay. This was the statute in effect at the time of this particular incident on January 13th, 2014. Other than reading the words in the statute, did you do any research regarding this particular statute as far as attempting to determine how the Florida courts have interpreted this particular statute?

A As an expert witness in this case, I didn't believe it was my duty as an expert, not an attorney, to opine on anything that was legally in Florida state law at that time. I read this as a law enforcement trainer, as a law enforcement expert in understanding how a law enforcement officer would look at this. And by looking at this, I would say I can't understand why charges were brought against him. If you --

Q Well, thank you for that gratuitous comment

but --

2.1

22

A You're welcome.

0 -- why don't we just wait until I ask a Statute 776.012, use of force in defense question. of person, which is the State's Exhibit Number 2 for this deposition: A person is justified in using force, except deadly force, against another when and to the extent that the person reasonably believes that such conduct is necessary to defend himself or herself or another against the other's imminent use of unlawful force. However, a person is justified in the use of deadly force and does not have a duty to retreat if: He or she reasonably believes that such force is necessary to prevent imminent death or great bodily harm to himself or herself or another or to prevent the imminent commission of a forcible felony.

What I'd like to do is go through with you your understanding of Florida State Statute and how it relates to this particular case. Before we do that I need to kind of get a feel for how you define, if you will, in your own mind the terms used in the statute. That will help me.

1 Α Well, are you asking my opinion on this? 2 No, there is no opinion here. Q 3 Α You just asked me what then? Explain to me what you're asking me then. 4 5 I am. One of the concepts that has to be 6 considered -- and I know we take this in total, but 7 to discuss them, we can't just jump around and talk to them in total. We have to talk about them one at 8 9 a time. 10 So one of the concepts is imminent danger. 11 Tell me your understanding of imminent danger. 12 is that? 1.3 Α Well, imminent -- imminent is a term --14 basically it's used as in elastic. It's not 15 immediate, it can occur at any time. And what do you mean can occur at any time? 16 17 What does that mean? 18 Imminent, it's not immediate. It can occur 19 within a few seconds, a few minutes. It's a good 20 chance it's going to occur. And it's elastic, so 2.1 it's one of those things that it's very hard to put 22 an absolute definition on imminent. It's kind of

elastic, and I think the courts put it that way so it is elastic.

Q Based on your training and experience and the doctoral thesis that you wrote, are you aware of -- I'm going to use the term concept, because I can't think of another word right now. The concept of certain criteria making up -- or let me start over, because that didn't come out right at all.

You know what? We're going to take our break now, because I need to walk around.

(Whereupon, the deposition recessed at 10:26 a.m. and resumed at 10:40 a.m.)

(Whereupon, the DVDs were marked as State's Exhibit Numbers 3 & 4 for identification.)

## BY MR. MARTIN:

2.1

Q We're back on the record after our midmorning break. We're going to start going through the factual basis of this particular case. What I'd like to do before we do that, I want to take the time to have you watch two of the videos so you have it fresh in your mind when you go through this, and

we'll be going back and forth and referring to the videos as we go through the material.

The first one would be State's Exhibit

Number 3. It is a DVD produced by the FBI under Case

Number 356E-TP4392101, Cobb Movie Theatre. It is

further described as 1/13/14, Theater Camera 11 and

12, paren, 13:14-13:26, full frame, hyphen, realtime,

paren, blue. And we had testimony yesterday from the

FBI that this is the raw footage off the EXE

proprietary DVR. The blue screens are where there's

no recording. So the only thing he's done to it,

according to his testimony yesterday, is in the blue

sheet he just put no recording so we know what the

blue screens are.

A Okav.

2.1

Q The next one I'm going to show you will be State's Exhibit Number 4. It is the FBI DVD, the same case number, Cobb Movie Theatre. It was produced during exam number 2 by the FBI. It is Cameras 11 and 12. It is an enhanced video. It's further described as 1/13/14, 13:14:42 to 13:26:56, resized 170 percent, color removed, brightness

enhanced. We had testimony yesterday from the FBI this is an enhanced video. It is a little bit bigger than the raw one. And he did insert the black screen where there is no recording in videotape. So if you'll accept that as what you're looking at when you see the black and blue, and that was the testimony we had yesterday. All right, sir?

A Okay.

2.1

Q So what I'm going to do, these will be attached to the depo. I have them on my computer. The quick time features work a lot quicker if I use it off the hard drive, so we're going to play it off the hard drive, but these are going into evidence.

So what I'd like to do is play State's Exhibit Number 3. It is realtime. It's about 20 minutes, but I want you to see exactly what is recorded, not recorded, and the sequence of events that's actually recorded.

A Okay.

Q All right, sir?

A Uh-huh.

Q So right now we're going to play State's

1	Exhibit Number 3 attached for the depo. I'm not
2	going to comment or anything. I just want you to
3	A Once you start playing, can I pull it
4	closer to me?
5	Q I'm going to make it bigger, and, yes, you
6	can pull it closer, but let me get it started.
7	(Whereupon, Mr. Martin plays the video.)
8	MR. ESCOBAR: I just want to make one
9	objection for the record, in that you're showing a
10	recording of both Camera 11 and 12 playing at the
11	same time, which is very difficult for the human eye
12	to focus on any one of the cameras.
13	(Whereupon, Mr. Michaels leaves the room.)
14	MR. ESCOBAR: Glenn, 11 is on the left and
15	12 on the right?
16	MR. MARTIN: Correct.
17	MR. ESCOBAR: So 11 would be on the as
18	you're facing the screen, on the right-hand side of
19	the theater?
20	MR. MARTIN: Correct.
21	MR. ESCOBAR: And 12 would be as you're
22	facing the screen on the left side of the theater?

1 MR. MARTIN: Correct.

2 THE WITNESS: So far the FBI did a great

3 job.

7

22

4 MR. ESCOBAR: Two blue screens?

5 THE WITNESS: Two blue screens with

6 numbers.

(Whereupon, Mr. Michaels enters the room.)

BY MR. MARTIN:

What I'm going to do now, Dr. Hayden, is play State's Exhibit Number 4, which would be the enhanced video. As I indicated, this is the one produced by the FBI. It's not the raw data with the blue screen, so where you see the black it was There are some places that are inserted by the FBI. some gaps, and I'll point those out to you that the black was not inserted, but when that becomes an issue, I'll point that out to you so you're well aware of it. That was the reason I wanted you to watch State's Exhibit Number 3, so you could see exactly where the blue screens come in. If there's any issue about whether or not there's a gap in the recording, we can always go back to Exhibit Number 3.

1 All right, sir? Α Okay. 3 Q All right. (Whereupon, Mr. Martin plays the video.) 4 5 (Whereupon, Mr. Michaels leaves the room.) 6 BY MR. MARTIN: Dr. Hayden, we took a few moments to -- I 7 8 gave you an opportunity to review State's Exhibit 9 Number 3 and State's Exhibit Number 4, videos 10 provided to the State by the FBI that we recovered 11 from Cobb Theatre at the -- of the night of the 12 shooting. 13 What I would like to do is first ask you, 14 did you ever sit down with Mr. Reeves and play any of 15 the videos and ask him to sequence the events for 16 you, and explain to you at this part in the video 17 exactly what I was doing, what was going on? 18 You know, I don't -- I don't remember if we 19 did or not, because I did not -- I don't remember 20 going over it in detail with him, looking at the 2.1 video at all, no.

For me it kind of begs the question, I

22

1 don't know if that's a yes or a no. Can you just --I don't know if it's a yes or a no either. Α 3 I don't remember --MR. ESCOBAR: Glenn, if it will help you 4 5 and help him, we didn't do that. 6 THE WITNESS: Yeah, I don't remember 7 looking at the video at all. 8 With him? MR. ESCOBAR: 9 THE WITNESS: With him, with him, yes. 10 MR. MARTIN: That's what I'm talking about. 11 MR. ESCOBAR: Yeah, no, no, we didn't do 12 So just to let you know that -- that didn't 13 happen. BY MR. MARTIN: 14 15 All right. After you conducted the interview with Mr. Reeves, the one that we went over 16 17 for almost an hour, without Mr. Reeves there, did you 18 attempt to go back and look at the video to determine 19 whether or not any of the video is consistent or 20 inconsistent with the statement that Mr. Reeves made 2.1 to you? 22 Α Yes, I did.

Q All right. And how long after the interview of Mr. Reeves did you do that?

A I had -- I had several of the videos, and I got more videos from Mr. Escobar, and I went over it, spent a lot of time frame by frame by frame by frame, and not just watching the video as it plays, because it's very difficult to pick up, because it is so fast. When I went frame by frame, I could pick up everything that I saw, and that confirmed what Mr. Reeves was saying to me was consistent.

Q We're going to start going through the facts. The way we're going to do this is by -- I'm going to use the defense pleading for the immunity as kind of an outline and go through those facts with you. That way it's structured and organized, and we can take it fact by fact?

A Okay.

2.1

Q Let me go ahead and put on the record what I'm talking about. It is the Defendant's Motion to Dismiss based on statutory immunity pursuant to Sections 776.032, paren, 1, comma, 776.013, paren, 3, comma, and 776.012, paren, 1, closed paren, hyphen,

1	paren, 2, closed paren, comma, Florida Statute 213.
2	This particular defense pleading is filed in the case
3	of State of Florida versus Curtis Reeves,
4	CRC-1400216FAES, with the Clerk of Court in Dade
5	City, Florida. It was E-Filed. The filing number
6	34188502, and it was E-Filed on 11/6/2015. The date
7	stamp I'm sorry, the timestamp is 04:35:40 p.m.
8	(tenders document.)
9	We're going to start on Page 23 of
10	A Are you marking this as an exhibit?
11	Q No. We're going to start on Page 23. It
12	will be the third paragraph down. Mr. Oulson was
13	43 years old, 6 foot 4 inches tall and weighed over
14	200 pounds.
15	Do you see where that is?
16	A Yes, I do.
17	Q All right. And are you aware of any facts
18	in this case that supports that statement?
19	A Yes.
20	Q And what is that?
21	A I believe it was in the autopsy they talk
22	about his size. His size has been talked about

several times, but I believe they weighed him out and everything, if I remember that correctly. I'm not sure. But I remember it was 6 foot 4, 200 pounds or 205. Somewhere in there.

1.3

2.1

Q All right. To your knowledge, based on any of the facts or circumstances that you have on January 13th, 2014, did Mr. Reeves know that information?

A Mr. Reeves, as a professional law enforcement officer, would have made an assessment at that time what kind of size this individual is.

Q Did you ask him specifically? That's what I want to know. Did Mr. Reeves have that information?

A I don't -- he did not say 6 foot 4. He did not say 200 pounds. He said that he was a big guy.

Q All right. The next paragraph on Page 23, I think it's the second sentence. The chairs in which Mr. and Mrs. Oulson were seated substantially reclined backwards upon application of pressure.

Based on your knowledge of the case, is there any facts that you are aware of that support

1	that statement?
2	A I don't know what the definition of
3	substantially is, but they do recline backwards when
4	you put pressure on it.
5	Q Do you know how far?
6	A I sat in the chair, and a few inches back.
7	I don't know exactly. I sat in the chair and leaned
8	back in it.
9	Q All right. And when did you do that?
10	A When I went to Tampa to talk to Mr. Reeves.
11	Q You went to Cobb Theatre?
12	A Yes, I did.
13	Q All right. Well, let's digress a little
14	bit. Was that about a month ago, the same time as
15	you interviewed Mr. Reeves?
16	A The same day, yes.
17	Q The same day? Did you buy a ticket to get
18	in?
19	A I did not.
20	Q What arrangements did you make to get into
21	the theater without buying a ticket?
22	A I was with Mr. Escobar, who made
	1

1	arrangements with the management.
2	Q And which theater did you go into?
3	A Theatre 10, I believe it was. The same one
4	that this incident occurred in.
5	Q What time of day was this?
6	A It was in the morning. No, wait, was it in
7	the morning? I had just got there, so maybe it was
8	midday.
9	Q Was Cobb Theatre open for business?
10	A No. I did not see anybody there.
11	Q Was there a Cobb representative with you at
12	all times while you were there?
13	A Not at all times, but he was with us, yes.
14	Q Do you know who that person was?
15	A I do not.
16	Q The person that was with you, other than
17	allowing you entrance, did that person perform any
18	other task while he was with you, relating to you
19	viewing the theater?
20	A Yes, he did.
21	Q And what task did he perform?
22	A He put the lighting on in the theater as it

would have been and put previews on.
Q And what is the lighting setting as it
would have been?
A It was diminished lighting. It was not
dark, but it was not light in there. That's the
setting that they would have had during previews.
Q And do you know what that setting is?
A I do not know.
Q And did you provide any information to that
Cobb representative about what setting to set the
lights?
A I did not.
Q Do you know what the setting was? I know
you've described what it looked like, but do you know
the setting?
A I do not, no.
Q You indicated that one of the tasks of the
employee was to play previews. What preview was
playing?
A I don't remember what the previews were.
It was just put on the previews. And I'm not sure
what the previews were.

1	Q How many previews were played, or was just
2	one played over and over?
3	A I don't remember. I just know he played
4	it, and it wasn't on all of the time.
5	Q You indicated that you sat in the chair.
6	What chair did you sit it in?
7	A I sat in several of the chairs.
8	(Whereupon, Mr. Michaels enters the room.)
9	Q Were you able to identify the seat that
10	Mr. Reeves was seated in at the time of this event?
11	A Yes, it was pointed out. And I forget
12	which one it was. Eight or nine on the back row. I
13	forget which one it was, but it was the seat that he
14	was in.
15	Q Did you sit in that seat while the lights
16	were adjusted, as you described, and the previews
17	played?
18	A Yes, I did.
19	Q And during that time period that you were
20	seated in the seat that Mr. Reeves was in at the time
21	of this event and the previews were playing, and the
22	light was adjusted as you described, what

observations did you make?

2.1

A It was limited light in the theater. It was noisy. Mr. Escobar and I were in there, and we were talking, and it was more difficult to understand and hear what he was saying and to see everything in the theater at that time.

Q I apologize to you. When you say "noisy," you were talking and then you trailed off, and I just didn't catch what you said. I apologize.

A Okay. We were talking, and I was sitting in the chair. Mr. Escobar was in the row ahead of me, and we were talking. We were moving around in different chairs. I was trying to understand just how difficult it would be to hear in there and how noisy it was, and how the lighting condition was.

And as I, myself, looking at it, how did it appear to me? And it was diminished lighting, and the sound from the previews made it louder in there and more difficult to talk.

Q Were you able to sit in any of the seats of any of the patrons who reported to law enforcement that they saw certain segments of this event?

I sat in several of the different seats 1 2 while I was there. 3 And what seat did you sit in? What patron's seat? 4 5 I can't tell you. I went to the left. 6 went to the right. I went up and sat in Mr. Oulson's 7 chair, in that area. 8 And did you take any photograph to Q 9 memorialize your being at the theater on that day? 10 Α I did not. 11 Did you take any notes? Q 12 I did not. 13 You indicated that you wanted to understand Q 14 that environment, the way it was set up, too. 15 indicated how noisy it was. It was hard to hear and 16 hard to see; is that correct? 17 It wasn't hard to see. It wasn't hard to Α 18 hear everything. I mean, I could hear the previews

going on. I could see Mr. Escobar. I could see

like I had enough that I could see every little

other things in the theater. So when you say "hard

to see, " it was diminished lighting so I didn't feel

19

20

2.1

22

detail in the theater, nor could I hear everything that was going on. We were able to talk. And we were able to talk, but it wasn't as if we were sitting here like right now.

2.1

Q Were there other individuals, such as the Cobb employee that was moving around the theater while you were in there sitting in any of the seats?

A I don't remember him moving around in there. He came in to see if everything was okay and if we needed anything else, but I don't remember him standing in there while we were doing any of this.

Q Did you sit in Angela and Corporal Hamilton's seat?

A I don't remember if I sat -- I don't believe -- no, I didn't. I can say I didn't sit in their seat, no.

Q Did you sit in Mark Turner's seat?

A In Turner's seat, I sat down at the end, so it might have been the first or second, third seat in there.

Q Did you sit in the Cummings' seat, which would be the same row as Mr. Oulson?

A Here again, I don't remember exactly what seats I sat in. I know I sat in Mr. Reeves, in Mrs. Reeves' seat in that back row, and at the end, whether it was the first, second or third seat, I don't remember, in Mr. Oulson's seat. They were the only seats I can say I actually remember sitting in. I know I sat in a couple of others. I have a bad back, too, so I prefer to sit sometimes instead of standing, so I just sat down while we were talking.

2.1

Q From Mr. Oulson's seat did you attempt to reach over and recreate grabbing the popcorn or striking someone in the seat?

A Yes. As I sat in that seat, I did stand up, turned around, tried to see how far back I could go and, you know, what you would need to do in order to get back to there. And, yes, I did do that.

Q Explain to me then, take me step by step.

As you sat in the seat, what did you recreate?

You're sitting there, just take me through step by step.

A Mr. Escobar and I were in there. And if I was sitting in Mr. Oulson's seat, Mr. Escobar was

back in Mr. Reeves' seat. And I stood up and at that point just tried to lean back in the seat to see how much, you know, I could lean back. And I --

- Q When you say lean back, I'm --
- A Pitched over the back of the seat, the back of the seat. Leaning over the seat.
  - Q Okay. When I think lean back, I think --
  - A Yes, over the top of the seat.
  - Q And did --
- A And then with Mr. Reeves, I sat in Mr. Reeves' seat, and Mr. Escobar was up there in Mr. Oulson's, and we kind of just went back and forth, sitting down in different seats there and just doing different things to see what it looked like.
- Q When you stood up and attempted to lean over the seat, tell me how you did that.
- 17 A Stood up.
- 18 Q Uh-huh.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

2.1

22

- 19 A Turned, leaned.
- 20 Q All right.
  - A I don't know how else -- what else you're expecting.

1 0 Let me go through some scenarios for 2 you, because I don't know exactly what you did. 3 Α Okay. The seat bottoms come up, do they not? 4 0 5 Α Yes, they do. 6 So my question to you, with that Q. 7 understanding: When you attempted to lean over, were 8 your shin bones or your thigh up against a down seat 9 bottom, and you tried to lean over? Was that your 10 scenario? 11 I stood up and I turned around, and I had 12 the seat down to see what that would be like. 13 then the seat went back up, and I went back into the 14 seat more, which would have been my -- I quess my 15 knee area more on the seat in that area but not 16 kneeling on the seat, but standing there with my knee 17 kind of back on the seat leaning back over the top of 18 the chair, trying to see just what I could do on 19 that. 20 All right. And you're talking about your 2.1 knee in the seat bottom of Mr. Oulson?

Not in the seat bottom, no. The seat is

22

Α

1 lifted up, so my knee is back against the seat as 2 it's --3 0 So your feet are on the floor? Both feet 4 are on --5 Α My feet are on the floor, yes. With it 6 folded. 7 Q. So with the seat bottom up, both feet on 8 the floor and whatever distance that is, your knees 9 were touching the seat -- metal part bottom we'll 10 call it, not the cushion part because it's up, right? 11 Α Right. 12 And with your feet on the ground, did you 13 attempt to lean over? 14 Α Yes. 15 And were you able to -- in that position -lean far enough for your right hand to come in 16 17 contact with whoever was sitting in Mr. Reeves' seat, 18 the left thigh? 19 I know I could get back far enough. Α Ι 20 don't believe I could have at that point reached the 2.1 back of the seat where his head might have been. 22 Q Did you attempt to do the lean with the

seat bottom down and one of your knees in the seat, and using your left hand to prop yourself up against the back of the seat back and reach over and either get close enough to hit someone in the face or to grab the popcorn off the left thigh?

A As you, I have bad back problems, so I didn't want to stand on the seat and think I'm going to fall. I just don't feel steady anymore, so I did not do that. I'm six foot, though, and my wingspan is about a six-foot wingspan so...

Q Well, the terminology -- we have to make sure we're both on the same page.

A Sure.

2.1

Q When I think of standing on the seat bottom, I think of two feet on the seat standing up, like I'm trying to change a light bulb.

My question to you was, did you put your left or right knee on the seat and use that to kneel and lean over? So both feet would not be on the floor. Just a knee in the seat, and one wherever it hangs.

A I don't remember trying that, no.

Q Okay. Do you recall the bond hearing testimony of Corporal Hamilton when he described what he saw Mr. Oulson doing when he reached for the popcorn?

A What he said from what I remember, that he

A What he said from what I remember, that he was leaning back over the seat, and that's what he described. Now, I don't remember it in any greater detail than that, but he leaned back over the seat.

Q All right. Do you recall any statement about being -- having a knee in the seat?

A I don't remember that.

2.1

Q Do you recall Mr. Hamilton at the bond hearing indicating that after Mr. Reeves -- I'm sorry, after Mr. Oulson was shot, he stood up?

A I do remember that being said. I'm not sure if it was Corporal Hamilton that said that or not. I don't know. But I remember that being said somewhere.

Q Extrapolating a little bit, but after shots, stood up, that begs the question as to the position of Mr. Oulson when he was shot, other than standing. I mean, is that what we can conclude from

1	that statement? That's what I'm asking you.
2	MR. ESCOBAR: Glenn, can you clarify? Who
3	stood up?
4	MR. MARTIN: Mr. Oulson.
5	MR. ESCOBAR: Stood up after the shot?
6	MR. MARTIN: Yeah.
7	BY MR. MARTIN:
8	Q Do you remember that testimony from
9	Mr. Hamilton at the bond hearing?
10	A I don't remember that exact words, no.
11	Q What words do you remember?
12	A I remember, as I said, that he leaned back
13	over the seat, and I think he said he grabbed the
14	popcorn.
15	Q All right. Did you ever take up the seat
16	of Mr. Reeves while you were in the theater and have
17	some other staff member or someone else present there
18	lean over so that you could in an attempt to get
19	Mr. Reeves' perspective of what he could see?
20	A Yes, I did.
21	Q All right. You're sitting in the seat, and
22	tell me what happened. I'm going to break this down.

Here's where I want to go with it: I first want you to explain to me as you're sitting there what the other person was doing. Just describe -- and if it was a couple of scenarios, we'll go through each one. And once you're done with that, then we're going to go to, did you attempt to do anything in response consistent with Mr. Reeves? And then I'm going to switch them together. So what I'm saying is, did you attempt to do the dance, if you will, where someone's coming over, and you reacted like Mr. Reeves described, so you could attempt to see what he saw?

A Yes, I did.

2.1

- Q All right. So let's -- we have to break it down, because otherwise --
  - A Sure, absolutely.
- Q All right. So let's break it down. You're sitting in the seat, all right, and there's another individual who is leaning over the back of Mr. Oulson's seat back. So just one scenario, tell me how that person started and how that person ended up?
  - A I was sitting in Mr. Reeves' seat, and

Mr. Escobar was in Mr. Oulson's position, and he turned around and made a motion back towards me, and I leaned back in the seat to see just what it would have been, or if I was just sitting there without leaning back. And then I leaned back to see just how it felt. You know, what he was seeing at that time.

Q All right. And I need to -- I'm really trying to fine-tune exactly what the actor was doing and so that you could have that observation.

You indicated that the person turned around and made a motion. So you need to describe that a little bit better, because it doesn't give me in an XY axis exactly where the person was. So standing, sitting, kneeling? Doing handstands? Do you see what I'm saying? So describe it for me.

It begins with two people sitting in the seat with their back to the seat facing the screen, or does it start with Mr. Oulson already -- you know, the actor already standing? See what I want to do?

A Right.

2.1

Q So take me from the very beginning, please, sir.

1 MR. ESCOBAR: Glenn, just to save you time, 2 we didn't try to recreate this. 3 MR. MARTIN: I'm just asking what he saw. MR. ESCOBAR: Okay. 4 5 BY MR. MARTIN: 6 So what did the, quote, actor do that was Q recreating -- well, that was -- I'm going to use 7 that. I understand. 8 9 MR. ESCOBAR: Yeah. 10 MR. MARTIN: You weren't recreating. 11 understand that. 12 MR. ESCOBAR: No, okay. BY MR. MARTIN: 13 14 That was providing you movement so that 15 from your position you could see what that looked 16 like? Is that fair enough? 17 He was standing there, he had turned around Α 18 and leaning back in the seat, and he made a gesture 19 towards me like he's reaching (indicating), like we 20 saw that the -- in the video that was done by 2.1 Mr. Oulson. Where he comes out and he reaches like 22 that (indicating.) I just wanted to kind of see now.

1 Q And was that reach towards your face, 2 towards your thigh? Do you know? 3 Basically towards my hand area where I was Α sitting there. And then I leaned back to see just --4 5 Wait, wait a minute. Your hand area? 6 Α My hand. I'm sitting here like I'm sitting 7 in the chair. 8 So are your hands on thighs, or they're up Q 9 on your shoulder? How --10 I believe my hands were right about on the 11 armrest area. 12 Q Okay. 13 Α And Mr. Escobar -- he and I were talking. 14 He had stood up, and he's facing me, and he's 15 talking, and then what he does is make a movement in 16 towards me, and I'm sitting there, and he basically 17 could come in, and he could grab my hand. So I 18 basically decide to sit back to see and -- you know, 19 how far away I would be. 20 All right. And was there any type of video 2.1 of that or photographs of that? 22 No, there was not. Α

1	Q Of those movements?
2	A No, there was not.
3	Q All right. And when you made the movement
4	I'm going to call it scooch. Is that the term
5	that you used before?
6	A I don't remember if that's the term I used,
7	but it's a good term.
8	Q All right. You took your buttocks and slid
9	it towards the front of the bottom of the seat,
10	right?
11	A Yes.
12	Q And leaned back?
13	A Yes, a little bit, yes.
14	Q All right. And what observations did you
15	make when the actor moved the hand towards you and
16	you moved your buttocks from the rear to the front of
17	the seat bottom?
18	A Well, the observation I made in there
19	while I was sitting in there that I'm in a confined
20	area. I'm in a seat that doesn't give me a whole lot
21	of latitude to scoot way out away. And I'm in a
22	confined area, in a darkened theater, loud noises,

and all of the things that are going on. So my assessment of that was I'm in a bad position at that point if somebody in Mr. Oulson's seat had decided to come over after me.

1.3

2.1

Q Was there any observations made with an actor portraying Nicole Oulson as far as in her seat and what Mr. Reeves could see from his seat? See what I'm saying?

A Well, I remember sitting in her position and turning my body as she said she turned her body and also as Mr. Reeves suggested she did, just to see how that would be and how she could have done that.

Q And how did she describe she turned her body? Tell me exactly what that is.

A She doesn't remember if she used her right hand to kind of boost herself up. She didn't know if she was standing. She didn't know if she was kind of sitting in a sitting motion, but she remembers putting her hand up and -- somewhere around his chest area she remembers putting that hand up. And that would have been the left hand. So she felt that she was -- might be, you know, standing up and putting

her hand there. And when I did that, I realized she had to be turning somewhat in order to do that.

- Q All right. It's a little bit of re-creation here, so let's just talk about that a few minutes. What is your factual basis that she doesn't recall if she's standing up or not? Where did you get that?
  - A Her statement.
  - Q Which one?

2.1

- A The deposition.
- Q All right. Did you sit in any of the patrons' seats and -- while two actors made movements in the area of Mr. Reeves' and Mr. Oulson's seat to determine exactly to what detail you could see?
  - A No, I did not.
- Q And were these actors making these movements during the time that the lighting was whatever it was set by the Cobb employee and the previews were running?
- A It was just myself and Mr. Escobar, and we were doing it while the previews were on, and then when the lights came back on, and we were sitting in

1	there and standing in there moving around and	
2	talking. So it was during both times, if I remember	
3	correctly.	
4	Q So lights I'm going to call it fully on,	
5	but house lights?	
6	A Yes.	
7	Q And then whatever lights were set for you	
8	for the previews?	
9	A That's correct.	
10	Q So both?	
11	A Yes.	
12	Q Did you do anything else while you were	
13	there?	
14	A No, not that I can remember.	
15	Q Lawyers hate that. It always comes back to	
16	bite them.	
17	A What's that? "Not that I can remember"?	
18	Q Not that I can remember.	
19	A I hate to give you that, but I just don't	
20	I don't remember anything more that was done. We	
21	said goodbye, and we left.	
22	Q How long were you in there?	

A I wasn't timing it, but I think we were in there probably a half an hour or 45 minutes maybe. I don't think it was an hour, but it could have been.

22

Q Continuing on Page 23: After Mr. and Mrs. Reeves sat down, the lights were either completely turned off or substantially dimmed, causing the interior of the Movie Theater 10 to become dark.

Now, you indicated you were in there with the house lights. My first question, are you aware of any facts based on witness testimony or your own observations there during your time at the theater that the theater was, quote, dark?

A I was not in the theater when it was completely dark, nor do I remember anything in any statement that people said that it was completely dark.

Q But whatever the house light settings were, you were able to see people coming up and down the stairs on each side of the seating area?

A As the previews were playing and the lighting was at, yeah, you could see. You could see, not clearly, but you could see.

Q You could make out their human bodies, you could make out the difference between hands and feet and head?

A Yes.

2.1

Q As far as being able to see other patrons sitting in the seat, you could see that, too?

A You could see probably figures sitting in the seat.

Q So you know they were humans and not dogs, right?

A It would be most likely, yes.

Q And you were able to see movements? You could see hand movements? You could see whatever was visible, whatever wasn't blocked, you could see -- you could see movements? You could see turning of heads, shifting in the seats?

A The way you're saying that makes a certain assumption. When you say could see, I can see you right now, but in a darkened area, I can still see you, but I don't see the details. So in the darkened theater where it was more dark, the visibility is not as good, so, therefore, I can't see all detail, nor

do I believe anybody else could see all detail in there. You'd see a body. You might not be able to see details of what's actually -- what they're doing.

Q Could you see movement of shoulders, movement of hands? Movements like this (indicating)?

A Well, if it's right close to you, yes, you'd be able to see it. Probably further away, you might be able to see movements of hands, throwing it up and stuff like that.

Q But if the hand went up, you wouldn't be able to discern if there was a ring on it or what?

A That's correct.

1.3

2.1

Q That's the kind of detail you're talking about?

A Not only that detail, but, you know, how far did the hand go up, what would actually happen? Diminished vision at that point in time. Eighty percent of our knowledge through gathering information comes visually, and a little bit more from hearing. So when lights are turned down and diminished, you lose a lot of that ability to gather information. And the brain, when it doesn't see

everything, doesn't register all of the detail you might want to see.

Q And where does that information come from?

A From years and years of research, starting back in 1965, I guess, when I was going through a lot of military training on vision and working in

Q And who taught you that?

darkened areas and things like that.

2.1

A I can go back to several things. I went through several different trainings with the military. I had a lot of specialized training, and we worked with a special unit that we received a lot of specialized training, and we worked in the dark a lot. In Vietnam, a lot of our operations — most of our operations were at nighttime. So vision was something that was very important to us, and so a lot — I didn't do the research at that time, but I was being told.

When I got out of the military and I went into the FBI, I realized when we're going into make an arrest of somebody, we better be able to see as much as we possibly can. If we're going into an area

that has diminished lighting, that really hampers your ability to register everything you need.

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

2.1

22

So from that point on, I started doing an extensive amount of research on how much information you can gather and what kind of time period you can gather and how much light you really need.

The research I did, I did for the FBI and only reported that back to the FBI. But I got a lot of that information from experts who are out there. Hal Breedlove from Virginia Beach. There is a Rosenblum, a Stolovitch, a Kroger (phonetic), I believe his name is, that did a lot of research on ability to gather information from different areas, and they did research -- I believe that they --Rosenblum, if I remember him -- his name right, did some research out in California with -- I don't know if it's the sheriff's department, but he had several cadets where they put them in lighted areas and had the lights  $\dim$  -- interior power from a .04 to a .45 candlepower, however that's registered. was 48 items they had to look at, and how much could you register? And in a very diminished light, out of 48, I think it was 4 that they could register. In a light of .45, they were able to get something like

11. So it just shows that as you get more light, you can register more information.

2.1

So the research that I did, the research that all of these other people did, it all comes together, and nobody's really saying anything different. It's just how we register that now.

So I know when Mr. Reeves was in there, being at the age he's at, your eyes start to diminish, research says, at age 40, which I found out personally to be true. And you start losing your ability to gather as much light. And so in that situation, you don't register -- and what I'm trying to say when you say see, I don't want you to believe that to be, yes, I see everything clearly. It depends on the light.

And when you gather that information, it's basically registered by lighting and contrast. Those are the two things that really bring it out. So if you don't have all of the light, but you have more contrast, if you have bigger figures, color all of

that, stuff registers in different ways. So it's just hard to register everything that is going on in a darkened theater. It's not completely dark, but it's darkened.

2.1

Q On Page 24 of the first full paragraph: While Mr. Reeves watched the previews, he noticed a light was shining in his face. The light was from Mr. Oulson's cellular phone.

What facts are you aware of in this particular case that would support that statement?

A Well, Mrs. Oulson. She said that he was -had his phone out. Mr. Reeves said he saw the light
from the phone. And I've seen several phones in
darkened areas that are turned on, and it's quite
bright. So that's the two sources basically.

Q Same paragraph, second sentence:

Mr. Reeves politely asked Mr. Oulson to stop using
his cell phone. The 43-year-old Mr. Oulson responded
by yelling loud obscenities at the 71-year-old
Mr. Reeves.

And are you aware of any facts in this particular case to support that statement?

A Again, Mr. Reeves' statement that he leaned forward and -- he believed that it was politely -- asked Mr. Oulson to turn his phone off. And then he said he started using obscenities at him at that point.

Q Any other source of information?

A Just that, you know, there are many comments that people said they heard loud talking.

Q Are you talking about patrons?

A Patrons.

2.1

Q When you say loud talking --

A Loud talking, yelling, obscenities. People said different things. But here again, as I mentioned, you have to be very suspect of any of these witness statements because of the contamination of those statements. But when they're all saying I heard loud noises, I heard loud talking, I heard people saying things, other people saying, you know, he says fuck several times, I mean, all of those sources are saying the same thing. Was it one person that heard it, and everybody else is copying that? I don't know. That's why I say you have to be very

suspect of that. But that comment has come out by many of the patrons.

2.1

Now, you indicated that Mr. Reeves told you in his statement to you that he leaned -- well, that he made contact with Mr. Oulson and, in his belief, politely asked Mr. Oulson to turn off the phone. And there was some questioning that I had of you as far as the sequence of events, and how many times did Mr. Reeves make that nonconsensual contact with Mr. Oulson. Remember that question?

A Yes, I do remember that, yes.

Q Okay. Now, having -- and we're going to go through it, but I just want to know before we start playing the videos. Do you know how many times Mr. Reeves actually made contact with Mr. Oulson before he left and went and complained to the manager?

A In watching the videos, I don't know. I see movement there, and I don't know if comments are made or not, because there is no audio. So I don't know how many times comments were made, but I do see movement.

1	Q Okay. We're going to view State's Exhibit
2	Number 4, which is the enhanced black and white one.
3	We'll bring it up to a bigger frame in a minute, but
4	I just want to get to the section. All right. We're
5	going to begin at 13:22:25.646. And I'm going to
6	take it frame by frame. We're not going to play it
7	at speed.
8	A Okay.
9	Q If it's all right with you, we'll put it
10	there, and can I stand next to you?
11	A You absolutely can, yeah.
12	Q All right. Thank you.
13	(Whereupon, Mr. Martin played State's
14	Exhibit Number 4.)
15	Q At 13:22:25.646 we're going to start
16	bringing it forward frame by frame. And at
17	13:22:26.012, do you see the body movement of
18	Mr. Reeves?
19	A Yes, I do.
20	Q And do you see his right hand?
21	A Yes, I do.
22	Q And did you see it reach forward?

1	A I saw it going towards the back of the
2	seat, yes.
3	Q All right. At 13:22:26.379, do you see the
4	continued movement of Mr. Reeves forward towards the
5	movie screen?
6	A Yes, I do.
7	Q And the same with his right hand moving
8	forward towards the movie screen?
9	A I don't know if his right is moving towards
10	the movie screen or just moving along the back of the
11	chair. I don't know. I can't tell.
12	Q All right. And that would be Mr. Oulson's
13	back of the chair?
14	A Yes.
15	Q At 13:22 point 20 I'm sorry, at
16	13:22:26.646, Mr. Reeves continues to lean forward
17	towards the movie screen?
18	A That's correct.
19	Q Okay. At 13:22:26.812, Mr. Reeves
20	continues towards leaning forward towards the
21	movie screen?
22	A That's correct.

And is he much closer to the movie -- not 1 2 much closer. Is he closer to the movie screen now 3 than when we started the sequence? Yes, he is. 4 Α 5 All right. And you were sitting there in 6 that seat, and you had those observations. Is 7 Mr. Reeves' head in close proximity to the back of the seat of Mr. Oulson's seat? 8 9 MR. ESCOBAR: Objection, improper predicate 10 and calls for speculation. You can answer it. 11 THE WITNESS: He's leaning forward. Ιt 12 would appear to me that he's getting closer to the 13 seat, yes. BY MR. MARTIN: 14 15 And do you know how many inches it is between the front of the seat bottom of Mr. Reeves' 16 seat and the back of the seat of Mr. Oulson? 17 18 Α I believe that the measurement that I saw 19 was, I think, 18 inches. 20 And that's from Mr. Knox? Mr. Knox's depo? Q 2.1 No, from the crime scene photographs. Α 22 Q All right.

Eighteen or twenty inches. I don't know 1 Α 2 exactly, because it had kind of a weird measurement. 3 All right. Now, at 13:22:27.079, Mr. Reeves continues to lean forward and now even 4 5 closer to the movie screen? 6 Α That appears to be, yes. 7 Q All right. And, again, it would be even closer than to the seat back of Mr. Oulson, if not 8 9 right at it? 10 Α It appears to be, yes. 11 All right. And at 13:22:27.246, Mr. Reeves Q 12 continues to lean forward towards the movie screen? I don't know how much more. A hundredth of 13 Α 14 an inch or what, I don't know. But it appears that 15 there was a little movement there, so I don't know 16 how much it is. 17 We're continuing forward --0 18 Α Because I believe this is in hundredths of 19 seconds, right? So you're talking about how long did 20 it take him to go from sitting down to leaning 2.1 forward? 22 Q That wasn't my question. We were just

1 talking about movements, but I appreciate --2 Α And I'm trying to explain I don't know. 3 You know, you keep on saying is he moving closer? Yeah, in that fraction of a second, yes, it appears that he is. 5 6 We're going to continue forward in the 7 We're going frame by frame now. I have sequence. stopped at 13:22:28.679. Was there any discernable 8 9 movement that you can see in the video by Mr. Reeves? 10 I didn't see anything. 11 All right. He's in that same position 12 then, leaned forward with his head towards the movie 13 screen? 14 Α It appears to be, yes. 15 If not at, close to the seat back of 16 Mr. Oulson continued there? 17 Α Yes. 18 And continuing to go frame by frame, at 19 13:22:31.012, do we see movement by Mr. Reeves? 20 Yes. Α 2.1 Now, the frame before that when we saw the 22 movement of Mr. Reeves, that frame is 13:22:30.179.

1	Now, the frame that we saw the first movement that	
2	you indicated that he did is at 13:22:31.012. There	
3	is some nonrecording between those two frames.	
4	A Okay.	
5	Q Okay? Do you see the difference in the	
6	frames?	
7	A Yes.	
8	Q Okay. I told you I would point that out to	
9	you	
10	A Right.	
11	Q in fairness to you. So at this point at	
12	13:22:31.012 is a frame that we see the first	
13	movement as we go forward and play the frames, and	
14	I'll stop it at 13:22:31.169.	
15	A .679.	
16	Q I apologize, .679. Do you see the movement	
17	of Mr. Reeves?	
18	A Yes, I do.	
19	Q And is it backwards towards the Bistro	
20	area, as opposed to the movie screen?	
21	A That's correct.	
22	Q Okay. Oops, I went the wrong way. I	
J		

1 apologize. All right. Now, at 13:22:32.112, does Mr. Reeves continue to move towards the Bistro while 3 settling back in his seat? It appears to be, yes. 4 Α 5 0 And you can clearly see his right hand? 6 Α Yes. 7 And his arm? Q 8 Α Yes. 9 And his elbow? Q I can't quite see his elbow. I know where 10 Α 11 it is, though. 12 You know where his head is? Q. 13 Α Yes. 14 Now, I stopped it at 13:22:32.946. 15 that frame and watching the movement of Mr. Reeves, 16 it appears he's settled back in his seat with his 17 back against his seat back? 18 Α That's correct. 19 And watching that in sequence, knowing that Q 20 there is a break there, what you just watched, does 2.1 that appear to be one contact with -- at least in the

area of Mr. Oulson, leaning forward?

22

1	A It appears it could be, yes.
2	Q It's one?
3	A I'm not saying it's a contact. It appears
4	it could be. But I know that myself with a bad back,
5	sometimes I'm in a seat, and I'll be moving forward
6	just trying to stretch my back out. So I can't say.
7	I don't see him talking to anyone, but it appears
8	that he does go forward, and he could be.
9	Q We're going to continue at 13:22:32.946 and
10	go forward. And at 13:22:34.246, do you see movement
11	of Mr. Reeves?
12	A Yes, I do.
13	Q All right. And is it leaning forward
14	towards the movie screen?
15	A Yes, it is.
16	Q At 13:22:34.712, Mr. Reeves continues to
17	lean forward towards the movie screen?
18	A Pretty much in the same position, but he
19	seems to be forward, yes.
20	Q Continuing frame by frame. Now I've
21	stopped it at 13:22:46.646. Is that the first frame
22	where you see Mr. Reeves begin the process of leaning

1	back towards his seat?	
2	A	He's starting to lean back towards his
3	seat, it ag	opears, yes.
4	Q	And you can see his right arm?
5	A	Yes.
6	Q	All right.
7	A	Part of his right arm. Not the whole arm.
8	Q	But it is extended forward towards the
9	movie scree	en, correct?
10	A	That's correct.
11	Q	Now, at 13:22:47.012, you continue to see
12	Mr. Reeves	leaning back towards the Bistro into his
13	seat?	
14	A	That's correct.
15	Q	Can you see his right arm?
16	A	I can see most of his right arm, yes.
17	Q	And at 13:22:47.812, does it appear at that
18	point that	Mr. Reeves has settled back into his seat?
19	A	Yes, it does.
20	Q	All right. Would that be the second
21	contact wit	th Mr. Oulson?
22	A	I don't know if it's that first, second

contact with Mr. Oulson. I know he did move in the seat. There's no audio, so I can't say he made contact with him. I just see the movement of Mr. Oulson.

Q In your discussion with Mr. Reeves, how many times did he indicate he had contact with Mr. Oulson before he left for the manager?

A Mr. Reeves -- from what he told me, I believe it was one time that he believed he made the contact with Mr. Oulson. The movement in the seats, I don't know. I know from myself -- and I don't know like to use myself, but I move around in a seat quite a bit just to get comfortable. And I know he has a lot of back problems also. So, you know, I didn't take any concern of this when I saw this video, that he's moving there.

Q All right. We're going to continue forward. I told you when I would tell you when there's a break. At 13:22:50.912, we have a frame.

A Right.

2.1

Q And then there will be a break, and the next frame is 13:23:00.279, correct?

1	A Okay.	
2	Q So there is a break in the recording there.	
3	All right?	
4	A Okay, uh-huh.	
5	Q I have stopped the video at 13:23:19.879.	
6	There's been no break in the video from the point	
7	that I mentioned the last break, right?	
8	A Okay.	
9	Q All right. At 13:23:19.879, does that	
10	frame a first depiction of Mr. Reeves, at least	
11	you can see his head?	
12	A Yes.	
13	Q Now, at 13:23:20.446, is Mr. Reeves leaning	
14	forward towards the movie screen?	
15	A It appears to be, yes.	
16	Q Okay. At 13:23:20.979, does Mr. Reeves	
17	continue to lean forward towards the movie screen?	
18	A It appears to be, yes.	
19	Q Now, we're looking at Camera 11. That's	
20	what we've been looking at, and we'll go to 12 in	
21	just a second. But on Camera 11 at 13:23:22.146,	
22	Mr. Reeves hasn't moved since the last frame we	

1	talked about?
2	A It doesn't appear he has, no.
3	Q Okay. Still leaning forward towards the
4	movie screen?
5	A It appears to be, yes.
6	Q All right. At 13:23:22.179 on Camera 11
7	and at 13:23:22.169 on Camera 12, do you see
8	Mr. Reeves?
9	A Yes.
10	Q All right. On Camera 12, do you see
11	Mr. Reeves?
12	A Yes.
13	Q All right. And he is leaning forward
14	towards the movie screen?
15	A It appears to be leaning forward, yes.
16	Q All right. Now, is that the third contact
17	with Mr. Oulson?
18	A I don't know what contact it is. I don't
19	know if he's talking to him or not. Again, there's
20	no audio. I don't see him talking to him. You only
21	can see part of the picture there, so I don't know
22	what contact he's making. I know he's moving around

1	in his seat, I will say that, yes.
2	Q And would you agree that he's a lot closer
3	to Mr. Oulson than if he was seated back in his seat
4	with his back on his seat back?
5	A Well, it depends at that time where
6	Mr. Oulson is.
7	Q Seated in his seat.
8	MR. ESCOBAR: Objection. You can't say
9	just say that
10	MR. MARTIN: Hey
11	MR. ESCOBAR: Mr. Oulson is sitting in
12	the seat. You can't just make that assumption.
13	BY MR. MARTIN:
14	Q Assume that he's seated in his seat.
15	MR. ESCOBAR: We object.
16	MR. MARTIN: Well, fine, object. Answer
17	the question.
18	MR. ESCOBAR: That's not visible in the
19	picture, and you can't say that.
20	BY MR. MARTIN:
21	Q Now, Camera 11 at 13:23:23.379, Camera 12
22	13:23:23.369. Camera 11, Mr. Reeves is leaned over

towards the movie screen?

2.1

A It appears at this point that he's moving forward with his upper body but appears to be trying to stand up at that point.

Q Okay. In fact, when we play to Camera 11 13:23:24.546, Camera 12 13:23:24.569, do you see Mr. Reeves stand up?

A Yes, I do.

Q All right. Now, in your discussion with Mr. Reeves, when in time did Mr. Reeves get up to go to the manager after he asked Mr. Oulson to turn off the phone? And we're talking time. One second, five second, one minute, two minutes? Do you know? Did you ask him? Two questions. So let's first, do you know?

A I don't remember telling him at the exact time, because when he told me he told Mr. Oulson -- asked Mr. Oulson if he could turn off his phone, and he said when it's apparent to him that he wasn't going to do it, that's when he got up and moved.

Q Okay.

A And when I was saying how long was that, he

says, I don't know how long it was. It was just apparent to me he wasn't going to do it, so I decided to go talk to the management.

Q All right. Now, you mentioned to me that when you interviewed Mr. Reeves at Mr. Escobar's office, he explained to you that when he asked Mr. Oulson to turn off the phone, that Mr. Oulson used foul language and made whatever statements to Mr. Reeves. Do remember that?

A Yes.

2.1

Q All right. And then you explained to me the thought process of Mr. Reeves that -- I'm going to use the term he didn't want anything to do with it, meaning that he wasn't going to mess with Mr. Oulson anymore. He was going to sit back in his seat, right?

A What he said was that when his response to him was apparent to him that he wasn't going to do -- you know, turn his phone off, and he was just going to get into an argument with him, and he didn't want that to happen, so that's when he got up.

Q All right. But we see from the video --

for whatever reason -- he leans forward in his seat three times towards the movie screen, right?

A No. The third time it's leaning forward to get up out of the chair.

Q Still leaning forward towards the movie screen?

A Oh, God, you'd have to. I don't know how you can get out of those chairs without leaning forward. I couldn't when I was there, and nobody else was there. So, yeah, you'd have to lean forward a bit. And as I mentioned before, he's moving in the chair. That's the only thing I can say at that time. Because I know sitting down sometimes it's very — not comfortable, you have to find that comfortable position. So I don't know what he was doing when he was moving forward, but he did say he did ask him to turn off the phone.

O Well --

2.1

MR. ESCOBAR: Let the record reflect that Mr. Martin has stood up and sat down because he has a bad back today and has been moving around the entire deposition in order to relieve his bad back.

MR. MARTIN: Thank you. I'll let you pay
for that part of the depo.

MR. ESCOBAR: Okay. Gladly.

## BY MR. MARTIN:

2.1

Q Did you ask Mr. Reeves how -- and not how like words, but what was the mechanism that occurred when he asked Mr. Oulson to turn off the phone? Here's where I'm getting at, Dr. Hayden: Was he sitting back in his seat with Mr. Oulson there going, Hey, turn off the seat (sic)? Did he lean forward and whisper in his ear, Hey, would you mind turning off the seat (sic)? Did he get halfway and talk normally, Hey, would you turn off the seat (sic)? What was Mr. -- how did Mr. Reeves communicate that request to Mr. Oulson? Did you ask him that?

A I don't know if I asked him exactly what his body position was when he asked Mr. Oulson. He said -- and I believe he said he leaned forward and politely asked him to turn off the phone, but I -- I can't be held to that, because I don't remember if he said actually leaned forward, but that's the impression I got. That he leaned forward to tell him

to turn off the phone. Whether he leaned an inch into him or five inches into him, I don't know. I didn't get into that specific.

Q All right. But you've watched the video and we've gone through the video?

A Yes.

2.1

Q Right?

A Yes.

Q And you made the statement before that after interviewing Mr. Reeves that you watched the video and everything was consistent with what Mr. Reeves said, correct?

A That's correct.

Q All right. And the frames that I've just played for you on Camera 11 and Camera 12 off of State's Exhibit Number 4, are you telling me that the frames that you watched and that we just went over is consistent with the statements that Mr. Reeves made to you in Mr. Escobar's office?

A Yes, it is.

Q And your explanation for the movement of Mr. Reeves is, well, maybe he had a bad back, but you

don't know that, right?

2.1

A My explanation is that people move around in a seat to get comfortable in the beginning.

Q All right.

A And he -- after he talked to Mr. Oulson, I don't know what his movement was at that time, but it was obvious that he -- he had his popcorn in his hand, and he moves back into his seat, and that's it. So I don't know why he's moving around in the seat.

Q That's the bottom line, you don't know why he's moving?

A No, I don't know. No, I don't.

Q And you didn't think to ask Mr. Reeves why? After you looked at the video, go back to him and say, Hey, I see two movements here. Can you explain this to me? Was it a bad back, or were you talking to Mr. Oulson again?

A When I talked to Mr. Reeves, I had not looked at the video this closely until after the fact, after I came back and, you know, where it -- and was able to get the more enhanced ones. And then I was able to see it in more detail. But I did not

look at the video just prior to talking to Mr. Reeves, so, no, I didn't bring that up.

- Q Well, afterwards, did you have an opportunity to speak with Mr. Reeves and say, Hey, can you clear this up for me?
  - A No, I did not.

2.1

- Q But you could have done that?
- A I could have done that, and I imagine if Mr. Escobar would have agreed to it, I could have.
- Q All right. And how important is it in your analysis of the number of times that Mr. Reeves had contact with Mr. Oulson before he went to complain to the management?

A When we're talking about this whole situation, how many times he talked to him and asked him to turn off the phone is really irrelevant, because the situation occurred that Mr. Oulson became very outraged and animated in his approach and aggression towards Mr. Reeves. This is what this is about. Not how many times he asked him to turn off the phone. If he asked him once, if he asked him twice, it really doesn't matter. And was he rude?

That really doesn't matter either. Does that give anybody the right, especially a younger man standing up cursing at an older man and threatening him? So to me it doesn't really matter that much if he told him one time or two times. So, I mean, we're spending a lot of time on this, but it really doesn't matter to me. And I don't know what he was doing when he was moving around in those seats and exactly how close he was to Mr. Oulson when he said that to him.

2.1

Q Well, when we talk about this sequence of events, and we're looking at that pleading where the facts are that Mr. Reeves politely asked Mr. Oulson to turn off the phone, and he responded, as Mr. Reeves told you, in a weird way, maybe something that he didn't see coming, is it important to know all of the sequence of events to try to understand why Mr. Oulson reacted the way he did?

A It's important as an investigator to go in and try to understand every detail you can possibly understand to find out why something occurred and why the reactions were the way they were. As I explained

before, with the background and experience that Mr. Reeves had, is that he was analyzing the problem as it's going on and realizing it's totally out of character, this is getting bad. I'm just -- need to go talk to the manager. When he comes back, he thinks he can resolve it by saying if I -- if I knew you were going to have the phone off, I wouldn't have said anything to the manager, and not realizing that made it worse, and that's when Mr. Oulson started going crazy, and that's when Mr. Reeves realized he was in a terrible situation.

2.1

Q All right. But we're talking about the sequence of events before Mr. Reeves goes off and complains to the manager. That's what we're focusing on. So would you not agree that multiple contacts with Mr. Oulson could just as well be the reason for his response to Mr. Reeves, Hey, fuck off, leave me alone?

A To me, if he said it once, twice, three times, Mr. Oulson's reactions is totally inappropriate, and I couldn't begin to imagine anybody going off like that in a theater when

somebody asks you to turn the cell phone off, unless there was some kind of a mental problem. I don't know.

Q The manner in which someone asks you to do something, does that change as to how someone should react?

A You're asking me to say how somebody would react. People react in different ways to different stimuli.

O Okay.

2.1

A And, you know, how Mr. Reeves spoke to Mr. Oulson is nice to know. Was he polite, or wasn't he polite? If he was polite, you know, that makes it worse. If he wasn't polite, okay, so Mr. Oulson might have a reaction to that. But not to the response that he had, which was totally outrageous. So, you know, yes, you're looking at every detail, and you're trying to get the totality of the whole situation, everything that occurred that led up to this, and trying to understand why Mr. Reeves had to react in the way he did.

There is no explanation that I can come up

with that Mr. Oulson had a right, a -- whatever you want to call it, to react in the way he reacted.

Even his wife knew he was overreacting when she tries to stop him.

Q Now, wait a minute. We're talking about the sequence of events before he leaves to complain to the manager. That's what we're focusing on. We have to take this baby steps. You're putting everything together. I told you what we were going to do. So please keep your comments to what your answer is relevant to the sequence of events before Mr. Reeves gets up and walks and complains to the manager. So please continue. Because we know -
MR. ESCOBAR: Have you got a question?

## BY MR. MARTIN:

MR. MARTIN:

2.1

Q We know that Nicole did not stand up before Mr. Reeves left for the theater. So would you please continue with your answer, and keeping that in mind?

Yes.

A Okay. I'll go back to what I said before. And the only thing I can do, Mr. Martin, is repeat what I said before. Whether he said it one time or

two times or three times to ask him to turn off the phone, that's not a request that's a bad request.

And if he did it in a polite way, that's nice. If he didn't do it in so much of a polite way, okay, that's not that nice. But there is no indication that I could see that it was done in a bad way. Just from the body movements and everything that we see in the video of Mr. Reeves moving forward, he moved forward, and did he use one of those opportunities when he moved forward to say to Mr. Oulson would you please turn off your phone? I don't know. There is no video.

So I think I've answered this the best I possibly can. I don't know what else you're looking for.

MR. MARTIN: Good time to break for lunch.

(Whereupon, the deposition recessed at 12:16 p.m. and resumed at 1:03 p.m.)

BY MR. MARTIN:

2.1

Q We're back from our lunch break, and thank you for everyone returning at the appropriate time. I appreciate that.

We're going to continue with our looking at the facts and how they relate to the facts as alleged in the immunity pleading that we put on the record before the lunch break.

I'd like for you to go to Page Number 25. We're going to continue that discussion. We talked about the contact that Mr. Reeves had with Mr. Oulson before leaving to go complain to the manager. In the sequence of events what I want to discuss with you, Mr. Reeves has left the theater, and is at the manager's place.

A Okay.

2.1

Q I'm not going to go into all of that. Now he's coming back, and he's walking down the aisle. That's where I want to pick up the sequence of events. There's no need for me to go into what was done out there. You already told me your rendition of it. Fair enough?

A Fair enough.

Q So that's where we're going to begin, and that's where -- on the second paragraph on Page 25: When he reached the last row, Mr. Reeves could no

longer see a light coming from Oulson's cell phone.

Upon reaching his seat, Mr. Reeves took a bag of
popcorn from his wife and sat down.

Before I ask you any questions, I want to show you State's Exhibit Number 4, beginning at frame -- Camera 11 13:26:16.012, Camera 12 13:26:16.003.

All right. Now, I've stopped it on frame -- Camera 11 13:26:23.379. Camera 12, of course, went blank just a frame before that. Do you see Mr. Reeves sitting down in the seat?

A I do.

2.1

Q Now, my question to you is: In your discussion with Mr. Reeves as far as when he made the statement that he admits to making to Mr. Oulson, if I had known you were going to turn off your phone, I wouldn't have told the manager, words to that effect.

A Right.

Q Did you follow up with Mr. Reeves as to when he said that? Was it walking down the aisle, or when he was in his seat?

MR. ESCOBAR: Objection, asked and answered, but go ahead, you can answer it.

THE WITNESS: From what I understand from what Mr. Reeves told me, he said he came back, sat down and mentioned it to him at that time.

BY MR. MARTIN:

2.1

Q And the same mechanics. How did he mention it to him? Did he lean forward? Did he lean back? Did he go, Hey, sorry, about that? You know, what -- how did he communicate that? What was his body position when he communicated that?

A I don't remember exactly what his body position was, but he said to him in not a loud voice, from what he's telling me. So he had to be close enough to Mr. Oulson so Mr. Oulson could hear him.

Q Okay. On Page 25 of the immunity pleading, very next paragraph. And just so the record's clear, the paragraph before is what we just talked about. When he reached the last row, Mr. Reeves could no longer see a light coming from Oulson's cell phone. Upon reaching his seat, Mr. Reeves took a bag of popcorn from his wife and sat down.

The paragraph I want to talk to you about is the very next one. Mr. Oulson then stood up,

turned to face Mr. Reeves, and for the second time hurled a barrage of loud obscenities and threats to cause bodily harm at the 71-year-old, period.

2.1

Now, in your discussion with Mr. Reeves, did you ask him the time period between the time that he made that comment to Mr. Oulson and Mr. Oulson stood up?

A No, I did not really ask him the time on that.

Q Do you think that's important?

A When he came back and he said to

Mr. Oulson, you know, he didn't have to -- I'm sorry,
you know, whatever it was with his phone, that to him
he made the comment and then sat down. And it
sounded like for me that he saw it as just one
continuous movement to when he sat down, period.

Q What do you mean he saw it as one continuous movement?

A Well, he came in, and whether or not he said something to him as he's coming by or he was sitting down, he says he remembers saying to him at that point in time, you know, if I would have known

you were going to turn off your phone, I wouldn't have said anything to the manager.

2.1

And whether or not he was moving by him when he said that or if he was sitting down, it really didn't matter to me, because he said it in a way that it wasn't yelling or screaming. Just told him that, you know, that message, and that was it.

- Q My question to you was, did Mr. Reeves tell you a timeframe between the time he made that comment and Mr. Oulson stood up? That's my question.
  - A And my answer to you is no.
- Q All right. And then my next question to you was, is that important? The timeframe between those two events? Mr. Reeves making that statement and Mr. Oulson standing up. Is that important?
- A Well, when you're talking about timeframe, was it one second or one minute or what? I mean, it's a timeframe that's there. So it doesn't matter that much when you're talking a few seconds.
- Q Okay. The same paragraph, second sentence, Page 25: While he subjected Mr. Reeves to this second torrent of vulgarities, Mr. Oulson had assumed

1 an aggressive posture and his face was contorted in 2 anger. 3 Now, in your discussion with Mr. Reeves during your interview, when Mr. Reeves indicated to 4 5 you stood up, did you ask Mr. Reeves exactly what 6 Mr. Oulson's posture was? 7 Α Yes. 8 And what did he say? 9 He said he was standing up, turning around, Α 10 and at that point coming at him in a more aggressive 11 manner, and using a lot of obscenities. 12 Q All right. Standing up, turning around, 13 coming at him. 14 Α Felt like he was coming at him. 15 Well, what does that mean? Felt like 16 coming at him? 17 It's a feeling that you get that somebody Α 18 is invading your space. 19 All right. Stands up? He sees him stand Q 20 up? 2.1 He knows that he's standing at that point. Α 22 Q All right, he knows that he's standing.

1 Knows that he's turned around facing him? 2 He's turning around, yes. Α 3 0 All right. And he knows he's coming at him? 4 As I said, it's the sense that he had that 5 6 he was coming at him. 7 Q. How did he explain that sense to you? was the movement of Mr. Oulson that gave him the 8 9 sense that he was coming at him? The outward 10 manifestations that you're going to see to make that 11 belief? 12 As I said before, that Mr. Oulson was 13 leaning back over the top of the chair in an 14 aggressive manner and that made Mr. Reeves feel like 15 he was coming at him at that point. 16 Did those three body movements by 17 Mr. Oulson occur contemporaneous with one another 18 without any break? What I'm saying, he's sitting so 19 he stands, he turns, and he leans with no hesitation whatsoever? Is that what Mr. Reeves related to you? 20 2.1 That's my understanding. When he came in

and he sat down and took his popcorn, so it -- there

22

was a break right there. Took his popcorn and sat down, and that's when it all started at that point in time. So, you know, whether a second break or a two-second break in there, I don't know.

Q Okay. What I'd like to do before we continue the conversation, I want you to have the benefit of the video. I'm going to -- beginning at frame -- I'm sorry, this is State's Exhibit Number 4, and it's Camera Number 11. We're going to start at frame 13:26:23.379. Camera 12 shows at this point video not recording. What I'm going to do is I'm going to play it straight through until the gun is fired, and then I'm going to have some questions for you. All right, sir?

A Sure, uh-huh.

2.1

Q All right. There we go. I'm going to start it over since we didn't have the -- I didn't have it full frame. Why is it doing that? Okay. Now we're back at 13:26:22.512 is full frame. And now we'll go ahead and play it forward.

(Whereupon, Mr. Martin plays the video.)

Q And the gun has been fired, and we're going

to stop at Camera 11 at 13:26:44.246, Camera 12
13:26:44.269.
Now, I know it was real fast, but I wanted
you to see it in realtime. And now we're going to go
through it. And with your permission, I'd like to
come back around
A Sure.
Q and work the computer for you. All
right, sir?
A Absolutely.
Q Okay. We're looking at State's Exhibit
Number 4, Camera 11 at frame 13:26:22.546 is where
we're beginning our discussion.
A Okay.
Q You indicated to me that after Mr. Reeves
came and sat down, he picked up his popcorn and sat
in his seat, right?
A That's correct.
Q All right. And based on the frame that
you're looking at, do you know where Mr. Reeves is
sitting?
A Sitting in the seat that he was sitting in

1 before.

2.1

Q All right. And do you see the popcorn in his hand?

A It appears to be the popcorn in his hand, yes.

Q So this is the timeframe we're talking about. He sits down right after returning from the manager, right?

A Okay.

Q Now, you indicated that Mr. Reeves indicated that once he sat down, regardless of when he made the statement, that Mr. Oulson then stood up, turned, and he felt he was coming after him. Do you remember that?

A Yes.

Q Okay. Now, I'm going to go forward with the frames. Camera 11 is still in play, and we're going forward, and I'm going to stop it here at frame 13:26:23.379. We see no discernable movement by Mr. Reeves, correct?

A That's correct.

Q Okay, sir. I'm going to continue to go

1 Now, I stopped it at 13:26:24.712. 2 from the timeframe that we've been talking about, 3 there's no discernable movement by Mr. Reeves, correct? 5 Α That's correct. 6 And, of course, the frame does not show at Q. 7 all the activity of Mr. Oulson? 8 That's correct. Α 9 All right. Now I'm going to go to the next Q frame, and, of course, we have video not recorded on 10 11 -- Camera 11 we still have video recorded not on --12 I'm sorry, on Camera 12, correct? That's correct. 13 Α 14 I'm going to go forward until we see video 15 recorded on Camera 11. Now we've gone forward in 16 time, and the first frame we see when video resumes is at frame 13:26:25.346, correct? 17 18 Α That's correct. 19 Okay. Now, in that particular frame are Q 20 you able to identify any of the participants in this 2.1 event? 22 Α Well, at this point in time, the only thing

1	I see is a light right there (indicating.)
2	Q Okay. That's the only thing you see?
3	A A reflection of some type. That's I see
4	Mr. Oulson sitting there. And if you can go back a
5	couple of frames and then go forward a couple of
6	frames, I might be able in a still motion, it
7	looks
8	Q When I go back, there's no recording.
9	A Okay.
10	Q I can go forward for you.
11	A Okay, go forward.
12	Q All right. So we're going to go forward.
13	We're going to start at 13:26:25.346, and that's
14	where you say you see a light, and you see
15	Mr. Oulson?
16	A That's correct.
17	Q All right. We're going to go forward, and
18	you tell me when to stop. All right?
19	A Okay.
20	(Whereupon, Mr. Martin plays the video.)
21	A Okay.
22	Q All right. You've asked me to stop the

Camera Number 11 at frame 13:26:27.879. Now, you asked me to stop at that point. You want to tell me what your observation was? Why did you want me to stop?

A The problem is, you start at 13:26:25.346. The frames prior to that, I believe, when you see -- before you see that light, you see an arm, a hand or something coming in, and you don't have that recorded. But when you see that light come acrossed, you see Mr. Oulson come forward, and then he goes back, and he gets --

Q How about if I play it like that for you? Kind of remind you of the BEK TEK loop?

A The what loop?

2.1

Q BEK TEK. The one with Mr. Oulson in that position where they loop it over and over, and you see it over and over again. You saw that, right?

A Well, I -- what I saw and what I'm trying to --

Q Right, Mr. Hayden? Dr. Hayden. I apologize. If you could just answer that question, and then I'll let you embellish on it, but would you

answer my question first?

2.1

A I don't know the question -- really how you're asking that question, I don't know how to answer.

Q Did you review a video -- and I apologize for standing close to you. Did you review a video produced by BEK TEK that is very pixilated, green in color, that is looped with several frames where you see motion over and over again? Did you see that video?

A Yes, I did.

Q Is that the video that you're referring to where you say I don't have it recorded, but you saw something with his hand shoving forward? Is that what you're referring to?

A I don't believe that's the one I'm referring to, no.

Q What are you referring to then, sir, that you saw that I don't have recorded?

A It was as you have right here, still frames, going forward by a hundredth of a second. I saw a frame before that when -- it would be right

1	when you see the light, I believe was a hand coming
2	in at that time, and then you see that light. And
3	that's the movement that I believe that was the
4	time that Mr. Reeves believes he was hit in the head.
5	Q All right. Well, let's stop just for a
6	second. I'm at 13:26:25.346. The frame before that
7	there is no recording.
8	MR. ESCOBAR: Well, there is no recording
9	in what you're showing him right there.
10	THE WITNESS: No.
11	MR. MARTIN: There is no recording on
12	Camera 11 or Camera 12.
13	MR. ESCOBAR: That's what you're showing
14	him right there, there is no recording?
15	MR. MARTIN: That is true, there is no
16	recording.
17	MR. ESCOBAR: On that exhibit?
18	MR. MARTIN: On that exhibit, nor any other
19	exhibit, and you know that to be the case. So you're
20	putting
21	MR. ESCOBAR: Okay. Well, we'll see.
22	MR. MARTIN: all of these gratuitous

1 comments on here.

2.1

MR. ESCOBAR: No, no, we'll see what -- BY MR. MARTIN:

Q Dr. Hayden, do you know what you were looking at when you made that comment that some hand stuck out?

A What I'm saying to you -- and I can't say it any clearer, is that same video -- type video that you're showing with a hundredth of seconds, still frames, where you're able to jump forward like that, I saw a video -- and I don't know which one it was. I have it. Where the hand --

Q Do you have it with you?

A I don't have it with me, no. I see a hand or it looks like -- appears to be a hand and an arm come through, and then it comes back almost immediately, and that's when I see the light. So you're starting it at the light. Right before that is when I believe that Mr. Reeves believes he was hit, and that's when the assault began.

Q I'm going to ask you to do me a favor,
Dr. Hayden. Would you mind just standing up and just

1 walking over there? I want Richard to come over, and 2 I want to show him something before I ask you any 3 questions. Fair enough? Α Sure. 4 Richard, come here, please. 5 MR. MARTIN: 6 MR. ESCOBAR: Yeah. 7 MR. MARTIN: I hope one of these plays. 8 MR. ESCOBAR: What are you trying to do? 9 MR. MARTIN: Play the BEK TEK. I didn't 10 put it on a disk. 11 MR. ESCOBAR: You can't do that. You've 12 got -- if you've got the disk, play the disk. 13 doesn't know which video at this point. 14 MR. MARTIN: I'm going to show him. 15 recognize it. 16 MR. ESCOBAR: But he doesn't have numbers 17 to the videos and stuff like that. If you have the 18 -- you know, the -- all of the videos that were 19 produced in this case, then go through all of them, 20 and then we can figure out --2.1 No, we don't have to go MR. MARTIN: 22 through all of them.

1	MR. ESCOBAR: Okay.
2	THE WITNESS: Okay to come back?
3	MR. MARTIN: No.
4	MR. ESCOBAR: No, no, it's not okay. He
5	doesn't want you back.
6	THE WITNESS: Oh, okay.
7	MR. MARTIN: That's what I'm going to show
8	him.
9	MR. ESCOBAR: Okay.
10	(Mr. Martin plays video for Mr. Escobar,
11	with witness not viewing.)
12	MR. ESCOBAR: What is it you're going to
13	identify? Because what he has seen may be completely
14	different from that.
15	MR. MARTIN: Well, it might be.
16	MR. ESCOBAR: Okay. Because he's
17	describing still frames. He's not describing a
18	video. He's describing still frames on the record,
19	and you're trying to show him a video.
20	MR. MARTIN: Is that what you said? Still
21	frames?
22	THE WITNESS: Yes.

1	MR. MARTIN: You watched a group of still
2	frames?
3	THE WITNESS: That's correct.
4	MR. MARTIN: Oh, all right. I can do that.
5	No, I can't do that. All I have is the video. All
6	right. Well, we're going to go back to State's
7	Exhibit Number 4.
8	BY MR. MARTIN:
9	Q We're going to go back to 13:26:24.512, on
10	Camera Number 11, on State's Exhibit Number 4. And
11	as we go through the first frame we I've got to go
12	back so I can get the number. The first frame we see
13	where you say there is the white light is at
14	13:26:25.346.
15	A That's correct.
16	Q Now, you believe you've seen a frame that
17	is before that?
18	A That's correct.
19	Q Okay. And where did you get these frames
20	from?
21	A Mr. Escobar.
22	Q Okay. Now, you mentioned that at

1 13:26:25.346 is -- you believe that's when the assault started, correct?

2.1

A Right around that point. It's right before that is when the assault really began. What you see there is a light. I don't know what exactly that light is.

Q Well, okay. But you do identify Mr. Oulson in that frame?

A Where Mr. Oulson was, you can't really see him that well there. But, yes, he appears to be right there.

Q You indicate that Mr. Reeves said after he sat down with his popcorn that Mr. Oulson stood up at that point? Is that the point?

A No, it is not. It's before that.

Q It's before that? Okay. I'm at frame 13:26:24.712, which is the frame before there's no recording. There's no recording between those two frames. Are you telling me that's where Mr. Oulson stood up?

A No, I'm not. I'm saying when he came up, and he sat down, whatever that frame was, I saw the

through. And it's right before that is when

Mr. Oulson stood up, and he turned around and in an
aggressive nature started yelling and screaming at
him and started coming over the back of the chair at
him, and that's when he felt like he got punched. So
it was right around that point, that 46 that you're
showing me, where he feels like he got punched. And
there was action right before that.

1.3

2.1

Q I've got to go further forward. We're looking at State's Exhibit Number 3, Cameras 11 and 12. You recall that we had testimony yesterday that State's Exhibit Number 3 is the raw footage from Cameras 11 and 12, have not been enhanced, and the blue screens were put in there by the DVR recorders? Do you remember that testimony?

MR. ESCOBAR: I would object, because he wasn't here yesterday so there's --

MR. MARTIN: I understand that.

 $$\operatorname{MR.}$$  ESCOBAR: -- been no testimony to that with him.

MR. MARTIN: That's true.

1	MR. ESCOBAR: Well, you can't you can't
2	be putting things
3	MR. MARTIN: Hey, this is my depo. Don't
4	interrupt me.
5	MR. ESCOBAR: You can't be telling him do
6	you remember that when he wasn't here.
7	MR. MARTIN: Yeah, he was here when I
8	explained it to him when I first did the video.
9	MR. ESCOBAR: He was here yesterday?
10	MR. MARTIN: I explained it to him when he
11	was here.
12	MR. ESCOBAR: He wasn't here yesterday.
13	BY MR. MARTIN:
14	Q My question to you was
15	MR. ESCOBAR: Do you want her to read it
16	back?
17	MR. MARTIN: I do.
18	MR. ESCOBAR: He wasn't here yesterday.
19	MR. MARTIN: My question to him was, does
20	he remember me telling him that today that we had
21	testimony yesterday? Listen to my question.
22	MR. ESCOBAR: He wasn't here yesterday.

## 1 BY MR. MARTIN:

2.1

Q Now, as I explained to you when we started looking at these videos that yesterday we had testimony from the FBI that State's Exhibit Number 4 was the raw data that has not been enhanced or anything, and the blue screens are there by the DVR itself in its settings. Do you remember me telling you that this morning before lunch, before you looked at the videos?

A Yes, I do.

Q All right. And that's what we're looking at now is State's Exhibit Number 4. And we're at frame -- Camera 11 13:26:16.912, Camera 12 13:26:16.887. And would you agree, because we just looked at it, that that's where Mr. Reeves was sitting down after he came back from the manager, right?

A That's correct.

Q Okay. Now we're going to go forward. Now, on Camera 12 at 13:26:20.621, we have the blue screen, no recording.

A Uh-huh.

1	Q Correct?	
2	A Okay.	
3	Q But we still have recording on Camera 11 at	
4	13:26:20.612?	
5	A That's correct.	
6	Q All right. We're going to go forward.	
7	Now, at 13:26:24.712, Mr. Reeves has been continually	
8	settled in his seat, right?	
9	A Appears to be, yes.	
10	Q No discernable movement, right?	
11	A That's correct.	
12	Q All right. Now, the very next frame we	
13	have the blue at 13:26:24.746, correct?	
14	A That's correct.	
15	Q All right. Now, you believe that at	
16	13:26:24.712, before we see the blue screen, that	
17	you've seen a frame with Mr. Oulson reaching towards	
18	him?	
19	A Not before you see the blue screen. It was	
20	someplace between then and the 13:26:25.346. I saw	
21	it, and I can't tell you exactly which video it was,	
22	but I know it was done by the FBI.	

- 1	
1	Q It was done by the FBI?
2	A Yes, it's the same one that you have right
3	here.
4	Q Well, I'm trying to find it for you so be
5	patient with me. I want you to explain to me exactly
6	what you saw. We see at 13:26:24.712, right?
7	A Uh-huh, yes.
8	Q And then we have a blue screen?
9	A That's correct.
10	Q And I'm going to go up until the blue
11	screen comes off, and I'll get the frame number,
12	okay? Now, the first frame after the no recording is
13	frame 13:26:25.346, correct?
14	A Okay.
15	Q All right. Now, where is it that you saw
16	this hand coming in on a still frame?
17	A I did not see it on your video. I'm saying
18	that I saw a video, the same not the video, but
19	the still shots, and I was able to see that hand come
20	in.
21	Q All right. Now, at 13:26:25.346, you've
22	already indicated to me that you see a light, and you

see Mr. Oulson, correct? Not a light, but it's a dot?

A A dot, yes.

Q All right. I'm going to go back so it's a little bit bigger, I'm going to go back to the same frame in State's Exhibit Number 4, so we have a larger picture to look at. All right, sir?

A Okay, okay.

2.1

Q Now, we're on State's Exhibit Number 4, Camera Number 11 at 13:26:25.346, correct?

A That's correct.

Q And that's the same frame we were looking at on State's Exhibit Number 3, right?

A That's correct.

Q Now, at this point, before we got into the discussion about this frame that you saw, you indicated to me that at this point is when something happened that Mr. Reeves explained to you. Would you just pick it up from there? What happens at this point?

A At this point Mr. Reeves believes he has been assaulted and hit in the head.

1	Q With what?
2	A He believes it's Oulson's fist.
3	Q All right. So at 13:26:25.346, beginning
4	with that frame, to 13:26:25.712, between those
5	frames is when it happened? That's what I'm trying
6	to figure out.
7	A No, I did not say that.
8	Q Well, tell me what you
9	A Okay, let me tell you again.
10	Q All right.
11	A At 13:26:25.346, you see the light,
12	whatever that light might be.
13	Q Yeah.
14	A The hand, when the arm coming through, you
15	see prior to that 13:26:25.346, so it has to be
16	someplace within that blue, and I did not see it on
17	your screen. I saw it on the computer. I did not
18	see it here.
19	Q All right. A still frame, not a video?
20	A I saw it in still frames. There might be a
21	video. I don't remember, but I saw it in the still
22	frames. Just like you're doing, advancing one by

1	one.
2	Q And it was a video produced by the FBI?
3	That's what you're telling me?
4	A From what I understand, that's correct.
5	It's the same exact thing that you have right here,
6	working exactly the same way, with the exact same
7	numbers.
8	Q It's just I don't have that frame on there
9	that you saw?
10	A I guess you don't.
11	Q At 13:26:25.346, according to the sequence
12	of events related to you by Mr. Reeves, is that when
13	Mr. Oulson stood up?
14	A Again, that is not what I understand that's
15	when he stood up. That's when the assault began. He
16	stood up prior to that.
17	MR. ESCOBAR: Glenn, I'm going to object.
18	This is the third time he tells you that, and you
19	keep asking him the same question all over again.
20	This has gone beyond being realistic.
21	BY MR. MARTIN:
22	Q Now, at this particular frame is it your

testimony that because you don't see the frame or the -- that you saw the hand at this point, Mr. Oulson is already standing?

- A At this point --
- Q At this time?

2.1

A At this point it appears that Mr. Oulson is probably standing, because what we saw before that was the hand come through, and then you see the light. So it is Mr. Reeves' belief -- and I believe that the video establishes this -- that he was standing at that time.

Q And when you say "at that time," we're talking about this particular frame he was already standing?

A At that particular frame the punch has been thrown, and Mr. Reeves is -- just been hit in the head or about to be hit in the head, if that's something else, a flying object.

Q All right. So now we have Mr. Reeves punched in the head, right? And something thrown at him?

A Hit in the head.

1	Q Hit in the head?
2	A And maybe the something that's thrown at
3	him is the hit that he felt. He doesn't know.
4	Q And sequencing the events related to you by
5	Mr. Reeves, it's at that point he becomes dazed?
6	A At that point he gets hit in the head, and
7	he feels something is happening, and he's dazed at
8	that point.
9	Q All right. And does he indicate to you how
10	he responds physically to the being hit in the
11	head? What is his body movements? Does he explain
12	to you what he does in response to being hit in the
13	head with something?
14	A What he explained to me is that when he got
15	hit in the head, he was dazed, and he doesn't
16	remember any other movements he made at that point,
17	except sliding back in his chair.
18	Q Okay. So we're going to go forward from
19	frame 13:26:25.346 on Camera Number 11, State's
20	Exhibit Number 4, and I'm going to stop it at
21	13:26:26.346. Do you see Mr. Reeves?
22	A Yes, I do.

1	Q Ar	nd he's leaning forward towards the movie
2	screen, is he	e not?
3	A Ye	es, he is.
4	Q No	ow, at frame 13:26:25.879, can you discern
5	Mr. Reeves' l	eft arm or hand?
6	A At	that point, no.
7	Q Ho	ow about at 13:26:26.046?
8	A Ca	nn I see his left arm?
9	Q Ye	es.
10	A No	) <b>.</b>
11	Q At	13:26:26.546, Mr. Reeves continues to
12	lean forward?	
13	A Th	nat's correct.
14	Q To	owards the movie screen?
15	A Th	aat's correct.
16	Q Al	l right. And at 13:26:27.746, Mr. Reeves
17	has leaned ba	ack and settled back in his seat,
18	correct?	
19	A He	e has leaned back in his seat. I don't
20	know if he's	settled back in his seat. He has leaned
21	back in his s	seat.
22	Q Al	l right. To the point where we just see

the -- a little bit of his head, right?

A That's correct.

1.3

2.1

Q Now, when you reviewed the video after interviewing Mr. Reeves and saw the frames that we just discussed where Mr. Reeves leans forward and leans back after you're telling me that he was — that Mr. Reeves indicated he was hit in the head and dazed, did you have an occasion after reviewing the video to go back and discuss with Mr. Reeves, hey, explain to me what you were doing leaning forward? Did you do that?

A I did not.

Q Don't you think that was important?

A When I talked to Mr. Reeves, he explained to me thoroughly -- understanding in a stressed situation what happens to you mentally and things you might forget and the order you might not remember, it fit completely with what he was saying. So did I expect him to remember he actually moved forward? He was dazed. You're talking about a second right here. And he was dazed, and he moved forward as he's stunned, and then he realizes he's hit, and he moves

1 back. Does he say that he grabbed his face or Q 3 said owie or, boy, this hurt? Does he indicate -how did he react to the blunt trauma? 5 Α He said it knocked his glasses sideways. 6 Uh-huh. 0 So he knew he knocked his glasses sideways 7 Α on that, and that's when he moved back in his seat. 8 9 All right. So while we see him leaning Q 10 forward, based on the sequence of events that 11 Mr. Reeves related to you, he was leaning forward 12 with his glasses knocked sideways? 1.3 Α I imagine it would have been, but I can't see it in this detail. 14 15 All right. I'm going to go forward with 16 the frames. We're going to start at 13:26:27.746, and I'm going forward. Now, at 13:26:30.912 is the 17 18 last frame that we see before -- and they're 19 indicating there's no recording, correct? 20 Α Correct. 2.1 All right. And from the time period that Q.

you and I have been discussing that he's back in his

22

seat up until that particular frame, there is no discernable movement by Mr. Reeves, correct?

A That is correct.

2.1

Q And, of course, the camera frame doesn't pick up anything else. We don't see Mr. Oulson, or we have no idea where he is or what he's doing in that frame, right?

A That's correct.

Q All right. Before that time period,
Mr. Reeves is in his seat and at least we can't
discern any type of significant movement that the
camera would pick up during that timeframe?

A That's what it appears.

Q The next frame is going to be blank, video not recorded. And I'm going to go forward until we see the recording, and then I'll put that frame on the record. The first frame that we see after video not recorded is frame 13:26:35.779. Almost five seconds later, right?

A Thirty-five? I think the first one is 25, yeah. It's -- I mean, it's seconds later, yes.

Q Well, five seconds. Not just a couple of

1	seconds, five	seconds.
2	A Twe	enty-five seconds is when it was before?
3	13:26:25.346	and
4	Q No	
5	A	now it's 13:26:36?
6	Q No.	, I don't want to mislead you. So
7	A Yea	ah, please don't.
8	Q No.	, I'm not. I wouldn't do that. The last
9	frame before	no
10	A Oh,	, the frame before that, yes. Okay, that
11	frame, yes.	
12	Q Ali	l right.
13	A Oka	ay.
14	Q See	e, I didn't want to mislead you.
15	A Oh,	, no, you did a good job.
16	Q Ali	l right. So about five seconds?
17	A Abo	out five seconds, yes.
18	Q Nor	w we go back to the frame where we first
19	see recording	. And, again, it's at 13:26:35.779,
20	correct?	
21	A Tha	at's correct.
22	Q Nor	w, are you aware how long it is between

1	the time that we saw the frame where you said there's
2	a white object? You know, we had the discussion
3	about whether or not we saw a hand or not?
4	A That's correct.
5	Q Until this point right here at frame
6	13:26:35.779?
7	A And your question?
8	Q How many seconds that's
9	A About ten seconds.
10	Q Okay. Now, in that ten-second period
11	and that's roughly ten seconds. The events that
12	you're describing that Mr. Reeves described to you
13	taking place is that something has hit him in the
14	head, his glasses is askew, sideways, and he's dazed,
15	right?
16	A That's correct.
17	Q And possibly this is when the cell phone is
18	
	thrown?
19	thrown?  A No, the cell phone was thrown up in
19 20	
	A No, the cell phone was thrown up in

1	believes he was hit with something.
2	(Whereupon, Mr. Michaels leaves the room.)
3	Q Okay. And you know that cell phone was
4	located or at least it was recovered that's the
5	best I'd say. It was recovered in Mr. Reeves' aisle,
6	very near where his feet were?
7	A That's correct.
8	Q Okay. Did Mr. Reeves ever indicate to you
9	that Mr. Oulson attempted to recover his cell phone,
10	if it was thrown at him?
11	A No, there's no mention of that.
12	Q And in your critical review of the video
13	frames of that ten-second period that we've been
14	looking at, did you identify any at any time
15	Mr. Oulson's attempt to recover his phone?
16	A I did not.
17	Q Do you know how much the phone cost?
18	A I do.
19	Q What's your best guess? I'll keep it as a
20	guess. I'm not going to hold you to it. It's an
21	iPhone 5.
22	A Well, I can tell you it depends what kind

1	of deal you get with the
2	Q With the phone company?
3	A With the phone company. But they can go up
4	to \$600, down to they can get them for a hundred
5	dollars. So
6	Q And do you know what information was on
7	that phone?
8	A I do not know everything that was on his
9	phone.
10	Q All right. Do you know the number of
11	contacts he had?
12	A I do not know that.
13	Q The number of applications that he had on
14	it?
15	A I do not know that.
16	Q Number of photographs that he had on it?
17	A I do not know that.
18	MR. ESCOBAR: Be careful with those
19	photographs.
20	MR. MARTIN: Still not relevant.
21	MR. ESCOBAR: You've opened the door.
22	MR. MARTIN: Might be.

1	BY MR. MARTIN:
2	Q You don't know how important that phone was
3	to Mr. Oulson, do you?
4	A I do not know how important it was to him,
5	no.
6	Q So according to Mr. Reeves, possibly an
7	iPhone belonging to Mr. Oulson was hurled in his
8	direction, and he was hit by it, right?
9	A He says that's a possibility, yes.
10	(Whereupon, Mr. Michaels enters the room.)
11	Q Okay. And this was some ten seconds before
12	the frame that we see right here at 13:26:35.779?
13	A That's correct.
14	Q Now, do you see Mr. Oulson in that
15	particular frame?
16	A Not really, no.
17	Q I'm going to go forward.
18	A Okay.
19	Q I'm going to go forward to 13:26:36.512.
20	The reason I did that I want you to look at that,
21	and then we're going to play it backwards until we go
22	to black. Now at 13:26:35.779. Now that you've seen

1	the movement that we see in the frames, do you know
2	where Mr. Wilson (sic) is in that particular reason?
3	MR. ESCOBAR: Is there another character,
4	Mr. Wilson, around here?
5	MR. MARTIN: I'm sorry, Mr. Oulson.
6	THE WITNESS: Mr. Oulson?
7	MR. MARTIN: Yeah, you're right.
8	MR. ESCOBAR: Let's not bring another
9	character in.
10	THE WITNESS: Just play it forward again.
11	Let me see.
12	MR. MARTIN: Sure.
13	THE WITNESS: You can see part of
14	Mr. Oulson right in there.
15	BY MR. MARTIN:
16	Q All right. At 13:26:35.779, now that
17	you've you know, looked at frame orientated
18	yourself and we worked backwards, do you know where
19	Mr. Oulson is in the frame?
20	A It appears Mr. Oulson is almost right on
21	top of him, which would put him just about over the
22	top of his wife's seat.

1	Q How do you know that?
2	A It just appears that way in the video.
3	Q But he's on top of him?
4	A He's on top of what?
5	Q He's on top of him? That's what you said?
6	A No, he's coming in towards him. You can
7	see the you can see the body of Mr. Oulson right
8	there, and you can see Mr. Reeves right there. And
9	the seats are such that he has to be over the
10	almost over the top of the seats at that point.
11	Q All right. And do you know the position of
12	Mr. Oulson, based on the facts and circumstances as
13	you know them?
14	A Do I know the position of Mr. Oulson?
15	Q Yeah, at that point. Is he standing with
16	both feet on the floor? Does he have his knee in the
17	seat? Does he have both feet in the seat? Do you
18	know that's what I'm talking about, position.
19	A I do not know the actual position of
20	Mr. Oulson on that chair, just that he's coming over
21	the back of the top of that chair at that time. He
22	could be standing, kneeling. I don't know at that

1 point. 2 But Mr. Reeves indicated that he was Q 3 pushing on the back of his seat, correct? He was coming over the top of the back of 4 5 his seat, Mr. Oulson was. 6 Well, correct me if I'm wrong, my question Q 7 to you is did Mr. Reeves tell you that he was pushing 8 on the back of his seat? Mr. Oulson was pushing on 9 the back of his seat? Mr. Oulson was pushing on the back of 10 11 Mr. Oulson's seat? 12 Yeah. Did Mr. Reeves say that to you? 13 Α I don't know if he actually said that to 14 He said he was coming -- he felt like he was 15 coming over the top of the seat towards him. I don't 16 remember him saying the word pushing on the back of 17 his seat. 18 All right. And I'm just talking about the 19 interview that you had with him, not the interview he 20 had with law enforcement. Yours.

That's correct.

2.1

22

Α

Q

Okay. Now, at frame 13:26:25.779, you

indicated that you see Mr. Oulson, and you indicated you don't know if he's standing fully erect, he's standing up in the seat or whatever, correct? You don't know his position?

A That's correct.

2.1

Q Okay. Now, when you and Mr. Escobar were in Cobb Theatre, and you had the actors playing or providing you the movements of Mr. Oulson so you could see what it looked like while you were sitting in Mr. Reeves' seat, did any of those -- did the actor hold onto the back of the seat or not hold? How did the actor lean over so the actor wouldn't fall over into Mr. Reeves' aisle?

MR. ESCOBAR: You know, Glenn, I'm going to let you get into this, but I want to make an objection that this is work product, but I've let you get into that because --

MR. MARTIN: Work product?

MR. ESCOBAR: Yeah.

MR. MARTIN: He's relying on it.

MR. ESCOBAR: No, no. No, no. He went through that process to have the experience of it.

1 But, you know, he and I were interacting, and we were 2 interacting in different positions, and that's work 3 product. But I'm --MR. MARTIN: 4 No. 5 MR. ESCOBAR: It is, but I'm going to let 6 you get by a little bit more, but, you know, you've 7 gone over this quite a few times already. BY MR. MARTIN: 8 9 My question to you is, the person providing 0 10 you the movements so you could have the life 11 experience, if you will, in Cobb Theatre, how did 12 that person providing the movement of Mr. Oulson lean 13 over the seat so that person didn't fall into the aisle of Mr. Reeves? 14 15 Well, I hate to say it this way, but Mr. Escobar's not 6 foot 4, so it's --16 Well, look, that doesn't matter. 17 0 18 You're asking me a question, so let me answer the question. 19 20 Q Okay. 2.1 You're asking if he -- pushing over the Α

seat, Mr. Escobar was standing where I thought that

22

Mr. Oulson is and he's coming over the top of the seat, and it appears like he's coming over. Is he kneeling on it? I don't know. Was Mr. Escobar standing there? He was coming over, and I don't know exactly where he had his hand. I just remember that one hand came in towards me.

Q All right. So my question to you -- and this is what I want the answer to. If you don't know, tell me you don't know, and we're going to move on. I don't need a long narration. Do you know how the person providing the movements leaned over and was able to extend that hand out in front of you while leaning over and do so without falling into the aisle where you were sitting? Do you know how that took place?

A No, I don't.

Q Now, you went and stood there and did the same thing, you did that movement?

A Yeah.

2.1

Q Tell me how you reached over with your right hand and didn't fall into the aisle. What did you do to prevent that?

1	A I believe at that time I was holding onto
2	the seat the back of the seat with my left hand,
3	just because my back is so screwed up. And that's
4	what happens
5	Q Well, even if your back wasn't screwed
6	up
7	A I can't tell you. My back is screwed up,
8	so I'm
9	Q Okay.
10	A telling you how I leaned. That's what
11	the question
12	Q All right, fine.
13	A you asked and the answer to it.
14	Q Wait a minute. No, we're my question to
15	you is, if you did not have your hand there, would
16	you have fallen over into the aisle?
17	A I don't think I would have.
18	Q All right. And how far did you reach
19	towards the other person sitting in the other seat?
20	A Just reached back to see how hard it would
21	be to reach back.
22	Q So my question was and please listen

how far did you reach? 1 Α And my answer would be I don't know 3 In inches, if you're asking, I don't know exactly. exactly how many inches I reached back. With my arm 5 length, whatever that is. 6 Were you able to touch the seat bottom of 7 the seat in the aisle across from you when you 8 reached over? 9 Α I didn't try to touch the seat bottom. 10 Q Did you try to touch the arm? 11 I did not try to touch it. I tried to Α 12 touch where it would be where somebody would be there 13 if I was going to grab something. And where would that be? 14 Q 15 It would be somewhere around the armrest, 16 somewhere around the armrest. And you did that? 17 Q 18 And I did that, yes. 19 All right. So in reaching that far, my Q 20 question to you is, could you have done that without 2.1 falling over without your left hand on the seat?

And my answer would be the same. I think I

22

Α

1 could. I don't -- I didn't try it that way.

Q All right. But what you did do is you put your hand on the seat?

A I believe I put my hand on the seat.

Q All right. Now, at frame 13:26:35.779, can you discern whether or not Mr. Oulson has his hand on the seat back? His left hand?

A I can't tell.

2.1

Q Okay. I'm going to play it forward. We're at frame 13:26:36.312. I'm going to play it forward. Camera Number 11, State's Exhibit Number 4. I want to go back, I'm sorry. Now, I'll play it again. I'm going to start over. I apologize to you. We're at 13:26:36.112. I want to play it forward. Now, at frame 13:26:36.312, do you know where Vivian Reeves was seated in relationship -- in relation to her husband at the time of the event?

A Seated to the right.

Q All right. And based on that knowledge, can you tell whether or not in this particular frame you see Vivian Reeves?

A It appears to be her, yes.

1	Q And she is beginning to lean forward?
2	A That's correct.
3	Q All right. I'm going to move it forward.
4	The next frame is 13:26:36.346. At that point do you
5	discern movement from Mr. Oulson?
6	A Yes, I see a hand coming in.
7	Q All right. Now, I'm just going to toggle
8	one, two; one, two; one, two. I'm just
9	toggling it back and forth.
10	A Okay.
11	Q And ask you is that the frames that you saw
12	when you thought about there was a hand coming in?
13	A It is not.
14	Q All right, sir. I'm going to go forward
15	from 13:26:36.346 to 13:26:36.579. Now, I can play
16	it over and over again for you, but at that point can
17	you tell whether or not Mr. Oulson has the bag of
18	popcorn in his hand?
19	A It appears he grabbed the bag of popcorn at
20	that point in time.
21	Q Okay. I'm going backwards. All right?
22	I'm going back forward. At 13:26:36.679, can you

discern whether or not Mr. Oulson is moving his hand back with the bag of popcorn?

A It appears he is.

2.1

Q All right. Now, according to Mr. Reeves' statement to you, the events that we see here,
Mr. Oulson grabbing the popcorn and bringing it back,
occurred some 10 or 11 seconds now after something
hit him that dazed him and dislodged his glasses,
right?

A That is correct.

Q So at this point -- and it's not where Mr. Reeves is saying that he was hit with a fist or the cell phone?

A That's correct.

Q Okay. It was some now 11 seconds before that?

A That's correct.

Q I'm going forward on Camera 11, State's Exhibit Number 4, 13:26:36.712 to 13:26:37.046. In those frames can you discern whether or not Mr. Oulson is in the process of tossing the popcorn bag?

1	A It appears his hand is coming back in, so
2	it appears he is, yes.
3	Q And he has the popcorn bag in his hand?
4	A It appears he does, yes.
5	Q I'm going to go forward at 13:26:37.112.
6	Can you discern whether or not the popcorn bag has
7	now left Mr. Oulson's hand?
8	A It looks like it still might be in his hand
9	at that point in time.
10	Q Next frame, 13:26:37.146, has it left his
11	hand?
12	A It appears it has, yes.
13	Q At this point can you discern whether or
14	not there's anything else in Mr. Oulson's hand at
15	this particular frame, or is his hand empty?
16	A From this video, it doesn't appear. I
17	can't tell.
18	Q But the bag came out of that hand, and it
19	left, right?
20	A It appears it has, yes.
21	Q We'll continue forward at 13:26:37.146.
22	I'm just playing it back and forth to 13:26:37.412.

Now, you mentioned to me that Mr. Reeves told you that upon being struck with whatever, a fist or the cell phone, that his reaction was that he scooted his buttocks from the back to the front bottom of his seat, and he stretched out trying to create distance, correct?

A That's correct.

2.1

Q All right. Now, some now almost 12 seconds later, we see the toss of the popcorn. Back -- and I'm going to go back, because I don't want to mislead you. Now we're at 13:26:25.346, State's Exhibit

Number 4, Camera 11, where -- based on your critical review of the video and Mr. Reeves' statement to you in Mr. Escobar's office, is when he was struck with whatever object it was, he was dazed, glasses off, and he began to scoot back --

MR. ESCOBAR: Not glasses off. Glasses -MR. MARTIN: You're right, you're right.

BY MR. MARTIN:

Q His glasses ascured (phonetic.) Is that the word? They weren't off his face, but they were on one ear or something.

1	MR. ESCOBAR: No, they weren't off his
2	face.
3	MR. MICHAELS: Askewed, askewed.
4	BY MR. MARTIN:
5	Q Askewed. Yeah, his glasses were askewed.
6	Thank you. Correct?
7	A Yes.
8	Q All right.
9	A If you're asking me, yes.
10	Q Now, at this point in frame 13:26:25.346,
11	when that occurred you indicated he was dazed, and he
12	began to scoot his buttocks from the rear to the
13	front of the seat. Is that what we see up until
14	13:26:27.779?
15	A What I said is that that's what he believed
16	he did.
17	Q That's what he said?
18	A That's what he believed he did, yes.
19	Q So my question to you is, do we see that in
20	the video?
21	A No, you don't see that.
22	Q All right. After you interviewed

1	Mr. Reeves and had a chance to look at the video in
2	greater detail, did you, in fact, notice that at the
3	time that Mr. Reeves indicated that he was struck
4	with the blunt object, that the video does not
5	support that he scooted his buttocks forward?
6	MR. ESCOBAR: And, Glenn, can we just put
7	the time period that you're
8	MR. MARTIN: Yeah.
9	MR. ESCOBAR: saying that he did scoot
10	his buttocks? But you've got to put that 13:26
11	MR. MARTIN: Yeah, okay, okay, Richard,
12	I've got it. Hang on a second. Hang on.
13	MR. ESCOBAR: You've got to give him the
14	parameters.
15	MR. MARTIN: Hang on, hang on, hang on,
16	hang on.
17	MR. ESCOBAR: Because his head evaporates.
18	MR. MARTIN: Hang on, hang on, hang on.
19	MR. ESCOBAR: Reeves' head.
20	MR. MARTIN: All right. 13:26:25.379 to
21	13:26:28.046.
22	MR. ESCOBAR: You've got to go further

back, because you'll see his head continues to
evaporate, Mr. Reeves' head. Go as far back as you
can.

MR. MARTIN: I'm not going back. I'm going forward.

MR. ESCOBAR: No, I say -- I mean forward meaning that keep going on the film.

MR. MARTIN: All right. We'll go all the way up to 13:26:28.912.

MR. ESCOBAR: Exactly.

## BY MR. MARTIN:

18

19

20

2.1

22

Q All right. Now, can you discern Mr. Reeves scooting his buttocks forward from the back of the seat to the front of the seat during the time of those frames? Between those frames?

A From the video, no.

Q Okay. Once you had a chance to conduct a critical review of the video, knowing what Mr. Reeves told you, did you have an occasion to go back and discuss with Mr. Reeves, Look, I've seen this in the video, can you explain this to me so I understand it? Did you do that?

A I did not, and I explained that to you before, why I did not.

- Q All right. Well, in this particular case, why did you not for this sequence?
  - A And it would be the same answer.
  - Q Okay. What is it?

2.1

A Is that I have extensive experience in people that have been involved in critical life-threatening situations and situations that they consider to be extremely dangerous, and their mind does not capture everything that's going on. So just because you don't do a certain movement, or they do a certain movement, doesn't mean they're lying. It just means they just didn't remember doing that.

Q Now, the concept that you just explained to me, that is a concept that is taught at Force Science Institute, is it not?

A I'd have to go back and think about that, if it's taught at Force Science. I know it's taught in the FBI. I know it's taught in many police departments all across the country. So I don't know if it's taught in Force Science or not. I just don't

remember that.

1.3

2.1

Do you recall during the Force Science Institute
Seminar instruction to the effect that when you have
a person's statement that appears to be inconsistent
with other evidence because of the concept that
you've just explained to me about a high stress
situation and a person's memory, that you cannot
automatically assume that the person is lying, that
you have to go and look at all of the extrinsic
evidence to determine whether or not it is memory or
it's lie. Do you remember that type of instruction?

A I do.

Q All right. Is that correct?

A And that is correct.

And so what did you do to go and look and make a determination as to the extrinsic evidence that's out there to make a determination is

Mr. Reeves lying, or is it based on -- on memory based on stress? Did you conduct that analysis?

A Did I conduct that analysis? I looked at the video. I looked at everything that happened.

1 Everything was pretty consistent with everything that 2 I understood, and I didn't see it as a problem 3 because of his actions. I did not see that. And how many times did Mr. Reeves tell you 4 5 that he stretched out? 6 Α He told me several times that he had 7 stretched out. Several times. 8 Q I phrased that question inartfully. May I 9 start over, please? 10 Α Sure. 11 Okay. My question is: Did Mr. Reeves tell Q 12 you how many times he stretched out? Not how many 13 times did Mr. Reeves tell you he stretched out. 14 you see the difference? 15 Α Yes. 16 Okay. I apologize for that. So could you 17 answer that question, please? 18 Α Mr. Reeves said that he wanted to get 19 distance, and that's when he stretched out at that 20 point to get that distance. So it was at that point 2.1 in time that he believed he stretched out. 22 Q Okay. We're just going to stay on State's

Exhibit Number 4, Camera Number 11. I'm going back to our discussion at frame 13:26:37.146, where you indicated to me that it appeared that the popcorn bag has left his hand, right?

- A That's correct.
- Q So now I want to start from there. Okay?
- A Okay.

2.1

Q So we're going to go forward with the video. I'm just playing it back and forth for you, and I'm stopping at 13:26:37.479. So we're just going to go back and forth. I want you to see it frame by frame. We are stopped at 13:26:37.479. I've played that over and over for you again so you could see the movement, because I want you to have that in your head, so I can ask you these questions.

In the frames that we reviewed from the time that you can discern that the popcorn apparently left his hand until we at least see just a little bit of Mr. Oulson's hand, if you will, in the frame, correct?

- A Okay.
- Q All right. Now, you indicated that

1 Mr. Reeves told you during his interview that he stretched out in his seat to get distance, right? 3 That's correct. Α Were you able to discern that in the video? 4 0 5 Α It appeared he did, yes. 6 And what is it about the video? What are Q 7 your cues when you look at that critically? What are 8 your cues that lead you to believe at that point he's 9 stretching out? And we can toggle back and forth, or 10 you can do it, if you want to. 11 Α Let's get the thing stretching out. He was 12 not laying down. He was moved back in the seat. 13 Right. Q 14 He couldn't lay down. He's moved back in 15 And it appears that's what he did. the seat. said he did that, and I see nothing in the video to 16 17 say he did not do that. 18 I'm just asking you to identify the cues 19 that you can see so I can look at those cues. Can 20 you do that for me?

the question you're asking, what cues are you talking

I don't know if I can. I don't know with

2.1

22

Α

1 about?

3

4

5

6

7

8

9

10

13

14

15

16

17

18

19

20

2.1

22

Q Well, I don't know. That's why I was asking you. You indicated that at that point you believe that Mr. Reeves was stretched out. All I'm asking is you to look at the video and say, Glenn, at this point I see this, at this point I see this, at this point I see this, and based on those three things, I believe he was stretched out. I don't know what the cues are. They are in your head.

A Okay. Go back, if you would.

11 Q I'll let you toggle back and forth so you can do it.

A You're going to let me toggle back and forth?

O Yeah.

A Thank you.

Q Go ahead, you can't hurt nothing. Just let me know.

A Okay. Right at this point you see the hand coming in there, and he grabs the popcorn.

Q Now, I'm going to have to help you with the frame numbers --

1	A Sure.
2	Q so the record's good. Now, I'll let
3	you narrate, though, all right?
4	A Sure, absolutely.
5	Q At 13:26:36.479, correct?
6	A Yes.
7	Q All right. Now, what takes place? What
8	are you telling me?
9	A Okay. He grabs the popcorn.
10	Q Yeah.
11	A It should be noticed at this time, too,
12	Mr. Reeves, when he talked to me, did not know he
13	grabbed the popcorn. Alls he knows is that a
14	movement was coming in towards him. Now you see the
15	hand is back, all the way back at this point.
16	Q All right. Wait a minute. "This point"
17	you're referring to frame 13:26:36.912, correct?
18	A That's correct.
19	Q Go ahead.
20	A And then you see the hand come forward, and
21	it appears that that's where the popcorn is leaves
22	Mr. Oulson's hand.

Q All right. And that's at frame

13:26:37.146. And at what point -- the question is:

Where is he --

2.1

A I believe he's back. I believe he's been laying back there. Let me go all the way back here. Okay. I believe he's laying back at that point. He's back as far as he can really go. And his wife at that point -- he's kind of moving. She knows something's going on, and she just wants to get out of the way. And the popcorn is grabbed, and then it comes back, and then it comes forward, and Mr. Reeves believes at that point in time --

Q All right, stop right there. When you say "that point in time" 13:26:37.212. You believe at that point that he's stretched out?

A I believe he's stretched out as much as he can be stretched out at that point. Laid back in his seat more.

Q Now, Mr. Reeves explained to you that when he was in that stretched out position that his left hand was out in front of him defending himself. Do you remember him telling you that?

1 A Yes, he did.
2 Q And you can use the toggles. If you would

2.1

just toggle forward and stop it where you see

Mr. Reeves' left hand extending out in defense, in a

defensive manner.

A Okay. Right about there. If anything, he might have his hand up at that point.

Q What is the visual cue in the video that you're relying on at this point his left hand is up?

A I see movement right about there. If you see a little bit of movement right there, that appears that -- it was coming across and it appears that it might be something that he's hitting at that point.

And you're telling me at frame 13:26:37.112, you've discerned from the cues that you see in the video that Mr. Reeves' left arm is extended out in front of him in a defensive manner to ward off Mr. Reeves? Is that your testimony?

A That's what it appears that it could be. I don't know, because unless you really enhance this

1	video and brought it up where you could see it, I
2	can't tell you for sure.
3	Q All right. Well, keep going forward.
4	A You can see his hand at that point. Do you
5	see it?
6	Q All right. Where is his hand?
7	A His hand is down at that point. It's
8	coming up right there.
9	Q Uh-huh.
10	A His hand is up more.
11	Q All right. Now, Mr. Reeves explained to
12	you that he reached out, and he came in contact with
13	something. He didn't know if it was the shoulder or
14	chest, and he was going whatever his thought
15	process was. I don't remember
16	A He didn't know what it was. An arm, a
17	hand, a chest. He didn't know. He felt like he
18	Q He'd grabbed ahold of something?
19	A He didn't grab ahold of something. He put
20	his
21	Q He touched something?
22	A He felt like he touched something, yes.

Q All right. So my question to you -- and use the toggles. Go ahead and stop the frame for the video that supports Mr. Reeves' statement that he reached out and actually touched Mr. Oulson.

A As I showed you, it looked like it might be a hand coming up at that point in time.

Q Just stop it, and I will put the frame on the record.

A I stopped it.

1.3

2.1

Q Okay, I apologize. 13:26:37.346 is where you believe that Mr. -- according to Mr. Reeves' statement, in an attempt to support his statement by the video that Mr. Reeves came in contact with Mr. Oulson?

A It goes back to exactly what I said before, and I'm not giving you any long dissertation. It's the same answer. When people are in stressful situations, they don't get every detail of what actually happened. Sometimes they put things in there that didn't happen, and other times they omit things. It's just because when you're under stress, your mind does not capture every piece. That is --

1 research has gone back many, many years, and a lot of 2 research was done in the FBI on that. 3 Now, your answer kind of begs the question, why did you tell me that if you did not believe that 4 5 the video supported the fact that Mr. Reeves' hand 6 went out and touched Mr. Oulson? 7 MR. ESCOBAR: I'm going to object. Ι 8 believe he told you that. You're being 9 argumentative. BY MR. MARTIN: 10 11 Are you going to answer the question? Q 12 I don't know. I don't understand your 13 question. 14 Well, you just told me that -- again, 0 15 reiterated, without giving a long dissertation, that 16 people don't remember everything, right? 17 That's correct. Α 18 That's what you said? 0 19 Α That's correct. 20 So you made that statement right after you 2.1 looked at the video, and I asked you where Mr. Reeves 22 touched Mr. Oulson. And so when I heard that answer

I want to know why you gave me that answer. Is it because the video doesn't support it, or it's just gratuitous on your part?

1.3

2.1

A I don't see anything on Mr. Reeves going up and grabbing his chest or his shoulder or anything. I see a movement. It could be his hand. And he might believe that he grabbed -- he might believe in his mind that he grabbed something. That's what I'm saying, is that he might believe that's exactly what he did. And I can see some movement in there, so I can -- I can look at this, and I can understand that's a -- possible. Yes.

Q So when we get back to what we talked about the memory and the ability to perceive and to accurately record memory under high stress situations, we talked about in order to determine whether or not the person is lying or just doesn't remember because of the high stress, you have to look at the extraneous evidence to make that determination, right?

A You have to look at the totality of everything.

1	Q	Okay.
2	A	So you're looking at everything, yes.
3	Q	All right. Now, you're a police officer?
4	A	I am not.
5	Q	You well, you were with the FBI.
6	A	I am I was with the FBI.
7	Q	You were with the FBI?
8	A	That's correct.
9	Q	You went to firearm training?
10	A	That's correct.
11	Q	I don't know well, let me just ask you.
12	Now in you:	r career do you carry a firearm, or do you
13	have any t	ype of license to carry a firearm?
14	A	I have every license that Virginia offers.
15	Protection	specialist to a private to a 218. I have
16	every lice	nse there is.
17	Q	All right. So you have a 218. So every
18	year you ha	ave to go and take a 40-hour I mean a
19	40-round co	ourse to maintain your H.R. 218?
20	A	I fire every year to qualify, yes.
21	Q	Yeah. Until you get your card, right?
22	A	Yes.

1 Well, let's just stick with that life 0 2 experience and your live experience as a police 3 officer. I wasn't a police officer. Α I'm sorry, a special agent. 5 0 6 Α Yes. 7 I apologize to you. Thank you. Q I want to 8 ask what you do, and then I'll follow up with some 9 questions. All right? And it's regarding the use of a firearm. 10 11 Α Okay. 12 You're on the range. You've got your 13 H.R. 218 that's got to be renewed, so you're going to 14 go through the 40-round course. You're up there, 15 stage 1. All right. Now, is stage 1 still the hip draw, or did they change that? 16 17 Oh, God, I don't remember. It's a Α 18 ridiculous course.

Q It is a ridiculous course, but I didn't want to use stage 1 if this is -- let's go back to stage 2 where you're at the 7 yard line, all right?

A Right.

19

20

2.1

22

1	Q And you have to draw and fire two-handed?
2	A I can't tell you the exact
3	Q Wait a minute. I just
4	A Okay, go ahead, go ahead.
5	Q All right. And then there's a part of the
6	stage where you have to fire weak hand and support
7	hand, correct?
8	A That's correct.
9	Q Now, here's my question to you: When you
10	draw your firearm and you know you're going to draw
11	fire either weak hand or strong hand, what do you
12	do with the hand that is not going to support the
13	firearm? What is your practice?
14	A What is my practice when I draw?
15	Q Uh-huh.
16	A When I draw the weapon, my hand is probably
17	somewhere around my front area, right in the middle.
18	Q Okay. Do you bring it to your chest? Say,
19	you draw right-handed. I don't know what hand. When
20	you draw, do you bring your hand close to your chest?
21	A I do not.
22	Q You stick it out here (indicating)?

1	A	I do not.
2	Q	Where do you put it?
3	A	As I said, I bring it around, and it's
4	probably so	omewhere in the middle of my body
5	(indicating	g.) And they teach if that's what
6	you're gett	ing at to put the hand up on the chest.
7	Q	All right. Now, Mr. Reeves is a police
8	officer or	was many years?
9	A	Yes.
10	Q	SWAT? All right. And he has an H.R. 218,
11	correct?	
12	A	That's correct.
13	Q	He also has a concealed weapon?
14	A	That's correct.
15	Q	And every year with an H.R. 218 his is
16	no differer	nt than yours he has to go through the
17	40-round co	ourse?
18	A	That's correct.
19	Q	It is a nationally recognized course, and
20	everyone do	pes the same thing?
21	A	That's correct. They're supposed to do the
22	same thing.	

1	Q All right. Would it surprise you that in
2	Mr. Reeves' training that he was taught the same
3	thing as you, to get your hand out of the way when
4	you draw a gun and go to shoot it one-handed?
5	A That would not surprise me at all.
6	Q Because that's what
7	A Yes.
8	Q All right. If you're proficient with a
9	firearm and you're serious about the training, you
10	get your hand out of the way, right?
11	A That's correct.
12	Q And it becomes memory, doesn't it? I mean,
13	you do it over and over, so you don't have to think
14	about it?
15	A H.R. 218 is a 40-round course. I would not
16	consider doing that over and over again.
17	Q I understand.
18	A You know, when you're firing thousands of
19	rounds every year in different courses, you're going
20	to get it into muscle memory.
21	Q All right. That's what I'm getting to, is
22	the muscle memory. And once you have that muscle

memory, it's kind of tough to get rid of that muscle memory, isn't it?

A It's like riding a bike. You kind of have it, but you might not be good with it.

Q True. And it would not surprise you that if Mr. Reeves fired -- pulls his weapon and is going to shoot it one-handed, he would bring his left hand to his chest, would it? Just out of pure muscle memory, don't even have to think about it. Right?

A No.

2.1

Q That would not surprise you if he would do that?

A It would surprise me if he did that.

Q Why would it surprise you if he did that?

A When you're under a stressful situation, unless you've been trained and trained and trained and you're current in your training, you're going to respond in a way that you feel is going to protect yourself. So if a person draws his weapon, he might not have his hand back. He might have his hand out in front, at the same time hoping to hold the person off that he's shooting at.

Q Okay. I know that you have some criticism on Mr. Proctor's interview of Mr. Reeves, but in reviewing the law enforcement interview of Mr. Reeves, do you recall Mr. Reeves indicating to Detective Proctor that when he drew his weapon, he had his left hand out in front of him and, in retrospect, he was surprised that he didn't shoot his hand?

A That's correct.

2.1

Q Now, having that statement out there in the air, does the video support Mr. Reeves' statement that his hand was out in front of him when he fired his weapon, therefore, he would be surprised that he didn't shoot his hand?

A It's another extremity that's flying out there, and you don't know exactly where it is, so it does not surprise me. And I don't know what he did with that hand, but it doesn't surprise me. I do not see it on the video that his hand stood out in front and that he thinks it is.

Q And, again, we go back to the same thing when we talk about trying to determine whether or not

it's a lie, or is it just unrecorded or misinterpretation due to high stress as far as someone's memory, you have to go and look at the extraneous evidence to make that determination, right?

2.1

A You have to look at everything, yes.

Q And did you do that in this particular case? Attempt to determine whether or not the statements by Mr. Reeves regarding where his left hand was, whether it was touching Mr. Oulson or so far out front that he was in retrospect concerned that he would have shot himself is a lie, or is it just because of the high stress situation his memory is not accurate?

A I believe his memory is not completely accurate. But in that same context, if he said his hand was out front, he's surprised he didn't shoot it, that does not surprise me, because you're trained, as you said, to put that hand up on your chest, he didn't do that. And he says, I'm surprised I didn't shoot my hand, my own hand. So to me that kind of showed he's telling the truth here, because

1	it's not what he's been trained to do.
2	Q Okay. Are you sure he didn't bring his
3	hand to his chest?
4	A I don't know. I don't see it in the chest.
5	I don't see his chest, so I can't tell you.
6	Q You could not discern from the video his
7	left hand going to his chest?
8	A I did not see that, no.
9	Q Now, on frame 13:26 I'm at like two
10	hours, so I promised everybody we would stop. So I'm
11	going to stop here. Let's take a 10-minute break,
12	and then we'll come back and finish this up.
13	(Whereupon, the deposition recessed at 2:30
14	p.m. and resumed at 2:43 p.m.)
15	(Whereupon, the photographs were marked
16	as State's Exhibit Number 5 for
17	identification.)
18	BY MR. MARTIN:
19	Q We're back on the record after our
20	midafternoon break. Thank you for everyone coming
21	back on time. I appreciate it. We're going to
22	continue our discussion and looking at State's

- 1	
1	Exhibit Number 4, which is the enhanced video of
2	Cameras 11 and 12 in Theater Number 10.
3	Now, we've been discussing the movements of
4	Mr. Oulson and where Mr. Reeves was scooching back,
5	if you will. We've had those discussions.
6	(Whereupon, Mr. Michaels leaves the room.)
7	Q And we've had discussion about where
8	Mr. Reeves' left hand was at the time he was bringing
9	the gun forward and then firing the gun, right?
10	A Right.
11	Q We've covered all of that?
12	A That's correct.
13	Q To cover the next part I need to go back,
14	we're going to have to look at the same frames again,
15	but it's going to be different questions. All right?
16	A Okay.
17	Q We're going to start with State's Exhibit
18	Number 4. We're going to start at frame
19	13:26:25.346. We've had previous discussions as to
20	trying to put in sequence Mr. Reeves' interview
21	I'm sorry, Mr. Reeves' statement to you during his
22	interview about when things took place.

1 A Uh-huh.

1.3

2.1

Q Now, one of the things that I'd like to try to put in sequence is when Mr. Reeves said to you that he saw Nicole Oulson and her activity. I want to try to put that into sequence now.

A Okay.

Q All right? So that's why we're going all the way back. So we're going to start at frame 13:26:25.346. Now, we've already had discussion about there's a frame that you've seen that I don't have, but that's what I have, so we're going to start with that. Did Mr. Reeves tell you when he saw or made the observation that Nicole Oulson was interacting in some way with her husband during this event? Other than, you know, the phone stuff. You know, talking on the phone. Okay?

A Okay. Mr. -- or Ms. Oulson, according to Mr. Reeves, at that time when he was hit in the head, it was right before then when he saw the other hand come in, and he felt like he got hit, he said that's when his wife was trying to restrain him, as he was coming up over the back of the chair.

Q All right. Now, we're at frame
13:26:25.346. Is that the time period that we're
looking at as far as when Mr. Reeves said that
Ms. Oulson was trying -- or interacting with her
husband?

A Well, she was interacting with her husband
at that time, and she was -- at that time she was not

at that time, and she was -- at that time she was not trying to pull him back.

Q What was she doing, according to Mr. Reeves?

Well, according to Mr. Reeves -- I forget what Mr. Reeves said. She was -- in her statement I forget exactly what she was saying, but she was not liking the argument that was going on at that point in time. And so at that point in time when he feels like he gets hit in the head, and he feels like Oulson is right over the top of him --

Q Well, wait, let me stop you there, because I'm a little confused. And just help me with my confusion.

A Okay.

8

9

10

11

12

13

14

15

16

17

18

19

20

2.1

22

Q He got hit in the head and over the top of

1	him. When you say "over the top of him," are you
2	describing what we see in frame 13:26:25.346? Or are
3	we talking about when the popcorn is grabbed?
4	A When the popcorn is grabbed is when she's
5	trying to restrain him at that point in time.
6	Q Okay. Well, that just takes care of a lot
7	of questions then.
8	A Okay, good. We just cut out some time.
9	Great.
10	(Whereupon, Mr. Michaels enters the room.)
11	Q Yeah. All right. So it's at the time the
12	popcorn is grabbed that he makes the observations
13	that Mrs. Oulson is interacting with her husband?
14	A That's correct.
15	Q Let's go to that part then. So at that
16	point he's already been hit, his glasses are already
17	askewed, and he's dazed, right?
18	A Right, correct.
19	Q So we're going to go forward, what, now
20	almost 11 seconds from that, correct?
21	A Right.
22	Q All right. So we're going to go we're

at Camera Number 11, State's Exhibit Number 4, frame 1 13:26:35.779. You've already explained to me after 3 we've done the reverse -- looking at -- you know, playing the frames in forward and reverse, that you 5 know where Mr. Oulson is in that particular frame, 6 right? 7 Α Yes. 8 Q Now, what I'm going to do is I'm going to 9 play forward from 13:26:35.779 through the grabbing 10 of the popcorn, the tossing of the popcorn and the 11 last time we -- right before -- you see Mr. Oulson's 12 hands going out of frame? 13 Α Right. 14 So what I want to do is I want to stop it 15 right as his hand's in that frame. 16 Α Okay. 17 Which is 13:26:37.602. 0 18 Α Right. 19 Now, in that time period when is Q 20 Ms. Oulson, quote, attempting to restrain her 2.1 husband?

22

Α

Ms. Oulson, herself, said she's putting her

hand up, and she's touching his chest, trying to calm him down, I believe, or something like that she said.

Trying to restrain him. Mr. Reeves --

Q Now, wait a minute, wait a minute.

Ms. Oulson said she's trying to restrain him?

2.1

A No, she didn't. She said she was putting her hand up. I think she said something -- you know, trying to calm down the situation. Mr. Reeves is the one that said she was trying to restrain him by putting her hand up.

Q Okay. Does Mr. Reeves, according to the statement he made to you, make this observation at the times that Mr. Oulson -- and I'm going to go through the sequence. First stands up, reaches out to grab, comes back to toss, toss, and then comes back. Now, one of those events --

MR. ESCOBAR: I'm --

MR. MARTIN: Wait a minute, Rick.

MR. ESCOBAR: You're asking him to make a judgment. You need to ask him what Mr. Reeves -- if Mr. Reeves told him at what moment Mrs. Oulson was actually being restrained. That's the problem. But

you're trying to pin him down to a particular segment of the video, and you're trying to give him the opinion. He wasn't there.

MR. MARTIN: All right. Are you done?

MR. ESCOBAR: I am.

MR. MARTIN: All right. Then I'm going to continue.

## BY MR. MARTIN:

2.1

- Q My question to you is -MR. ESCOBAR: Objection.
- Q -- did Mr. Reeves tell you at what point in the process of Mr. Oulson, as we see in the video, standing, reaching, coming back with the popcorn, tossing the popcorn and hand coming back, that sequence, those frames. At what point in time did he first see Ms. Oulson interacting with her husband by placing her left hand in his area?

A I don't know an exact timeframe that she -he said she put her hand up. He said after he was
hit, Mr. Oulson was standing there facing him, using
loud obscenities, and he felt like he was coming
over, and he felt at that point in time Ms. Oulson

was trying to restrain him. So somewhere within that 1 10-second period, probably towards the last 5 seconds 3 he felt like she was trying to restrain him. When the film is playing? 5 Α No, before -- yeah, where I guess it's 6 playing, before the popcorn was thrown. 7 All right. Q 8 But at that time the popcorn is thrown she 9 feels -- he feels like she has her hand up, trying to restrain him. And the ballistics and the evidence 10 11 shows that her hand was up there. 12 When she was shot. Q 13 Α When she was shot, yes. 14 And, of course, we know that looking at the Q 15 film 13:26:37.612, the popcorn toss has taken place, 16 the hand's back, but the gun still hasn't been fired, 17 right? 18 Α That's correct. 19 In fact, the gun is not fired until Q 20 13:26:37.846, correct?

And of course just -- if she's shot and

That's correct.

2.1

22

Α

Q

1	he's shot with one bullet at the time the gun's
2	fired, that's when she had her hand in front of the
3	chest, right? I mean, there's no doubt about that?
4	A That is one point in time when she had her
5	hand
6	Q One point in time we can all agree?
7	A Yes, right.
8	Q So the question becomes, you indicated that
9	Mr. Reeves says she was still interacting we have
10	the grab, we have the toss, coming back, and, of
11	course, then we see the first part of the gun,
12	correct?
13	A Right.
14	Q At frame 13:26:37.746, right?
15	A Right.
16	Q Now, she is shot in the left hand, right?
17	A Correct.
17 18	A Correct.  Q And you're saying that Mr. Reeves told you
18	Q And you're saying that Mr. Reeves told you
18 19	Q And you're saying that Mr. Reeves told you that at the time of this popcorn toss event

1 in time. 2 All right. Is that possible? Q 3 I think it shows in the evidence. Α No, what shows is she got shot when the gun 4 Q 5 was fired? 6 Α She got shot. Her hand was there. There's 7 one bullet. It goes through his forearm. It goes 8 through her finger, and it goes through his chest. 9 So they're all lined up. That's pretty easy to line it up. 10 11 My question to you is: During the sequence 12 of events of grabbing the popcorn, bringing it back, 13 tossing it, and his hand coming back -- because we 14 can see the hand is coming back before we see the gun 15 fired, right? 16 Α Right. 17 So before the qunfire, you indicated that 0 18 Mr. Reeves indicated to you that Ms. Oulson was 19 interacting with her husband with her left hand or --20 Α Yes.

That's what it appears, yes.

All right.

Q

Α

2.1

22

1	Q So my question to you, during that
2	sequence, before the gun is fired, is that possible?
3	MR. ESCOBAR: I'm going to object.
4	Improper predicate for this person. He is not an
5	accident reconstruction or shooting reconstruction
6	expert. He's a use of force expert. You've got to
7	lay a proper predicate if you want someone of that
8	particular caliber to give you that opinion. So
9	that's my objection. You can answer the question,
10	Mr. Hayden
11	MR. MARTIN: Doctor.
12	MR. ESCOBAR: if, in fact, you know,
13	you're giving a lay opinion. But other than that,
14	you know, I don't think he's qualified to be able to
15	give the reconstruction like that.
16	MR. MICHAELS: My objection is it calls for
17	speculation.
18	BY MR. MARTIN:
19	Q Go ahead and answer the question.
20	A I absolutely do think it's possible.
21	Q Okay. Now, according to Mr. Reeves, how
22	far over the chair did Mr. Oulson come?

A Again, I don't know in inches. He felt like he was coming over the chair. He actually made contact with him when he grabbed the popcorn, so he knew he was coming over the chair at least that far. He thought he was being attacked at that point in time. So how far in inches, I can't give that to you. I don't know.

Q Okay. In the sequence of frames that we've been discussing where Mr. Oulson is seen in the frame in the process of grabbing and tossing the popcorn, do you see Mrs. Oulson in any of those frames?

A I do not.

2.1

Q Now, you were at Cobb Theatre, and you had a chance to be in Mr. Oulson's seat and turn around and, as you indicated, this bottom seat was up and your knees were against the seat was one scenario that you did, and you leaned over. Do you remember that?

A That's correct.

Q Now, having that life experience, when you leaned over and reached towards the seat where

Mr. Reeves -- at the point that you were leaned over,

1	was there any other actor or anything that placed a
2	hand in front of your chest at that point?
3	A No.
4	Q Based on that life experience of Cobb
5	Theatre, if a person had placed their hand there,
6	would that restrict your movement in any way as far
7	as leaning forward?
8	MR. ESCOBAR: Objection, calls for
9	speculation.
10	MR. MARTIN: He has a life experience at
11	Cobb Theatre. He knows what was there.
12	MR. ESCOBAR: Objection, speculation.
13	BY MR. MARTIN:
14	Q You can answer the question, you were
15	there.
16	A Does it? I don't think it really does. I
17	mean, somebody can try, but that doesn't mean it's
18	going to actually work.
19	Q What?
20	A You're talking about restraining?
21	Q No. No. I said not restraining. Does
22	it restrict the movement? Could Mr. Oulson have

1	moved as far forward as he did in the frame with her
2	hand there?
3	MR. ESCOBAR: Objection. Calls for
4	speculation. Again, improper predicate for someone
5	like this to give a certainly an expert opinion.
6	Are you looking for a lay opinion?
7	MR. MARTIN: I'm looking for his life
8	experience at Cobb Theatre, whether or not based on
9	that life experience he feels that's possible.
10	MR. ESCOBAR: So you're looking for a lay
11	opinion?
12	BY MR. MARTIN:
13	Q Do you want to answer the question?
14	A I do believe it's possible, yes.
15	Q We've talked for a while about something
16	hitting Mr. Reeves in the area of the face. Some
17	object, a fist or cell phone or something. Do you
18	remember that conversation?
19	A Yes, I do.
20	Q Did Mr. Reeves describe the injuries that
21	he sustained to his face based on that?
22	A Just that he thought he had something in

1	his eye, and that's pretty much it.
2	Q As a special agent with the FBI and also
3	you were in the military, right?
4	A That's correct.
5	Q Have you ever been in a fistfight?
6	A I have.
7	Q Had your face hit with a fist?
8	A I have.
9	Q Hit with something other than a fist? A
10	blunt object?
11	A I have.
12	Q Do you know what a contusion is?
13	A I do.
14	Q All right. Do you know what abrasions are?
15	A I do.
16	Q Okay. Your life experience when you were
17	hit with some type of fist or blunt object, did it
18	result in an abrasion or contusion?
19	A At times it did, yes.
20	Q All right. At times were you dazed?
21	A Yes, I was.
22	Q I'm trying to get your life experience so I

1 can ask these questions. All right? Α Yes. 3 Okay. Did Mr. Reeves indicate anything other than he felt he had something in his eye, such 4 5 as an abrasion or a contusion about his face? 6 He just felt like he'd been hit in the 7 head, knocked his glasses off, and he felt like his 8 eye was affected. And that's basically what he said. 9 He said he had something in his eye? Something in -- he didn't know if something 10 11 was in his eye or not. 12 Did he describe any injuries to his face as Q. 13 a result of his glasses being askewed on his face? 14 Like something hit his glasses, and his glasses was a 15 secondary blunt object into his face? Do you know 16 what I'm talking about? 17 Α Right. He didn't know. He knew his 18 glasses got, you know, knocked sideways, and he got 19 hit in the head. That was it. 20 He didn't describe any injuries associated 2.1 with his glasses being askewed? 22 Α He did not.

1	Q Have you been provided any pictures of
2	Mr. Reeves taken on January 13th, 2014, of his face?
3	A Yes.
4	Q Let me see State's Exhibit Number 5. Other
5	than pictures taken on January 13th, 2014, have you
6	been shown any other photographs of Mr. Reeves' face
7	taken on any other date?
8	A I don't know if I did or not. I don't I
9	can't answer that.
10	Q Okay.
11	(Whereupon, Mr. Martin tenders document to
- 1	
12	Mr. Escobar.)
12 13	Mr. Escobar.) BY MR. MARTIN:
13	BY MR. MARTIN:
13 14	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5
13 14 15	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5  (tenders document.) Have you seen those photographs

13 14 15 16 17	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5 (tenders document.) Have you seen those photographs before?  A I have.
13 14 15 16 17	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5 (tenders document.) Have you seen those photographs before?  A I have.  Q And are they photographs of Mr. Reeves'
13 14 15 16 17 18	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5  (tenders document.) Have you seen those photographs before?  A I have.  Q And are they photographs of Mr. Reeves' head area, chest area, extremities, his arms?
13 14 15 16 17 18 19 20	BY MR. MARTIN:  Q Let me show you State's Exhibit Number 5  (tenders document.) Have you seen those photographs before?  A I have.  Q And are they photographs of Mr. Reeves' head area, chest area, extremities, his arms?  A Partially, yes.

1 three of them A, B and C. So when I say look at A or 2 B or C, the record will reflect. Okay? 3 Α Okay. MR. ESCOBAR: I'm going to object to these 4 5 pictures as not being glossy pictures; to them being 6 wallet-size pictures instead of at least eight by ten 7 pictures. And certainly the ones that we were --8 made available to us we can make into eight by ten 9 pictures. So that's the first objection. We'll see 10 what your question is. BY MR. MARTIN: 11 12 Have you seen these pictures before? 13 Α I don't remember seeing a page like this. I do remember --14 15 I understand that, but did you -- have you 16 seen the pictures depicted in there? 17 Α I remember seeing pictures. I can't say 18 they were exactly these pictures, but I did see other 19 pictures besides this. 20 Other pictures that were taken on 2.1 January 13th, 2014? 22 Α I don't know if it was taken January 13th,

1 2014.

2.1

Q You can see Mr. Reeves appears to be still in the theater?

A Appears to be, yes.

Q Did you see any pictures other than what -- Mr. Reeves appears to be in the theater?

A I can't tell that Mr. Reeves is in the theater in these pictures. But because he's handcuffed, I believe he's probably in the theater when the pictures were taken. I don't know where these pictures were taken. I'm saying I've seen pictures like this. I don't know if it's exactly the same pictures, but I saw another picture of Mr. Reeves with a side view like B.

Q Okay. And from the picture B that you see in State's Exhibit Number 5, can you discern any injuries that amount to a contusion or an abrasion?

MR. ESCOBAR: Objection, improper predicate for this layperson to give any opinions concerning injuries that he's viewing from a picture on the human body. And, therefore, he's not competent to answer that particular question, and it calls for

1 extreme speculation.

## BY MR. MARTIN:

2.1

- Q You can answer the question.
- A I'm not a medical doctor, and I look at these pictures, and they look like normal pictures taken -- mug shot pictures.
- Q Okay. If you go to the immunity pleading, go to Page 27, please, second paragraph. Just let me know when you're there.
  - A Okay.
- Mr. Oulson's right fist. The medical examiner later concluded that Mr. Oulson's right fist was in front of his thorax at the time it was grazed by the bullet. The back of Mr. Oulson's hand had stippling on it, comma, indicating that it was in close proximity to the barrel of the firearm when it was discharged, period. This was consistent with Mr. Oulson attempting a third punch at Mr. Reeves.

Do you see that in the pleading?

- A Yes, I do.
- Q First question is: What facts are you

aware of that Mr. Oulson's hand was in the shape of a fist at the time that he was shot? What facts do you have to support that?

2.1

A So the photograph of that where the bullet had come through his wrist area and the stippling on the back of his hand, I didn't see stippling, you know, all the way out. I saw it on the back of his hand, which would make it -- it was in a fist.

Q Would the lack of the stippling -- well, since you've made that opinion, let me go ahead and ask you this question. The lack of stippling as you described in the photographs that you saw which led you to the conclusion that Mr. Oulson's hand was in fist, do you know if that was because his hand was in his fist or because the gun was in such close proximity on Mr. Oulson's hand that the spread of the powder and the particulates when it was fired would only encompass up to that point? Do you know?

MR. ESCOBAR: Objection, improper predicate for this witness to opine on an expert opinion like that. If you're asking for his lay opinion, then certainly he'll be more than glad to give you his lay

opinion. But, again, he is not an expert in that particular field, and you're asking a question that requires predicate and certain expertise concerning stippling.

## BY MR. MARTIN:

2.1

- Q Answer the question.
- A I can't give --

MR. ESCOBAR: It calls for speculation as well.

A I can't give you the exact spread of the stippling, especially from a .380. I know that the closer it is, the closer the stippling is going to be. The further away, the further away the stippling is going to be.

Q When you say a closer and further, we're talking?

A The weapon itself. The fire -- when the fire comes out of the barrel, the powder that's behind the round is coming out, and sometimes you'll pick up stippling three feet away, but it's usually within about the 18-inch period is that you -- 18-inch distance is where you get, you know,

stippling, a lot of stippling. This seemed like there was a lot of stippling on the back of his hand, which made me believe it was probably closer than that when he fired.

Q Well, my question to you is because you indicated that you believe that the fact that supports that Mr. Oulson's right hand was in a fist was the lack of stippling from the knuckles towards the tip of his fingers. Remember you telling me that?

A I didn't say that, no.

MR. MARTIN: Would you read that back, please? The first time I said fist.

(Whereupon, the Court Reporter read back the following Answer: "So the photograph of that where the bullet had come through his wrist area and the stippling on the back of his hand, I didn't see stippling, you know, all the way out. I saw it on the back of his hand, which would make it -- it was in a fist.")

21 BY MR. MARTIN:

Q Do you remember that testimony?

1 Α I remember that. I did not say knuckles to 2 the tips of his fingers. 3 Same area, right? Q Same area we're talking about, yes. 4 Α 5 So my question to you is: Do you know 6 whether or not the lack of stippling from the 7 knuckles to the end of his fingertips --8 MR. ESCOBAR: Objection. Same objection as 9 before. BY MR. MARTIN: 10 11 Which you indicated that that's what you 12 were talking about. The lack of it, is it because his hand was in a fist or because the firearm was so 13 14 close, the spread of the particulates were so tight 15 that it did not encompass that area? Do you know if 16 it's one or the other? 17 Α I don't have an expertise in that, so I 18 really can't answer that, no. 19 So it kind of begs the question, what are 0 20 you relying on as for your life experience, if you're

not an expert, to indicate to me that the lack of

stippling from his knuckles to the end of his

2.1

22

fingertips supports the fact that his right hand was in a fist?

2.1

22

Stippling will cover whatever is in front And if you don't -- if you don't have that in front of it, then it wouldn't be there. So that's the only thing I'm saying. I don't know any more about stippling than what I've explained to you here. I saw it on the back of his hand. I don't remember seeing it on the fingers. It could be on the I don't remember seeing it in the picture. So that's what I'm saying. I don't know. I'm not an expert in that area, so I really can't opine on, you know, exactly what the deal is with stippling. Ι know stippling comes out in different distances and it dissipates.

Q My question to you is: What facts are you aware of that support that Mr. Oulson's right hand was in a fist? If this discussion we had about stippling isn't one of them, what else do you have?

A Well, that's the only thing I have, that I came by, and I don't know the position of his hand at that point in time.

Q The last sentence that was read: This was consistent with Mr. Oulson attempting a third punch at Mr. Reeves. Do you see that?

A Yes, I do.

Q Okay. We're going to start at frame 13:26:35.779.

A Okay.

2.1

Q Okay? Now, I'm going to play the video forward. The popcorn is tossed, and we're back to where we were when you just see the right hand in the frame at 13:26:37.612, right?

A Right, I can.

Q Now, between the sequence of events and the frames, those frames, can you discern and corroborate Mr. Reeves' statement that there was a third punch coming?

MR. ESCOBAR: I'm going to object. There's been no statement by Mr. Reeves that there was a third punch coming. And this is -- you read the sentence that's in the motion, and then if you want to ask him a question concerning that sentence, you can, but you can't be putting in facts that are

1 nowhere in evidence in this record. 2 MR. MARTIN: Are you sure two weeks is 3 going to be long enough for this hearing? MR. ESCOBAR: That was awfully sneaky, but 4 5 not sneaky enough. 6 Nothing sneaky going on. MR. MARTIN: 7 MR. ESCOBAR: Oh, very sneaky. That was 8 totally intentional. I was born at night, not last 9 night. BY MR. MARTIN: 10 11 We're looking at State's Exhibit Number 4, 12 Camera 11, frame 13:26:37.612. I'm going to play it 13 one frame forward, one frame forward, one frame 14 forward, one forward. At 13:26:37.746, I want you to 15 concentrate there. 16 Α Uh-huh. 17 I'm going to go up to where the gun is 0 18 fired at 13:26:37.846. 19 Α Okay. 20 Knowing that the gun is fired there, we're 2.1 going to play it backwards. One frame, two frames, 22 three frames, four, go up one at 13:26:37.746, can

1	you discern where the gun is doing that analysis?
2	Seeing where the gun is and reversing it back?
3	A It's somewhere down at his side.
4	Q Well, do you see where it is?
5	A Yeah, yeah, I see it down.
6	Q Right?
7	A Yeah, uh-huh.
8	Q Okay. So I toggled back and forth, and
9	doing that reverse critical review you can discern
10	where the gun is at that point in time?
11	A That's correct.
12	Q All right. Which is less than a second
13	before the gun is fired, right?
14	A Yes, appears to be, yes.
15	Q At that point in time, what did Mr. Reeves
16	tell you that he was trying to prevent?
17	A He was trying to save his life at that
18	time. He said he felt very threatened. He felt like
19	this guy was going to come over after him, and he
20	just felt like his life was definitely in danger, and
21	he was going to be beaten badly or killed.
22	Q What did he say the outward manifestations

of Mr. Oulson was that led him to the belief that when we see -- at frame 13:26:37.746, when we see that gun just seconds before it's fired --

MR. ESCOBAR: Objection.

-- what does he see Mr. Oulson doing that led him to that conclusion?

MR. ESCOBAR: Objection to limiting him to that particular frame, because there were two punches that were -- or arms that appeared to be coming into Mr. Reeves' face immediately before that. And we're talking about fractions of a second. And so you're trying to limit him to one frame. We object.

2.1

22

What was he trying to prevent? What was he seeing from Mr. Oulson that he was trying to prevent?

And I apologized for this earlier, but this is one of those questions you can't answer directly like that. It would be more of a dissertation on this, is why does a person feel threatened? And it goes all the way back to the beginning when he started to have interaction with him -- and I'm going to make very quick. An interaction with him --

Q No, I know. It's no problem. I'm listening.

2.1

A -- to where he feels like this guy is totally out of control to the point he gets hit in the face, and now he really believes this guy is going to make a major assault on him, and then he starts coming over the seat. And at that point he doesn't realize his popcorn's being stolen from him, he thinks a fist coming in and then a fist coming back again, and all of this, going through all of the training and everything he had, he realized at that time if I don't do something right now to protect my life, I could be dead. And the only recourse he had at that point was to use his firearm.

So it goes back not into a one-second, you know, picture that you have here, but it goes back into the totality of the whole situation, is what went on in his mind. His fear was being built the entire time. So that's the best I can answer it for you.

Q State's Exhibit Number 2 that we briefly discussed, paragraph A, 776.012, He or she reasonably

believes that such force is necessary to prevent imminent death or great bodily harm to himself or herself or another or to prevent the imminent commission of a forcible felony.

2.1

So my question to you is: When that gun is out and before it's fired, at frame 13:26:37.745, what conduct of Mr. Oulson was Mr. Reeves trying to prevent that would be construed as being able to -- in an imminent manner -- cause death or great bodily harm?

MR. ESCOBAR: Objection. Again, you're asking him to interpret a statute. He does not have a law degree. There's an improper predicate for him to interpret that statute and to apply the facts. He's already given you his opinion concerning Mr. Reeves' reasonable belief that he was going to be seriously hurt or killed factually. That's all he can do. So we would object. It's beyond the scope of his ability as an expert in this case, because he's not a lawyer. That's for the trier of fact. BY MR. MARTIN:

Q You indicated to me in the beginning of

this deposition this morning that you had an opinion as to whether or not there was -- in fact, let me just read the question to you.

MR. ESCOBAR: He can give you a lay opinion, if you want it.

MR. MARTIN: I'm just asking him the question. I don't care if it's lay or expert.

MR. ESCOBAR: Okay. Well, as long as it's a lay opinion, you can ask that, but we've got to clarify it on the record, because he's not a lawyer to interpret the statute.

### BY MR. MARTIN:

2.1

Q I asked you under the facts and circumstances as you know them, was there conduct by the victim immediately prior to the Defendant or Mr. Reeves firing his pistol that rose to a level constituting an imminent event justifying the use of deadly force, and you indicated yes.

A That's correct.

Q Okay. I'm trying to put that in a sequence. At what point does that take place in the sequence of events? Can we use Mr. Reeves'

statement? Can we use a patron's statement? Can we use the video? Where do we put our finger on the facts that someone can use that as a factor to determine the reasonableness of Mr. Reeves' actions? That's what I'm asking. So is it in the video?

1

3

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

2.1

22

We're looking at the video, you -- the Α video goes right along with what Mr. Reeves is I don't see a contradiction at all. saving. are statements made by many of the patrons that there was an argument going on, so we know that there is an argument. Even Mr. Oulson's own wife is saying that he's saying some things. And he stands up, people had seen that, and Mr. Reeves believes he's coming over. And he believes that all of the actions of this guy, why -- anybody ever believe that a reasonable person would reach over towards a 71-year-old man and throw popcorn at him? It's hard to imagine. So I believe Mr. Reeves truly, 100 percent believed that he was in imminent danger of death or great bodily harm.

Q All right. Now, we've already had discussions that -- by the time the gun's fired,

we're almost 13 seconds out from the time that you explained to me and showed me on the video where you believed Mr. Oulson was standing and threw the cell phone. Do you remember that?

A Yes.

2.1

- Q All right. Or was hit with a fist, right?
- A That's correct.
  - Now, these aren't tongue-in-cheek, and I know it may sound that way, but I don't mean it to be that way. But the bottom line is that event was over 13 seconds ago, right?
    - A That's correct.
    - Q Before the gun was fired?
- 14 A That's correct.
  - Q So firing the gun could not have prevented those two acts, right? I mean, it's 13 seconds later.
  - A No, you can't separate them like you're trying to separate them. The assault began when he felt like he got hit by a fist, and everything that was going on at that time was building up to that one point in time where they came in and got the popcorn

and threw it at him and he shot. So all of those things that are happening in between, he has ten seconds where he's being threatened by this individual in some way, shape or form, and he feels threatened at that time. He feels like this guy is crazy. He's totally out of control. This guy is going to kill me.

2.1

Q You would agree that the reasonableness of a person's action when it comes to self-defense is to prevent something, so whether it be use of a firearm or punching someone in the nose --

MR. ESCOBAR: I'm going to object as leading.

 $$\operatorname{MR.}$$  MARTIN: Just let me ask the question. And I can lead during a depo.

MR. ESCOBAR: You're testifying is what you're doing. It's more than leading.

MR. MARTIN: I'm giving him a factual scenario so he can respond to it. Let me ask the question. When I'm done with the question, you can make your objection.

MR. ESCOBAR: It's not a question. You're

1 testifying.

22

MR. MARTIN: Well, don't interrupt me while I'm asking a question.

MR. ESCOBAR: You're asking him to adopt your testimony.

### BY MR. MARTIN:

Q Now, my question to you is: Would you not agree that in order for the immunity statute to apply one has to be in the process of preventing an event that would be -- that is imminent, that would cause death or great bodily harm or to prevent the imminent commission of a forcible felony?

A You're asking me a legal question. I'm not a legal expert and so I really can't answer that.

Q Well, when we talk -- I'm not asking for your legal opinion. You indicated that you felt his conduct was reasonable. So the reasonableness -- that opinion, you have to prevent something, correct? You would agree with that, right?

A The reasonableness, you're trying to avoid something. No.

Q To prevent. That's what the statute says.

Prevent.

2.1

A Well, I'm saying I am not an attorney. I'm not going to deal with the statute as a legal term. I can't deal with that. I'm not a legal expert, and I don't want to opine on something that you're asking me about a legal opinion. And I can't give you a legal opinion. If you're asking a layman's person about how a person is defending himself, how a person is going to react to a situation, I can tell you that, and we can spend the next five minutes or the next five hours talking about that, if you'd like.

Q In your opinion that Mr. Reeves' actions was justifiable or was reasonable in shooting Mr. Oulson, does it include the fact that it was necessary to prevent great bodily harm or death or to prevent a forcible felony?

A I believe Mr. Reeves believed that, and I believe that the actions that were there by Mr. Oulson shows why he would believe something like that, and I think it's reasonable. And what we're talking about the reasonableness factor, you're talking about, you know, a reasonable person on the

scene at that point in time. Not 20/20 hindsight, which it sounds like a lot of this is coming in. But would a person actually feel threatened at that time? I'm saying, yes, he would feel threatened, and I can understand him being totally threatened and feeling like this individual is going to do great bodily harm to him.

Q At the very beginning of this depo you indicated to me -- and I went through your -- the opinions the best I could guess as to what they would be. What I'm trying to figure out now is the facts that we've gone over since you gave me those opinions, how important some of these facts are to you in your opinion, and if it was proven that those facts did not exist, would it change your opinion? That's the line of questioning we're going to go through. Okay?

A Okay.

2.1

Q Okay. The iPhone being thrown and hitting Mr. Reeves. Is that important to you in your overall opinion that Mr. Reeves' actions were reasonable; therefore, his conduct was justifiable?

A I don't know and have any proof that the iPhone is the object that hit him.

2.1

Q That kind of begs the question, do -- well, we'll just keep going. And we've had some discussion regarding the length of time, and you've shown me on the frames that you believe Mr. Oulson was standing and facing Mr. Reeves before the shooting, which, based on the frames, we've been using about 13 seconds from the time we see that until the gun is fired, right?

A Okay. Approximately, yes.

Q Yeah, approximately, of course. Is the length of time that Mr. Oulson was standing facing the Defendant before the shooting, is that important in your overall opinion that Mr. Reeves' actions were reasonable and justifiable?

A It's all important. I can't take one thing and separate it. Yes, the time is important, and other things that happened in there are important to me when I look at the totality of the circumstances.

Q If it was shown that Mr. Oulson was only turned and facing Mr. Reeves for a matter of three to

five seconds, would that make a difference?

2.1

A I can't really break it down into seconds. You know, three or five seconds, eight seconds, nine seconds. The point of the matter is do I feel that Mr. Reeves would have been threatened? Yes, I do. So you're saying three seconds, five seconds. I don't know how many seconds. We know from looking at the tape here that we have twelve, thirteen second line -- frame in there somewhere. Things were happening during that period of time.

Q Well, let me just narrow it down to just one question then. If it was shown that the iPhone was not thrown at Mr. Reeves, if it was shown that Mr. Reeves was not hit in the face with a fist, if it was only shown that the popcorn was grabbed and tossed in his face prior to the shooting, would that make a difference? Would that change your opinion in this case?

A If a lot of these other factors changed and Mr. Oulson was not yelling at him and wasn't doing the things he was doing, and he just threw popcorn, yeah, that would make a big difference.

Q In what way would it -- if he just threw popcorn would that make a difference?

1

2

3

4

5

6

7

8

9

10

11

12

1.3

14

15

16

17

18

19

20

2.1

22

Α Well, if he just threw popcorn, and he threw popcorn, who did he throw popcorn at? What was his intentions? I don't know. You're taking a scenario and you're breaking down -- what I'm opining on is the use of force. Was he justified in using We can talk about a lot of force in this situation? other type of situations where force wouldn't be necessary. We can talk about other situations where more force, I mean, a lot of force would be necessarv. This is the situation I'm talking about. This is the one I've been asked to come and opine on. And this is what I'm opining on, is that I believe from everything that happened, the totality of the whole circumstances led up to Mr. Reeves believing he was threatened, his life was threatened. And if he wasn't going to be killed, he was going to have great bodily harm. And he defended himself the only way he could at that point in time, and that was to use his weapon.

Q So based on your first comment before that

if he just tossed popcorn on him, then he wouldn't be justified, right?

MR. ESCOBAR: If the record is saving the

MR. ESCOBAR: If the record is saying the only thing that we have is tossed popcorn and Mr. Reeves understood that popcorn was being just tossed against him, is that your question? Because if we're going to put the facts, okay, for this expert, put the facts crystal clear, and eliminate everything else that happened in that theater. Because what you're asking him to do is totally unfair.

MR. MARTIN: Okay.

MR. ESCOBAR: And I know exactly what you're trying to do.

MR. MARTIN: Well, you might.

#### 16 BY MR. MARTIN:

2.1

Q You told me this morning that you -- all of the patrons' testimony, you've just discarded them, because they're contaminated.

A I did not discard them. I said they're contaminated. I still looked at everything. I tried to make sense out of what was being said and what was

being done in there.

2.1

As I mentioned later on, is that many of the patrons said they heard loud voices. They heard arguing. They heard curse words. A lot of people said different things. So I get from that that something was going on, and it wasn't Mr. Reeves just making up a story. It was something that was going on, and enough patrons in there were saying different things.

I'm saying their testimony is contaminated, because we don't know who they talked to and know what was going on. So I can't take everything they're saying and say this is what happened. This is what X person said that he was doing. I can't do that, because it's too contaminated. It would be totally unfair to you, and it would be totally unfair to everybody.

- Q All right. So we have two guys in a theater. One guy gets upset with the other and starts cussing at him. Anything more than cussing?
  - A For what? They're just having an argument?
  - Q Yeah, Mr. Oulson, who -- you said you're

1 going to look at all of the witness statements. 2 Anymore than cussing? Get out of my face, get out of 3 my fucking face. I was texting my daughter. what all of the witnesses said, right? 5 Yeah, a lot of witnesses said different 6

things, not all of the same thing. Some contradicting each other.

22

But there was no threats, I'm going to kill Q you, you told me that. There was no threats I'm going to kill you or anything like that, right?

I don't remember if anybody said that or not.

So what we have is just cussing. Get the Q fuck out of my face, leave me alone. Raising voices. Stop it, get out of my face. That's the type of stuff we're hearing, right?

That's a lot of the stuff we're hearing. А We're hearing stuff like that, yes. I don't know what else they heard, but that's some of the things, yes.

All right. You didn't -- can you hang your Q hat on anyone that said I'm going to kill you?

1 A I cannot.

2.1

Q All right. So when we're talking about verbal threats of violence, there ain't none hanging out there that you're aware of?

MR. ESCOBAR: I'm going to object. You're defining verbal threats of violence in your manner, and it may be completely different in this expert's manner, and it may be completely different in Mr. Reeves' manner. You just can't throw these terms out there without a definition.

## BY MR. MARTIN:

Q Get out of my face. Does that mean I'm going to kick your ass?

A You know, the way you say it right now, I wouldn't take it as a threat. But, you know, I don't know at that point in time who's saying what, what's being done. So threats, it's not just verbal. It's gestures. It's a lot of different things. And you take that into consideration. Especially somebody who has been on the street, been a police officer for 30 years, has read thousands and thousands of situations and knows when you have somebody that's

1 totally out of control.

2.1

So, yeah, that's what he's reading. So did he have to say I'm going to kill you? No, I don't think he had to.

Q What was the gestures that Mr. Reeves related to you?

A Oh, just what Mr. Reeves said. He had this face all contorted. He was -- he was, you know, looking very aggressive, coming towards him, and that would be threatening. That would be very threatening.

Q All right. So when we couple the cussing and get out of my face, plus with the gestures like the contorted face, tossing of the popcorn, so we're going to shoot him? Is that reasonable?

MR. ESCOBAR: I'm going to object again, because you're perceiving that Mr. Reeves believed that popcorn was being tossed against him, and you're not putting the facts in that Mr. Reeves saw two hands coming at him at a very rapid pace near his face. So get your facts straight as to factually what is being seen on the video.

1	BY MR. MARTIN:
2	Q And what Mr. Escobar just so eloquently put
3	on the record all had occurred and was over with when
4	Mr. Reeves shot Mr. Oulson, right?
5	MR. ESCOBAR: That all depends again,
6	I'm going to object to the record
7	MR. MARTIN: Let Mr. Hayden answer the
8	question.
9	MR. ESCOBAR: But you're saying over
10	BY MR. MARTIN:
11	Q Answer the question.
12	MR. ESCOBAR: Objection.
13	A When it occurred, it's one fluid motion
14	starting from the beginning to the end. It doesn't
15	end at an absolute second at the firing of the shot.
16	There's a lot of things going on in your mind, in
17	your brain, so it just doesn't stop. The threat is
18	coming. It's still coming. Fists are being thrown.
19	I don't know if you've ever had fists
20	MR. MARTIN: Fists have been thrown? Where
21	is that in record?
22	THE WITNESS: That's what I'm saying is

1 possible. It's possible fists are being thrown --BY MR. MARTIN: 3 Thirteen seconds before the shooting of the 0 qun, that's when you told me it happened. 4 5 Α He sees a -- he sees a hand --6 MR. ESCOBAR: I'm going to object --7 MR. MARTIN: Be quiet. 8 MR. ESCOBAR: -- because you're saying --9 no, I'm not going to be quiet. You're saying fists 10 are not being thrown. Hands are being thrown. 11 you tell whether it's a fist or not? 12 BY MR. MARTIN: 13 Answer the question. Q 14 MR. ESCOBAR: Can you tell whether it's a 15 fist or not? As soon as he stops talking, you can answer 16 17 the question. 18 Twice he comes in very fast. Whether or 19 not it's a fist or a hand, it's coming in. He comes 20 in, and he grabs it -- and let me finish -- and 2.1 another hand comes back in. To me, I'm looking at

this thing whether you're coming in with your hands

22

1 straight out -- most people are going to come with 2 their hands closed. So, you know, the hands are 3 coming in. It's a threatening movement at that time. And that's what Mr. Reeves is seeing, this 4 5 threatening movement. He doesn't see popcorn being 6 thrown at him. He doesn't even mention that. 7 doesn't even know what happened to his popcorn until 8 later. That's not the question. The question is: 9 Does he feel threatened because he sees these hands coming in at him quick? If you've had that situation 10 11 before, you know what that kind of threat is like. 12 And he's protecting himself at that point. It's just 13 one fluid motion that's going through this whole 14 thing.

Q And at that point it's over when he shoots Mr. Oulson?

A When he shoots him, at that point he sees that Mr. Oulson has stopped at that point, and it was over for him, yes.

O So he shoots him?

15

16

17

18

19

20

2.1

22

A No. After he shot him, he saw it stopped at that point, and that's when he put his gun down on

1 his lap.

2.1

Q Before he shot him, Mr. Oulson was bringing his hand back just like we saw on the video, right? We saw it in the video, right?

A What did we see in the video? He's bringing his hand --

Q He's bringing his hand back as the gun's coming forward.

A I saw that hand coming forward at least twice in there. And then the gun came up almost simultaneously as that, and that's when he shot. Feeling like he's being attacked at that point, that the attack is coming over the top of the chairs, and he's going to be seriously injured. At that point in time he defends himself the best way he can, and that's using his firearm. So it all happens at one time.

After he shoots, he sees Mr. Oulson, stops, he stops, he sits back, and he puts the gun down on his knee. Showing that there is no more aggression. He's trying to defend himself. There's nothing more to defend himself, because Mr. Oulson now has backed

1 off. You did see in the video -- and we went Q 3 over this over and over, and I guess we're just going to have to play it again. Mr. Oulson's hand is 4 5 coming back towards him as Mr. Reeves is bringing the 6 firearm up towards Mr. Oulson, correct? 7 Α Correct. 8 All right. And Mr. Oulson's hand then goes 9 out of frame about two frames before the gun is fired, right? 10 11 Α That's correct. 12 Q. And at the time the gun is fired, 13 Mr. Oulson is not over the chair, is he? 14 MR. ESCOBAR: Let's play that, because how 15 can you tell he's over the chair or not? 16 MR. MARTIN: Because we know when he was 17 over the chair he grabbed the popcorn. 18 MR. ESCOBAR: How do you know? How do you 19 know he's not over a chair? Let's play it for him. 20 Let's not give him little -- you know, little tidbits 2.1 of your opinion. Let's play it for him.

22

BY MR. MARTIN:

Q Isn't that correct? He's done. You can answer the question. Do you want to see the video?

22

Α Okay, we're going to have to go in to do this, because it's the only way you're going to understand it. And I can explain it over and over again, but let me make this very, very clear how the mind works. When you see a threat coming towards you, it takes at least a third of a second for you to understand what's even happening. Somewhere in about a half a second you understand there's a threat towards you, and you have to react. There's time that's in there, and there's lag time to when I see a threat coming at me, by the time I act, the threat might be over with at that point in time, and the shot is fired. But in the mind of the person that fires and takes care of that threat, the threat is still going on. So there's a lapse of time in that period right there.

You're trying to put this like there is no lapse of time. There is a definite lapse of time from the time you see something to the time you react until the time things are happening. It doesn't

happen like in the movies. It's -- our minds are different. And some people are slower than other people. Some people are faster. Mr. Reeves has had He's had a lot of a lot of experience in the past. training, and he realizes the threat is coming, and he's had to make that decision that he has to defend himself, and that's what he did at that point in So you're trying to make the point because the arm is coming back, and Mr. Oulson is done. the arm coming back, and he's getting ready to throw another arm in there. I don't know. You don't know. So I can't speculate towards that, nor should you. Because I think we're trying to come to a point of And who -- was he what really happened here? justified or not? I'm saying without any doubt he was totally justified in defending his life and believing that he was being threatened at that time.

Q Anything else?

3	P-R-O-C-E-E-D-I-N-G-S		
4	Whereupon		
5	PHILIP P. HAYDEN		
6	a witness, called for examination by counsel for the		
7	State, and, after having been sworn by the notary, was		
8	examined and testified as follows:		
9	EXAMINATION BY COUNSEL FOR THE STATE OF FLORIDA		
10	BY MR. MARTIN:		
11	Q Would you state your name for the record,		
12	please, sir?		
13	A Philip P. Hayden.		
14	Q Mr. Hayden, my name is Glenn Martin. I'm an		
15	assistant state attorney out of Pinellas County in		
16	Florida.		
17	We're here to take your deposition in the		
18	case of State of Florida v. Curtis Reeves. The Pasco		
19	County case number is CRC1400216A I'm sorry, FAES.		
20	Mr. Reeves is charged with second degree murder and agg		
21	battery involving a shooting at a theater in Pasco		
22	County on January 13th, 2014.		

Mr. Hayden, you have been listed as a defense expert by Mr. Reeves' defense attorneys, Mr. Escobar and Mr. Michaels, and the reason that you're here today is for me to take your deposition to find out everything that you know about this particular case and to determine what if any opinions, if you are asked and allowed to render such an opinion by the court, you would render in this case. Is that your understanding of why you are here, sir?

A Yes, it is.

2.1

Q All right, sir. What I'd like to do is I have marked as deposition -- Deposition Exhibit No. 1 is the -- your curriculum vitae. Would you just look at that and -- is there any additions, corrections, deletions or anything on that CV?

A This one I have not updated since -- I don't know what date it was we put it in there but it hasn't been updated in a couple of years.

- Q All right.
- A And -- yeah.
  - Q What is missing off that CV, then?
- 22 A The Force of Science course that was taken

- 1 last year. I don't believe that's in here. I'm just
  2 looking.
  - Q And that's the one at Quantico?
  - A No, that's at -- in Minnesota.
- 5 Q Okay. And that was in 2015?
- A I would say it was probably two thousand -7 late 2014.
- 8 Q Okay.

taken:

3

4

9

15

- A But I'm not positive about that date.
- 10 Q Now, you took the class or were you an 11 instructor?
- 12 A I took the class.
- 13 Q All right. Anything else?
- A There's several other courses that I've
- in-custody death classes that were held in Las Vegas.

American for Effective Law Enforcement and

- 17 I don't see those here. But basically, besides the
- 18 courses I've taken, the other things, my background,
- 19 | all that is correct.
- 20 Q All right. So the three additions would be
- 21 the Force of Science Institute course and a course on
- 22 | American for Effective Law Enforcement?

1	A	No, I went to several courses taught by
2	them.	
3	Q	Taught by who is "them"?
4	A	By the Americans for Effective Law
5	Enforceme	nt, AELE.
6	Q	All right. And you went through several
7	courses?	
8	A	Yes.
9	Q	And do you know what those courses were?
10	A	I couldn't tell you offhand, no.
11	Q	Do any
12	A	But
13	Q	of them relate to the concept of use of
14	force?	
15	A	All of them do.
16	Q	When did those courses take place?
17	A	Took place over the last four years.
18	Q	Even though you may not know the title of the
19	course, c	an you give me the content? If you want to
20	lump them	all together since they all apply to use of
21	force and	that concept, what do the courses what was
22	the conte	nt of the courses?

A They all refer to the use of force concepts and the use of force that policemen use and the use of force used against police.

Q Was it similar to the Force of Science Institute two-week course?

A No, it was not.

2.1

Q In what regard was it different? We're going to get into the Force of Science manual and the last class that they put on in 2015 and the course material a little bit later, but can you go ahead and let me know the courses by the Americans for Effective Law Enforcement, what was different? What's new?

A They're taught by several different instructors that come in that have backgrounds in use of force: Police officers; heads of departments; we had a couple chiefs there; we have attorneys there that deal with the legal aspect of use of force; we deal with the psychological aspects of use of force and also the -- the backgrounds of police officers that are injured in cases because they haven't used use of -- used the force properly, and it's hour courses and they go --

1	Q It's what kind?
2	A Hour, one-hour courses, that go through the
3	day and it lasts for a three-day period or a four-day
4	period, depending what course you sign up for.
5	Q For each hour, then, you would have a
6	different topic
7	A Yes. That's correct.
8	Q All right. And who were some instructors?
9	A Judge Pitt from the Baltimore area, not
10	Hanson or Henson. I can't think of his name right now.
11	I can't think of the names of all the different
12	instructors.
13	Q For those classes that you took I'm going
14	to lump them all together
15	A Sure.
16	Q was there course material provided to
17	you?
18	A Yes, there was.
19	Q And do you still have that course material?
20	A I might have it somewhere.
21	Q All right. And would you be willing to
22	provide that to me?

1 If I have it, I'd have no problems providing 2 it. 3 Other than Judge Pitt, were there any other Q instructors which you consider to be authoritative in 4 5 nature that go around and teach concepts of use of 6 force? 7 Α Probably just about every instructor they have there. 8 9 And who would they be? Q And as I said before, I don't remember their 10 11 names. Would that be on the course material? 12 Q 13 Yes, it would be. Α Is the effective law enforcement -- or 14 15 America for Effective Law Enforcement, do they have a 16 website? 17 Α I believe they do. 18 Is their course material on the website? 19 I don't believe the course material is on the A 20 website but a lot of reference material is on the 2.1 website.

The American for Effective Law Enforcement,

is that -- I'll call it an institution because the Force of Science hangs "institute" on the back of their name. How are they set up? Is there a board of governors? Are there people that run the business and go from place to place? Is it a company? How does that organization work?

2.1

A I can only tell you what I understand; it might not be factual but there are two -- there's a couple different owners and they're out of Henderson, Nevada, and the one owner is a psychologist and I don't remember what the other guy is because he's not there that much, but their backgrounds are -- are in the psychological and also in the law enforcement background and the legal background, so they have all those different areas.

Q Okay. As far as the psychological background, did those individuals do their own independent studies regarding the human factors involved in a high-risk situation?

A From what I understand from the instructors that have been introduced and have been used out there, they have done their own independent studies,

especially getting their doctorate and doing independent studies afterwards, and work with other organizations all throughout the world.

2.1

Q And to your knowledge did the course material include any of their papers, abstracts, writings, FBI bulletins that they authored, newspaper articles, magazine articles, anything that they had written?

A I can't tell you if it did or did not. I don't believe it did, though.

Q All right. As far as the individuals who are the psychologists, you indicated they also have a background in law enforcement. What would -- what was their background in law enforcement, other than their independent studies?

A Well, the one individual that I'm talking about that is a psychologist, he was a deputy sheriff, I believe, and -- while he was working his way through school and he worked as a deputy sheriff and that was his background.

Q And how many courses were there? You indicated that the course is one-hour blocks of individual instruction. How many different courses did

1 | you go to?

2.1

A They have the courses a couple times a year.

O Yes, sir.

A And sometimes they give a little bit different variation of the courses they -- they're giving and so they'll send out a pamphlet telling you the different courses that are there and they try to change it up enough so that each session that they give is different enough to bring people back. So sometimes it's a repeat; sometimes it's recapping some information; other times it's new information. And, like I said, they give them -- I don't know how many times a year but I know it's at least two times a year, and they've been doing it for probably 15 years or so.

Q Do you get some type of certificate indicating a completion of any of those courses?

A You get one certificate -- well, you get a certificate for completing the course. It's just you completed the course. If you go through four of the courses, then you get a certificate that says

litigation specialist.

2.1

- Q And did you obtain such a certificate?
- A Yes, I did.
  - Q And do you have a copy of that?

A Not with me but I do have a copy of it, here again, somewhere. I don't -- I don't worry about those things that much so I don't always keep them where I need to get them right away.

- Q And would you be willing to provide me a copy of that?
  - A That'd be fine.
- Q You also indicated that not on your CV is investigating -- I'm sorry, in-custody death investigations. Tell me about that course.

A Well, it's a lot of the same people that are involved in that and it's just kind of a different branch of their whole program. Even though they're two separate entities, the way I understand it, one deals with more situations, jailing situations, where they would have jailers come to it, guards, things like that, and they teach courses of how do you deal with subjects that are out in the field and deal with them

in a way that is safety -- your safety -- protects you and them.

- Q You used the term "they" and "them." Are you referring back to the people who run the American for Effective Law Enforcement?
- A Well, when I'm referring to any of that, it goes back to law enforcement in general and accepted principles that we -- when I say "we," that myself, the other professionals in this area, have accepted as, you know, leading principles.
- Q You -- I believe either -- I believe you misunderstood my question.
- A I probably did if you didn't like the answer.
  - Q That's okay. I'm trying to find out who's involved in the program that teaches in-custody death investigation. Is that the same group of people that own and operate American for Effective Law
- 19 Enforcement?

2.1

- A I'm not sure of that. I couldn't answer that question honestly.
- Q And did you receive course material in that

1 particular --

2

9

10

11

12

13

14

15

- A Yes, I believe I did in that, yes.
- 3 Q And do you still have it?
- A I would have to look but I think I probably still do have it.
- Q And would you be willing to provide that to me?
- 8 A Yes, I would.
  - Q How many hours was the in-custody death investigation?
    - A That was, here again, run very much like the other course, is that one-hour blocks and some were two-hour blocks, they'd have a break in between, and they went for two or three days also. And they were also given out of Nevada.
      - Q And did you obtain a certificate?
- 17 A You obtain certificates for attending those 18 courses and --
- 19 Q Just for attending?
- 20 A But that would be it.
- 21 Q Okay. Would the certificate indicate the 22 days that you did it, the number of hours that are

1 involved?

2

3

4

5

6

7

8

9

10

11

12

13

14

16

17

18

19

20

2.1

A I don't know about the number of hours but it would definitely give the date.

Q All right. And do you have that certificate?

A Here again, I don't really worry about those things too much so I'm not sure if I have them but I most likely do have them.

- Q And would you be willing to provide a copy?
- A I would be willing.
  - Q I'm going to save the Force of Science seminar that you went to for just a little bit later. Let me get some basic information from you and then we're going to jump into that, okay?
- 15 A That's fine.
  - Q I didn't want you to think I forgot about it.
  - A Well, I wouldn't think that.
  - Q The education that's listed on the CV as far as obtaining your BS degree, your master's degree and your doctoral and education, is that -- all that correct?
- 22 A That's correct.

Q Are there any current associations that you belong to, whether it be associations which I refer to as vanity -- you just pay a dues and you're a member -- or, because of coursework, you've actually done some studies and then you're a part of that association?

A No, the only associations I belong to are associations such as the International Association of Chief of Police, the instructor courses, the IOFA, I think it is, and those type of courses. I'm members of different police boards but just as a, as you called it, a vanity member.

Q Okay. What is the instructor course, IOFA?

A Well, it's courses that -- you belong to the association and in that association they have meetings and sometimes they give courses and it might deal with different aspects of -- of law enforcement, and I have instructed in that and I've also taken some courses in it, but not recently.

Q Okay. Can you give me a list of courses that you in fact took as a student?

A No, I cannot.

2.1

Q Can you give me the courses that you taught

as an instructor?

2.1

A The only -- I could not give you the name of the course as I named it but it was when I was working on my doctorate itself, and that was in the adult education dealing with survival awareness and how you teach those courses.

Q And the concept of survival awareness, would you explain to me what that is, please?

A Survival awareness is the mental mindset that a -- and we're talking about police officers here that -- I'm talking about police officers -- the mindset that an officer goes through when he is involved in a critical life-threatening situation. It's also the tactical responses that that officer might have in dealing with that same life-threatening situation.

So survival awareness is being aware of what it's going to take to survive that situation: You survive it, all your fellow officers survive it, innocent people survive it, and also the individual, if at all possible, might survive it.

Q Okay. You indicated that you taught that

- class while you were obtaining your doctorate. Was
  your doctoral thesis on this subject or --
  - A Yes, it was. It was on that subject.
- Q All right. And was your doctoral thesis published?
- 6 A No.

3

8

- 7 Q You still have a copy of it?
  - A I probably do. It's one of those things you bury after you finish.
- 10 Q I understand. If you do have a copy, would 11 you be willing to give me a copy of your doctoral 12 thesis?
- A Only if you promise to read it. How's that?

  I can't get that promise out of you, I'd still give it

  to you.
- 16 Q You do have that promise from me, sir.
- 17 A Okay.
- 18 Q How many times did you teach survival 19 awareness? I'm breaking this up a little bit.
- 20 A In the --
- 21 Q I want to know number of times, who the 22 students were, you know, so I'll --

- 1 Α In the instructor course I just talked 2 about --3
  - Yes, sir. Q
  - -- I only did that, I think it was, twice. Α
- 5 Okay.

4

8

9

12

13

14

- 6 And the first time I got a mug and the second Α 7 time I got a "thank you." I could not tell you --
  - Q Apparently you did better on the second time around.
- No, they just -- they run out of money and so 10 11 they don't -- they had to cut back on the mugs.
  - The students -- the students would be a variety of students from all different backgrounds, mostly students within the police ranks, sheriff's ranks, that type.
- 16 All right.
- 17 Α And every now and then you'd have some 18 federal people in there too.
- 19 And do you still have your course outline or Q 20 the material you provided to the students?
- 2.1 No, I -- I doubt very much if I still have A 22 that.

Q In your CV you talked about being a board member and a consultant for Seccredo, S-e-c-c-r-e-d-o, Incorporated International. Are you still a board member of that company?

A I'm no longer a board member of that company.

2.1

Q Just kind of to narrow it down, did your position as a board member with that company in any way relate to how you acquired your knowledge regarding high-risk situations or use of force situations, or was it a private sector thing?

A No, I was a board member on that because of my background in law enforcement, my specialty in the whole survival awareness concept.

Q Okay. It indicated in the CV that you conduct security seminars so I want to go ahead and ask you that. What was the content of the security seminars?

A I conducted security seminars in several different parts of the world dealing with -- number one, like in Sweden, I went to Volvo, went to their truck division of Volvo, the automotive part of Volvo,

dealing with their executives and dealing with their -mostly management personnel in what happens within an
organization and in the individual's mind when a
high-risk situation occurs, dealing with terrorism,
dealing with an individual coming in to the facility,
dealing with blackmail, dealing with the concept of
stalking, all those kind of things. We dealt with
those aspects.

We also dealt with doing an assessment of the facility to find out if there's better security that they could provide for themselves.

Q Okay. Well, let me go ahead and jump ahead a little bit. You mentioned the Volvo Car Specialty Vehicles Division. You were a senior consultant and product design specialist?

A Yes.

2.1

Q What product design?

A It was based on the V80 frame and was going to be the first Volvo police car designed for the United States -- for North America, Canada and the United States.

Q Okay. You mentioned some of your duties and

responsibilities already. Regarding the Volvo, other than what you previously mentioned, how did that relate to the concept of -- I'm sorry. How did that relate to you acquiring knowledge as to the concepts involved in use of force investigation and determinations?

2.1

A Well, we're designing a police car, so how could police officers be in that vehicle, perform their duties in a safer, better environment.

Q In this particular case, of course, we're dealing with a shooting, so if we can set the police car aspect of it aside with Volvo, is there anything in that life experience that you will bring to the table in this particular case as far as doing your analysis of whether or not Mr. Reeves was in fact reasonable in his conduct in shooting the victim?

A Not dealing with Mr. Reeves but shootings were a part of that whole concept within the Volvo police car: How do you get in and out of the car? How do you do that?

Q All right. You mention from 2002, January 2002 to December of 2006, your CV indicates that you're Vice-President Client Relations with M. Morgan Cherry

1 and Associates.

2.1

- A That's correct.
- Q What were your duties and responsibilities?
  - A I was consulting them on investigations.
- It's an investigative company --
- Q Okay.
  - A -- and -- and my responsibility was designing investigative techniques to go out and do an investigation, mostly in Latin America.
  - Q And is there anything about that life experience that you're going to bring to bear in our discussion of Mr. Reeves' case?
  - A When you look at life experiences, my life experiences is involved in all of these different situations and my background, my knowledge, the research I've done into so many different things.

When I was dealing with M. Morgan Cherry, we're dealing with: How do you do an investigation?

But investigations can be done very -- can be done in a way that's not safe for the individual doing that investigation, so what we do teach is how do you do -- and how do you approach people in safer, better manners

and getting more information? So a lot of other things are involved besides that but that is an aspect of it.

2.1

Q Regard to the investigation and how you conduct the investigation, is there anything about that life experience that you anticipate that you will use in our analysis in this particular case? I'm talking about the investigation itself.

A Well, when you do an investigation, you're doing an analysis on what kind of individual you're investigating, what kind of person you're approaching. When you approach an individual, how is that person's behavior?

And so we teach not only to take a look at how you approach that individual and do it safely, but what is the assessment that you're putting forward? Is this person a threat to you or isn't a threat to you?

Do you need more people there? That kind of thing.

Q All right. And how does that life experience relate to the factual scenario as you know it in the Reeves case?

A Well, in the Reeves case, what you had, you had to do a threat assessment. Mr. Reeves had to do a

- 1 threat assessment of his environment, his abilities, 2 his surroundings, what his other alternatives were. Не had to do all that. And it's the same thing that they 3 do in an investigation. You still do the same thing 5 when you do an investigation. A police officer or these investigators, who were mostly police officers, 6 7 you're always connecting with people. That's what your 8 So you always have to be aware of what science 9 might be there to see if there's a problem that you 10 have to identify.
  - Q All right. You indicated that as a private consultant between 1999 and 2005 in your CV you were with Communication Resources, Incorporated, a consultant and security specialist. What were your duties and responsibilities there?
    - A Which one is that?

11

12

13

14

15

16

17

18

19

20

2.1

- Q It's where you talk about --
- A Oh. I haven't dealt with that in a long time so I forgot what that one was. It's a communication -- it's a company out of England.
- Q Well, let me ask you this: Is that life experience in any way going to bear on your analysis of

this particular case? If not, we'll move on.

A Well, we can -- we can move on or we could stay with this because, as I said before, everything that I'm doing here relates to my life experiences that I've had, my educational background, my research I've done, it all relates in some way, shape or form.

- Q Okay. Well, let's go through it, then.
- A Okay.

- Q What were your duties and responsibilities with that company?
- A Basically just taking a look at what their program was to see if it fit into the parameters of safety for their individuals that were involved.
- Q What kind of safety?
  - A Safety -- their own physical safety when they're going out, doing their jobs.
  - Q Okay. Safety as far as terrorist threat/kidnapping/ransom or safety because of their environment and you don't want to step on a shovel?
- 21 A You've answered every one of them.
- Q Okay. On your CV, Kroll, K-r-o-l-l, and

Associates, consultant and security specialist.

A Kroll and Associates was a company that was out of New York, was the headquarters, and they asked me to come in and work with them and it's a larger security company and what I was doing was security surveys. I was consulting on different programs that they had within their organization and the -- the president of Kroll, when I was working for them, was the number two man for Louis Freeh, the director of the FBI. When he got out, he basically got involved in that organization. So I was doing that as a -- as an individual that had the experiences that I said before.

Q You indicated in the CV that you developed behavior modification techniques designed to enhance performance for high-level executives.

A Yes.

2.1

Q Would you explain that to me, please.

A In my dissertation, in dealing with adult education, what we're dealing with there is the psychology of behavioral development, behavior modification: How do I have to change the behavior of

an individual to get them to learn or to get them to apply principles of safety on themselves or principles whatever they might be? How do I get that individual to -- to begin to change? How do you begin to make change? So -- and that's what the thing is I'm talking about, developed behavior modification techniques.

Q Same time period, January 1999 to December 2005, you indicated you were at the Safeboard Body Armor Company.

A Yes.

2.1

Q Again, what were your duties and responsibilities?

A What we're doing is developing body armor for law enforcement officers and the type of body armor that they would wear and that would be protecting in a 3A level.

O Which level?

A A 3A.

Q Would you explain that, please?

A 2A is a bullet -- a bullet-proof vest, or whatever better words you want to use than that --

Q Sure.

A -- that protects you against rounds such as a 2 .38 caliber.

When you get to a 3A, it protects you against the higher calibers: The .44s, the .45s, the 40 mil, the mags -- .357 mags. It protects you against that.

Q Okay.

3

4

5

6

7

8

9

10

11

12

13

14

15

A So there are assaults on police officers. We wanted to make sure they're protected the best they possibly could from those type of rounds. So what my job was there is to try to help develop that program and then get it -- basically selling it within this country.

- Q All right. I'd like to go back now to the Force of Science Institute --
  - A Okay.
- 16 O -- and discuss that --
- 17 A Sure.
- 18 Q -- in a little more detail.
- You indicated previously that you took that course in late 2014. How long was the course?
- 21 A It was a one-week course.
- 22 Q That would be 40 hours?

- A Yes. Probably more like 45 to maybe even 50 hours.
  - Q Okay. And did you obtain a certificate -- certification of completion or certificate of completion?
  - A Yes, I did.

3

4

5

6

7

8

9

11

12

13

14

19

20

2.1

- Q Do you still have that?
- A I'm sure I do.
  - Q Would you be willing to provide me a copy?
- 10 A I would be.
  - Q Regarding that particular organization, you indicated that, in your CV, May 2002 to present you're on the national advisory board for the Force Science Research Center.
- 15 A That's correct.
- 16 Q Okay. Is the Force Science Research Center
  17 the same as the Force of Science Institute or are they
  18 two separate entities?
  - A When they first started -- when Bill Lewinski first started that program, he was associated with the Minnesota State University, I believe it was, and they had the one name from that, and then when he wasn't

able to get all the funding and everything he needed and the controls he wanted from the university, he stepped out from the university and that's when that changed up a little bit. So it's the same organization.

2.1

Q Okay. You indicated in the CV that you're responsible for reviewing policy, procedures and research regarding police use of force during arrest procedures -- during arrest procedures, vehicle stops, et cetera. As far as -- I want to concentrate on the research regarding police use of force. You indicated when we were going through some of the companies that you were working with, you indicated several times about the research that you have done, so let's start with that. What research have you done as relates to use of force, you personally?

A When I came to the FBI academy -- or before I came to the FBI academy -- we'd have to step back into my military experience -- and what -- trying to understand what it is an individual has to do. I went through several courses, and after going through those several courses I began to realize that I had to find

out why -- this is my nature -- why individuals were teaching what they were teaching in that and what -- what basis they were using for teaching it. So I did my own personal research -- and it wasn't in-depth -- my own personal research in why courses were being taught the way they were, and what I was learning, was it correct?

- Q I'm sorry. Wasn't or was correct?
- 9 A Was correct.
- 10 Q Okay.

1

2

3

4

5

6

7

8

16

17

18

19

20

2.1

22

- 11 A And then --
- 12 Q Let me just stop you there --
- 13 A Sure.
- 14 Q -- because I want to talk about the research
  15 you did.

When you did that research, were you doing any type of independent clinical studies where, like a psychologist would with a group of individuals, having a control group and another group and doing that type of analysis, or were you simply going through the material and reading everything that you could find and read?

A Going through the material and reading not everything but reading a lot of the things --

Q Okay.

2.1

A -- yes. That was it.

Q All right. And how did that research relate, then, to your duties and responsibilities on the national advisory board for the Force Science Research Center?

A Well, I don't know if he asked me to come over there because of any of that background. My military background was a military background that showed that I had been in life-threatening situations in combat and that I had survived those situations, and if somebody wanted to read it, I guess they could read it. So I don't know if that had any reason for being elect -- brought to the board or not.

Q One of the questions that I've -- I noted is the purpose of the research, and you indicated already that it was for you to verify that whatever some of the instructors that you had been exposed to was in fact teaching you concepts that is generally accepted within that particular field. That was the purpose of the

research? 1 2 Α Yes. 3 Was there any other purpose involved? I just wanted to know more -- more that I 4 5 could know, the better I thought it was going to be. 6 Going to combat, I just really wanted to understand 7 it. And how did you use that research? 8 Q 9 For my own knowledge. Α Did you impart it to anyone while you were an 10 11 instructor any place? 12 Α Yes. Other than what we talked about with the IOFA 13 14 and that course, where were you an instructor where the 15 research came to bear as far as what you taught your 16 students? 17 Α In the FBI academy. 18 Okay. Any other place? 19 In courses I taught all throughout the world A 20 as a private individual after the FBI.

Were you associated with any particular

association, group, organization, institute, or was

2.1

this just as a private individual, you alone?

A As a private individual. That was pretty much it. And the other -- and before that was with the FBT.

Q Were you ever an instructor for the Force of Science Institute?

A No.

2.1

Q In your research, did you identify any one or several individuals that you felt were authorative [sic], if you will, in the field that you were researching? Is there any --

A Many.

Q -- individuals that stood out?

A Many. And I can't give you their names but they were sergeants and officers that taught in the schools that I went through, things that they said that just stuck in my head and -- and everything that I read after that validated everything they ever taught. So it was just many, many instructors.

Q The research you did, was that involved in police shootings or police high-risk situations?

A No. What I was involved with in the military

was basically military operations.

Q Okay. The research that you did that you and I have been discussing as far as for the Force Science Research Center and the Force Science Institute where you wanted to acquire all the knowledge and learn if what you're being taught is correct, did that mostly involve police shootings?

A Okay. You're confusing the two.

Q Okay.

2.1

everything I could learn to survive and understand, you know, what I was getting involved in. That was back -- I was young. I was in the military. And when I took that into law enforcement it was the same thing, but that's not where I was applying it when we talked before. I wanted to learn when I was in law enforcement everything I could possibly learn to understand what police officers, what law enforcement officers throughout the country, throughout the world, were involved with in order to survive any kind of a violent confrontation.

Q So after you got out of the military -- am I

- understanding correct? -- then you did research involving police officers in high-risk situations and/or shooting situations.
  - A Several years after I got out of the military and I went into the FBI.
- 6 Q All right.
- 7 A I didn't start that until I went into the 8 FBT.
- 9 Q Well, let's set the military aside.
- 10 A Okay.

- 11 Q We were talking about in your CV, under Force 12 Science Research Center, you did research regarding 13 police use of force. That's your language --
- 14 A That's correct.
- 15 | O -- in the CV.
- 16 A That's correct.
- 17 Q So have we touched upon that, the research 18 that you did?
- 19 | A No.
- 20 Q Okay. What research that you did regarding 21 police use of force that you've identified in the CV?
- 22 A Police use of force that we're talking about,

as I've identified here in the CV, deals with all the research I did in the FBI as a FBI agent, as a SWAT agent, as an investigator in the field, and my research there was trying to understand as much as I could possibly understand about any of those concepts.

2.1

When I got into the in-depth research is when I got to the FBI academy and became an instructor in the SOARS unit, which is the Special Operations and Research Staff, which dealt with all tactical situations for SWAT, the Special Weapons and Tactics.

There, we dealt with the mindset, the physical aspect and the -- and the ability of officers to survive and to overcome any kind of conflict they might be involved in. Now, that's where I did -- started doing a lot of my heavier research.

Q Okay. And that research, did that include searching whatever database, metadata mining, whatever, to read everything that you could get your hands on, or did it also include any independent clinical studies involving test subjects and control subjects?

A When I first started this, computers were not my friend so I didn't get a lot into computers. We had

the library at -- the legal library at the FBI academy which has thousands of books on police science.

2.1

I -- in that research that I did, I did a lot of studying on certain research that was done by experts in the fields, that were considered experts within their field, explaining the psychological aspect of what an officer might go through, deciding, you know, when to react to -- in certain ways, what the subject that you're going after, what his psychological behavior might be and why they would act like that and what the response might be.

So we got into the very heavy ends of all that, and I read hundreds of documents, journals, books, and then I got into my doctoral work, which I got into this even deeper.

Q All right. And we've already discussed that.

In relating to that research regarding use of force in police shootings or high-risk situations, how does that transfer over to civilians, nonpolice officers, involved in shootings? How does that research transfer over, or does it?

A Well, what you have to take a look at is,

who's a police officer? Because we don't have Robocop. So Robocop doesn't exist. We have police officers who are human beings and are part of society but they've been trained in different ways to confront a violent confrontation, to resolve that confrontation. So the only difference is, is that a police officer usually has higher training than a civilian might have but you're going through a lot of the same psychological aspects, the same problems that they go through, the physiological aspects that an individual might go through would be the same as a police officer, but a police officer hopefully is more controlled.

Q Is a police officer held at a different standard because of the higher training than a civilian involved in a shooting?

A Yes, they are.

2.1

Q And would you explain the difference, then? What would be the difference between the standard with a police officer and a civilian shooting?

A Well, I think you'd have to take a look at the type of training an individual might have. If you had an individual that was injured on the street and the civilian came up, was trying to help him versus a doctor trying to help him, would that doctor be held to a higher standard? Yes, because of the knowledge he has and the expertise he has, the experience he has. So he would be held to a higher standard.

2.1

Same thing with a police officer. The police officer has gone through more training, usually; they have been certified in a certain areas, usually, depending upon what their specialty is. So any individual that has that experience would be held to a higher standard, but police officers are usually held to a higher standard because they have a lot more training.

Q The higher standard, how does that higher standard affect the determination of whether or not a shooting is justified or reasonable in a particular situation?

A Well, the only thing I can say in that is that -- I'm not talking about the legal aspect; I'm talking about the -- what a police officer sees when he enters into a violent confrontation. He has to be able to assess that threat. He has to be able to have a

knowledge of what he's going into, know his environment. What's his environment like? Is it dark? Is it cloudy? Is it rainy? Is it -- what is it? Is there a light shining on the individual? You know, what that -- is that whole environment about? Does he have a way of escaping or doesn't he have a way of escaping?

2.1

And then you have to look at what kind of ability I might have as a police officer. Do I have an ability to run and get behind cover and protect myself and protect other people or am I in a situation I don't have any means of escape? Are there people going to be injured? And then, you know, what are my alternatives, you know, fight, flight or freeze, the same thing you were talking about before, is that, you know, what are my alternatives?

So when a police officer goes through that, he's usually trained, and there's almost 700,000 law enforcement officers across the United States and I've trained many thousands of law enforcement officers within the United States, I've dealt with hundreds of different police departments, and within that you don't

see much of a difference in their training. It's just a little bit of a difference in how they might train.

2.1

But we're all trained pretty much the same way and that same standard would apply, is that they're taught how to use a firearm; they're taught defensive tactics; they're taught physical fitness, why physical fitness is important to them. They're taught with all the gear that they carry, how to use all that gear, whether it be a stun gun, whether it be a caps gun, whether it is a firearm, whether it be a baton, handcuffs. They're taught with all those different things.

A civilian doesn't have that capability.

They aren't taught with those things. A police officer is. So what's at his disposal?

And then when he goes from that point, you know, what force does he have to use to stop a threat against him? These are the -- all the threat assessment that an officer has to look at much more than a civilian would look at.

Q Would the trained police officer also have the background or life experience of how to deal with

the public and to gain control of the situation without resorting to violence? Are they taught that?

2.1

A Police officers in general are taught that. I can't speak for all police officers out there but I know police officers, in the courses that they're taught, are to -- how to analyze the best they can in a nonclinical way, the best they can, the individual that they're confronting. What kind of a person is this? What kind of a threat does he bring to the table here? You know, will he carry through with the threat? All those type of things are things that we -- we as law enforcement -- I say "we," just -- I was law enforcement so I use that term, but as law enforcement is taught to gather as much information as you can so you can make a good decision when you have to make that decision.

Q Would those same officers, based on their training, also be taught how to deal and respond when a high-risk situation de-escalates and maybe just goes away? Are they taught how to turn it off, if you will?

A You're referring to all law enforcement. I

can't speak for all law enforcement.

Q I'm just -- based on your research, your studies --

A Yeah, my research, my studies and all the training that we did, yes, is that you have to look at a situation and when it de-escalates, you stop.

Q I want to touch base again with the Force Science Institute. You've already indicated you're familiar with Mr. Lewinski --

A Yes.

2.1

O -- correct?

And how did you become -- I'm going to start that question over, okay?

A You can start it wherever you'd like to.

Q All right. How were you introduced to Mr. Lewinski and if you did work with him, how did that come about?

A I first met Mr. Lewinski -- and I can't tell you the year or the date I met him -- but he was dealing with a program, the -- oh, God. It escapes my mind right now. It's a program that was out that thousands of police officers took. It was the Caliper

Press course on -- I forget what the name of it is but it was Caliper Press that taught it. Bill Lewinski was one of the instructors.

O What did he teach?

A What he taught was officer survival and what he taught was use of force and it was all done in the -- an auditorium where he and another instructor were on the stage and they taught. They used a lot of videos. They used a lot of different things like that to help you understand.

I took three of my people with me and -- my people that were working for me -- and I took them to the course just to see what was being taught, to see anything that we could use in that that would help our own instruction, and that's where I met Bill Lewinski.

- Q The very last Force Science Institute course that you took, was he an instructor?
  - A He was the primary instructor.
- Q Okay. I'm going to spell the last name.
- 21 A Good.

22 Q Dr. S-z-t-a-n-j-n-k-r-y-c-e-r.

- A Okay. You spelled it and I can't pronounce it either.
- Q See? In the very last Force of Science
  Institute seminar, she's a medical doctor. She taught
  Understanding and Leveraging the Psychology of
  Emotional Intensity. Does that sound familiar to
  you?
  - A There was a course that sounds familiar to me. It was something like that.
    - Q All right. Now, she has done some independent studies regarding the aspects of law enforcement including survival and the interactions with survival stress and tactics. Are you familiar with her?
    - A I'm -- I -- you couldn't spell the name and I can't recall her name, so . . .
    - Q All right. Do you have any such formal medical training as she would as far as understanding the human physiology and how the human physiology reacts to stress?
- 21 A I do not.

22 Do you feel that based on the research that

you have done that you would be able or qualified to discuss the human -- I'm going to start that one over too.

2.1

Based on the life experience you've -- we've been discussing and the research you have done, do you feel that you're qualified to discuss in a general way how the human body, from a physiological standpoint, reacts to high-risk situations or stress?

A Well, I'm not a medical doctor and I can't refer to it as -- in those terms. I can refer to it in terms of the studying that I have done, the understanding of the lectures I've gone through, the books I've read, the research I've done on what happens to individuals, and my experience is, the physical experience that I've had with individuals who have been in those situations in interviewing them and trying to understand why they did what they did and what they did do.

Q Do you feel based on your research and your life experience that you're able to discuss how particularly the brain functions and what if any changes may or may not occur relating to stress and

1 | fear in high-risk situations?

- A The only thing I can refer to --
- Q Let me just -- not the outward manifestations
  but how the brain --
  - A Okay.

2

5

6

7

8

9

10

11

12

13

14

15

- Q -- actually responds.
  - A The only thing I can refer to in that is what the other experts have said that I've been table to read and been able to try to understand the best I can, and from that I try to relate that to the students. So I would not consider myself an expert in the way the brain works but I would consider myself a person who's done a lot of research on why the body responds in certain ways when the brain starts changing.
    - Q Do you know Dr. Artwohl, A-r-t-w-o-h-1?
- 16 A Yeah. Alexis Artwohl. Yes.
- 17 Q Okay. How do you know her?
- 18 A Through Force Science. She's on the board
- 19 also.
- 20 Q All right.
- 21 A I don't know her well but I -- I do know 22 her.

- 1 Q And she is a psychologist?
  2 A From what I understand, yes.
  - Q And you have no formal training as -- being a clinical psychologist or psychiatrist?
    - A I do not.

- Q And based on just your life experience and the research you've done, do you feel that you're qualified to discuss how the brain functions as it relates to memory when stress and fear are introduced?
- A And here again, it's not a trained psychologist, but in the research that I've done, the information I've acquired, the classes I've sat through, I feel like I have an understanding of how that works and I try to relay that on to my students.
- Q But you don't feel you're an expert in that field.
- 18 A I would not be an expert in that field.
  19 That's more of a psychological technical expert in that.
- 21 Q Do you know Mr. Chris Lawrence?
- 22 A That does not sound familiar to me.

Q He's done some studies involving sensation and perception responses relating to time and stress in high-risk situations. Are you familiar with any of his work?

A I can't say -- I've read so many different works and so many different authors that I can't say I'm -- I -- that name pops out at me, but this -- the area that you're talking about, yes, I've done a lot of research myself and read a lot of material on that.

Q He has coined a phrase and has taught the concept known as "the Hick's law." Do you know what that is?

A I've heard it referred to, yes.

Q What is it, please?

2.1

A I can't explain to you right now what it was but I remember the Hick's law is -- Lewinski's course brought that up too and I can't just -- it's not there right now. You were talking about memory before?

Yeah, I just had a lapse of memory.

Q He also discusses another concept called the Fitt's law, F-i-t-t apostrophe S law. Do you know what that is?

A I remember that -- a lot of that was brought out in Bill Lewinski's course and I can't recall exactly what that was either.

Q I want to talk about the research that you've done, okay?

A Okay.

2.1

Q Are there any articles, abstracts, papers, books, FBI bulletins, magazine articles, scientific studies, that you're going to rely upon in support of any opinion that you may render in this case? And give me a list.

A The only documents or things that I wrote was for the FBI and I don't know where they sit as far as availability, but in that a lot of my research was given to them on why I'm doing certain things, and usually it was because I was trying to increase the program and to get more funding for the program and get more support for the program so I showed the research that I was doing and why I was doing that and how we felt it helped law enforcement officers.

Q When you say "showed the research," by what media did you provide that information?

Written documents. Written documents. 1 2 Okay. Would that be in the form of FBI Q 3 bulletins that are published or written documents that would be internal letters, memorandums, abstracts, that 4 5 you simply submitted for their review? 6 Α Written documents. 7 And do you still have those written documents? 8 9 Α They're FBI material and I don't have No. 10 them. 11 Who did you provide them to? What part of 12 FBI, what --13 Different management within the FBI. Α And those documents, you didn't keep a copy 14 Q 15 for your own personal file? 16 Α No, you're not supposed to and I didn't. 17 Why are you not supposed to? 0 18 You don't keep documents -- I mean, when I --19 I had them when I was an FBI agent, but when you're --20 you get out, you're not supposed to take those

documents with you -- they're FBI property -- so I

2.1

22

never took them.

Q Was the -- did the FBI consider your research at that time being their intellectual property and not yours?

2.1

A The FBI, I don't think, considers anything their own intellectual property. They are willing to give their documents or their material out to a lot of different departments.

Internal documents, I can't speak to that.

That's FBI policy and I can't speak to that.

Q So the documents that you wrote would be internal documents?

A They'd all be internal documents, yes.

Q And can you give me the general topic, scope or content of those documents in a general fashion?

A In a general fashion, they were all documents dealing with the behavior of law enforcement officers, of individuals that are involved in violent crimes, how these individuals would respond to different stimuli. It would be dealing with officers' ability to shoot in high-risk situations and how we can bring that into a better control and better understanding so police officers shoot better in those crisis situations. It

dealt with the physical fitness. It dealt with the ability to defend one's self physically with hands only, with different weapons such as batons and material like that, and went all the way up into the -- dealing with time lag, time -- dealing with the ability to respond to a situation in a certain period of time and --

Q When you say "respond," you're talking about responding by a cruiser or responding if you and I were face to face and responding to a situation? What are we talking about?

A Well, most of the times it would be when you and I are face to face, what is my reaction time?

Q Okay.

2.1

A What is my reaction time to a stimuli that I see that's coming towards me, how much time do I have? How much time does it take for me to process that information and to be able to take that information and apply it physically and -- so that I can respond with something to stop that threat? It went to the ability of individuals; it went to the ability of organizations because what we dealt -- were dealing with mostly was

the violent crimes task forces within the FBI and -- so it dealt with all the aspects of how do you survive a violent confrontation? How do you complete your work you're trying to do in the safest, best way possible for you and everyone else concerned?

2.1

Q Of course my follow-up question as far as the research that you're going to rely on, is there anything other than what we've just discussed that you've turned over to the FBI that you have personally written -- any articles, abstracts, papers, books, magazine articles, scientific studies -- that you're going to rely on, other than what we've already discussed?

A You say that I'm going to rely on. The only thing -- everything that I've done is in my background, my experience, and I rely on all that.

I did write an article for -- maybe it was two articles for this one magazine. It was a law enforcement magazine. And I think that was the only thing I published. I wasn't interested in publishing anything, but . . .

Q And do you know -- or do you recall what

1 magazine?

5

8

9

10

11

12

13

14

15

16

17

18

19

20

2.1

22

A I don't recall what magazine but I know I do have those copies.

Q And would you be willing to provide a copy to me?

A I would be willing to provide a copy to you,
yes.

Q I'm going to change topics just a little bit.

I want to talk about your FBI background --

A Okay.

Q -- in a little more detail.

All right. Let's start from the beginning.

August 1973 to August of 1983, ten years as a field

agent, Chicago and New York.

A Right.

Q All right. You indicated -- and I'm picking this up from your CV -- you were certified by the FBI as an instructor in the following areas: Tactical concepts for law enforcement officers. What was your certification? What does that mean in that particular area?

A Where are you right now?

Well, it's probably --1 Q Α Right under Federal Bureau of Investigation? 3 Yeah, probably. Q Creating and -- okay. Okay. That's all the 4 5 things I created. Where are the things that you're 6 talking about? 7 I believe I -- I'm taking this a little bit out of order --8 9 Α Okay. -- on your CV. It's almost to the 10 11 next-to-the-last page. 12 Only have three pages, so the middle page? Α Yeah. 13 Q 14 Α The special agent, New York, Chicago offices? 15 Yes. Q 16 Α Okay. 17 So you see where it says "certified by"? Q 18 Right. Α Tell me about that certification. 19 Q 20 Every one of those certifications are courses Α 2.1 that I took through the FBI that I had to complete 22 and complete satisfactorily.

Q Your CV says that you were certified as an instructor. So you took a course. You were certified as an instructor at that point. What were you certified to teach?

2.1

A Well, what I was instructed to teach was the things I was certified as, like, for instance, a firearms instructor. I was certified at that time to be a firearms instructor and to teach firearms to other FBI agents.

Q Let's go back to the first one, the tactical concepts for law enforcement officers. You were an instructor for that particular -- I'll call it course concept. What is that? Explain that to me.

A That -- that is a course that basically I developed and that I developed a standard that had to be met in order to be certified on concepts of law enforcement, tactical concepts. It was dealing with the whole area of pre-SWAT, in between just being a regular agent and being a tactical agent, per se. So I put that course together and the certification that I received is the certification that I had developed.

Q Okay. And what were the topics or subtopics

of that?

2.1

A All dealing with the whole mental mindset, the physical mindset, the physical abilities, the tactical abilities of an individual to use, in order for his -- to maintain his own safety and the safety of other officers and innocent parties.

Q Your CV indicates that after that, in August of 1983, you went to the Special Operations and Research unit. My question is: What were your duties and responsibilities in regard to research?

A In the -- which one was that? The --

Q It's -- it comes before the one we just talked about.

A Okay. Participated in arrest of violence and investigated and conducted areas --

Q No.

A -- of criminal cases, certified --

Q No, sir.

A -- by the FBI as an instructor in the following areas: Defensive tactics, special weapons, crisis management, firearms, snipers --

Q Mr. Hayden, let me stop you. I'm looking

1 for --

2

8

9

10

11

12

14

15

16

17

18

19

- A Okay.
- Q -- the whole topic that says Special

  Operations and Research unit.
- 5 A Okay.
- 6 Q August 1983 to June 1990?
- 7 A Okay. I have you there.
  - Q All right, sir. My specific question to you is regarding the research unit. What research did you do?
  - A The name of the organization is the Special Operations and Research unit.
- 13 Q Yes, sir.
  - A What we did was research as much information as we could on tactical responses by teams, specifically SWAT teams, within the FBI and within law enforcement that we were working with. So the research that we did is how can we better train these individuals to do their job in a safer and better way?
- 20 Q Okay. Your CV indicates that you were 21 eventually elevated to the position of supervisory 22 special agent, FBI academy, 1983, January 1999. How

were you associated with the FBI academy?

A I was brought back to the FBI academy to be a part of the Special Operations and Research unit.

Q Okay. So we've already discussed that.

A Yes.

2.1

Q During that same time period, June of 1992 through January 1999, you indicated that you were program manager for the law enforcement training for safety and survival subunit. What is that?

A I developed the program Law Enforcement

Training for Safety and Survival. It's called the

LETSS program, L-E-T-S-S, LETSS program, and in that I

put together a program for the violent crimes task

forces within the FBI and I started my research on that

and I developed this course.

Q And what were some of the topics, then? Car you pull them out for me or list them?

A We went from everything dealing with the physical aspect of tactics: How to deal with a firearm, both handguns and long rifles, shoulder weapons; how to shoot under crisis and when your heart rate is higher, when you're dealing with a lot of

stress; how do you deal with an individual when you don't have a weapon on them and it's just hands, how do you deal with that; going on to different situations of how would you get involved in an operation that is a high-threat situation and realizing how many people do I need to take care of this situation?

So all the things that dealing with basically the SWAT concept, the team concept, goes through individuals up to a couple men on the team to the whole team of how do you operate in a safer, better environment.

- Q Your CV indicates additional subunits while you were at the FBI academy included conducted training for over 6,000 federal and state, city, local officers; created and instituted the tactical instruction program for the FBI; you developed a tactical curriculum for new agent training. And all that was up until 1999.
  - A Yes.

- Q All right. In 1999, did you retire?
- A Yes, I did.
- 21 Q We're now 17 years down the road.
- 22 A Is it that long?

- 1 Q Yes, sir.
  - A Oh, God.

2.1

- Q In those 17 years since you've taught at the academy, what has changed regarding human physiology as it relates to high-risk situations and use of force, officer shootings? What has changed in the last 17 years?
- A If you could explain to me. What do you mean what has changed? You mean what has changed in the world or what has changed in me? What is it you're asking?
- Q I appreciate that. The concepts that were associated in the 1990s --
- 14 A Yes.
  - Q -- those concepts associated with human factors of individuals involved in high-risk situations or use of force or shootings, have those concepts or those understanding, has that changed in 2000, 2016, the last 17 years? Is there anything new?
  - A As far as techniques, I don't believe there is anything really new.
- 22 As far as equipment, there's a lot more

1 better equipment.

2.1

As far as training, there's been a lot more training within that period of time.

Q Let me stop you there. I want to shorten this up a little bit.

A Sure.

Q I'd like for you to focus on the human physiology, the human factors.

A Okay.

Q And people's understanding of how humans or individuals react in high-stress or use-of-force situations. Has any of the understanding of those concepts back in the 1990s, has that changed over the last 17 years?

A The only thing I could say about that in the readings that I've done over the past 17 years, it doesn't appear that anything has changed, but I can't speak in a clinical sense to that. I don't know if anything really has changed. But as far as I understand, as far as the readings that I've had, nothing has changed in that.

Q Having that in mind, during the last 17 years

have you taken the opportunity to keep abreast of the research and the studies that have taken place involving human physiology, how the human mind and body responds to high-stress situations? Have you kept abreast of new trends, new concepts, over the last 17 years?

A When you say I've kept abreast, I don't know if I've kept abreast of a certain standard that you're looking for but I have read different articles; I've talked to different instructors; I've talked with individuals who have done research; I was a member of the board on Force Science; I've talked to Bill Lewinski several times to find out what research he's done and what his results are of that research. So in that way I have kept abreast the best I knew how and -- and that pretty well sums it up.

Q What I'd like to do is go through some of those concepts with you and kind of ferret out exactly what your current understanding is regarding human physiology and how the human body and mind responds to high-risk situations and shootings, okay?

A Okay.

2.1

Q The concept of fear, a human emotion. As it relates to high-stress situations or use-of-force situations, what would be your definition of fear in that context?

2.1

A The high state of arousal that basically leads to the fight, flee or freeze. Dr. Roger Solomon is the one that basically started dealing with the whole concept of arousal -- high state of arousal.

I've known him for 30 years. I've dealt with him. I haven't talked to him in the last several years but he was the one that was doing a lot of the initial research on that and how fear affects police work.

Q Okay. As far as that high arousal state, what is your understanding how that affects the cognitive functions, how your brain receives, perceives, processes, information during a high-risk situation?

A From the research that I did with hundreds of law enforcement officers out there that the have been in high-risk situations and what they tell me that they have gone through and the understanding that I have from the experts who have been out there, what happens

is that your brain receives this information and from that your brain goes into a survival mode and basically starts dumping different natural chemicals into your body, hormones and things like that, that will basically slow up your brain, speed up your brain, your capillaries begin to shut down or you begin to get more blood flow into certain parts of your body and you lose your ability to function with fine motor skills and you only really have the ability to function in larger motor skills like your legs and things like that.

2.1

So that's what my understanding of it is, and my understanding comes from the research that I've done, all the officers I've talked to that are other law enforcement instructors and the experts that are out there that have done this research.

Q The emotional state of fear, or, as you put it, a high arousal state, how if anything does that affect one's performance during a high-risk situation?

A It affects your performance differently for different individuals. An individual that's not been

trained very well will react differently than an individual who's been trained in a -- trained a lot in that area.

2.1

A person that has been trained properly, you begin to realize: I'm in trouble. I begin to get to that point where it's: What am I going to do? I ask myself the, What am I going to do? and then I begin to get to resolve, and resolve How am I going to get myself out of this? and begin putting all the knowledge that you have in survival of how you resolve. Do you get to a point where you're able to respond and you react physically, emotionally, psychologically the way you need to react in order to get through that situation? So it takes you through a whole gamut of different areas.

Q In relation to the human body and how the brain processes information, as far as one's attention during high-risk situations, how if anything does fear or high arousal state affect attention?

A Here again, I can only answer it in the aspect of myself as an instructor who's dealt with hundreds of law enforcement personnel throughout the

country -- thousands of law enforcement personnel, the research that other people have done, that when your brain gets to a certain area of fear, there's a lot of things that can happen to you. Tunnel vision is one of those things where the only thing -- instead of going from a wide angle I go down to a very narrow angle and I see the threat that's coming at me. So your brain and your memory and your recall might be different when that's going through your head at that point because you're processing this information. And here again, not in a clinical sense other than what I've studied from the other clinical psychologists.

Q Along the same lines as attention, I guess also comes perceptions.

A Okay.

2.1

Q So if you're attentive then you're able to perceive, in a very general sense. And what is your understanding as to how the emotion of fear or high arousal state affects one's perception?

A Here again, it goes back to all the other things I was saying: When you're dealing with fear, you're dealing with that high arousal -- state of

arousal. A lot of different things are happening to your body at that time and your brain, and what happens is that you see things, you perceive things, as a trained officer would, or if the person's not trained, they're going to perceive things in a different way. A trained officer is going to perceive things and try to analyze, do a threat assessment: What is going on here? How do I perceive this? Is it a threat towards me or isn't it a threat towards me?

2.1

Q We talked a couple times, or you have, about a trained officer and we've discussed a little bit how maybe the training of an officer and how that officer responds to a given high-risk situation might be somewhat different than a civilian with a lack of training. Is the training that an officer receives, is that a diminishing skill over time, 15, 16, 20 years after any type of formal training?

A Any skill that we're dealing with is going to be a diminishing skill. How much it falls off depends upon the individual and what his desires are. If the individual has gone through a lot of training, done a lot of things and has a very high skill level, he might

still, in that point, do things that try to keep his skill level up higher so it might not fall off as much.

2.1

And, as you said before, it would be different than a civilian. I don't know what a civilian's background might be. It can be the whole gamut again. Same thing with a police officer: It could be the whole gamut of very unskilled to very skilled.

So what I'm looking at here is somebody that's been skilled, as we would look at in law enforcement, saying that's the kind of skill that we want in the police officer at this level and that's what I'm looking at. So, yeah, skills can fall off unless you maintain it by thinking about, you know, what you have to go through and what your mind, body is going through.

Q We talked a little bit about perception, and what is your understanding of any perceptional changes that may take place during high-risk situations as far as eyes, nose, ears, you know, your senses, how your brain assimilates the information in front of it?

A Well, as an individual that is trying to

perceive what is going on, a lot of information, almost 80 percent of your information, is observed -- absorbed into your brain visually. You also take it from the auditory, and the kinetic is that you learn it in many different ways. Smell. Certain smells will trigger -- trigger a response that this isn't a good smell.

2.1

So there's a lot of different senses that you have that would contribute to your perception of what is going on. How you see things. If you're -- never -- you had 20/20 vision and now your eyesight's going on you, you're not going to see exactly the same thing when you had 20/20 maybe. If it's dark in an area, if it's, you know, the weather is really bad, if there's light shining at you, there's different things happening around there, a lot of those things are going to change your perception of what's actually happening.

Q Still in the same area but changing the topic just a little bit, I want talk about memory. You've touched upon it but I want to discuss it with you a little bit more as being a cognitive function of the human body within your brain. What is your

understanding of any changes, if any, that occur as far as memory in a high-risk situation or a shooting situation, in that particular context?

2.1

A Well, memory is one of those things that you build on. As you have more life experiences, you have more training, you learn more and more and more, and then you go through situations and you have experiences. That gets instilled into your memory. So as you progress through life, you have many more memories and some of those memories are good, some of the memories are bad, but the memories are there and they keep on growing. And then sometimes we just forget about things and we put it in the back shelf.

Q Okay. Well, when we deal with memory as far as being able to account accurately one's involvement in a high-risk situation, is that something that changes at all?

A Well, the research done through law enforcement that I've been involved in reading, studying, trying to understand, is that people have different recalls of different situations in high-risk situations. And it's not so much the memory; it's the

ability to gather that information. So when you see something that's occurring, you look at it, you believe that's what's happening, and that's what you remember. And it might be a little bit off; it might be right. But that's what your memory is of the situation. So your memory of the situation does not necessarily say that is the absolute truth; it's what you remember.

Q Does memory become more detailed or more disorganized and fragmented with an individual, generally speaking?

A Generally --

2.1

Q In a high-risk situation.

A Generally speaking, it can go both ways because the high-risk situation, a lot of things are happening to you, as we talked before. And so a lot of those things are happening. It can really scramble the brain in some people's heads and other people gather that information, just bring it in, and are able to deal with it much better. So I can't say from the research that I've done and everything that I've read that, you know, I see something I can actually put my finger on and say absolutely this is what happens every

time, but in a trained law enforcement officer, usually the memory is -- is better because they're looking for facts.

2.1

Q As an investigator who is trying to determine whether or not a particular shooting was justified, what if anything should the investigator keep in mind as far as an individual's memory and how fear and eyesight in a high-risk situation involves or affects or impacts memory?

A Well, as any investigator -- hopefully, you know, we're dealing with somebody who is very professional, keeps a very open mind and doesn't go into a situation and have a predisposed idea of what it is and he's going to try to prove it, but he goes in with an open mind and tries to understand what that individual is going through. Unless that person -- even if that person was a trained psychologist, that doesn't necessarily mean he's going to be able to put his finger on exactly what happened in that person's mind, but he has to listen to that person and hear what that person has to say and is it something that is realistic in his mind? Is it something that could have

happened, in his mind?

2.1

As an investigator in attempting to determine whether or not the individual involved in a shooting is providing accurate information, what would be some of the sources of information that, as an investigator, one should go to and try to resolve any type of conflicts between the shooter's account and other evidence in the case? What would you look at?

A Well, what an investigator is going to do, he's going to talk to as many people as he can, eyewitnesses; however, eyewitnesses' accounts are not always as reliable as we'd like them to be because you'll get several different people saying different things, so then as an investigator you have to be able to take all that information, put it together, and if you have any physical information, is there anything physically there that we can look at and see, that we can put our finger on and say, This is what did happen? And an investigator should, as I said before, keep a very open mind and try to gather as much information as they can.

Q When you talk about reliable physical

information, would that include photographs?

- A Yes. Anything that you can get that --
- Q Surveillance video?

2.1

- A Surveillance video, photographs.
- Q Because the officer or a civilian involved in a high-risk situation or a deadly -- or a use-of-force situation memory might be affected adversely, like you and I have just talked about, does that, in your mind, mean that that person should just have carte blanche and get away with whatever that person did, or do you go and try to determine the credible facts and determine whether or not the conduct is justified?
- A You're always, as a good investigator, always going to try to gather all the facts you possibly can and not rely on one simple -- one specific thing.
- Q If the credible facts suggest that a particular event occurred in a particular way, which, in some aspects, might be inconsistent with the shooter's account of what occurred, can a thorough investigation still be conducted which would result in a finding that the shooting was not justified?
  - A Well, a thorough investigation is done, the

facts are given to whoever is going to be the responsible person in that and you make a decision on that: Is it something we would want to proceed? Now it goes to court and the court decides at that point, a jury decides. So --

Q Okay.

2.1

A -- you look at the facts the best you possibly can, you put the facts out there, and that's really the only thing you can do at this point in time.

- Q In about another ten minutes we're going to take a break, okay, because I'll be done with --
- A Okay.
- Q -- with your CV. There's a couple aspects --
  - A You're still on my CV? Okay.
- 16 Q Yes, sir.

You mentioned in your CV that you work with state attorney's office and with defense attorneys. Specifically you mentioned in your CV that you've worked out of Miami-Dade and Sarasota, Florida.

- A Yes.
- Q All right. What cases did you do in

1 | Miami-Dade?

5

6

7

8

9

10

11

12

13

17

18

22

A Oh, God. I couldn't tell you the cases. I can tell you the -- the attorney was John Hanley.

Q Okay.

A I don't know if you know him or not but --

Q John Hanley?

A John Hanley.

O And he's out of Dade?

A He was out of Dade County at the time, I believe, and I think he switched over to another place and I did several cases with him.

Q Okay. What year? Nineties? Two thousand?

A Well --

14 Q 2010?

15 A You know, probably -- probably -- probably 16 ten years. I'm trying to think --

Q Was it after 9/11? I'm trying to give you some time frames here.

19 A Yeah. It was -- it was probably after 9/11.
20 I was in my other house at the time, so, yeah, you're
21 talking about eight, ten -- ten years or so.

Q Were you deposed in any of those cases?

1	А	I was not deposed.
2	Q	I'm talking about the
3	А	No.
4	Q	Did it go to trial or any type of hearing?
5	А	No.
6	Q	Were you simply a consultant for Mr. Hanley?
7	А	Well, as an expert in that and reviewing
8	material,	looking at it, and then he ended up writing
9	all the re	eports on it with my comments in it. So I
10	never had	to write any long reports on any of it.
11	Q	Was
12	А	So more of a consultant, I would have to
13	say.	
14	Q	All right. Was the cases you were involved
15	in investigations that normally a state attorney would	
16	be involved in, such as a police shooting involving	
17	death?	
18	А	It was arrest. I don't think there was any
19	death.	
20	Q	Arrest?
21	А	Yeah, it wasn't any death involved. It was
22	arrests and how they	

Excessive force? 1 0 2 -- excessive force, yes. Α 3 Q All right, sir. Did all the cases that you were involved with with Mr. Hanley involve allegations 4 5 of excessive force during an arrest? Α Yes. 6 7 No shootings. 8 Α No shootings, no. 9 How about Sarasota? Same questions. Q Just -give it to me. 10 11 Α It was involved in a shooting -- involved in a shooting where a police officer shot at a individual 12 in a car as he tried to run him over. 13 14 Do you recall the prosecutor? Q 15 Α I don't. 16 Q Do you recall the year? Again, I don't. I don't remember when 17 Α Year? 18 I haven't dealt with a case in Florida in a 19 few years. 20 Were you deposed? Q

So I -- did it go to trial, any type of

No, I was not.

2.1

22

Α

Q

hearing?

2.1

- A Not that I know of, it did not.
- 3 | Q Did you write my reports?
  - A I did not.
  - Q Do you recall the facts enough to give me a broad general outline of what information you provided that prosecutor regarding a police officer shooting and a car that was trying to run him over?
    - A I can give you the basic facts on it, yes.
    - Q Would you do that, please, sir?
  - A It was an arrest team; they had an arrest for an individual. I do not remember what the arrest was for. They approached his residence in a tactical vehicle, which was a van, I believe, and then they were able to sneak up on the residence and the individual came out, jumped in the vehicle and took off across his lawn.

The police officer -- one police officer was basically just nicked by the car and the other police officer jumped out of the way, and as he jumped out of the way, he shot the individual and I believe he did kill the individual in that one.

Q And what information, opinions, thoughts, did you provide the prosecutor in that case?

2.1

A The question that came out of this was were the police officers in the right position and what did they do, what could they have done different, and my opinion in that is that there was a videotape of the area -- or a video camera of the area up on a pole and I wanted to know what that videotape showed and they didn't have it and never provided it to me and -- but basically came down to was he justified and I said at that point in time he was not justified in shooting.

Q And would you go with -- through the facts of the case? Just kind of outline them for me that led to the conclusion that he was not justified.

A The reason I said he was not justified is because this individual -- I forget -- it was a drug warrant, I believe, for this individual. He -- when he got into his vehicle, a lot of police training is taught not to fire at moving vehicles because it puts too many people in danger. You had a cross-fire situation where two officers right across from each other and you had this individual fleeing, and under

the Tennessee v. Garner, I believe, you know, it basically says that unless this person is a dangerous person to society, you would not be justified in shooting, or if he -- but they said that because he tried to run him over in a car that he became a danger to the police officers and that he could have done more damage.

2.1

My opinion was, in the situation he was in and where the police officers were, the police officers were not in a danger of them running over. They could get out of the way very easy. And that's basically all I remember of the case.

Q All right, sir. As far as the defense attorneys, you indicated in Richmond, Virginia;
Baltimore; Prince George County, Maryland; Las Vegas,
Nevada. What cases were you involved in? Do you recall?

A I can recall some of the cases I was involved in. You mentioned the Richmond case, the defense. It was a SWAT team that approached this crack house, surrounded the crack house and shots were fired from inside the house towards the police officer. One of

the police officers was holding a shield and the shield was hit with this round so it was close to where the police officers were.

One of the police officers returned -- you know, returned fire. Nobody was hit but he decided to go into the house. He used a shotgun breach, blew out the door knob and the round from that breach, which was not a typical shotgun round but it was for breaching doors, came through and hit this lady and killed her.

- Q A lady that I'll call --
- A Was part --

1

2

3

4

5

6

7

8

9

10

11

13

14

15

16

17

18

12 O -- an innocent or --

A They said she was innocent but she was in the crack house because she knew her daughter was over there and she went to go get her daughter and the story goes on and on and on.

- Q I understand. All right. And did that go to trial? Were you deposed?
- 19 A No, it did not to trial. I did write a 20 report on that and I was not deposed.
- 21 Q How long ago was that?
- 22 A I'm thinking that was probably 10, 11 years

ago.

2.1

Q Do you know the defense attorney that was involved?

A I do not.

Q In that report, did you render any type of conclusion or opinions in that report for the defense attorney?

A Yes, I did.

Q And what was your conclusions or --

A My conclusion from that, if I remember correctly, is that they were justified in making entry into the house. The type of breaching that was done was a breaching that was considered by law enforcement in general as a legitimate type of breaching round and that it blew the -- blew the door knob off and the lady was close enough -- they didn't have any idea she was there and it blew the door knob off and the door knob, I think, is what hit her and killed her. And so I said it was -- they were justified in doing what they did.

O Was that a civil or a criminal case?

A I believe it was a civil case. Well, it was a civil case.

Q Again, there was no trial in the civil case?

A Not that I know of.

2.1

Q Baltimore: Do you remember any of the facts of that?

A The Baltimore case was an FBI case where an FBI task force, a violent crimes task force, had a surveillance out looking for this one particular bank robber. The bank robber was supposedly going to meet an individual at a 7-Eleven and the individual they were going to meet was a source for the police that were working with this task force.

The -- as happens so many times, nothing went the way they wanted it to go. The individual that was supposed to call the police, his cell phone died, so he tried to use the cell phone or the phone of the 7-Eleven after the individual came out and he was going to call the police officer but he couldn't. He had to call the department. The department finally put it out over the radio, came out a lot later, and what it came down to, the individual that came out -- and the police and the FBI thought that he was the bank robber because

he met the description of what they thought he was going to be. They followed the car and then one of the agents decided to force the -- force the issue, tried to talk the team leader into doing a car stop.

They did a car stop. The one agent came around the car. He had an M16 in his hand and he ended up shooting the passenger, who they thought was a bank robber, in the face with that, and -- and that was basically the facts of the case.

- Q Did that go to trial?
- A It did not go to trial.
- Q Let me ask you this: In -- since 1999, have you testified in any trial or hearing in either state or federal court in which you've been qualified as a witness?
- 16 A Yes.

- 17 Q All right. And what cases would that be?
- 18 A Oh, God. I couldn't tell you all the cases
  19 that --
- 20 Q The reason I ask, because you specifically 21 mention these in your CV.
- A Mm-hmm.

- 2 So I'm trying to ferret out exactly where
  2 you've actually testified as an expert. So let's start
  3 with state court.
  - A State court, I believe it was in Chicago,

    Texas, and I -- I'd have to pull these cases out to

    take a look at it exactly where they were, what the

    cases were --
  - Q Well, that's my next question.
- 9 A Yeah. I --
- 10 Q Did you keep a list of the cases?
- 11 A I do keep a list of the cases.
- 12 Q All right. And would you be willing to 13 provide that to me?
- 14 A The list of the cases?
- 15 Q Yes, sir.
- 16 A Yes, I can do that.
- Q Without going -- and I'll get the list of cases from you. In those -- state court, any in
- 19 Florida?

6

7

- 20 A No.
- 21 Q Okay. In what field were you qualified as an 22 expert?

- 1 A Use of force, police procedures.
- 2 Q And were you allowed to render any specific 3 opinions regarding use of force?
  - A Yes.

5

6

7

8

9

10

11

12

13

14

Q And what opinions were you allowed to render?

A Within my specialty, the reports that I could render an opinion on were, was the force excessive or was it within line of police procedures and accepted principles.

- Q So basically looking at the SOP or the policy of a particular agency, determine whether or not it was excessive?
- A No.
- 15 Q From a legal standpoint --
- 16 A No.
- 17 Q -- whether it was --
- A No. The only thing the policies and procedures show you is whether or not, within their own department policies and procedures, if that police officer was within his bounds of doing what he did or not.

Q So explain to me the excessive and police procedure. That's what I picked up on: Procedure.

A Procedures. If the police were authorized to act in a certain way when they made an arrest by throwing an individual over a hood of a car, by throwing him down, by throwing him in the back of the car, whatever it might be, is that a procedure or policy that the department allows you to perform.

Q Okay.

2.1

A And if it isn't, then they're not within the policy and procedures, but that's not the legal aspect of it.

Q Okay. As far as the legal aspect, were you ever, in state court, allowed to testify as to whether or not a particular individual involved in a shooting was justified in the shooting?

A Yes.

Q You were allowed to testify to that legal procedure.

A Yes.

Q And where was that?

A Oh, I have to think where that one was.

Yeah, you're going to have to let me dig that one out.

I forget where it was. I don't -- I don't do this

expert witness work as a full line of work. It's one

of those things that I do because I believe in the

- Q I'm just trying to determine exactly --
- A I'm sure you are.

cases I take that are important.

2.1

Q -- what you have and have not been allowed to do as far as the legal concept of justification, though you -- your memory is that you've been allowed to render opinion as to whether or not a particular individual involved in a shooting was justified.

A Was justified. I'm not talking about the legal. I'm not an attorney so I don't talk about the -- so much the legal aspect, except as we have been taught within law enforcement and as I have taught in law enforcement, if a person is justified under certain parameters of the court, what they have --

Q What parameters? What do you mean?

A The parameters of the court. You're taking a look at Graham v. Connor, you know, it's the one -- the big one, the reasonableness factor, you know, was an

officer reasonable in what he did in making that arrest; under Tennessee v. Garner was he legal in shooting the individual as he ran from the scene?

2.1

Those type of things were -- are the basic court cases that law enforcement are taught in order to develop and understand their own deadly force policy and nondeadly force policy, and so that's the parameters that which I teach it and which I learned it and which I understand other departments all throughout the United States do it.

Q Now, you've mentioned Tennessee v. Garner and Graham v. Connor. Are you talking about those court cases and whether or not a particular police agency's policy adopted those cases and then whether or not they were justified under the, you know, police agency's policy?

A I'm not looking under the police agency policy. When you're talking about policy and procedures, it's usually physical things and what they -- the police are supposed to be able to do. I haven't found anything in any department I've ever looked at where the police are -- have a free reign to

do whatever they want. A lot more restrictive.

2.1

The FBI is probably more liberal than a lot of police departments in the way they approach things, but it all comes under the Supreme Court. We, within the United States, are all governed by those laws. So every department in the United States, all 700,000 law enforcement officers, are governed under the Supreme Court rulings and court cases within their state.

So this is what we look at was an officer justified in how he handled the situation and was he justified in the force he used.

Q Of course, if an individual is not a police officer, a civilian, you're not able to look at whether or not the policies of a particular agency are in line with those two U.S. Supreme Court cases --

A Not the policy of the agencies but was this person -- was he also covered under the law? The law, from the way I understand it, you know, basically covers citizens of the United States.

Q But the -- specifically those two U.S. Supreme Court cases talk about police officers.

A That's correct.

Q Doesn't have anything to do with civilians as far as the -- within the four corners of those two opinions.

A I would agree with that, yes.

2.1

Q All right. Were you allowed to render opinion regarding the legal concept of necessity under the totality of the circumstances as to whether or not a particular shooting was necessary to prevent death or great bodily harm?

A And here again, not in the legal concept as an attorney but under a legal concept as a law enforcement trainer in those situations, you know, did he fall within the parameters of doing it the way he was supposed to do, or she was --

Q Pursuant to police policy.

A Police policy and the law as we, in law enforcement, have taught it and understand it.

Q Okay. And you're going back to the same two cases of Graham and Tennessee v. Garner.

A Basically they're the two major cases that govern the use of force within -- and deadly force especially.

- Q And in this particular case we have a civilian: Mr. Reeves.
  - A In this case you have a civilian, yes.
  - Q All right. Were you allowed to render opinion regarding whether or not, under the totality of the circumstances, a threat was immediate or imminent?
  - A Yes.

- 9 Q Okay. Explain that circumstance.
  - A In that situation was an individual was coming out of a shedded area and the police officer, at that point, fell back, was tripping, and this individual was coming out and he didn't know what was going to happen at any point in time. He didn't know if it was going to be exactly right at that moment when that guy came out but he knew it was going to happen some time and that's when he backed up and he fell,
- 19 Q And that was a police officer involved in 20 that?
- 21 A Yes.
- 22 | Q Have you been involved in any case, criminal

1 or civil, involving a civilian shooter where the court 2 has allowed you to render opinion as we just discussed regarding justification, necessity, or threat? 3 Never testified in any court case on that, 4 5 no. 6 When a civilian's involved. Q 7 Α Right. 8 MR. MARTIN: I did go a little bit past my 9 ten minutes. THE WITNESS: You did. 10 I was timing you. 11 MR. MARTIN: I know you were. But I think this is a good time to take a break. It is now 950 12 13 The court reporter has been going for almost hours. two hours. We're going to leave your CV and we're 14 15 going to start talking about the facts of this case 16 when we get back from break, okay, sir? 17 THE WITNESS: Okay. 18 MR. MARTIN: Is 10, 15 minutes -- what would 19 you like guys like? 20 Yeah, 15 minutes is good. MR. ESCOBAR:

That'll give us some time to call the office and --

MR. MARTIN: Madam Court Reporter, is 15 okay

2.1

with you? 1 2 (A recess was taken.) 3 MR. MARTIN: We have returned from our break. What I propose is that we go It's about 1110 hours. 4 5 till about 12:30, we take our lunch break and then come 6 back. 7 BY MR. MARTIN: I indicated before the break that we have 8 9 concluded reviewing your CV and I'd like to go ahead and start talking about the facts of this particular 10 11 case. Let's talk about your current business. 12 What is the name of your business? 13 14 Α Well, I have three businesses. 15 All right. The one that relates to the 16 Reeves case, which one would it be? 17 Α Phil Hayden and Associates. 18 And what does Hayden and Associates do? 19 Hayden and Associates was developed a while A

20

2.1

22

back -- I think it was 2007 I incorporated -- to do

anything that I wanted to get involved in. So I -- a

lot of that work that you saw that I did for Seccredo

- and things like that I did under Phil Hayden and Associates.
- When I decided I was going to get into

  doing -- doing expert witness work, I decided at that

  time that everything that I did would be done under

  Phil Hayden and Associates.
- 7 Q Is that separate than Hayden and 8 Associates?
- 9 A It's still --
- 10 Q Okay.
- 11 A No, it's not Hayden and Associates; it's 12 Philip Hayden and Associates.
- 13 Q I'm sorry. All right, sir. Okay. As far as
  14 expert work, what services do you provide to a
  15 client?
  - A Well, the services I mostly provide are expert's witness work and as much support I can give on the use of force, police policies and procedures, techniques of arrest, things like that.
- 20 Q And do you have a fee schedule that you're 21 able to provide to prospective clients?
- 22 A Yes.

17

18

- 1 Q And do you have a current one with you?
- 2 A I do not.

4

5

6

7

8

9

- Q Is that something that you'd be willing to provide to me?
  - A Yes, I would.
  - Q All right. For a case involving use of force involving a shooting, can you tell me generally what your fee is? Is it a flat fee? Hourly rate? How do you break it up?
  - A I do it by hourly rate.
- 11 Q And what is your hourly rate?
- 12 A 275 an hour for -- for reviewing material.
- When I go into court or depositions it's 350 an hour with a minimum of four hours.
- 15 Q Let's talk about this particular case, State
  16 v. Curtis Reeves. When were you first hired in this
  17 particular case?
- A I believe it was about a year ago, a little
  over a year ago, I think it was, that Mr. Escobar first
  contacted me.
- 21 Q Do you have an employee-employer contract 22 with Mr. Escobar?

- A My contract is my fee schedule that's signed.
  - Q Okay. And the fee schedule that was signed, what is the fee schedule, like we just --
  - A The fee schedule that was signed. I'd have to look to see if Mr. Escobar actually did sign one or not, but usually I get it -- I ask for it to come back and I always haven't gotten them back. I just -- I don't follow through on it all the time. But the fee schedule lays out all my fees: The 275 an hour, the court work, the \$3,000 retainer, I think it is, mileage, travel time.
  - Q Okay. In the event that you have a signed one by Mr. Escobar, are you willing to provide me a copy of that?
- 16 A I am.

- Q To date, up until today, how many hours have you worked on this case?
- 19 A I keep those records of how many hours I
  20 worked on it and I have that back in my office. I
  21 can't tell you exactly but it's been many, many hours.
  22 It's probably -- probably closer to 60 hours or so,

- 1 | more -- maybe even more.
- 2 Q Have you billed for all those hours or some 3 of those hours have you donated?
- A I've billed for some of those hours.
- 5 O For some.
- A Well, I've only billed so far my invoices. I haven't billed for work that I've done since the last invoice.
- 9 Q I see. All right. But those records are 10 available?
- 11 A Yes, they are.
- 12 Q As far as the number of hours you keep 13 track --
- 14 A Yes.
- 15 | Q -- the invoices?
- And would you be willing to give me a copy of those invoices?
- 18 A I believe I can. I don't think there's --
- 19 unless there's some kind of work schedule that's part
- 20 of the work schedule. I don't know if it is or not.
- 21 But if I can, I will.
- 22 Q Have you written a report in this case?

1 A In this case, no.

2.1

- Q The hours that you worked, 60 hours, what work have you done? What have you done to justify 60 hours, billing 60 hours?
  - A In -- you're saying --
  - Q Just list. Just --
- A Okay. You're saying 60 hours like that was what it was. I'm not sure what it was but I know it was probably somewhere in that area right there.
  - Q I understand.
- A In reviewing all the different material, there is voluminous amount of material. I couldn't even begin to tell you, but depositions, statements, police reports, videos, photographs. It's just a lot of material.
- Q Other than depos, statements, videos, photographs and police reports, can you think of anything else?
- A I can't think of anything right now but I'm sure there's a lot of other things in there because it's almost four pages I have written down of all the material that I have.

1 Q All right. 2 Just listing them down. I don't know how Α 3 many lines you get on a piece of paper in 12 font, but four pages it almost takes up. 4 5 All right. Would you be willing to give me a 6 copy of the list of all the documents that you've 7 reviewed? Α T --8 9 I would probably object to that MR. ESCOBAR: list if it includes any work-product information that 10 11 was discussed between the defense and Dr. Hayden. I'11 12 have to review it myself. 13 MR. MARTIN: You can review it, sanitize it for work-product and identify the work-product and then 14 15 we'll have a motion with the court --MR. ESCOBAR: Yeah. 16 MR. MARTIN: -- and then the court can make 17 18 an in-camera. 19 MR. ESCOBAR: Yeah. 20 MR. MARTIN: Fair enough? 2.1 MR. ESCOBAR: Yeah.

MR. MARTIN: Okay. We got it covered.

1 THE WITNESS: Fair enough.

2 MR. MARTIN: All right.

10

11

12

13

14

15

16

- Q In reviewing all the documents, you've indicated you've made no report. Did you take notes as you reviewed the documents?
- 7 A Yes, I did.
  - Q Are the notes typewritten? Handwritten?
- 9 A Typewritten.
  - Q And do the notes contain your observations regarding the documents that were provided to you and that you reviewed?
  - A What it -- what my notes pertain to is the comments that I believe pertinent in this case that I've been able to extract out of all the documents that I've read and I have them footnoted to where they came from.
- 18 Q And those particular notes that are
  19 typewritten and have your comments that are pertinent
  20 to this particular case, is that something that you
  21 will use to refresh your memory prior to testifying at
  22 any hearing or trial?

1 A Yes.

2.1

Q And would you be willing to give me a copy of those notes?

MR. ESCOBAR: I would object to that. You're not entitled to notes under the Florida rules of discovery and so we would object and would instruct him not to turn those notes over to you.

## BY MR. MARTIN:

- Q The typewritten notes with the comments that are -- you believe are pertinent and you'll be using to refresh your memory prior to trial, is that the only memorialization of any of your conclusions or findings, those typewritten notes, or are there other media, documents, PowerPoints, spreadsheets --
  - A That I produced?
- 16 O Yeah.
- 17 | A No.
  - Q Okay. Are there any documents other than the typewritten notes and those several things that you indicated -- depos, statement, videos, those sort of things -- that you have gathered that you will rely on when you testify? So here's where I'm kind of getting

- at, okay, because I kind of see that deer in the headlight look. That's okay.
  - A Yeah.

6

7

8

9

10

11

12

13

14

15

16

17

- 4 Q That's all right.
- 5 A Yeah.
  - Q Are there any articles or abstracts, are there any photographs of a demonstrative aid, are there any charts or graphs or anything like that that you've gathered up that you're going to rely on when you testify in court?
  - A Just documents that I -- I look at to basically help me just -- the documents are my own documents that I use for my own knowledge. That's basically what it comes down to.
  - Q Okay. What are the documents within your documents that are your own knowledge?
  - A Okay. The documents from the International Associations of Chief of Police --
- 19 Q And what would they include?
- 20 A A lot of use of force cases and how they look 21 at use of force and --
- 22 Q Okay. And that --

And --1 Α 2 What else? Q 3 Α Dealing with behavioral problems of subjects. 4 5 Again with the International Chief of 6 Police? 7 Α With the International Chief of Police, but also the Americans for Effective Law Enforcement. 8 9 All right. Q Articles written by different individuals 10 11 within the FBI and outside the FBI in law 12 enforcement. 13 All right. Q I can't think of the other documents right 14 Α 15 now without having them here in front of me. Do you have a list? 16 Q Do I have a list? Yes. 17 Α 18 All right. List of all the documents. And Q 19 of course you have the documents themselves. 20 Α Yes. 2.1 And you will be using those as authoritative

in nature in the event that it's necessary to justify

any of your answers or in support of any of your conclusions or opinions?

2.1

A When I review that material, I review it just to make sure that what I am talking about is basically peer reviewed throughout the law enforcement community and that it's an accepted principle within law enforcement of what -- how officers should react, the problems and behavior, those type of items.

Q And would you be willing to provide those documents that you're going to rely on?

A Here again, if it's not considered work-product, I would have no problems.

Q We're here at the -- at your deposition and you have no records in front of you. Did you bring any of the records that you reviewed to this deposition?

A No. In my subpoena there was nothing mentioned about bringing any records, and if I had brought records, you know, I could definitely show you, give them to you, but I don't have anything here, nor did I put anything together. And to put some of these together -- and you're asking me for a lot of different documents, it's going to take me time to pull out a lot

of these different things.

2.1

- Q But those things, other than what Mr. Escobar talked about as potential -- involving work-product, all those things are available?
- A I don't know about all of them. A lot of the things should be available but I haven't looked and I don't know if they're available or not, some of the documents that you asked for before.
- Q This last set of documents that we discussed from the International Chief of Police, the American Effective Law Enforcement, articles from the FBI, those are documents that you have readily available because you're going to use those in support of any potential testimony in this case.
  - A That's correct.
- Q Okay. There was a -- through Mr. Escobar and Mr. Michaels the defendant filed a motion to dismiss based on statutory immunity pursuant to some Florida state statutes. Have you read that pleading?
  - A Yes, I did.
- Q Okay. I brought a courtesy copy for you because over the next -- rest of the day we're going to

- 1 be referring to that document.
- 2 A Okay.

3

4

5

6

7

8

9

10

- Q But if you would just quickly look at that and make sure that that is the document that we are referring to.
  - A It looks like the document. I can't say for positive for sure it is unless I compare it page to page but it looks like the document.
- Q You don't have any reason to believe that I would mislead you in any way, do you?
- A No, you look like an honest guy, I think.
- 12 Q That didn't really answer the question.
- 13 A I don't believe you're trying to mislead me.
- 14 | I would have no reason to believe that.
- 15 Q All right. Well, I'm going to be using the 16 same document, so . . .
- 17 A Okay.
- 18 Q All right. When was the last time that you read that document?
- 20 A Maybe a week ago or so.
- 21 Q Was that to prepare for this deposition?
- 22 A No. It was sent to me and I just read it for

my own knowledge.

- Q How many times have you read it?
- A Oh, God. I can't say how many times I read it. I read through it. I then went back and I just looked at a couple things in it and so -- I read through it once, maybe went back and looked at a couple things but didn't study the document.
  - Q Did you draft any portions of that document?
- A I did not.
- Q When you read that document, were you able to identify any information that you provided to defense counsel that was included in that document?
- A What I noticed in the document, a lot of things that I believe are the same things that are being put in here whether I provided it to him or not.

  Mr. Escobar and I talked on several different occasions so he might have used some of the things that my thoughts are and these might have been totally his thoughts. I don't know.
- 21 Q Prior to this particular document being 22 filed, did you review it and make any corrections or

1 additions before the document was filed?

- A Not to my knowledge I didn't, no.
- Q Did you make any suggestions as to appropriate language that should be included in the pleadings so that the language would be consistent with your potential testimony?
- A No.

2

3

4

5

6

7

8

9

10

11

12

- Q Mr. Escobar filed a pleading with the clerk of court and I received a copy of it indicating some of the items that were provided to you for your review.

  I'd like to go through a couple of those with you now, okay?
  - A Okay.
- Q One of the documents was the police report,
  15 Pasco County Sheriff's police report --
- 16 A Right.
- 17 Q -- which included not only the officer's 18 report but also forensic technician reports.
- 19 A Yes.
- 20 Q The way the system is set up, pagination has 21 become somewhat of an issue. Every time they add a 22 report, pagination changes. There's no supplement

numbers. Okay. It's just what we have to deal with.

But the bottom line is, I'm trying to get a sense for when you read the report so I kind of know what version, if you will. Are we talking 144 pages? 159 pages? Because every time they print it out for us, we get a new pagination. So about how long ago did you read it?

2.1

A Oh, I really have to dig back into my memory on this because it's been over the last few months that I read a lot of this material and some of it was even provided way earlier than that. So it's been over the last year that I've gotten documents. So when I get the documents, I'll read them and that's when I put them into my notes. And I don't put a date on when I actually read it.

- Q All right. So when you -- in this particular case, specifically the Pasco County Sheriff's police reports, when you did review it, whatever comments or observations that you made that may be relevant or touch upon your testimony at court, you made notes.
  - A In my typewritten notes, yes.
  - Q Okay. From the police reports -- and I can

only do this kind of one at a time because I know when
you look at a lot of material, you then take everything
in a -- and everything's assimilated together.

- A Right.
- Q But we can't discuss it that way --
- 6 A That's --

5

8

12

13

14

15

- 7 Q -- in any fashion.
  - A I totally understand.
- 9 Q So we're just going to talk about the police 10 reports.
- 11 A Okay.
  - Q From reading the police reports, both the law enforcement reports and the forensic science reports, what facts jump out at you that are relevant and material to your analysis of the conduct of Mr. Reeves at the time that he shot Mr. Oulson?
- 17 A Just dealing with the conduct of Mr. Reeves?
- 18 Q Well, I'm talking about that factual 19 scenario. What was relevant and pertinent?
- A Well, basically within his police report, if
  I remember correctly, was his statement by -- or when
  interviewed by -- I think it was Officer Proctor.

1 Q All right, sir.

2.1

- 2 A And in that interview he talked about --
- 3 Q "He" being Mr. Reeves?
  - A "He" being Mr. Reeves, talked about, you know, what he went through mentally and physically, and I believe there is another couple officers that talked to him also and there's bits and pieces that didn't make any sense why they would kind of scramble it around the way they did, but he was talked to and I believe he was.
  - Q All right. I have that to discuss with you somewhat down the road here, but since you brought it up let's deal with it now.
  - A Okay.
    - Q As far as the defendant's statement that was made by Mr. Reeves to Detective Proctor, what salient facts were recounted by Mr. Reeves that you found to be relevant or material in determining whether or not Mr. Reeves was reasonable in shooting Mr. Oulson?
    - A Well, you go back to the beginning of what this -- this incident began is where Mr. Reeves asked Mr. Oulson to turn his cell phone off.

 $1 \mid Q \quad Mm-hmm.$ 

2.1

A At that time, from what Mr. Reeves was saying, that Mr. Oulson was not very happy with that and made some comments to him and he then, after a minute or so, got up, walked out, went down to the manager's office and waited there patiently where the manager talked to somebody else.

Q Mm-hmm.

A Showing he wasn't upset; he wasn't irate; he wasn't -- he was just doing what he would do. He would talk to the manager and told the manager that he had a guy up there that was -- he had his cell phone on and he was being -- I think he said he was -- he said some things to him, and then Mr. Reeves went back into the theater.

O Mm-hmm.

A By himself.

Q Mm-hmm.

A And he walked back, he said something to Mr. Oulson like, If I would have known you were going to turn the cell phone off, this wouldn't have -- you know, I wouldn't have had to report you, and then sat

down. And the interesting thing that you looked at in the video, and even in his statement, I believe he says he picked up his popcorn.

O Mm-hmm.

2.1

A And from that, I'm looking at this individual saying he's not expecting anything to happen. He's sitting down in the seat and he picks up the popcorn and he's sitting there.

- Q When you say "this individual," you're referring to Mr. Reeves?
  - A Mr. Reeves, yes.
- 12 Q Okay. Go on.

A And then there's some insults where

Mr. Oulson stands up, turns around, stands up and he's

kind of getting up on his chair and he's coming over

the chair and saying some things to him and he's -
used the word "fuck" several times and -- which is

usually a pretty good indication that somebody's really

upset, and he's not acting -- Mr. Oulson is not acting

like a normal person that we would accept in this

society as being normal actions. He's cursing at this

older gentleman. He's standing there over the top of

him and being threatening towards him.

1.3

2.1

And then Mr. -- Mr. Reeves said he takes a swipe at me or hits me or does something, and the interesting thing in that statement, he never mentions anything about him taking the popcorn from him and throwing it at him. It was something that he didn't even know -- he just knew he had been hit by something. And he was stunned at that point, and this individual now is still coming at him in a more threatening manner, coming up over the seat and he says his wife's holding him back, and that's when he decided his life was in danger at that point where this irate individual is threatening him and there's nothing he can do about it.

Q Okay. Those are the salient facts that you learned from Mr. Reeves' statement, his account --

A Well, it's pretty much his statement. I also saw the video, and I don't think I'm bleeding one over into the other. I think from his statement, his interview with Detective Proctor is -- he said those things, but I -- it could be some of the things came out of the video also.

MR. ESCOBAR: Just for purposes of the record so the record is clear, Mr. Hayden does not have the transcript of that particular interview, nor does he have a disc encompassing the video for him to answer these questions prior to being asked.

- Q Have you looked at the video?
- A I've looked at several different videos.
- Q Okay.
- 10 | A But --
- 11 Q And I believe that Mr. Escobar provided you
  12 the video clips that were introduced at the bond
  13 hearing?
- 14 A I don't know about the ones introduced at the 15 bond hearing but the --
- 16 Q I'm just going by his pleading.
  - A Well, and I'm just stating what I know. The videos I have, there's four clips on one DVD and one is the throwing of something; one is the shooting, or the shot. It only takes two seconds, I think, in the video; and another one is a longer video -- I don't know how many minutes it is -- of him walking out of

his seat, coming back into the seat; and the other one is just a very long video that goes on watching the other people out in the theater. I don't know what portion that was, so --

Q So you've looked at the video.

A I've looked at those videos. I don't know -when you say "that" video, I don't know about "that"
video. I've looked at those videos.

Q All right. When you looked at the smaller clips, do they appear to be taken from the longer video? Everything was consistent?

A Yes, it did.

Q All right. So when I ask you have you looked at the video of -- the surveillance video at the theater of the shooting event, you've looked at a video where you see Mr. Reeves and his wife walking in the first time to sit down?

A Yes.

2.1

Q All the way up to Corporal Hamilton retrieving the gun from Mr. Reeves after the shooting.

A I think that might have been in the longer video at the time.

- 1 Q That's what I'm --
- 2 A That might have been, yeah.
- 3 Q All right. So you've looked at the video.
  - A Yes.

2.1

- Q Okay. How many times have you reviewed the video?
- A The shorter videos and that one that's six, seven minutes long, I've probably reviewed the shorter videos three or four dozen times. I've looked at the longer video probably a couple dozen times. The real long video I've only looked at certain portions of it, period of time.
- Q And during the times that you've watched the video, did you in fact take notes like you did when you reviewed the police report?
- A I -- what I did is I put down numbers. I was trying to put down numbers of what actually happened at that time to see --
- 19 Q What do you mean numbers?
  - A Numbers of the time stamp on the bottom of when actually things did occur, and -- and the other things I was looking for to see if it was consistent

with the statements that he made that I had.

Q Okay. We're going to talk about the video at length along with some other information. When we get to that point, I'm going to play it for you.

A Okay.

2.1

Q But I want to move on right now and go through the documents that were provided to you. My only information as to what was provided to you was the pleading that was filed by Mr. Escobar, so I want you to know that's where I'm getting the information is from that public document --

A Okay.

Q -- okay?

MR. ESCOBAR: Glenn, just so that you can make arrangements on this, if you're going to be providing him a video, if you're going to be providing him a document, we need the video actually marked as an exhibit to the deposition. We need the documents marked as an exhibit to the deposition so that we have a complete record of what, number one, he was seeing, number two, what he was looking at. Those are obviously important characteristics of a depo and so we

- 1 must do that to have a complete record. 2 MR. MARTIN: You will not have a video 3 attached. MR. ESCOBAR: You can't show him a video --4 5 MR. MARTIN: I am going to show him a 6 video -- you can object all you want, Richard, but this 7 is my deposition and you're not going to tell me how to do it. 8 9 MR. ESCOBAR: But you can't do anything 10 outside the record and this court reporter can only take things down --11 12 MR. MARTIN: Yes. 13 MR. ESCOBAR: -- electronically and not video-wise, so in order to preserve this record, we've 14 15 got to preserve it correctly. 16 MR. MARTIN: I don't have a problem with 17 that, and if you want a copy of it --
- 20 MR. MARTIN: No, I don't have to have a copy 21 of it and that's not the way it's going to happen.

MR. ESCOBAR: You could have had a copy of it

MR. ESCOBAR: Well, it's' --

that we could have had attached --

18

```
1
              MR. MARTIN: Now, I'm going to conduct
2
    this --
3
              MR. ESCOBAR: No. No.
              MR. MARTIN: -- this deposition the way I
4
5
    want it.
              If you don't like it --
6
              MR. ESCOBAR:
                            Nope.
7
              MR. MARTIN: -- you can then take it up with
8
    the judge later but we're not going to have this
9
    argument.
10
              MR. ESCOBAR: We're not going to have a
11
    deposition --
12
              MR. MARTIN: We're going to play it --
13
              THE COURT REPORTER: I can only take one at a
14
    time.
15
              MR. MARTIN: We are going to play it,
16
    Richard.
17
              MR. ESCOBAR: No. No, we're not. We're not
18
    going to play -- if you want to make copy of it here
19
    and then we can attach it to the court reporter, I am
20
    happy to do that. So get a disc, make a copy of it --
2.1
              MR. MARTIN: You can't do it.
22
              MR. ESCOBAR: -- and give it to the court
```

```
1
    reporter because we're not going to do it any other
2
    way.
3
                           Yes, we are.
              MR. MARTIN:
              MR. ESCOBAR: You're not going to have a
4
5
    depo --
6
              MR. MARTIN:
                           Yes we are.
7
              MR. ESCOBAR: -- without a complete record.
8
    We're not going to do it.
9
              MR. MARTIN:
                           Yes, we are.
10
              MR. ESCOBAR:
                             No, we aren't.
11
                            This is my depo and you're not
              MR. MARTIN:
12
    going to --
              MR. ESCOBAR: It's your depo --
13
14
              MR. MARTIN: -- tell me how to take it.
15
              MR. ESCOBAR: -- but you're not going to
    deviate from the appropriate protocol, period.
16
17
              MR. MARTIN: Then file a motion with the
18
    court.
19
              MR. ESCOBAR:
                             No, we're not going to allow it
20
    to happen. We're going to stop it and we're not going
2.1
    to allow it to happen. You're going to do it proper --
22
    protocol. If you weren't prepared to have those
```

1 documents --2 MR. MARTIN: I am prepared. 3 MR. ESCOBAR: -- then you shouldn't be taking this depo. 4 5 MR. MARTIN: You have no idea how prepared I 6 am so don't event think that I'm not. 7 MR. ESCOBAR: Well, then you should have a 8 copy of that. 9 MR. MARTIN: No, you don't attach a depo --10 MR. ESCOBAR: Oh, yes you do. 11 MR. MARTIN: You don't attach a video to a 12 depo. 13 MR. ESCOBAR: Anything you show a witness you 14 have to attach to the depo. 15 MR. MARTIN: No, you don't. 16 MR. ESCOBAR: Yes, you do. 17 MR. MARTIN: We can identify it in the 18 transcript. If you want a copy --19 MR. ESCOBAR: That's in your computer and 20 that's going bye-bye somewhere and we don't have a 2.1 complete record. We're not going to do it that way, 22 Glenn --

MR. MARTIN: Yeah. 1 It's going to happen. 2 MR. ESCOBAR: -- so get yourself a disc and 3 copy it here. MR. MARTIN: Nope. It's not going to 4 5 happen. 6 MR. ESCOBAR: Okay. 7 BY MR. MARTIN: 8 Regarding Mr. Reeves' statement, other than 0 9 what you've provided to me, are there any other 10 material facts that you found to be relevant in your 11 analysis of Mr. Reeves' conduct at the time of the 12 shooting? Other than what you've already previously told me. 13 14 Α No, I --15 Because we're going to go through it in a lot more detail later, but this --16 Okay. I can't think of --17 Α 18 -- pick your brain a little bit. 19 I can't think of anything right now. Α 20 Okay. As far as the forensic technician

reports that were included with the police report, what

else -- what about any of the documentation by the

2.1

forensic scientist, whether they be in reports -- and we're going to get to photographs in a minute, so let's just talk about what was said in the reports.

A On that, I -- I don't have the documents here in front of me. I don't know exactly everything that was in the police report and a lot of these things, as you said before, kind of all come in together and I don't remember exactly what was in the police report nor in that document that you're talking over, this scientific portion.

Q They're just tech reports, you know, people come and gather --

A As I said, I don't remember exactly what was said in there so I really can't comment on that.

Q Do you remember the evidence that was collected?

A I remember the evidence that they talked about, the phone on the floor.

Q Mm-hmm.

2.1

A I don't know if there is any other evidence that they talk about in that. I just don't remember. I don't have the document in front of me and without

1 that document I can't tell you exactly.

- Q Which document, the police report?
- A Anything within the police report.
- Q Were you provided a copy of the police report?
- 6 A Yes.

3

4

5

7

8

9

10

11

12

13

14

15

16

17

18

- Q Other than the cell phone, is there anything else that was collected as evidence that --
- A I just -- I just don't remember. I -- you know, as I said before, you know, there was nothing that you requested for me to bring so therefore I didn't know -- I've been to depositions where we've just chatted and talked about things. I didn't know what your approach was going to be, and if I would have known you wanted all the documents, I would have brought the documents. I would have reviewed the documents beforehand.
- Q You didn't review the documents before this depo?
- 20 A I didn't review a lot of them, no. I didn't 21 need to. I wasn't bringing anything. I reviewed every 22 document that was sent to me and I went through it and

I made my notes but I did not go back to review in

depth every document before this deposition. No, I did

not.

Q What did you do to prepare for this deposition?

A I spent well over 60 hours going through every document --

Q No, to come here today. What did you do?

A As I said, if I could finish, I spent a lot of time going through every piece of evidence that was sent to me and looking at that.

Q Yeah.

2.1

A This deposition right here, I looked at my notes, I looked at a few other things, and I didn't spend a lot of time preparing more for this depo because I didn't have the slightest idea what you wanted to talk about and, as I said, I've done depos where I haven't been asked to bring anything and I -- I've answered everything I can.

MR. MARTIN: This depo is going to be continued at a different time. This is bullshit.

MR. ESCOBAR: No. You know what's bullshit?

1 You should have provided that in your notice. That's 2 what's bullshit. 3 MR. MARTIN: No. MR. ESCOBAR: Every single depo --4 5 MR. MARTIN: No. I've never ever had a quy 6 show up not prepared for his depo. 7 MR. ESCOBAR: No, no, no. He's prepared. 8 He's just not prepared for your questions. So you 9 should have done that. That's on you, on nobody else. MR. MARTIN: This is done. I'll come back 10 11 later. 12 MR. ESCOBAR: Okay. This is absolute waste of time. 13 MR. MARTIN: 14 MR. ESCOBAR: Well, don't blame us; blame 15 you. 16 THE WITNESS: So I take it I'm dismissed? 17 MR. MARTIN: You're still under subpoena 18 until I can reschedule this deposition. 19 THE WITNESS: I'm under subpoena for today 20 only, am I not?

He's saying that you're -- that subpoena will continue

MR. ESCOBAR:

Yeah, you're good to go today.

2.1

## CERTIFICATE OF NOTARY PUBLIC

I, Mary McCarty, RDR, the officer before whom the foregoing deposition was taken, do hereby certify that the witness whose testimony appears in the foregoing deposition was duly sworn by me; that the testimony of said witness was taken by me in stenotype and thereafter reduced to typewriting under my direction; that said deposition is a true record of the testimony given by said witness; that I am neither counsel for, related to, nor employed by any of the parties to the action in which this deposition was taken, and further that I am not a relative or employee of any attorney or counsel employed by the parties thereto, nor financially or otherwise interested in the outcome of the action.

Mary McCarty, RDR Notary Registration 7315842

Notary Public in and for the Commonwealth of Virginia. My commission expires: November 30, 2018.

1	ACKNOWLEDGEMENT OF DEPONENT

1	P-R-O-C-E-E-D-I-N-G-S
2	THE COURT: Good morning, everybody.
3	MR. MICHAELS: Good morning, Your Honor.
4	MR. MARTIN: Good morning.
5	THE COURT: Welcome back. It feels like we
6	never left.
7	All right. Mr. Escobar?
8	MR. ESCOBAR: It's Mr. Michaels this morning.
9	MR. MICHAELS: Good morning, Judge.
10	THE COURT: Good morning.
11	MR. MICHAELS: Defense calls Dr. Philip Hayden.
12	THE BAILIFF: Step this way, stand right here.
13	Face the clerk, raise your right hand to be sworn.
14	(Thereupon, the witness was duly sworn on oath.)
1.5	THE BAILIFF: Come have a seat up here. Adjust
16	the mic. Speak in a loud and clear voice for the
17	Court.
18	THE COURT: You may proceed, Counselor.
19	DIRECT EXAMINATION
20	BY MR. MICHAELS:
21	Q. Please state your name, spelling your first and
22	last name for the court reporter and the Judge, please.
23	A. My name is Philip Hayden. First name Philip,
24	P-H-I-L-I-P, last name Hayden, H-A-Y-D-E-N.
25	Q. And before we start, I'm going to give you an

It's Exhibit 111. That's the Defense's number. exhibit. 1 If I may approach, Your Honor? 2 MR. MICHAELS: 3 THE COURT: Uh-huh. 4 BY MR. MICHAELS: That's a copy of your CV to help you if you need 5 Q. to remember some of the many things you've done in your 6 past, in your educational and professional background. 7 Okay? 8 Α. Okay. 9 So let's talk about first, what is your 10 11 occupation? Right now I'm a law enforcement consultant, and 12 Α. I also have a company that's an investigative company. 13 When you say, "law enforcement consultant," 14 15 explain to us what it is that you and your company does. As a law enforcement consultant, I'm available 16 to law enforcement if they need help, but I also work as 17 an expert witness, in that for both the plaintiff and the 18 19 defense. 20 Have you also provided consultation and expert witness services to state attorneys and U.S. Attorneys' 21 offices? 22 23 Yes, I have. Α. Give the court some examples of the offices you 24 25 provided these services for.

- A. The Department of Justice in Washington D.C., the Department of Justice in Iowa, Department of Justice in California, so several U.S. Department of Justice offices. State's attorneys have been in Birmingham, in Chicago, Des Moines, Iowa.
  - Q. Sarasota?

- A. Sarasota.
- Q. Miami Dade?
- A. Miami Dade, yes.
- Q. Feel free to look at your CV if you need to,
  Dr. Hayden.
  - A. Okay.
  - Q. What are some of the state and city attorneys' offices you've consulted and provided expert witness services for?
  - A. Here in the United States Attorney's office in
    New York City, Western District of New York, District of
    New Jersey, Washington, D.C., El Paso, Texas, Portland,
    Oregon, Alexandria, Virginia, Eastern District of
    Pennsylvania, and State and County Attorneys' offices,
    Delaware, County Attorney's Office for Prince George's
    County, Maryland, Connecticut, and defense and plaintiff
    attorneys in Richmond, Virginia, Washington D.C.,
    Baltimore, Maryland, Las Vegas, Nevada, Denver, Colorado,
    Kansas City, Pasedena, Texas, Birmingham, Alabama, and the

Swedish Defense Ministry. 1 Now, have you ever been qualified in state court 2 Q. 3 to render an expert opinion? 4 Α. Yes, I have. In what field? 5 Q. In use of force and also in police policies and 6 7 procedures. In federal court? Ο. 8 In federal court, the same. 9 Α. Now, before we get to your services in this 10 Q. particular case and your opinion in this particular case 11 and what you've done in this particular case, let's talk a 12 little bit about your background. 13 I understand that you're a veteran of the U.S. 14 15 Army? 16 A That's correct. And from what year to what year? 17 Q. 1964 to 1968. 18 Α. And you entered as a private? 19 Q. 20 A . That's correct. What was your rank when you separated? 21 Q. I was a captain. 22 A. 23 Why did you separate from the armed services?  $Q_{*}$ I was on physical disability. I got shot up 24 A. pretty bad in Vietnam and retired out of the military. 25

And so when you were in Vietnam, you received 0. 1 certain honors; did you not? 2 Yes, I did. Α. 3 The Purple Heart? 4 Q. Yes, I did. 5 Α. The Vietnamese Cross of Gallantry? 6 Q. Yes, I did. 7 Α. Conspicuous Service Cross? Q. 8 Yes, I did. Α. 9 The Army Commendation for Valor? 10 Q. Α. Yes. 11 Bronze Star for Valor? 12 Q. Yes, I did. 13 A. And also the Distinguished Service Cross? 14 Q. That's correct. 15 A. Now, before we get to your FBI service and your 16 Q. experience in the Federal Bureau of Investigations, let's 17 talk a little bit about your educational background. 18 19 Okay? 20 Okay. Α. I called you Doctor when you came in. 21 Q. talk about bachelor's. Where did you get your bachelor's 22 23 and when? From Adelphi University. I received that in 24 A. 1972. 25

And what is your bachelor's in? 1 Q. It's in accounting and business. 2 A. And you have a master's? 3 Q. I have a master's degree I received in 1980. Α. 4 From what school? 5 Q. Adelphi University. 6 Α. What is the master's in? 7 Q. In accounting. 8 Α. Let's talk about your doctorate. From what 9 0. 10 school? From Nova Southeastern in Fort Lauderdale. 11 Α. 12 Q. What year? In 1977. 13 Α. What is your doctorate in? 14 Q. In education. 15 A . It's in education. How does that relate to your 16 Q. current work as an expert in -- consultant in the field of 17 use of force? 18 As an educator, what I had to do is understand 19 how people learn; how people transfer that information 20 that they see, they hear, and how do they interpret that 21 to, they actually use those types of skills that we're 22 23 trying to teach. And specifically, did that concept and those 24 ideas apply to the training of law enforcement officers? 25

- 1 A. Yes, specifically to that, yes.
  - Q. That's a program that you developed?
  - A. That's correct.

- Q. And that's training for use of force and things in that realm; is that fair to say?
  - A. That's correct.
  - Q. Now, let's talk about your career in the FBI.

    When did you join the FBI?
  - A. I joined the FBI in 1973.
  - Q. How many years were you with the FBI?
  - A. Twenty-six.
- Q. Before we go into some of your training and experience in the FBI, let's talk a little bit about what your various assignments are. So when you start the FBI, I imagine you go to an academy?
  - A. Yes, that's correct.
- Q. Where is that?
  - A. That's in Quantico, Virginia.
- Q. And what sort of training do you receive at that point?
  - A. We receive sixteen weeks of training which involved all the investigations that you might do in the federal realm, and at that time there was like 350 different types of investigations; criminal, intelligence work, counterintelligence. So you receive training in all

those different areas and you received firearms training, 1 defensive tactics, physical fitness, investigations, 2 interviewing. 3 Are you also schooled in the concept of use of 4 Q. force? 5 Absolutely, yes. 6 And that would mean when it's appropriate, 7 Q. 8 correct? When it's appropriate and what force you should A. be able to use. 10 And do you also learn at a very early time the 11 Q. various cues and things you should look for when deciding 12 when and if to apply force? 13 Yes, that's a critical factor in learning that, 14 15 yes. And how much force to apply? 16 Q. That's correct. A . 17 Now, as an FBI agent, do you go in -- you go to 18 Q. Quantico, you go to the academy. What's your first 19 assignment? 20 After I get out of Quantico I go to Chicago, and 21 A. in Chicago I was assigned to the theft of interstate 22 23 shipment. How long is that assignment for? 24 0.

25

A.

I was in Chicago for just about three years.

And tell the Court what it is that you did in 1 0. that particular assignment. In other words, what do you 2 do when you're assigned to, you said theft of 3 interstate --5 Shipment. A. -- shipment. 6 Q. Basically, truck highjacking, things like that 7 Α. that cross the state lines, and investigating those crimes 8 and conducting the arrest on individuals that you're able 9 10 to identify. Okay. So you would be involved in the 11 0. 12 investigation? That's correct. 13 Α. And also the apprehension of the individuals 14 0. that where being investigated? 15 That's correct, and all of paperwork that goes 16 A. 17 with it. Okay. What's your next assignment? 18 Q. I worked in counterintelligence and I worked in 19 Polish intelligence, dealing with the individuals at the 20 21 Polish Embassy. What years are we talking about? 22 Q. This is from 1973 through 1976. 23 A.

Before the wall came down?

Before the wall came down, yes.

24

25

Q.

A.

- Q. What did you do in that particular assignment?
- A. I worked pretty much undercover, and did just -following the different individuals that they had in the
  Polish Embassy that we were interested in.
  - Q. Next assignment?

- A. Next assignment, I was in Chicago, and they move you around a bit so you get a different experiences, and I worked bank robberies, fugitives, and that was my last assignment in Chicago.
  - Q. What does that particular work involve?
- A. Here again, investigations. Investigations in bank robberies, doing interviews, doing the investigation, then conducting the arrest.

The others are fugitives that -- you might have a fugitive, as identified through the federal system, that there's a warrant for that person, and you try to find that person and make the arrest.

- Q. And does that particular assignment put you in contact directly with violent and potentially -- and potentially violent individuals?
  - A. Absolutely, it does.
  - Q. And what's your next assignment after that?
  - A. I was transferred to New York City.
  - Q. What did you do there?
  - A. When I first arrived there, I worked in

counterintelligence in the Russian Squad. 1 What year are we talking about? 2 Q. That was 1976 to probably 1977, early '78. 3 Α. And so there you are doing similar work 4 Q. regarding the Russian Embassy as you did in Chicago with 5 the Polish embassy? Is that fair to say? 6 That's correct. 7 Α. How long do you do that for? 8 Ο. Just about a year a year and a half. 9 **A**. What's your next assignment? 10 0. Next assignment, I ended up going to one of the 11 A. organized crime squads. And on the organized crime squad 12 I was one of four different individuals that was assigned 13 to that squad to set up and develop plans and do the 14 arrest of individuals that we identified. 15 So you weren't actually involved in the 16 Q. undercover work itself? 17 I wasn't involved in any undercover work in 18 **A**. that, no. 19 20 0. But you were involved in the arrest? That's correct. 21 **A** . So, again, placing you potentially in direct 22 Q. contact with violent or potentially violent individuals? 23 That's correct. 24 Α.

Next assignment?

25

Q.

Next assignment, I worked on a squad that did qo 1 I worked undercover in identifying different 2 undercover. criminal aspects, both in a criminal side and on 3 counterintelligence, and we worked to help identify those 4 people and to make the arrests of those people. 5 And any sort of segment that was targeted? 6 No, it's what they requested from the different 7 squads within the division I was assigned to that if they 8 needed help in certain -- identifying or arresting certain 9 people, then they brought us in to assist them. 10 Okay. Again, in contact with dangerous and 11 potentially dangerous individuals? 12 That's correct. 13 Α. And we were working on -- or we were working 14 15 with task forces from the New York City Police Department also that was involved in this. 16 Okay. Next assignment? 17 Q. Next assignment after I left Chicago, I went to 18 Α. Ouantico, Virginia. 19 20 You mean after you left New York? Q. After I left New York. I'm sorry, yes. 21 Α. What year are we at now? 22 Q. 23 When I went to Quantico, it was 1983. A. And at that point are you a supervisory special 24 Q.

25

agent?

- A. That's correct.
- Q. What is the purpose of you going to Quantico?
- A. I was asked to go to Quantico to work on the SWAT program and the different aspects of SWAT, sniper training, defensive tactics, firearms.
- Q. And does part of that have to do with your military background?
  - A. Yes, it did.
- Q. What sort of training did you receive in the military?
- A. Well, I went through the basic training of combat infantry, I went through officer candidate school. I went through airborne school, ranger school, pathfinder school, demolition -- part of a demolition school. I trained for two and a half years.
- Q. Okay. Now, when you go to Quantico, is it to be part of the squad team or is to help develop it or both?
- A. When I went to Quantico, the unit was called the Special Operations and Research Unit, which was designed to work with the SWAT teams throughout the United States or FBI SWAT teams, and we did the training for them, getting equipment for them and assisting them if they needed our assistance in setting up posts and things like that.
  - Q. So is it fair to say, that in 1983 began your

```
career where, specifically, you're training other law
1
     enforcement personnel, special agents, local police,
2
3
     et cetera?
               That's when the large portion of my training
 4
          A.
     began. We did do training back in New York, and I was a
5
     firearms instructor there, defensive tactics instructor,
 6
     and sometimes we worked with local police as well as FBI
7
     agents.
8
 9
               But you were also involved in training other
          Q.
     people then at that point?
10
               That's correct.
          A.
11
               In 1993?
12
          Q.
               1983.
13
          Α.
               In 1983.
14
          Q.
15
          A.
               Right.
               Now, during that time period -- what is it, '83
16
          0.
     to '99?
17
              Is that fair to say?
               '83 to '90 I was in the source unit.
18
          Α.
               And actually training individuals, that goes all
19
20
     the way out to '99, right?
               Yes, that's correct.
21
          Α.
               In terms of with the FBI?
22
          Ο.
```

you training officers and special agents in?

During that time period, what sort of areas are

That's correct.

23

24

25

Α.

Q.

A. We're training them in the tactics of officer sound -- sound tactics. How do you go into a situation and do it in a way that's conducive to your own safety and to the safety of other individuals?

We dealt with all of those tactics dealing with firearms, defensive tactical, hands-on arrest techniques and then also planning, how to plan for an arrest and how to actually take it down.

- Q. During that time period, give the Court an estimate of how many law enforcement personnel, special agents, and local and state law enforcement that you were involved in training. How many people?
- A. In the combined of the source unit and when I went over to the practical applications unit and then to the law enforcement training for safety and survival, the SWAT was probably 1,500 or so people.

We went into the other areas of the task force training, probably another 4,000, 4,500 people, both -- and that was both federal agents. It could be from DEA, FBI, a lot of different federal organizations, and the task forces were also combined of federal and local, state, county police officers.

- Q. Did you also train law enforcement entities in other countries?
  - A. Yes, we did.

- Q. Give the Court some examples.

- A

- A. We went to Russia on five different occasions.

  We went to the Ukraine. We went to Uzbekistan. We went to several countries over in the Eastern Bloc countries.

  We went to Jordan. We went to Egypt; and what we did there was train our police officers in the program that was developed for the law enforcement training for safety and SWAT.
- Q. And did you help create a law enforcement training for safety and survival?
  - A. Yes, I did.
  - Q. When did you do that?
- A. I was asked to do that in 1992 for the Violent Crimes Task Forces.
- Q. And that's after you had already been training individuals for nine years or so?
  - A. Yes, that's correct.
- Q. Let's talk about while you were with the FBI, some of the lesson plans you designed.
  - First tell the Court what a lesson plan is.
- A. Lesson plans were developed to help our students have the guideline for what they're going to be instructed in and take them through the stages of what the first step would be all the way through that training process.
  - Q. And what areas are we talking about?

A. We are talking about several different areas. I had them written down here. I can't see it right here.

Oh, here we go.

Some of these lesson plans that we did were:
making arrests and handling subjects, preparation for an
arrest, arrest and search warrants, side surveys, law
enforcement operations orders for arrest and search
plans. Approaching an entry point. Conventional room
entry. Techniques for room clearing. Procedures and
equipment for room clearing. Clearing hallways, interior
movement, stairways, attics, roofs, crawl spaces, vehicle
stops, quick entries, which is sometimes referred to as
dynamic entry, use of ballistic shields, entries and
vehicle clearing, mechanical breaching, tactical
operations and repel master instructor.

- Q. So what happens with those lesson plans? You write them up and it's FBI property, or explain how that works.
- A. These lesson plans, they had -- the original lesson plans were there. They were not in very good order nor in detail, so I was asked to rewrite these for the new programs and --
  - Q. Who is it that asked you to do that?
  - A. The supervisors within the FBI at Quantico --
  - Q. Okay:

- 1
- A: -- asked me to do that.
- 2
- Q. And you also wrote some articles for the FBI?

use of force, how to arrest an individual in a safe

these articles were written for their benefit.

to create those lessons plans you talked about?

manner, how officers can be protected and do their job in

- twelve different individuals.
- Q. Did you also incorporate the training that you had received?

1 A. Oh, absolutely.

2

3

4

5

6

7

8

9

10

11

12

13

- Q. And the experience that you had in your various assignments during your tenure in the FBI?
- A. I did that for myself, but I also did it for other agents that were there that we all had an input into if we thought that process was a good process or not.
- Q. You also helped to produce a video or videos for the FBI?
  - A. That's correct.
- Q. Now, when you were on the FBI, were you on any special units? You mentioned SWAT. Were you a member of the SWAT unit?
  - A. Yes, I was.
- O. What other units?
- 15 A. I was also an aviator. I flew aircraft for the 16 FBI.
- Q. So you were an FBI pilot is what you're telling us?
- 19 A. Right.
- 20 Q. Were you a member of the FBI Shooting Board?
- 21 A. Yes, I was.
- 22 Q. Tell the Court what that is.
- 23 A. The Shooting Review Board is held at the
  24 headquarters in Washington, D.C., and that board is made
  25 up of about twelve different individuals that some of them

have tactical background, some of them have a legal background, some have an administrative background, and every shooting that an FBI agent is involved in or every time that an FBI agent discharges a weapon outside of the training area, it could be an accidental discharge, it could be something -- he's cleaning his weapon at home and it goes off. Anytime an FBI agent is involved with a weapon that is fired outside of training that comes to the Shooting Review Board, and the Shooting Review Board analyzes everything that's done for the report that was 10 given.

- And that means that if an agent -- special agent 0. fires his weapon and actually shoots somebody, that's included within that review board?
  - Α. Absolutely.

24

- As well as dropping the weapon at home and then discharging it?
  - That's correct. Α.
- And nationally, every single special agent of the FBI or any FBI personnel who's involved in any sort of shooting, that review board that you were a part of reviewed that shooting; is that fair to say?
  - Α. That's correct.
  - Okay. Now, you did that for how long? Q.
  - I did that for about seven years. A.

And did you always -- was your opinion always 1 Q. that the shooting is justified? 2 No, it was not. A. 3 Now, during your tenure with the FBI, did you 4 Q. have occasion to interview agents or other police officers 5 postshootings? In other words, police officers, agents 6 involved in a shooting, were you involved in the interview 7 of any of those individuals? 8 Yes, I was. 9 Α. How many occasions, do you think? 10 Q. Well over 200, 200 to 300. I would have to look Α. 11 exactly, but it was well over 200, probably closer to 300. 12 Now, in this case you were hired by my firm? 13 Q. That's correct. 14 Α. Escobar & Associates, correct? 15 Q. That's correct. 16 Α. And you're being paid for your services? 17 Q. That's correct. 18 A. Now, in this particular case what sort of 19 materials were you provided to review to formulate your 20 21 opinion? I was given 137 different documents from your 22 association to review, and I have a list of that if you'd 23 like to see that list. 24

25

Q.

Why don't you tell us what is on that list or

read it if you need to. 1 Well, there's depositions, over twenty 2 depositions, statements. There are police reports, there 3 are officers' statements of interviews that they did, a 4 lot of statements many, many, many statements. 5 Did you look at some photographs as well? 6 0. 7 Α. I looked at photographs. Autopsy report? 8 Q. Autopsy report. 9 Α. Did you listen to the recorded statement of Mr. 10 0. Reeves? 11 I listened to the recorded statement of 12 A. Mr. Reeves. 13 Did you get a big, thick police report as well? 14 Q. Yes, I did. 15 A. And what else did you do in terms of your 16 Q. 17 investigation? Well, I reviewed all of that material, and then 18 19 T --How many hours do you think you've spent 20 reviewing the materials and formulating an opinion in this 21 case? 22 Probably -- the material that you sent, probably 23 well over 50, 55, 60 hours, then reviewing materials, my 24 own material, probably another 30 hours.

Okay. At some point did you come down to 1 Q. 2 Tampa --Yes, I did. A. 3 -- as part of your investigation in this case? 4 Q. That's correct. 5 Α. Did you actually go to the Cobb Movie Theater? 6 0. 7 A. Yes, I did. Tell us about that. You went there. Who did 8 Q. you go with? 9 I went with Mr. Escobar. 10 Α. All right. And where did you go? 11 Q. We went to the Cobb Theater. We went inside. A 12 A. manager opened it up for us. It was not open at the time. 13 We went into Theater 10. 14 All right. And that's the theater that's in 15 question in this particular case? 16 17 Α. That's correct. And you knew about that before you went into 18 Ο. 19 Theater 10? That's correct. 20 All right. Tell me what happens when you get 21 22 into Theater 10. I went in there, and we looked at the different 23 seating arrangements they had back there. We went over to 24 the seating that Mr. Reeves was sitting in. I sat in that 25

I went to where Mr. Oulson -chair. 1 Let's talk about that. 2 So you went into the theater. You sat in the 3 chair that Mr. Reeves was in. How did you know that was 4 the chair that Mr. Reeves was in? From the videos and from the reports. 6 And did Mr. Escobar also indicate to you that 7 0. that was the seat? 8 9 A. Yes, he did. Tell me what happens. Do you actually sit in 10 the seat? 11 Yes, I do. 12 Α. What is the lighting -- what are the lighting 13 14 conditions in the theater? Well, at the time Mr. Escobar and I are talking 15 and it's just a -- opened up the lighting that they had in 16 there, the actual lighting, and after we got done talking 17 the manager turned on the sound. 18 19 We're going to get there. 0. 20 Α. Okay. So when you go in, the theater is not dark; is 21 Q. 22 that what you're telling the Court? That's correct. 23 Α.

probably don't know what the settings were and all of

24

25

And I know it's a relative term because you

that, but it was not a darkened theater; that's what you're telling us?

A. That's correct.

- Q. So you sit in the seat, and what is your purpose of sitting in the seat? What are you doing there?
- A. What I'm trying to do, I'm trying see what Mr. Reeves, how he was sitting in that seat, how he felt in that seat.
- Q. Agree or disagree: You're trying to evaluate what the environment is, at least as it's concerning the physical constraints of the seat, if you will?
  - A. That's correct.
- Q. And so when you sit in that seat, what do you notice in terms of the seat itself? For instance, are there arms side to side or no arms?
  - A. Arms.
- Q. And what does that do in terms of restricting your movement or do you even try to move?
- A. No, I definitely tried to move within that seat, and I tried to move around. I tried to move to the left, to the right, how I would have to stand up in there, how close it is to the seat in front of me, so I'm moving around there, seeing what the restrictions might be.
  - Q. We're going to talk about that.
    So you're in the seat, and how much do you

1 | weigh?

- A. I weigh about 250 pounds.
- Q. Okay. And so did you find it easy to move around in that seat?
- A. Not easy to move very far. I could kind of move my body around in there, you know, trying to get in a comfortable position, but there wasn't much room to move to the left or right.
- Q. Now, in terms of the seat in front of you, initially, when you sat down, was that seat leaned back or just left in the position with nobody sitting there?
- A. It was left in the position of nobody sitting there.
- Q. And tell me what observations you made concerning that seat in terms of distance from where your knees were.
- A. Well, from the photographs that the crime scene photographers had done, I saw that they had a measuring tape. It was about eighteen inches from the front of the seat that I was sitting in to the back of the seat with just sitting straight up. From where Mr. Reeves was was about 36 inches from his seat to where Mr. Oulson was.
- Q. Okay. But without getting into measurements, I want to know what you observed, because certainly you were not there with a tape measure.

1 A. No, I was not.

- Q. So when you were seated there, could you easily reach up and touch the seat in front of you?
  - A. Yes, I could.
- Q. You said you tried to get up. Tell the Court how it is that you tried to get up.
- A. Well, when you're standing up there, I wanted to see just how easy it would be to stand up from that position.

When you see, because of the seats and the way they're developed, you have to lean forward quite a bit in order to be able to stand up, and because my back is also messed up, I had used the hand rest to kind of push myself up.

Q. And what did you observe when you tried to push yourself up? And specifically, I'm talking about what did you observe in terms of your proximity to the row in front of you?

In other words, as you were pushing up, did you get closer to the row or did you get further back?

- A. When I was pushing up, I was right to the back of the row, so I was all the way forward.
- Q. When you pushed yourself up, where was your head positioned in relation to that seatback?
  - A. Just about where the seatback was.

Now, in that initial seat, what else did you do? 1 0. Did you try moving around? 2 You saw on the video, because you said you 3 looked at the video, Mr. Reeves sticking out his leg. Did 4 you try to move around at all? 5 Mr. Reeves said that he had slid down in 6 Α. Yes. the seat, so the back of the seat -- so I wanted to see 7 how that would be, and I tried to do the exact same thing. 8 And were you able to? 9 10 A. Yes, I was. Now, from that back row did you try leaning the 11 Q. seat back at all of the back row seat? 12 Of the back row seat, trying to lift --13 Α. Lean it back. Did it lean back at all? 14 0. No, not really, because there's a wall back 15 It leans back very little. 16 Okay. Now, what's the next thing that you did? 17 Q . Now you sat in that seat. What do you do next? 18 Mr. Escobar was over where Mr. Oulson was, and 19 we were kind of interacting, pushing the seat back to see 20 how close we could be to -- if he could reach me, if he 21 22 couldn't reach me, and then --Okay. Now, Mr. Escobar is not six-four. We can 23 Q. 24 agree with that, I'm sure.

Absolutely.

Α.

So tell me what your experience was then with 1 Mr. Escobar, at least, leaning on the seat. Was he able 2 3 to reach you? A. Yes, he was. What area of your body did he reach to? 5 Q. He was able to reach, right, basically almost to 6 my chest by leaning over the seat. And was he pressing on the seat so it was 8 9 leaning back? 10 Α. Yes. 11 Could you tell? 0. Yeah, it appeared that's what he was doing. 12 A. Did you see where his legs or knee was? 13 Q. No, I couldn't see from there, but he tried in 14 different positions, and he's leaning back in the chair. 15 He did not try to stand up in the chair, but he was 16 17 kneeling in the chair on one occasion. Okay. And that's the seat that's not in front 18 0. of you but the one that would be to your right? 19 To the front right, yes. 20 21 So he's not actually coming between the seats, 0. but he's manipulating the seat to the right? 22 He moved over in-between the two seats also. 23 A.

closer to you when he reached over?

24

25

0.

When he moved over between the two seats, was he

He was close to me when he came over that second 1 time, when he came through the crack of the seat, 2 basically, and it appeared that he could almost be right 3 on top of me. 4 Okay. Now, from there, what's the next thing 5 that you do in the theater? 6 Well, I ended up sitting where Mr. Oulson was. 7 A. Let's talk about that. 8 Q. So now you change positions, you sit in the seat 9 that Mr. Escobar was near? 10 Yes, that's correct. Α. 11 That would be the seat that as you're looking Q. 12 forward, if you're sitting in Mr. Reeves' seat, it would 13 be the seat to the right? 14 That's correct. 15 Α. So what did you do in that seat? 16 I did the same type of things that Mr. Escobar 17 A. did. Mr. Escobar was sitting in Mr. Reeves' seat. 18 Okay. So tell me what it is that you did. Now, 19 you're there. Is the seat bottom up or down? 20 The seat was down. I was sitting in it. When I 21 A . stood up, the seat came up and I was leaning back in the 22 23 seat. When you were sitting in the seat, did you try 24

to reach back at all?

1 A. Yes, I did. 2 Q. Were you able to? When I was sitting in the seat? 3 Α. Yes. 4 Q. Not when I was not sitting in the seat I didn't 5 Α. try to reach back. 6 Okay. When did you try to reach back? 7 Q. When I turned around. 8 Α. So tell us about that. You turned around? 0. I turned around, I stood up and turned around 10 and I reached back. 11 All right. And the seat bottom is up or down? 12 Q. Α. Up. 13 And your knees are where? Against the seat 14 Q. 15 bottom? Basically right against the seat. They were 16 A. in -- the upper part of the seat is where it comes up, and 17 18 that's about where my knee is. All right. So you're not kneeling on the seat? 19 My knee is there, but I wouldn't say I was 20 Α. 21 kneeling on the seat. You're not kneeling on the seat when it's down? 22 Q. 23 A . No, I'm not. The seat is folded up? 24 Q.

That's correct.

25

A.

And your knee is contacting the seat --1 Q. Leading, Judge. MR. MARTIN: 2 BY MR. MICHAELS: 3 I'm trying to understand. Do you agree with me 4 Q. or disagree with me that your knee was touching the bottom 5 of the seat as the seat was in the up position? 6 That's correct. 7 Α. So you agree with me? 8 0. Yes, I do. 9 Α. All right. Now, when you're in that position, 10 0. are you right in front of the seat or over to the side? 11 I was -- I did both. I was right in front of 12 A. the seat and moved over to the side. 13 Tell us about right in front of the seat, 14 0. 15 what -- you reached over? I reached over, and I couldn't get as close as I 16 could when I moved over. 17 When you say as close, how close did you get 18 Q. from the position where you're in front of the seat? 19 20 When I was standing right in front of the seat, Α. I could probably reach over and just about touch it, but 21 22 not quite. Okay. And touch Mr. Escobar? 23 Q. Yes, that's correct. 24 Α. We can agree, not only is he not six-four but he 25 Q.

doesn't weigh 250 pounds?

1

2

18

19

20

21

22

23

24

- A. That's correct.
- Q. And so when you reach over, you can almost touch him, you say. How tall are you?
  - A. Six foot.
  - Q. Okay. You're not six-four?
  - A. No, I'm not.
- Q. Now, when you reach over, are you -- is your hand on the back of the chair? By that I mean the part you lean back in --
  - A. Yes.
    - Q. -- or where is your hand?
  - A. My hand was on the back of seat.
- Q. When you say you're reaching over, you're reaching over with your right or your left hand?
  - A. I'm reaching over with my right hand.
- Q. Now, you said you had a bad back. How were you able to balance yourself? Tell me -- explain to us what it is that you were doing to accomplish that sort of position.
- A. Well, in order to accomplish that, my knee was on the back of the seat. My hand was on the back of the seat. My knee was on the back of the seating part, and I was pushing over and trying to reach over with my hand to see how far I could go.

So you were pushing on the back of the seat that 1 Q. actually moves a little bit; is that what you are 2 3 explaining? Yes, that's correct. 4 Α. Now, after you do that in front of the seat, 5 0. what's the very next thing that you do? 6 Well, the next thing we did, we had the manager 7 Α. 8 turn on the sound. Did you move towards the -- in-between the seats? 10 Yes, I did move in-between the seats, yes. 11 Α. What did you do -- what did you do once you were 12 0. 13 in-between the seats? I did the same thing. I tried to move over 14 toward Mr. Escobar to see how much I could reach over. 15 Were you able to get close or not? 16 Q. A. Yes. Closer, yes. 17 Were you able to touch him? 18 Q. 19 A. Yes. In what area? 20 0. I could touch him in his -- pretty much his --21 A. where he's sitting back where his hands are, in that area. 22 And -- well, I'm not sure --23 0. Right around the chest area. I could get in 24

25

that close.

Okay. What's the next thing that happened in 1 0. the movie theater? 2 We had the manager turn the sound on and then 3 Α. the preview, and I don't remember which one it was, and 4 turn the lights the way the lights would have been at that 5 6 time. Okay. And in terms of how the lights really 7 Q. were on the day this all happened -- agree or disagree --8 you don't really know what it's like -- what the lights 9 10 were physically like on the day this happened? Right. No, just what the manager said, this is 11 Α. 12 what it would have been on that day. Okay. And so you're there. The lights are, 13 Q. according to the manager anyway, at preview level, and 14 you're watching some preview but we don't know which one, 15 16 right? 17 Α. That's correct. What do you do -- where are you when you're 18 0. 19 watching that? We do the same thing for Mr. Reeves' seat to 20 21 Mr. Oulson's seat. We kind of moved around. Mr. Escobar

was moving back and forth to see how much I could see of

him when he was moving around. It was just the two of us,

22

23

24

Mr. Reeves' seat, was what? 1 At that time, to see with the lights down, to 2 Α. see how clearly I could see Mr. Escobar. 3 Okay. And agree or disagree with me: You also 0. 4 did that to get some idea of Mr. Reeves' perspective. 5 6 Agree or disagree? 7 A. I agree. Now, part of what you did in this case, you 8 talked about the materials that you looked at. Let's talk 9 10 a little bit about those materials. You said you looked at the depositions. 11 that be depositions of both laypeople or patrons and law 12 enforcement as well? 13 14 That's correct. Α. And did you review statements by laypeople or 15 the patrons in the movie theater? 16 Yes, I did. 17 A. And did you consider those statements in 18 formulating your opinion in this case? 19 No, I read through all of them, but I did not 20 use it because I thought it was really contaminated at 21 22 that point. Let's talk a little bit about that. 23 Q.

Quantico, tell us about your training in interviewing

24

25

As an FBI agent, from the very time you began in

1 large groups of people?

- A. One thing that's pointed out, it was pointed out very clearly, right from the very beginning is that you have to separate witnesses in order to make sure that you get statements that is in their mind, not words from somebody else.
  - Q. Why is that a big deal?
- A. Because people have a tendency to want to fill blanks, and when they hear what other people have to say, they have a tendency to put that in their statement, thinking that that's what they did see or hear.
- Q. So what does your training tell you in terms of considering statements that have been subject to this contamination?
- A. Well, what it says is that you have to request everything and be as thorough as you possibly can when you read any of these documents, so whether or not it's contaminated or not, to see if there's some kind of consistency.

So I did. I did read them, but when I formed my opinion, my opinion was not based on much of what they said at all.

Q. And what is it that gave you the idea, or why are you of the opinion that these statements are contaminated witness statements here?

Because several of the witnesses within their 1 Α. depositions stated that they had talked to other people. 2 They had talked to each other. They had talked to 3 spouses, you know, before they made their statements, and 4 that large groups of people were standing around talking 5 about what happened, discussing the case. 6 Okay. So they overheard other people talking 7 about it? 8 They overheard other people talking and were 9 Α. involved in some of the discussions of what happened. 10 So you actually went to the movie theater. 11 There was a video in this case. Certainly you've had a 12 chance to review the video? 13 14 Yes, I have. Α. 15 Q. And several clips? 16 Α. Yes, I have. And several versions of the video? 17 Q. Yes, I have. 18 Α. Mr. Martin showed you a video during your 19 0. 20 deposition? 21 24 That's correct. Clips and all of that? Do you recall that? 22 0. 23 Yes, I do. Α. So it would be fair to say, that you had a 24 Q.

chance to review the video in this case?

1 A. Yes, I did.

2

3

4

5

- Q. Now, did you use your review of the video as part of your formulation of your opinion in this case?
  - A. Yes, I did.
  - Q. What else did you do in this case?
- A. Well, I -- after reviewing all of the material, the videos, the photographs.
  - Q. The reports?
- A. The reports, everything that was -- that was given to me by you in looking at my background, my past experience.
  - Q. Well, did you also interview Mr. Reeves?
- 13 A. Yes, I did.
- Q. Well, when you came down to the movie theater,
  you interviewed Mr. Reeves, right?
  - A. That's correct.
- Q. All right. Tell us about that. Where was the interview conducted?
  - A. At Mr. Escobar's office.
  - Q. How long did that interview last?
- 21 A. Probably no more than an hour.
- Q. All right. Now, did you take notes?
- 23 A. No, I did not.
- Q. Did you record the interview?
- 25 A. No, I did not.

Q. What was the purpose of interviewing Mr. Reeves?

- A. I already read all the statements and had a very good understanding of what he said, and what I wanted to do was clarify in my own thinking some of the questions that I had about his statements and things he had said, so I just wanted to talk to him about that.
- Q. Okay. And had you, before this, before you interviewed Mr. Reeves, in addition to all of the material, did you actually listen to the interview Mr. Reeves gave Detective Proctor and Koenig at the scene?
  - A. Yes, I listened to that twice.
- Q. Okay. Now, tell me about the interview with Mr. Reeves. What does he tell you?
- A. There was nothing really different from what his statement was, that his oral statement said, and so when I talked to him, I really didn't see much difference. I just got more clarification about his fear and things like that.
- Q. And tell the Court, what sort of clarification did you get concerning Mr. Reeves' fear?
- A. Well, he said in his statement that he was scared shitless, that he was really scared.
- Q. Now you're talking about what he said in his statement to whom?
  - A. To Detective Proctor.

1 Q. Okay.

24

25

A. So I asked him about that, "What do you mean? Why would -- were you scared? What was it that scared you?

And he explained to me that he was scared from the demeanor, the words, the actions of this individual, was totally out of context of anybody being in a theater, and he was explaining that to me, why he felt that fear.

- Q. Well, let's look at Mr. Reeves' statement that you have there in front of you?
  - A. I have a statement.
- Q. Again, I'm talking about the statement he gave to law enforcement that day.
  - A. That's correct.
- Q. Now, Mr. Reeves says to Proctor, and it's on page 79 of the report, it's line 34 of the transcription that we were provided from the State, Mr. Reeves says to tell you the -- it says, "Damn," there. I believe the recording accurately says, "Dang, I hate to be here. This is crazy. It was absurd. I tell retired cops that you don't do this."

What did Mr. Reeves mean by that? Did you talk to him?

- A. I did talk to him about --
- Q. Did you talk to him about that particular line?

Not exactly about that particular line. 1 A. So then let's talk about this. 2 0. Tell me what it is regarding law enforcement --3 law enforcement officer involved in a shooting, a 4 justified shooting. In your interview, how does that law 5 enforcement officer feel? б It's probably one of the worst experiences that 7 Α. you'll have, taking another individual's life, and every 8 police officer I talk to basically said that, that it's 9 not something that you ever want to be involved in. 10 Okay. And so that's a possible explanation, 11 0. even though you didn't ask --12 MR. MARTIN: Your Honor, I'm going to object. 13 That calls for speculation. 14 I'll move on, Judge. He's right. MR. MICHAELS: 15 16 BY MR. MICHAELS: 17 18 Q. Let me ask you this: Mr. Reeves says "But I've never had anybody jump 19 20 on my ass like that." 21 MR. MARTIN: Page and line, please? MR. MICHAELS: Line 35, same page. 22 MR. MARTIN: What page are you on there? 23 It's the printed-out transcript. MR. MICHAELS: 24 Let me get you a copy of it, if I may. 25

May I approach, Judge? I'll show Mr. Martin. 1 THE COURT: You may. 2 This way we can be, literally on MR. MICHAELS: 3 the same page. 4 BY MR. MICHAELS: 5 6 Q. All right, Doctor? 7 A. Okay. Okay. Now, I know I asked you before if that's 8 Q. how Mr. Reeves felt and, of course, you can't say that he 9 felt that, you know, he said this for that reason, but let 10 11 me ask you this: Would that sort of statement be consistent with 12 that sort of sentiment that you described regarding law 13 enforcement postshooting? 14 Yes, it would be. 15 Now, let's talk about the next line down which 16 Q. is starting on 35, "I've never had any" --17 What page are you on? 18 A. Same page 3. I'm sorry, 3, line 35. Do you see 19 the little number? There you go. Page 3, line 35. Okay. 20 21 All right. Mr. Reeves says "But I've never had anybody jump 22 on my ass like that." 23 Let's talk about that. Is that consistent with 24 the statements that he made to you during your interview? 25

Yes, it is. Α. 1 Tell us about that. What do you know factually 2 Q. about, "Never having anybody jump on my ass like that"? 3 Well, I asked him about that and he said in 27 4 years being a police officer he never had anybody get up 5 into his face like that, and he said it was frightening. 6 It was very frightening that somebody did that. He said, 7 "It totally took me by surprise." 8 Okay. Let's go to page 5 --9 Q. Excuse me, Mr. Michaels. 10 MR. MARTIN: Judge, would you like a copy of this transcript 11 so can you follow along? 12 MR. ESCOBAR: I think she's got one. 13 THE COURT: I did have one but it's in my 14 Sorry. If you've got an extra one, I'd 15 office. appreciate it. Thank you. 16 BY MR. MICHAELS: 17 Page 5, line 4, Mr. Reeves tells Detective 18 19 Proctor, "He kept on hollering. I'm not sure what he 20 said, to be honest with you." Do you have any kind of proof that you can point 21 to that Mr. Oulson kept on hollering? 22 No, I have no proof that he kept on hollering 23 except from what Mr. Reeves said. 24 And certainly the video does not have any sort

25

Q.

of audio. 1 Α. That's correct. 2 Is there anything that you see in the video that 3 0. may be indicative of somebody being angry and that sort of 4 behavior? 5 I see different movements from the row that Mr. Α. 6 Oulson was in. 7 Okay. Again, page -- line 5 and 6, same page, 8 0. "Not sure what he said, to be honest with you. 9 something, and that led me to believe he was going to kick 10 my ass." 11 Now, again, is that consistent with Mr. Reeves' 12 statement to you? 13 14 Α. Yes, it is. And the previous statement that we talked about 15 Q. in terms of he had never been in that situation before? 16 That's correct. 17 Α. Is there anything that you can point out in the 18 video that says, "Oh, that is where he's saying it"? 19

- Q. Is there is anywhere on the video that you can point and say, "Yeah, I see where Mr. Oulson is saying it"?
  - A. No, not where I can see it, no.

20

21

22

23

24

25

Α.

Yes.

Q. So, again, you're basing your belief on what

Mr. Reeves says? 1 2 A. What he says and the video. And the video which you talked about earlier 3 0. where you see that movement towards Mr. Reeves? 4 That's correct. 5 A. So looking briefly, line 7, "I know I can't get 6 Q. anywhere," so what evidence do you have or what backs up 7 8 that statement that Mr. Reeves is making to Detective Proctor? I sat in that chair in the theater, and I knew 10 it was extremely difficult to go anywhere. 11 Did you all observe or not observe the distance 12 Q. between Mr. Reeves' chair and the chair in the very front? 13 14 Yes, I did. A. Is that part of your analysis in determining 15 that that's a truthful statement and that could be backed 16 up with physical evidence? 17 Yes. 18 Α. And did you have any reason to disbelieve 19 Mr. Reeves on any of these statements? 20 No, I didn't. 21 Α.

Q. Now, Mr. Reeves says, "So I'm leaning all the way back in my chair." Again, is that something that we see on the video?

25 A. Yes.

22

23

Now, line 13 of the same page, Mr. Reeves says, 1 Q. "My left arm is out in front of me." Now, let's talk a 2 3 little bit about that. When you interviewed Mr. Reeves in Tampa the day 4 5 you came down to the movie theater, does Mr. Reeves tell you that same thing? 6 No, I really didn't ask him about that. Α. Did -- can you see that in the video at all? 8 0. Α. I do not see that in the video. Now, is that what a trained police officer would 10 0. do, put his hand down in front? 11 If -- the trained police officer would probably 12 Α. put his hand up to block whatever strike is coming in at 13 14 him. 15 If a police officer was in danger of great bodily harm or death, is a police officer going to put his 16 17 hand in front before he draws his pistol? MR. MARTIN: Judge, I'm going to object. 18 calls for speculation. We're talking about every 19 police officer. There are so many variables in the 20 situation. 21 BY MR. MICHAELS: 22 23 Q. In your training in your --MR. MARTIN: Judge, I have an objection. 24 I'm sorry. I was moving on. 25 MR. MICHAELS:

1 THE COURT: Sustained. 2 Rephrase. She sustained it, I thought. MR. MICHAELS: 3 THE COURT: Uh-huh. 4 BY MR. MICHAELS: 5 So in your vast experience of being trained and 6 training, is it your experience that police officers are 7 trained to put their hand in front of them if they're 8 about to discharge their firearm? 9 No -- well, no, it isn't. 10 Now, Mr. Reeves says, line 15, starting at the 11 Q. end of 14, "Suddenly my head was to the right, so he hit 12 me with something. I assumed it was his fist, but I don't 13 14 know." Did you -- could you see anything in the video 15 where you can identify a hundred percent sure that 16 Mr. Reeves is getting hit with something? 17 Not a hundred percent sure, no. 18 Now, what sort of evidence do you have, whether 19 it's interview, photographs, or other evidence, that 20 Mr. Reeves may have been hit with something other than a 21 fist? 22 23 Α. Yes. What evidence is it that you can point to that 24 0. 25 would suggest that?

- A. Two things: That there is a photograph of the cell phone between Mr. Reeves' feet. So we know that that cell phone ended up there, and in the video I saw an arm coming in. I saw a light. I don't know what that light was, but something happened at that point in time.
  - Q. Did Mr. Reeves also tell you same thing in your interview of him in Tampa when you came down to go to the movie theater?
    - A. Yes, he did.

Q. Line, starting at 16, "Something was wrong with my left eye. I had them wash it out for me, so he hit me with his fist or something. I think he had a cell phone in his hand because I saw the — I saw the — the blur of the screen."

Again, are we talking about evidence to back that up, the same sort of thing you just talked about, the photograph?

- A. That is correct.
- Q. Video?
  - A. Yes, that's correct.
- Q. Mr. Reeves' statement.
- 22 A. That's correct.
  - Q. Again, with the left hand, we already talked about that. "Hit me in the face, knocks my glasses sideways."

Do you see anything in the video or have any 1 evidence that his glasses were knocked sideways? 2 No, I don't. Just his statement. 3 Α. Okay. And, again, there are witnesses that 4 you've discounted because of contamination, so they're not 5 in this mix; is that fair to say? 6 That's correct. 7 Α. Page 6, line 5, Reeves says, "But, uh, and I, 8 and good heavens, I didn't mean to do that. That was 9 just -- I had to say that I've counseled cops for" --10 "Question: How many rounds did you shoot?" 11 "One. I guess you could say I was scared 12 shitless." 13 So did you question Mr. Reeves, specifically on 14 what he meant by the phrase at the end of that first 15 sentence, "I didn't mean to do that"? 16 I didn't ask him specifically that. 17 Α. Okay. Certainly the last part of it that seems 18 Q. to be a continuation of the sentence that he was scared 19 shitless, you talked to Mr. Reeves about that? 20 Yes, I did. 21 Α. And was that consistent with his statement to 22 Q. 23 you? 24 A. Yes, it was.

25

Q.

Was that also consistent with anything else that

you did? For instance, your theater visit, that someone would be scared?

MR. MARTIN: Your Honor, I object. That calls for speculation.

THE COURT: Sustained.

MR. MICHAELS: Well, Judge, I think --

MR. MARTIN: Judge, that calls for speculation.

If he's trying to equate that with Mr. Reeves or if someone else would be scared, there's too many variables.

MR. MICHAELS: Judge, he made an evaluation in this case, and he's going to formulate an opinion about whether the use of force here was justified. Certainly when we talk about whether or not someone is scared, we have to consider certain factors.

Obviously we can't cut their brain open and look at the scary part and see if that's been affected, but certainly we can say, Well, he's telling me this, I saw the video, I see this individual coming over on three occasions, and by sitting in the chair and seeing the close proximity I can understand why he's scared.

It is the same thing that any investigator would do and certainly an expert in formulating an opinion by putting himself in the place, I think he can

explain that and make a determination as to whether or not he used that fear in his formulation of his professional opinion.

THE COURT: All right. I will overrule.

MR. MICHAELS: Okay.

## BY MR. MICHAELS:

- Q. Anything else aside from Mr. Reeves telling you?
- A. No, just from what Mr. Reeves is telling me and what I see in the video.
  - Q. Okay. And what about being in the theater?
- A. Being in the theater. I sat in his position. I had the lights down. Mr. Escobar was interacting with me at that point, and I was trying to look at this in an objectively, reasonable way to understand what anybody with his background and experience would feel in that I have many of the same things that Mr. Reeves has; bad back, bad knees, bad elbows --

MR. MARTIN: Excuse me, Judge. I'm going to object to this line of questioning and the response.

He's saying, "I'm just like Mr. Reeves, so if I was scared, he's scared." I object to that. That's pure speculation. The way he's answering the question is pure speculation.

MR. MICHAELS: Judge, again, an expert can base their opinion on not only education, not only

provocation but certainly their own personal 1 experience, professional experience as well, so he's 2 just answering the question. I'll move on, but he 3 just answered the question. 4 THE COURT: I'm going to sustain as to that one. 5 6 Move on. 7 MR. MICHAELS: All right. BY MR. MICHAELS: 8 Now, Mr. Reeves tells you, line 13 of the same 9 Q. page, "As you get older, you find out you're a physical 10 11 wreck," right? 12 Α. That's correct. Did you look at any x-rays or radiology reports? 13 Q. I did not. 14 Α. 15 Can you even read those? Q. 16 Α. I can not. 17 Did you have any reason to believe Mr. Reeves in Q. that statement? 18 I just know that physiologically that when you 19 20 get older, things don't really work the way it was when 21 you were thirty years old, so, yeah, I have reason to 22 believe that could happen. 23 And as part of that, did you actually delve and look at your own personal experience? 24

Yes, I did.

Α.

Page 6, line 34 -- line 33, I will start there: 1 Q. "Proctor: I hear you. Did, um, your wife 2 where -- where was your wife at?" 3 "Reeves: She was sitting on the right-hand side 4 of -- if she's paying attention, and bless her heart, 5 she's -- you know, there's no justification for what 6 7 happened in there." And so did you ask Mr. Reeves specifically, 8 about that statement? No, I did not. 10 Α. Page 7, line 19. 11 Q. "Reeves: His wife was talking. Whoever was 12 with him was trying to hold him back." 13 Do you see any evidence of that in the video? 14 From what Mr. Reeves was saying is the -- really 15 the only thing that I see, that somebody was trying to 16 17 hold somebody back. What about any physical evidence in terms of 18 autopsy or other medical reports that you received? 19 What I did see in the autopsy is that where he 20 was shot in the chest, that Mrs. Oulson was also shot in 21 the hand -- in the left hand would be consistent with her 22 putting her hand up in front of his chest in the bullet 23 24 path. So, because you saw -- you actually -- did you 25

Q.

see photographs of Mrs. Oulson's hand?

A. Yes, I did.

Q. Line 22 -- page 7, line 25.

"I think when I leaned over and asked him to turn his cell phone off, he told me to get the "F" out of his face, so I knew right away that" —

What about that? Mr. Reeves is saying that he leaned over and asked Mr. Oulson. Does that -- what Mr. Reeves told you in his interview, is that consistent?

- A. Yes, it is.
- Q. Is there anything on the video that would indicate or make you think that that's a true statement?
  - A. Yes, there is.
    - Q. What is it that you observed on the video.
- A. I see him move forward in his seat three times.

  I don't know what he's doing at that time, but I see him

  moving in his seat, and it looks like he appears to go

  forward.
- Q. Is that the time period before he goes to the manager?
  - A. That's correct.
- Q. Page 7, line 34, Reeves says "It was enough for me to try to look for a way out, and my wife was saying when I got up to go tell the manager. He says, 'Why don't we' -- we should have just moved is what we should have

done, and she said that after the shooting, I think." 1 2 Did you ask Mr. Reeves specifically, about that statement? 3 I did ask him about that. 4 Α. And what did he tell you? 5 He basically told me that at that point he A. 6 believed that Mr. Oulson was just being mouthy and there 7 wasn't a problem. He was just going to go to the manager 8 and resolve it, come back in, sit down, and enjoy the 9 He thought that was it, so he didn't feel like he 10 really needed to move. 11 Reeves tells Proctor, page 88, that's page 10 as 12 it's printed, line 27: 13 "If I had thought that I wasn't going to get 14 beat up, it would have never happened. I was -- I was 15 pretty confident after being hit one time that he wasn't 16 17 going to stop." Again, is that consistent with your interview 18 19 with Mr. Reeves? Yes, it is. 20 Α. Did you see anything in the video to back up 21 22 that statement? Yes, I did. 23 Α.

I see in the video that arm appears -- arm and

What do you see?

24

25

Q.

Α.

part of the body coming in and that light coming across, and that's when Mr. Reeves said he was hit, at that point in time.

- Q. Okay. Then do you see a second time an arm coming across?
- A. In about eleven seconds later I see an arm coming across, and then that's when the popcorn comes out of his hand and then an arm comes back in a third time.
- Q. Page 10, line 35, Reeves says, "No, you got to know, the lady that was sitting one seat away from me, she should have seen everything."

Did you talk to Mr. Reeves about that?

- A. I didn't really ask him about that.
- Q. Okay. Now, there had been some suggestion that, you know, Mr. Reeves made this up because he's a law enforcement officer and had time to think.

Is there anything in that statement that would, in your opinion, would be indicative of just the opposite?

- A. He's pretty consistent with what he's saying in his statement and what I talked to him about, and as a law enforcement officer, once he was handcuffed and put in the car, he should have known at that time not to speak to anybody, at that time. That's what he should have done.
- Q. Does it seem here like he's trying to hopefully get the police to talk to somebody so they could verify

what he's telling them?

A. Yes. What he told me about talking, he said, "I wanted them to understand what happened," because he says, "I felt like I was the person being assaulted here. I wanted them to understand" --

MR. MARTIN: Excuse me, Judge. That's nonresponsive to the question. We're talking about whether or not he was suggesting to the police you go talk to this lady, and all of a sudden we have an answer that's out of the blue that's totally not responsive to that question. I don't know where it came from.

The question was about talking - going and talking to the lady, and then he never responded. I don't know what he's talking about.

MR. MICHAELS: He's in the middle of responding and he got cut off, so I'm not sure what the response was going to be.

MR. MARTIN: Well, the response would have kept going, was that he was sitting in the car and he shouldn't have spoke and that sort of thing, and it was nothing about going to talk to the lady, because -- not Mr. Knox, Mr. Knox; I apologize -- Dr. Hayden has already indicated he didn't talk to him about that.

Now he's asking him to speculate what he meant
by that, so it's speculation and it's nonresponsive.

That's my legal objection.

THE COURT: All right.

MR. MICHAELS: Part of the problem, there's been a suggestion here that Mr. Reeves fabricated this and has these, quote/unquote, self-serving statements, so since we are going to be talking about those, this is a statement that appears on the face of it — certainly the suggestion of it not to be self-serving at all: Go talk to somebody else, please, because they must have seen it, and everything is going to be all right if you talk to them.

THE COURT: Okay. I got that question, and

Mr. Martin is right. I don't recall hearing -- all I

recall hearing is that he didn't really ask him about

that statement, so let's move on.

MR. MICHAELS: All right.

## BY MR. MICHAELS:

- Q. Now, you didn't ask Mr. Reeves about that statement, but let me ask you: Would you consider such a statement in formulating your opinion in this particular matter?
  - A. The statement you're talking about --
  - Q. That Mr. Reeves made, where he's saying, you

know, "You've got to know the lady that was sitting one seat away from me. She should have seen everything."

Does that help you determine whether or not Mr. Reeves is being truthful in your interview with him?

A. Yes, it does.

- O. How is that?
- A. Because he wants the police to go talk to other people in there. Somebody should have seen what was going on. "They would be able to tell you what I'm saying is truthful."
- Q. Now, tell us regarding your training what's important if an adversary has a size advantage. Why are you looking at size?
- A. Well, size -- every police officer is trained to evaluate when they go into a situation. Size is a consideration; is that person a large person or a small person? You know, what is that person doing? You're evaluating everything, and size is one of those things you're going to evaluate.
- Q. Does that help an individual, a trained police officer make a determination in assessing the potential danger of the individual? Yes or no?
  - A. A police officer is going to do that, yes.
- Q. Now, in terms of age, again, assessment of danger and of threat, does an age difference play into

2/28/2017

that sort of assessment, in police training? 1 Absolutely. 2 Α. Tell us about that. Q. 3 If you're going up against a younger individual 4 Α. and you're an older police officer, you don't have the 5 skills that maybe you had when you were younger. 6 What about this: What if you're a younger 7 Q. police officer and you're going against a 8 seventy-year-old? 9 If you're a younger police officer going against 10 a seventy-year-old, you probably have an advantage. 11 Now, let's talk about confined space. 12 Q. described you went to the theater. You sat in the chair. 13 How does that play into the assessment of what a person is 14 able to do and a trained police officer not able to do in 15 terms of gauging what their -- the proper reaction is? 16 Well, when you're sitting in that seat, you're 17 Α. trying to figure out, at that point, is there a way to get 18 out of that seat? Is there a way that you could flee the 19 area and get out of it? 20 I didn't believe that there was any kind of a 21 way that he could have gotten out of that situation as it 22

occurred that fast.

You know that, why? 0.

23

24

25

I was sitting in that position. Α.

- Could you get out of the seat without coming 1 towards where the threat was coming from? 2 I could not. Α. 3 Could you go to the side somehow? 0. 4 I could not. 5 Α. Could you go back at all? 6 Ο. 7 Α. No, I could not. Language, use of language, how does that play 8 Q. into the whole idea of assessing what a threat is and what 9 the proper response of that threat is? 10 Police officers are taught from the very 11 Α. beginning: You have to assess a person by everything that 12 you're seeing; the body language, the actual physical 13 language, a person threatening you. What is that person 14 doing? You're assessing all of those things that are 15 16 going on. What about the idea of, you know, as far as your Q. 17 training and -- both training you received and training 18 you imparted to others, tell us about the idea of time and 19 place. In other words, because this was happening in a 20 movie theater, does that make a difference? 21 Α. Yes, it does. 22
  - Q. Why is that?

23

24

25

A. Well, you're dealing in a different environment.

It's a darkened area. It's loud noises. There's other

people in the theater. You're not able to gather all of the information by visual.

Q. What about the idea that this whole behavior is

- A. Absolutely. It's not characteristic of what
- Q. What about unexpected movements? For instance, a hypothetical:

An individual is sitting in a movie theater, he's a trained police officer, and now all of a sudden somebody in front of him or a little off to his right suddenly jumps up and starts cussing. Should that officer be alarmed and be on alert at that point?

A. He better be.

out of place in a movie theater?

would be happening.

- Q. And if that individual actually moves over now, does that make the threat even greater?
  - A. Yes, it does.
- Q. And if that police officer is confined to a small space, again, does that make the threat greater?
  - A. Yes, it does.
- Q. If that individual on the other side is actually moving over with hands or whatever, does that make the threat greater?
  - A. Yes, it does.
  - Q: Now, let's talk about hands and feet as weapons.

Are you aware that hands and fists are
weapons -- because it doesn't appear to be any feet
involved here; at least there are no allegations of
that -- tell me about what your experience is with hands
and fists. Have you seen hands and fists used as weapons
in your time in the military in Vietnam?

- A. Yes, I have.
- Q. What sort of damage could hands and fists cause?
- A. It can do great bodily harm to you. It can kill somebody.
  - Q. What about cut somebody open?
- 12 A. Yes.

- Q. So that they need stitches?
- 14 A. Yes.
  - Q. What about fracture of the eye socket?
- 16 A. Yes.
- Q. What about the little bone around the temple?
  - A. There's several bones in your face that can be broken very easily by being hit.
    - Q. In your experience as a special agent for the FBI and a supervisory special agent, have you also witnessed that in personal experience with injuries, serious injuries and even death caused by hands or fists?
      - A. Yes, I have.
- 25 Q. Just once or twice?

Several times. A.

2

Now, let's talk about objects to the head. Q.

us about the FBI policy regarding use of nonlethal force, fists, asps, batons if they're applied to the head and neck area? The one thing that's taught when you're doing

- defensive tactics and you're learning about use of force, deadly force, you have the head -- if you go to the head with any kind of a hard object, it could be your fist, it could be anything else, it's considered deadly force at that point in time.
- Okay. Now, in this case have you formulated an Q. opinion as to whether or not Curtis Reeves reasonably believed that his actions were necessary on that day in the theater to prevent imminent great bodily harm or death?
  - I have. Α.
  - What is your opinion? Q.
- My opinion is that he believed that there was going to be imminent harm or danger to him, great bodily harm or he could be killed, and I believe he honestly believed that, in what his perception was.

MR. MICHAELS: May I have a moment, Judge? This would be a good time for a THE COURT: break.

That would be good, Judge, because 1 MR. MARTIN: I need to set up my computer and get some technical 2 things done. Can we get 15 minutes? 3 THE COURT: All right. Let's take 15 minutes. 4 Dr. Hayden, you're free to take a break as well, 5 but you can't discuss your testimony with anyone at 6 this point. And here's your copy back. Thank you. 7 I got mine out of my office, of the transcript. 8 Thank you. 9 (Recess taken.) 10 CROSS-EXAMINATION 11 BY MR. MARTIN: 12 13 Q. Good morning. Good morning. 14 A. During the course of the conversation that you 15 Q. had with Mr. Michaels -- let me start over. 16 What I will try to do, I want to go through 17 certain topics with you. I'm going to jump around a 18 little bit, but what I plan to do is tell you when I 19 change from topic to topic so that you and I can talk 20 about the same thing. Fair enough? 21 Α. That's fine. 22 When you say, "You had a conversation with," 23 0. we're changing topics and moving on. All right? 24

25

You had a conversation with Mr. Michaels during

direct examination where you indicated that you were going through Mr. Reeves' statement that you saw, at least in your mind, in the video Mr. Oulson engage in certain conduct by turning in his seat or whatever he did. There was a lighted object. Do you remember that conversation? That's correct. All right. And you said that that is where 7 Q. Mr. Reeves says he was hit. Do you remember that?

- - That's correct. Α.

24

- All right. Then you had another conversation with Mr. Michaels dealing with reaching in towards Mr. Reeves. Do you remember that conversation?
  - That's correct. Α.
- All right. Now, Mr. Reeves told you that he Q. believed that he was hit with a fist?
- He said a fist. It could have been a fist. A. didn't necessarily know it was a fist or not, but he said it could have been.
- In fact, from his statement you know All right. that he said that he was hit with such force that he was Do you remember that in his statement? dazed.
  - Yes, I do. A.
  - You'll have to speak up just a little bit. Q.
  - I'm not close to -- I could get closer. A.
  - There you go. I appreciate that. Q.

1 A. Thank you.

- Q. He also indicated that when he was hit, that his glasses became askewed on his face. I know he didn't use the word "askewed," but they were not knocked off but they've become not adjusted correctly on his face. Do you remember that?
  - A. Yes, I do.
- Q. All right. You also indicated to Mr. Michaels that you took it upon yourself to discount the patrons' statements because, in your opinion, you believed they were contaminated, not worthy of your consideration, right?
  - A. Not quite in those words, no.
- Q. All right. You did not factor those into your opinion, correct?
  - A. That's correct.
- Q. All right. What you relied on, you relied on the statement of Mr. Reeves along with your perceptions of what occurred in the video, correct?
  - A. That's correct.
- Q. All right. Now, in making a determination as to what information you're going to use in order to form a basis of your opinion, you would want to make sure that that information is accurate, true, and correct?
  - A. That's correct.

- Q. You know as a law enforcement officer that an individual who is a suspect in a crime that's been taken into custody has the motive to not be quite truthful with the person conducting the interview, right? You've had that occasion?
  - A. It depends on the individual. I can't say.
  - Q. But it does happen, right?
  - A. I'm sure it does.
- Q. And you have to take into consideration whether, you know, it did or did not happen that an individual who's trying to explain a situation so that he can go home to his wife and children has a motive to either embellish or misdirect the officer in the attempt for that goal, "I want to go home." You have to take that into consideration, don't you?
- A. I try to take into consideration the facts of the case, what I read, and try to understand it from a reasonable standpoint.
- Q. That wasn't my question. I appreciate your answer.

My question to you was in determining the credibility of the information that you received, you have to take into consideration that a person who is -- who's arrested has a motive to lie, right?

A. I take a lot of things into consideration and

being not truthful might be one of those things, is he truthful or not, and I don't know.

Q. You don't know that?

- A. I don't know until I go through the facts of the case.
- Q. Now, Dr. Hayden, you've come in here and you told us that you're an experienced federal agent. You've been to numerous places. Are you telling me that it's your life experience that individuals who have been arrested don't have a motive to lie?
- A. Not always. I don't know what branch you're looking at, but in my experience some people that come in are very honest with you. Some people are not telling you the truth. Some people are way out in left field someplace.
- Q. All right. Now, having said that, my question to you in determining the credibility of Mr. Reeves, you had to take into consideration whether or not he was being truthful to you. Based on your life experience some people lie and some people don't when they're in custody, right?
  - A. Yes.
- Q. All right. And you indicated that you determined the credibility of Mr. Reeves by watching the video and going to Cobb Theater and making a determination

of certain facts that he said. We're going to go into the 1 facts, but very generally that's what you did, right? 2 3 Α. Yes. Objection. That wasn't what the MR. MICHAELS: 4 testimony was, Your Honor. That's an improper 5 characterization of the testimony. The testimony 6 7 was --Excuse me. He just said yes, it 8 MR. MARTIN: Now he's trying to explain the answer of his 9 witness? 10 Hold on. One at a time. THE COURT: 11 MR. MICHAELS: Judge, I didn't yell over the 12 prosecutor and I don't expect him to yell over me. 13 But what we have is Mr. Escobar and MR. MARTIN: 14 Mr. Michaels constantly interrupting so that they're 15 teaching their witness what to say. That's been 16 going on for days and days. 17 I will object. MR. ESCOBAR: Objection. 18 THE COURT: Hold it. Stop. 19 MR. MARTIN: He's teaching witnesses. 20 THE COURT: Do you this think this poor young 21 lady is a magician? One at a time, gentlemen. You 22 know the rules. 23 Thank you, Judge. MR. MICHAELS: 24 THE COURT: Mr. Michaels, you start. 25

MR. MICHAELS: I appreciate that.

My objection is it is improper characterization of prior testimony. I think that the Court has notes, and my recollection is the prior testimony was not that Dr. Hayden relied solely on the evidence that he saw. He relied on his personal experience.

There are a lot of things he relied on to make his determination as to whether Mr. Reeves is telling the truth, not only what he saw in the video, so I think it's improper characterization of what his testimony was.

So, you know, if the question is to tell the prosecutor what it is that he considered, if he has any specific questions regarding specific areas of what Mr. -- of what Dr. Hayden used in his examination of the interview that he did with Mr. Reeves, then I think that's fair, but characterizing it as, you know, strictly going by the video, I don't think that is -- that's not accurate.

THE COURT: Response?

MR. MARTIN: Judge, my question was: You used the content of the video and your experience at Cobb Theater in order to corroborate Mr. Reeves. That's what I said. And he said, "Yes," because that is true, because do you remember the questions: "I sat

in the seat. I couldn't get up. I couldn't move to the left or right," and he said, "Yes."

THE COURT: All right. I'll overrule. You can redirect if you wish, and I'm taking notes, so go ahead.

MR. MICHAELS: I know you are, Judge.

THE COURT: Go ahead, Mr. Martin.

MR. MARTIN: May I have just a moment, Judge?

THE COURT: Uh-huh.

## BY MR. MARTIN:

- Q. My question to you, Dr. Hayden, was in determining the credibility of Mr. Reeves you relied on your interpretation of the content of the video and your experience at Cobb Theater when you went in there with Mr. Escobar, correct?
- A. I said I relied on a lot of things, not only being in the theater but talking to Mr. Reeves, to interacting and looking at the video, a lot of things.
  - Q. Those were two of the things; was it not?
  - A. It was two of the things, yes.
  - Q. Okay. Thank you.

Determining the credibility of Mr. Reeves is very important to you as an individual who's going to come in and opine whether or not his conduct was reasonable in our particular circumstances, right?

Not just what he says but a lot of things, 1 2 whether it's reasonable or not. I appreciate that, Dr. Hayden. My question to 3 you was in determining the -- determining the credibility 4 of Mr. Reeves is very important to you. 5 It's one of the factors. 6 The credibility of Mr. Reeves is very important 7 Q. to you if you're going to rely on his statements to you as 8 one of the bases of formulating your opinion? 9 If it was the only thing, it would be very 10 heavy, but if it's not the only thing, then it's not, 11 This is a consideration. 12 I'm going to ask that question one more time. 13 Now, please allow me to do that. 14 MR. MICHAELS: Judge, (indiscernible) asked and 15 16 answered. MR. MARTIN: No. No. No. 17 THE COURT: Overruled. 18 19 BY MR. MARTIN: Determining the credibility of Mr. Reeves is 20 0. very important to you as one of the factors that you're 21 going to use in formulating your opinion; is it not? 22 23 A It's a factor, yes. In your discussions with Mr. Michael you 24 Q. indicated that you wanted to sit down and speak about

Mr. Reeves and ask him the "why" questions, how he was feeling, his perceptions. Do you remember that line of questioning?

A. That's correct. I do.

- Q. Do you remember the line of questioning when he was going through the statement of Mr. Reeves to law enforcement and what he said to you? He kept asking you: "Is that consistent with what he told you?" Do you remember responding that way?
  - A. I do remember that, yes.
- Q. The conversation continues between you and Mr. Michaels regarding, "You can't really look into someone's head," and as Mr. Michaels indicated, you can't look at that scary part in the head and determine it was activated. Do you remember that conversation?
  - A. I remember that conversation.
- Q. And that's true. When someone's telling you what they felt or what they perceived, first of all, you have to take what they say at face value and then try to corroborate it, right?
  - A. You do, yes.
- Q. But feelings and perceptions very difficult to corroborate; are they not, if not impossible?
- A. I wouldn't say impossible. They -- you have to look at all of the different factors, and then you would

be able to give an opinion on that, yes.

- Q. As to whether or not someone is afraid?
- A. Yes.

- Q. Of what their intent was?
- A. Yes
- Q. What their motive was? You can do that by talking to someone?
- A. I'm not saying I can do that. I am saying that's a factor that you have to look at in trying to understand fear. If you look at fear, you try to understand why fear occurs and what happens to the individual.
- Q. I understand that, but we're talking about Mr. Reeves, and your final opinion you said that he honestly believed that it was necessary to shoot Mr. Oulson. I know that's not your exact words, but that's the bottom line of your testimony, right?
  - A. That's correct.
- Q. All right. And that's what I'm trying to go into is the underlying factors that led you to that conclusion, and what I'm asking you is, or discussing with you is when we talk about someone relating their perceptions as far as feelings and state of mind and emotions. You first have to take their words at face value and then see if there's any facts to back it up,

1 right?

Δ

- A. Well, I don't take their words at face value, but I do try to back it up with other things that might be there.
- Q. And you don't take it at face value, especially with someone who's been arrested and may have the motive to embellish or lie about what took place in order to achieve a self-serving goal, right?
- A. I don't know what their emotion -- the emotion is at that time. What I'm trying to do is I'm trying to understand, so I try to look at everything in a reasonable fashion in trying to understand without -- with being objective about it.
- Q. Did you understand my question? I don't mean to be argumentative --
- A. I guess I didn't, because I think I'm answering your question.
- Q. In determining the credibility of information provided by an individual that cannot be corroborated, one of the things that you can look at is verifying whether or not those things that can be corroborated were, in fact, true. That's one way to determine: Are you going to believe what we can't corroborate if he was truthful about other things, right?
  - A. That's part of it, yes.

Just the

All right. As a very simple example, a suspect 1 says, "I was hit and, therefore, I had to engage in 2 conduct A." Would you determine that that person wasn't 3 hit? 4 You take that into consideration as to whether 5 or not his conduct A, was, in fact, reasonable since he 6 That's the analysis that you go through, 7 wasn't hit. right? 8 That's part of the analysis that you go through, trying to look at all the facts and trying to balance it 10 11 out. But that is one of them? 12 Ο. 13 Α. That's basically one, yes. And in this particular case if it was shown that 14 a cell phone was not thrown at Mr. Reeves and he was not 15 hit with a cell phone and he was not hit with a fist, your 16 opinion in this case would be different, wouldn't it? 17 If it could be factually documented that that 18 did not happen, then my opinion might change. I'd have to 19 look at the rest of the situation. 20 How might it change? 21 0. It depends on everything else that occurred. 22 A. There would be no escalating of violence, would 23 Q. there? 24

25

Α.

I don't know if there would be or not.

punch that you're saying is not the only one factor. 1 There are several different factors that you have to look 2 at. 3 But it sure would call it into question, your 4 Q. 5 opinion, wouldn't it? What you're looking at is perception. What does 6 he actually believe? So would it affect my opinion? 7 Dr. Hayden, did you understand my question? 8 0. I just -- Mr. Martin, I did understand your 9 A. 10 question. Well, my question was --11 Q. THE COURT: One at a time, please. 12 BY MR. MARTIN: 13 My question to you was, in the event that it was 14 0. shown that Mr. Reeves was not hit with a fist or the cell 15 phone was not thrown, then that would definitely call into 16 question your opinion; yes or no? Then you can explain 17 18 it, but first yes or no. There's -- not everything is an easy yes or no. 19 Α. You can explain it. Yes or no? 20 Q. 21 Α. When --MR. MARTIN: Judge, I'm asking the Court to 22 instruct the witness to answer the question. 23 explain it all he wants, but I want a simple one-word 24 answer to that question, and I'm entitled to that. 25

He can explain it later.

THE COURT: All right. With the ability to explain, you can answer.

## BY MR. MARTIN:

- Q. Yes or no?
- A. Just ask the question again, please.
- Q. If it was shown that the cell phone was not thrown at Mr. Reeves and he was hit in the head with it to the extent that he was dazed or that he was hit with a fist in his face to the extent that he was dazed, if those things were shown not to happen, it would seriously call into question your opinion in this case; yes or no?
- A. When you put one word there, I would have to say no.
- Q. Okay. Why is it "No" when those things no longer exist?
- A. Because you're saying seriously consider it's a factor because you're looking at the perception of what he believes at that time. Does he believe he got actually hit in the head or not? So it's perception at that time. It might not be exactly what happened, but it's a perception.
- Q. So you're telling me that perception, getting hit in the head with a fist, if it didn't occur, you could perceive that pain? Is that what you're telling this

1 | Court?

- A. I'm not telling the Court that at all.
- Q. Well, that's what you said, is it is perception as to whether or not he was hit or not. So you're telling me that you could perceive pain and that's a viable mental state that, "I was hit in the head," justifying shooting somebody?
  - A. I did not say that.
- Q. You're either hit or you weren't. There's no perception about it, correct?
- A. Yes, there is a perception. Perception a lot of times depends on what's going on in your mind, what you believe. If you believe you're being attacked, there is people that believe they've been hit. I don't know at that time. I'd have to look at everything else, not just one factor.

MR. MARTIN: Defense Exhibit -- is this yours,
Madam Clerk up here?

THE CLERK: The blue one?

### BY MR. MARTIN:

Q. Defense Exhibit 27, the picture's been passed around. Many people have looked at it.

One of the things that you would consider is whether or not there's any injuries about the face of Mr. Reeves consistent with a punch to the face or being hit

with a cell phone. That's one thing that you would 1 consider, right? 2 If I saw damage, yes, it would be one thing that 3 would be another consideration. 4 And you don't see any damage there, do you? 5 I'm not a doctor, but looking at this, I don't 6 7 see any damage, no. You went through several of these statements of 8 0. Mr. Reeves and said, "Yes, I looked at the video and I saw 9 that," or, "I didn't see that." Do you remember that line 10 11 of questioning? (No response.) 12 Α. Where you went through with Mr. Michaels? 13 Q. Yes. 14 A. And do you remember the discussion with 15 Q. Mr. Michaels where it was asked whether or not when 16 Mr. Reeves was stretched fully out, he had his left hand 17 extended, there was a discussion about that's what 18 somebody would do if they're trying to ward off an 19 20 attacker. Do you remember that? 21 **A** . Yes. And you said you looked at the video? 22 0. 23 A. That's correct.

And you saw that?

I did not see that.

24

25

Q.

Α.

25

the seat and you said you saw a light. Do you remember

1 that? That's correct. 2 Α. And you indicated that that's where Mr. Reeves 3 believes he was hit, right? 4 That's correct. 5 Α. Some eleven seconds before the shooting I 6 Ο. 7 believe was your testimony? That's correct. 8 A. And in looking in that video at that particular 9 time after you see what you said was Mr. Oulson with some 10 type of body part extended over the seat, immediately 11 after that you see Mr. Reeves lean forward towards 12 13 Mr. Oulson, correct? That's correct. 14 Α... You did not see Mr. Reeves in that video grab 15 0. his face like he'd just been hit with a fast pitch from a 16 baseball, right? 17 I didn't see that in that video, no. 18 In fact, when you said you see that light and 19 that's where Mr. Reeves said he was hit, after he leaned 20 forward he then leaned back and settled back into his 21 seat; did he not? 22

A. He moved back into his seat, yes.

23

24

25

Q. He didn't get up and go attempt to get any medical attention, right? He didn't stand up at that

1 | point?

- A. At that point in time, I don't believe he wanted to stand up because he thought it would put him in more danger.
- Q. As you mentioned after looking at that photograph, you didn't see any injuries on his face, right?
  - A. I didn't see any injuries, no.
- Q. And those are the type of things that the tryer of fact can look at in determining the credibility of Mr. Reeves as far as his statement, correct?
  - A. That's part of the factors, yes.
- Q: And the reason it's important is because

  Mr. Reeves is describing conduct that we cannot see in the

  video, right?
  - A. That's correct.
- Q. So in order to believe Mr. Reeves' statement about what we cannot see, it would be very helpful for us to believe what we can see; would you not agree?
- A. That's just a factor. You're putting it all together.
- Q. Now, we've gone through several items where Mr. Reeves has made a statement to law enforcement about what occurred that we do not see in the video. Do you remember that? We just had that conversation, right?

A. That's correct.

...

.

Q. Some of those statements that we cannot see in the video, and I'm going to point out two of them, all right, that would be a factor in considering whether or not his actions were reasonable, and I'm going to go through the first one and then the second one.

The first one is when he said he had his hand out and he was touching Mr. Oulson's chest or shoulder, "And he was virtually on top of me," and he shot him, right? That's what he told law enforcement, right?

- A. Yes.
- Q. Well, that's not what happened in the video, was it?
  - A. That's not what happened, no.
- Q. But that particular statement is very weighty as to the close proximity of Mr. Oulson and what Mr. Oulson was doing and how imminent the threat was, correct?
- A. So many other things to take into consideration, not just what you see.
- Q. I'm asking you a specific question, Dr. Hayden. That particular statement to law enforcement about Mr. Reeves being so close that he can reach out his hand and either touch his shoulder or his chest, and he was stretched out and he had to shoot Mr. Oulson in that location, that is some very weighty evidence about whether

or not his actions were reasonable because the threat is 1 very imminent if it's in his lap, his shoulder, hand on 2 his shoulder. He's got to shoot while he's straightened 3 out, right? 4 No, it isn't. 5 Α. No, it's not? 6 Q. That's correct. 7 A. If you saw that in the video, would we even be 8 Q. in the courtroom here today? I don't know what you would do if you brought it 10 in the courtroom or not, but there are so many other 11 factors that you don't want to include in this that are 12 essential that you include. 13 Well, right now I get to ask you questions and 14 you get to answer them. Okay? 15 16 Α. Sure. And if someone else wants to talk to you about 17 them, I'm sure they will, but please answer my questions. 18 MR. MICHAELS: Judge, could you please instruct 19 the prosecutor not to admonish the witness? He's 20 been asking question after question, but it's 21 improper for him to lecture the witness on answering 22 a question or not answering the question. 23 MR. MARTIN: Not when Mr. Hayden has been as 24

25

nonresponsive that he's been for the last twenty

minutes to my question. 1 THE COURT: All right. 2 MR. MICHAELS: That's the Court's job, Your 3 Honor. 4 THE COURT: Let's just move on. I'll do the 5 directing of it. Thank you. 6 BY MR. MARTIN: 7 In fact, Mr. Reeves in that segment about his 8 Q. hand being forward, wanted to so convince Detective 9 Proctor that that was true that he explained, as a police 10 officer, "We never put our hand in front of the muzzle, 11 and I thought I could have shot my hand." 12 13 Do you remember that? I do remember that. 14 **A**: Another attempt by Mr. Reeves to get Detective 15 Q. Proctor to believe -- to believe how imminent that threat 16 was, but that's not what we see on the video, is it? 17 That's not what you see in the video, no. 18 A. May I have a moment, Judge? MR. MARTIN: 19 THE COURT: Yes. 20 MR. MARTIN: Thank you for the time, Judge. 21 THE COURT: Uh-huh. 22 MR. MARTIN: I don't have any further questions. 23 THE COURT: Thank you, Mr. Martin. 24 Redirect? 25

MR. MICHAELS: Thank you, Judge. 1 MR. MARTIN: Thank you, Mr. Michaels. 2 REDIRECT EXAMINATION 3 BY MR. MICHAELS: 4 Now, I know the prosecutor talked to you a 5 little bit about what you didn't see. You definitely saw 6 Mr. Oulson coming over the aisle and a lighted object 7 appear to be moving in some fashion, right? 8 Yes, sir. 9 A. MR. MARTIN: Your Honor, I object. That wasn't 10 his testimony during direct. He just saw a lighted 11 object. Otherwise I would have gone into it a lot 12 more if he said anything different. 13 THE COURT: Rephrase. 14 MR. MICHAELS: Okay. 15 BY MR. MICHAELS: 16 One of the things that you saw definitely on 17 0. that video is Mr. Oulson and what appears to be his hand, 18 arm and body -- right? 19 That's correct. A. 20 -- reaching over his row towards Mr. Reeves? 21 0. That's correct. 22 A. And there is some appearance of something 23 lighted or a light area in the video coincidentally at 24 that same time? 25

That's correct. 1 You saw crime scene photos and you noticed a 2 Q. phone, a hundred percent you saw between Mr. Reeves' feet? 3 I did. A. 4 You are aware of DNA evidence in this case? 5 6 got a report to review? 7 Α. Yes. And in terms of the outside case of the phone, 8 could the FDLE, could they exclude Mr. Reeves as a 9 possible contributor to DNA on that phone? 10 MR. MARTIN: Your Honor, I object. 11 MR. ESCOBAR: (Indiscernible). 12 No. No. No. MR. MARTIN: No. 13 MR. ESCOBAR: Yes, they have. 14 MR. MARTIN: No, we need to approach. 15 (Sidebar conference was held at the bench.) 16 THE COURT: State, before argument I will let 17 you refresh your memory about the stipulation. 18 The question by Mr. Michaels was MR. MARTIN: 19 after reviewing the DNA report, Mr. Reeves could not 20 21 be excluded from a particular area on the DNA. That's not what it says. There was one area where 22 it's uninterpretable. That doesn't mean he could be 23 That means it's uninterpretable. excluded. 24 Where we do have the DNA, we have Chad Oulson 25

being included and Mr. Reeves being excluded. 1 just because it's uninterpretable doesn't mean that 2 he was excluded. So that's why I brought it up. 3 That's not what the stipulation says. 4 MR. MICHAELS: Judge, that's --5 MR. ESCOBAR: That's exactly what it says. 6 definitely found a mixture of three individuals. 7 That's without question. That's without question. 8 They found a mixture of DNA by three individuals. 9 They could not exclude anybody from it because it was 10

It's not like they found, "Oh, you know, it's three individuals --

not interpretable, but that's what they found.

THE COURT: Well --

MR. ESCOBAR: No, no. That's different. Look at the screen. No, no. Judge, that's different.

Look, let me -- because he had the same problem initially --

MR. MARTIN: No, there are two individuals. One is on outterbox and one on the screen. There are two different areas --

MR. ESCOBAR: So if you look at -- I'll give you the first paragraph. The first paragraph right here says a P13 black case. Okay. That black case also has a screen, a clear screen. So in the black case

they found the mixture, okay, of at least three 1 individuals, not that this is just found, a mixture 2 and they couldn't tell how many individuals. It was 3 a mixture of three individuals, and they couldn't 4 exclude Mr. Reeves because it was not interpretable. 5 Now, if you look -- Mr. Martin, would you please 6 7 have the courtesy --MR. MARTIN: I didn't say a word. 8 THE COURT: No, no. 9 Then if you look at Number 4, you MR. ESCOBAR: 10 will see that it says Exhibit AP13 screen -- get the 11 phone, so we can see. 12 I got it. I got it. I got it. 13 THE COURT: This is --14 MR. ESCOBAR: So that was -- and listen, this is 15 the same problem. He'll tell you that when he first 16 read the report, he didn't read it that way when we 17 came back, and I said, "No, look," this is what it 18 19 says." We drafted the stipulation, so I know the 20 stipulation like the back of my hand. 21 MR. MARTIN: Well, I know it, too, and that's 22 exactly word-for-word from the DNA. 23 That doesn't mean he was not 24 uninterpretable.

25

excluded? That's not the way it's reported out, and

you can't follow that conclusion. 1 MR. ESCOBAR: Could not be excluded, could not, 2 could not. It's not interpretable. 3 MR. MARTIN: No. 4 THE COURT: All right. I'm the trier of fact 5 here. I get it. We're -- I'm going to allow the 6 7 question. MR. ESCOBAR: Judge, it's important. So the 8 Court knows, I'm just trying to be -- (indiscernible) 9 three individuals were found, the DNA of three 10 individuals. 11 (End sidebar conference.) 12 BY MR. MICHAELS: 13 So you're able to look at the DNA report 14 15 provided to you by us, those that were provided to us by 16 the State. That's correct. 17 Α. And in terms of the case, what is the long and 18 the short of it? What conclusions did you get, in terms 19 20 of the outer part of the case, as it relates to Mr. 21 Reeves? What I understood --22 Α. 23 MR. MARTIN: Judge, I'm going to object to that How he interpreted the report is not 24 question. If he wants to read the report word for 25 relevant.

word, but his interpretation -- he is not a DNA
expert. He hasn't been qualified for that. He
doesn't know how to make those interpretations.

MR. ESCOBAR: Could we just read the stipulation? It's as simple as that. I don't have a problem with that.

THE COURT: You either have to lay a foundation or --

MR. MICHAELS: The Court read the stipulation in. In terms of the case, due to the limited nature of the DNA results obtained from the iPhone's black case screen, the data is insufficient for inclusion purposes, but may be suitable for inclusion.

I'm sorry. I read it out of order.

Number 1: The DNA obtained from the iPhone black case, AP13, black case, demonstrated the presence of a mixture of at least three individuals. Due to the complexity of the mixture obtained from the iPhone black case, Exhibit AP13 case, this data was not interpretable.

Paragraph 2: Due to the limited nature of the DNA results obtained from the iPhone's black case screen, Exhibit AP13, screen, this data is insufficient for inclusion purposes and may be suitable for exclusion.

Due to the limited nature of the results 1 obtained, Chad Oulson could be neither included nor 2 excluded as a contributor to the iPhone's black case 3 screen. 4 Curtis Reeves, Exhibit AP13 screen, is excluded 5 as a source of the limited DNA source obtained from 6 the iPhone black case screen. 7 BY MR. MICHAELS: Now, there was a phone in the video where we 9 can't see -- you see movement about eleven, twelve seconds 10 11 later, correct? That's, correct? 12 A. By Mr. Oulson towards Mr. Reeves? 13  $Q_{\alpha}$ That's correct. Α. 14 You see Mr. Oulson's hand come out? 15 Q. On the second occasion or the first one? 16 Α. 17 Q. The second. The second occasion, yes, I do. 18 Α. We are already past the first one. You see the 19 Q. hand go back? 20 21 Α. Yes, I do. The hand come back out? 22 0. That's correct. 23 A.

That's correct.

24

25

Q.

Α.

In between there's popcorn grabbed?

Α.

No.

Q. Did Mr. Reeves at any time tell you that Mr. Oulson told him or indicated in any fashion that, "Hey, Mr. Reeves, I'm going to take your popcorn"?

reasonable at that point? What are you looking at?

Q. So in terms of perception at that point, what is an individual seated in the seat in that sort of theater and that sort of setting, what sort of perception is

MR. MARTIN: Your Honor, I'm going to object at that point as far as his expertise as far as determining that particular question, you know, what is reasonable or not reasonable, sitting in that location.

He's already rendered his opinion. He believes
Mr. Reeves was honest in his belief that he had to
shoot Mr. Oulson. Now, whether or not Mr. -- I
apologize -- Dr. Hayden, you know, now we come in and
we do this reconstruction that we heard about that's
kind of interesting, he can't answer that question.

MR. MICHAELS: Judge, I'm going to object to those gratuitous comments, number one. I appreciate that the prosecutor finds it interesting. I only wish that the police found it interesting enough to try it themselves before they even arrested Mr. Reeves, but that's another matter.

Nonetheless, Your Honor, I'm just asking what 1 the perspective was in terms of what's reasonable for 2 an individual in that particular environment to 3 perceive. In other words, is that person perceiving 4 that the individual who's been cussing and had come 5 over the aisle before is now going to grab the 6 popcorn, or is it reasonable to perceive it as a 7 threat? 8 9

THE COURT: I will overrule.

- Is it reasonable to perceive that motion that we 0. see twelve seconds later after the first throwing motion as a threat?
  - Yes, absolutely. Α.
- And as the hand comes back and goes forward again, would it be reasonable to perceive that particular second motion as a second threat?
  - Α. Absolutely.
- Or a continuing threat? 19 Ο.
  - Α. Yes.
  - All right. This is Exhibit 27. I know the Q. prosecutor showed it to you. You looked at it.
  - I know you're not a doctor, but do you agree or disagree with me when you look at what would be Mr. Reeves' left eyelid --

Judge, I'm going to object. MR. MARTIN: 1 mean, I don't care about agree or disagree. 2 When you're pointing at something, he's already 3 looked at the picture and said, "I saw nothing." 4 Now, if that's not totally suggesting the answer, I 5 don't know what is. When you point at a red mark and 6 say, "Would you agree or disagree," when he already 7 had an opportunity -- fair opportunity to look at the 8 picture, that's absolutely leading. 9 MR. MICHAELS: Judge, I'm not leading. 10 indicating the area that I want to draw his attention 11 12 to. THE COURT: All right. I've been sitting 13 here --14 MR. ESCOBAR: Judge, I don't want to interject, 15 but he said "damage" in the question to Mr. Hayden. 16 He did not say anything. He said "damage," and the 17 use of the word is very important. 18 THE COURT: All right. 19 MR. MICHAELS: At any rate --20 THE COURT: I'm sure it is. 21 I heard the prior testimony. I get it. I 22 figured this was coming. 23 I think it's absolutely leading to some extent, 24 but then again, I guess you're entitled to direct him 25

to certain areas of the photographs, so... 1 BY MR. MICHAELS: 2 Well, let's look at this photograph, Exhibit 27, 3 0. okay. Now, look closely. Take your time, please. I know 4 you're not a doctor. 5 Direct first your attention, if you would, to 6 the right eyelid, and then work yourself across the face 7 to what would be Mr. Reeves' left eyelid and your right. 8 9 Okay? Okay. 10 A. All right. Can you see this all right? 11 Q. Yes, I can. 12 Α. All right. Do you see anything that appears to 13 Q. be any redness on either eyelid? 14 He said --Α. 15 MR. MARTIN: Give me a break. 16 THE WITNESS: Yes, I do. I see the redness on 17 18 his left eye. 19 BY MR. MICHAELS: Okay. And would that be consistent with 20 somebody getting hit in the eye? 21 MR. MARTIN: Judge, that calls for speculation. 22 MR. MICHAELS: Well, Judge, the prosecutor asked 23 24 the question. THE COURT: I will allow it. 25

# BY MR. MICHAELS: 1 Is that consistent? 2 0. It would be consistent with him having his eye 3 Α. affected somehow. 4 It would be consistent with having his glasses 5 6 knocked to the side? 7 Α. Yes, it would be. Now, as a special agent in training police 8 Q. officers, are there certain techniques and interrogation 9 techniques on a suspect or a subject that is willing to 10 talk, that you use to try to get information out of? 11 12 Α. Yes. And is that -- are those technique used to try 13 to ferret out the truth the best that you can? 14 It's called cognitive interviewing techniques. 15 It is to get to the facts of what actually happened, what 16 he believes happened, not to trip anybody up, to try to 17 get as many facts as you can. 18 And in terms of as a police officer, are you 19 aware that individuals that are arrested have the right, 20 21 absolutely, not to speak to you? 22 A. Absolutely. MR. MICHAELS: May I have a moment, Judge? 23 THE COURT: Uh-huh. 24 That's all I have. Thank you. MR. MICHAELS: 25

THE COURT: May this witness be released? 1 MR. ESCOBAR: We're going keep him under 2 subpoena but most probably will not have to recall 3 him. 4 THE COURT: All right. 5 MR. MICHAELS: He can go back to Virginia for 6 7 now. THE COURT: He'll be on standby. Dr. Hayden, 8 you are free to go today. You will still be under 9 subpoena, but hopefully they won't be calling you 10 If someone does have to call you back, I'm 11 certain they'll give you plenty of advanced notice. 12 Thank you, sir. 13 Thank you very much, Judge. THE WITNESS: 14 THE COURT: All right. 11:20. 15 MR. ESCOBAR: I think it's early lunch. 16 last thing I want to do is break up my presentation 17 of Mr. Reeves, so we will have to take lunch sooner 18 or later. 19 THE COURT: I will give you that option. It is 20 a pretty early lunch, but if obviously -- I'm 21 quessing we will not finish Mr. Reeves tomorrow 22 before 12:00. 23 I think that's -- especially with MR. ESCOBAR: 24 me doing the questioning, I would think not.
